NEWARK ELECTRONICS

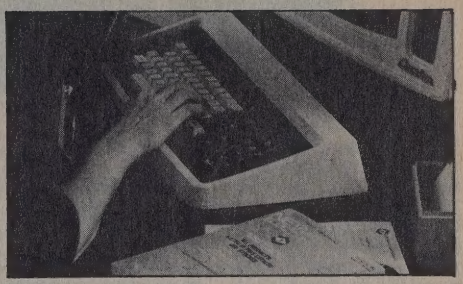
"Where serving you begins even before you call"

Newark Electronics is a UNIQUE broadline distributor of electronic components, dedicated to providing complete service, fast delivery and in-depth inventory. Our main warehouse and numerous branch warehouses make immediately available a multi-million dollar inventory of electronic components and equipment. Thousands of items are stocked from **200 manufacturers** in quantity. This means you get off-the-shelf deliveries of leading brand-name products promptly and efficiently from Newark's broadline inventory.

With more than **130 BRANCHES,** Newark offers Local Branch Services in **42 states** to Industrial Customers.

Refer to the following page for Branch Addresses and Telephone Numbers.



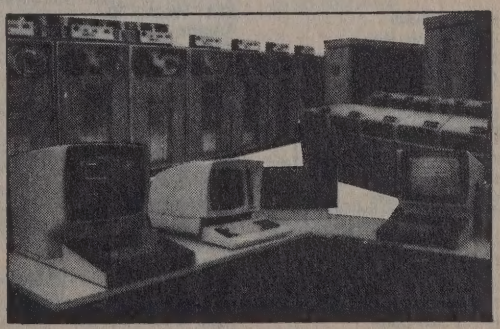
NEWARK'S ON-LINE SYSTEM

Provides you and your Newark Sales Person with immediate access to:

- **STOCK STATUS**
- **RESALE PRICES**
- **LEAD TIMES**
- **FAST ORDER ENTRY**

To Make Your Job Easier

SERVICE — Starts with having what you want In Stock when you want it! Take advantage of Newark's Broadline, in-depth inventory.



This system spans the nation and maintains perpetual inventory balances on **THOUSANDS OF ELECTRONIC COMPONENT PARTS** for fast response to customer inquiries.

A DIVISION OF PREMIER INDUSTRIAL CORP.

Newark—your local broad line distributor has a location near you to provide in-depth, one stop shopping service for everything you need. See pages 789-797 for a complete product listing.

IT'S CONVENIENT AND PLEASANT TO DO BUSINESS WITH

Wherever you are located, Newark can provide fast, efficient service for your electronic component requirements. A list of facilities is on pages two and three.

PRICES

CATALOG PRICES ARE NET, F.O.B. SHIPPING POINT. THEY ARE SUBJECT TO CHANGE WITHOUT NOTICE. ORDERS ARE FILLED AT THE PRICES IN EFFECT AT THE DATE OF SHIPMENT AND THESE PRICES MAY VARY FROM THOSE SHOWN HEREIN, DEPENDING UPON THE PRICE CHANGES. FOR UP TO THE MINUTE PRICES AND FOR PRICES ON QUANTITIES IN EXCESS OF THOSE SHOWN, CONTACT THE NEWARK BRANCH NEAREST YOU. PRICES DO NOT INCLUDE ANY FEDERAL, STATE OR LOCAL TAXES.

WARRANTY AND DISCLAIMER

SINCE THE SELLER, NEWARK ELECTRONICS, DOES NOT CONTROL THE USE OF ITS PRODUCTS, THERE ARE NO EXPRESS WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION CONTAINED HEREIN. SELLER DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE. SINCE SELLER CANNOT CONTROL THE MANNER OR USE OF ITS PRODUCTS AFTER THEIR SALE, SELLER WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INDIRECT DAMAGES. SINCE SELLER IS ONLY ACTING AS A DISTRIBUTOR OF PRODUCTS MANUFACTURED BY OTHER COMPANIES, SELLER EXPRESSLY LIMITS ITS LIABILITIES TO ANY GUARANTEES EXTENDED BY THE MANUFACTURER, WHICH GUARANTEES SELLER WILL PASS THROUGH TO THE CUSTOMER. NO WARRANTY WILL APPLY IF ITS PRODUCTS ARE IN ANY WAY ALTERED OR MODIFIED AFTER DELIVERY BY SELLER.

OPEN ACCOUNTS/ INDUSTRIAL CUSTOMERS

Orders are accepted for open account billing from well-rated firms, institutional and school accounts and government agencies. Firms without a published rating may apply for credit by submitting trade and bank references. Terms of payment are net, 10th and 25th of the month. Past due accounts subject to late payment charge of 2% per month.

MINIMUM BILLING

Minimum billing is $25.00 for the total amount of any order. On non-catalog items; minimum billing is $25.00 per item.

LARGE QUANTITY QUOTATION OR BIDS

Newark will quote on quantities in excess of the maximum amounts shown in the catalog. Contact your nearest Newark branch for current prices and delivery.

PRECIOUS METAL SURCHARGE

Because of the volatile price fluctuation of precious metals used in many electronics devices, a surcharge may apply on selected products. The surcharge is based on prices in effect at time of shipment. Products subject to the surcharge include connectors, relays, switches and semiconductors. Current price data is available from your Newark branch.

TO PLACE AN ORDER

Call your nearest Newark branch (see page 2 and 3) to place all orders. Orders must be at least $25.00. Non-catalog items—$25.00 minimum per item. We ship the most economical way. Current prices and delivery information will be provided by friendly personnel. To qualify for an open account, follow the procedure outlined .

C.O.D. SHIPMENTS

A $2.00 handling charge is made on all C.O.D. shipments in addition to any charges by Postal, UPS or Truck carriers. In addition, the Post Office charges a collection fee and a money order fee. A handling charge of $20.00 is made on checks returned for "non-sufficient funds." Check with your Newark branch for current prices and availability, before ordering.

SALES TAX

Newark Electronics is required by law to charge and collect state & local sales tax. As laws vary from state to state, please remit the correct percentage for your locality. A state sales tax exemption certificate copy must accompany all C.O.D. orders; otherwise, sales tax will be charged. Open account customers must have a state sales tax exemption certificate on file with Newark Electronics to avoid state sales tax charges. Sales tax will always be charged unless otherwise indicated. A customer using a restricted sales tax exemption certificate (Per Purchase Order) must submit a confirming purchase order referencing the state sales tax exemption number for all orders exempt from sales tax.

NO BACK ORDERS ON C.O.D. ORDERS

On C.O.D. orders, shipment is made from available stocks. Back orders are not created on out of stock items. Appropriate refunds are made on items not shipped.

NON-CATALOG ITEMS—Open Account orders Only

Merchandise not listed in our catalog, if available from our regular suppliers, may be subject to minimum order quantities and/or special handling charges. Shipment is made as quickly as deliveries are received from our source. Special order products are sold on a nonreturnable basis.

NEWARK ELECTRONICS

IF YOU CALL

If you call regarding a phone order, information can best be obtained by talking to the sales person in the branch who took your order. Always contact your nearest Newark facility. (See pages 2 and 3).

IF YOU WRITE US

When writing us regarding Open Account orders please give your purchase order number and our invoice number. If you wish to return a C.O.D. order include the packing copy from your shipment or one of your invoice copies, as well as your instructions with your request. Follow instructions under "returns".

RETURNS

Returns must be made promptly and accompanied by a "Return Authorization." Authorization may be obtained from the Newark facility in your area. Returns without this authorization will not be accepted. Returns may be subject to a restocking charge.

APO AND FPO SHIPMENTS

Orders for shipment to APO and FPO destinations should be addressed to "Export Department, Newark Electronics, Chicago, IL 60624." Minimum order amount is $100.00 and full remittance including postage is required. No C.O.D. shipment can be made. It is advisable to write for current prices on the items you wish to purchase.

APO and FPO Rates and Services from Chicago

Standard Parcel Post (4th Class)—Maximum size (length plus girth), 100 inches. Maximum weight, 70 pounds, APO, FPO New York (zone 5)—$2.33 first pound, APO, FPO San Francisco (zone 8)—$2.98 first pound.

Parcel Air Life (PAL)—Maximum size, 60 inches. Maximum weight, 30 pounds. Rate same as standard Parcel Post plus $1.00 per package.

Space Available Mail (SAM)—This is also by air, subject to availability of capacity. Maximum size, 60 inches. Maximum weight, 15 pounds. Rate same as standard Parcel Post with no surcharge.

METHOD OF SHIPMENT

All terms are F.O.B. shipping point

UNITED PARCEL SERVICE. UPS serves the 48 states and the island of Oahu in Hawaii.

AIR SHIPMENT—EXPRESS MAIL. If requested, we will ship air freight or UPS air, shipping charges collect, or by Express Mail, which is next day postal service between major cities. Consult your local facility for rates.

TRUCK. For heavy shipments, Common Carrier truck is most economical. Charges are F.O.B. shipping point.

SHIPMENT DAMAGE

Merchandise we ship is carefully packed or prepackaged by our suppliers in compliance with carrier requirements. Claims for loss or damage in transit must be made with the carrier by the customer.

Concealed Loss or Damage. Does not become apparent until shipment is unpacked. Make a request for inspection by the carrier's agent and file claim with the carrier.

Visible Loss or Damage. Any external evidence of loss or damage must be noted on the freight bill or carrier's receipt and signed by the carrier's agent. Failure to do this will result in the carrier refusing to honor the claim. For your protection our billings include insurance for damage or loss in transit.

DEPEND ON NEWARK FOR SERVICE—SELECTION—AVAILABILITY

LOCAL SERVICE—Over 130 Branches Nationwide

VAST STOCKS—Many Thousands Of Items Stocked

BROAD COVERAGE—over 200 Major Product Lines

HIGH SERVICE LEVELS—All Products Catalogued Are Stocked

FAST RESPONSE—Computerized Inventory Management and Order Processing Systems

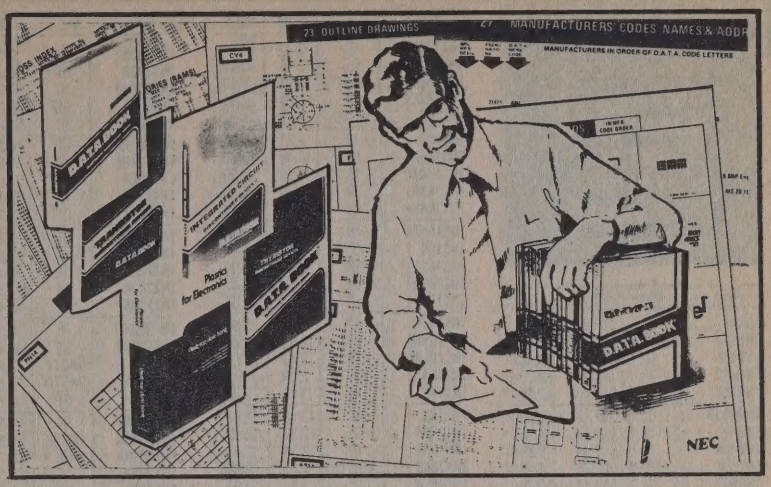
ELECTRONIC ENGINEERING DATA BOOKS D.A.T.A., INC.

26 VOLUMES PUT MILLIONS OF WORLDWIDE DEVICE CHARACTERISTICS WITHIN ARM'S REACH.

Four reasons why D.A.T.A. Books are used:
- You save data collection and search time.
- You're given the ideal way to find the precise device for your special needs.
- You can quickly and easily compare manufacturer's specifications.
- You get up-to-date, accurate information.

Try the data way and prove to yourself that you can save hours after hours in search and selection time. All over the world, engineers have discovered the D.A.T.A. Book System that speeds and simplifies finding, reviewing, and comparing semiconductor information.
Here's your opportunity to do the same and save hours with the D.A.T.A. way that makes your job easier.



DISCRETE DEVICES

TRANSISTORS

Fourteen technical data sections listing 26,300 products from 135 worldwide mfr's. for easy comparison. Special MIL-Spec index and dimensioned outline drawings. 504 Military-qualified Jan-prefix devices.

81F3798 ..... 69.00

DISCONTINUED TRANSISTORS

Lists over 14,200 types that have become obsolete since 1956. (Full technical data referencing obsolete Devices.) Facilitates substitution when used with the Transistor D.A.T.A. book.

81F3801 ..... 43.00

DIODES

Over 43,300 diodes from 158 mfrs. Dimensioned outline drawings plus 1,165 military-qualified Jan-prefixed devices.

81F3800 ..... 69.00

DISCONTINUED DIODES

Over 26,500 diodes that have become discontinued since 1969. Facilitates accurate substitution when used with the diode D.A.T.A. Book.

81F3803 ..... 43.00

THYRISTORS

Over 23,000 types—SCR's, Triacs, Shockley diodes, gate turn-off devices, SCS's, triggers, etc. from 93 worldwide mfrs., with lead designation and dimensioned outline drawings. Includes 89 MIL-qualified Jan devices.

81F3799 ..... 69.00

DISCONTINUED THYRISTORS

Over 17,400 devices including SCR's and PNPN's which have become discontinued since 1963. Plus specialty thyristors discontinued since 1973, facilitates substitution or replacement.

81F3802 ..... 43.00

INTEGRATED CIRCUIT DEVICES

DIGITAL IC'S

Over 15,300 types, basic logic, timing, computational, parity and latch functions from 68 worldwide mfrs. Thousands of outline drawings plus 1,578 MIL-qualified Jan types.

81F3804 ..... 47.00

INTERFACE IC's

Electrical, logical, physical and connection data on more than 12,700 state-of-the-art interface IC's from 81 worldwide mfrs. Detailed logic and outline drawings. Includes 681 MIL-qualified Jan IC's.

81F3805 ..... 47.00

MEMORY IC's

Over 7,200 types from 60 mfrs. in ROM's, RAM's, character generators, code converters, shift registers, logic devices, and 222 MIL-qualified Jan devices.

81F3806 ..... 47.00

LINEAR IC's

Provides characteristics for over 13,900 IC's and modular types from 100 manufacturers in categorized functions. Includes schematic, logic and outline drawings. Includes over 230 MIL-qualified Jan devices.

81F3807 ..... 47.00

MICROPROCESSOR IC'S

References over 5,400 chip level products—RAM, ROM and interface support chips. Includes process or architecture and mfr. software support.

81F3808 ..... 44.00

MICROPROCESSOR SYSTEMS

Organized by Bus structure. It details over 2,600 devices, CPU, memory, controller and data transfer boards, etc.

81F3809 ..... 44.00

MICROPROCESSOR SOFTWARE (ENGINEERING)

Provides operating and vendor detail on over 1,000 packaged programs. Unique organization allows side-by-side comparison of over 25 key program characteristics.

81F541.1 ..... 76.00

CONSUMER IC'S

Mass market items. Unique cross-reference, parameter-sequenced format. Details electrical, pictorial and functional information on TV circuits, amplifiers, clocks, calculators, rhythm devices, and video games.

81F3810 ..... 44.00

DISCONTINUED IC'S

Details over 31,700 types from Digital, Interface, Memory and Linear IC that became obsolete since 1965. Facilitates substitution and replacement.

81F3811 ..... 43.00

DISCONTINUED LINEARS

Covers over 8,000 obsolete devices since 1969. Facilitates easy substitution or replacement when used with the Linear D.A.T.A. Book.

81F 5410 ..... 43.00

MASTER TYPE LOCATOR

Master index to all D.A.T.A. Book references currently available devices. Identifies mfrs. part no., product type and directs reader to D.A.T.A. book. 111 Product classes, 426 worldwide mfrs.

81F3815 ..... 51.00

MODULES/HYBRIDS

Details over 16,500 linear and interface modules and hybrid devices as well as 6,000 power supplies.

81F3821 ..... 41.00

SPECIAL APPLICATION

OPTOELECTRONICS

Twenty-two technical data sections. Lists over 12,300 devices and assemblies from 111 worldwide mfrs. on emitters, junction sensors, photocell and couplers, displays and specialty devices such as GAP/Reflex detectors, CCD's and fiber optics.

81F3812 ..... 44.00

DISCONTINUED OPTOELECTRONICS

Lists over 4,700 obsolete devices since 1974. Facilitates substitution when used with the Optoelectronics D.A.T.A. book.

81F3817 ..... 43.00

PLASTICS FOR ELECTRONICS

Detail over 2,000 plastics and their properties from 150 mfrs. Cross-indexed by generic type, Commercial name, mfrs. application, flammability data and ranked properties. Includes wire coating, potting, encapsulating, etc.

81F3820 ..... 75.00

MICROWAVE

Over 20,900 semiconductors and tubes from 130 worldwide mfrs. for commercial and military application. Gives MIL-Spec numbers, QPL mfrs., and industry-standard types.

81F3813 ..... 44.00

DISCONTINUED MICROWAVE

Provides data on over 15,600 obsolete devices since 1959. Easy and simplified to speed substitution or replacement when used with microwave D.A.T.A. Book.

81F3818 ..... 43.00

POWER SEMICONDUCTORS

Over 39,900 devices from 159 worldwide mfrs. on rectifiers, power zeners, power transistors, general purpose and inverter SCR's, plus drawings and lead code. Includes 649 MIL-qualified Jan devices.

81F3814 ..... 47.00

APPLICATION NOTES REFERENCE

Allows easy one-stop order notes from a single source. Covers over 4,900 circuits and devices from 84 mfrs.

81F3819 ..... 27.00

DISCONTINUED TYPE LOCATOR

Covers and identifies over 110,000 obsolete IC's, transistors, diodes, thyristor, microwave, opto, Jedec, and MIL-Spec devices.

81F3816 ..... 51.00

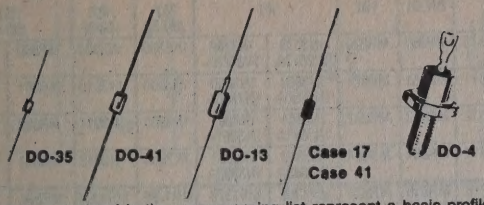
Pressure Sensors, Temperature Sensors
Zener and Avalanche Regulator Diodes and Transient Suppressors



The devices depicted in the accompanying list represent a basic profile of Motorola's large inventory of zener-diodes. Available tolerances from 20% (low cost) to as tight as 1% for critical applications. Use Plastic (surmetic) and glass for low cost, high reliability and metal for highest power.
NOTE: Also available in 50 watt).

Pressure Sensors

A unique silicon shear stress sensitive piezoresistive element having an output that is ratiometric to the supply voltage. Devices are available with and without signal conditioning.

Device	Case	Pressure Range	Pressure Type	Full Scale Output Typ	Sensitivity Typ
MPX100A	344-03	0-100 kPa	Absolute	60 mVdc	0.60 mV/kPa
MPX100D	344-03	0-100 kPa	Differential		
MPX50D	344-03	0-50 kPa	Differential	60 mVdc	1.20 mV/kPa
MPX200A	344-03	0-200 kPa	Absolute	60 mVdc	0.30 mV/kPa

Temperature Sensors

Solid-state temperature sensing devices designed for use in extreme temperature ranges requiring high accuracy and quick response time. All devices have a linear V_{BE} versus temperature curve relationship and negative temperature coefficient.

Device	V_{BE} Typ	Temperature Matching Accuracy	Thermal Time Constant Liquid-to-Liquid	Thermal Time Constant Flowing Air
MTS102	595 mV	±2°C	(TO-92) 3.0 s	8.0 s
MTS103		±3°C

SOT Small Signal Devices

An internationally standardized hybrid assembly already adopted by major European hybrid assemblers. A wide variety of discrete components are available in SOT packages, including Bipolar and Unipolar (Field Effect) transistors, and Switching and Varactor Diodes.

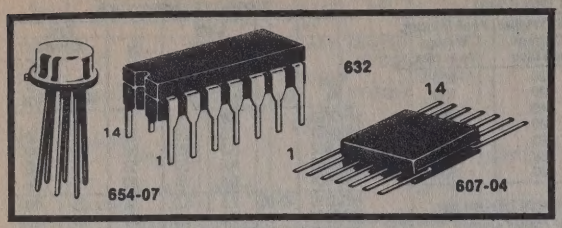
MULTIPLE TRANSISTORS AND SMALL DARLINGTON AMPLIFIER TRANSISTORS



NPN-PNP SILICON QUAD TRANSISTORS

Each quad transistor contains four similar transistors that can be used to reduce space requirements. Listed in order of decreasing BV_{CEO} (min.). NPN except as otherwise noted.

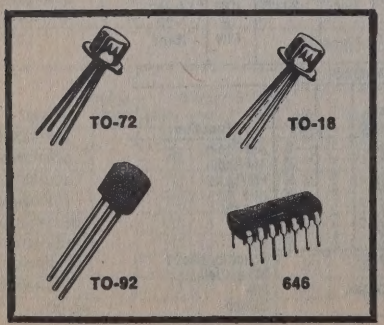
SMALL-SIGNAL DARLINGTON AMPLIFIER TRANSISTORS



Darlington amplifiers are cascaded transistors used in applications requiring high-current gain and input impedance. Plastic transistors have monolithic construction, metal package transistors are two chip construction.

*Technology available in ALS series.

High Speed CMOS & High Speed Schottky

The Fast Schottky TTL provides a 75-80% power reduction compared to standard 74S TTL.

The High Speed CMOS features low power dissipation with LS TTL Speeds and LS TTL Pinouts.

MC Device	Function	Pins
74HC00*	Quad 2-Input NANO Gate	14
74HC02*	Quad 2-Input NOR Gate	14
74HC04*	Hex Inverter	14
74HC08*	Quad 2-Input AND Gate	14
74HC10*	Triple 3-Input NAND Gate	14
74HC11*	Triple 3-Input AND Gate	14
74HC14	Hex Schmitt-Trigger Inverter	14
74HC20*	Dual 4-Input NAND Gate	14
74HC27	Triple 3-Input NOR Gate	14
74HC30	8-Input NAND Gate	14
74HC32*	Quad 2-Input OR Gate	14
74HC42	1-of-10 Decoder	14
74F64	4-2-2-3 Input and/or/Invert Gate	14
74HC73	Dual J-K Flip-Flop with Clear	14
74HC74*	Dual D-Type Flip-Flop with Set and Clear, Positive-Edge Triggered	16
74HC75	4-Bit D-Type Latch	16
74HC76	Dual J-K Flip-Flop with Set and Clear	16
74HC77	4-Bit Bistable Latch	16
74HC85	4-Bit Magnitude Comparator	16
74HC86	Quad 2-Input Exclusive OR Gate	16
74HC107	Dual J-K Flip-Flop with Clear	16
74HC109*	Dual J-K Flip-Flop with Set and Clear, Positive-Edge Triggered	16
74HC112*	Dual J-K Flip-Flop with Set and Clear, Negative-Edge Triggered	16
74F113	Dual J-K Flip-Flop	14
74HC123	Dual Monostable	14
74F124	Vltg. Cutled. Octr.	14
74HC132	Quad 2-Input Schmitt Trigger NAND Gate	14
74HC133	13-Input NAND Gate	16
74HC138*	1-of-8 Decoder	16
74HC139	Dual 1-of-4 Decoder	16
74HC147	10-to-4 Priority Encoder	16
74HC151*	8-Input Multiplexer	16
74HC153*	Dual 4-Ply Multiplexer	16
74HC154	4-to-16 Decoder	16
74HC152*	Quad 2-Input Date Selector/Multiplexer	16

MC Device	Function	Pins
74HC158*	Quad 2-Input Date Selector/Multiplexer Inverting Output	16
74HC160	Decade Counter, Asynchronous Clear	16
74HC161	4-Bit Binary Counter, Asynchronous Clear	16
74HC162	Decode Counter, Synchronous Clear	16
74HC163	4-Bit Binary Counter, Synchronous Clear	16
74HC164	8-Bit Serial-to-Paralle Shift Register	16
74HC165	Parallel-Load 8-Bit Shift Register	16
74HC173	4-Bit D-Type Register, 3-State	16
74HC174*	Hex D-Type Flip-Flop	16
74HC175*	Quad D-Type Flip-Flop	16
74HC192	BCD Decade Up/Down Counter	16
74HC193	4-Bit Binary Up/Down Counter	16
74HC194*	4-Bit Bidirectional Universal Shift Register	16
74HC195*	4-Bit Universal Shift Register	16
74HC221	Dual Monostable Multivibrator	16
74HC240*	Octal Buffer/Line Driver/Line Receiver 3-State, Inverting Output	16
74HC241*	Octal Buffer/Line Receiver, 3-State	16
74HC242*	Quad Bus Transceiver, 3-State, Inverting Output	16
74HC243*	Quad Bus Transceiver, 3-State	16
74HC244*	Octal Buffer/Line Driver/Line Receiver 3-State	20
74HC245*	Octal Bus Transceiver, 3-State	20
74HC251*	8-Input Multiplexer, 3-State	16
74HC253*	Dual 4-Input Multiplexer, 3-State	16
74HC257*	Quad 2-Input Date Selector/Multiplexer 3-State	16

MC Device	Function	Pins
74F258	Quad 2-Input Mutipxt.	16
74HC259	8-Bit Addressable Latch 3-State	16
74HC266	Quad 2-Input Exclusive NOR Gate	16
74HC280	9-Bit Odd/Even Parity Generator/Checker	16
74HC299	8-Bit Universal Shift/Store Register, 3-State	16
74F352	Dual 4 Input Multiplexer	16
74F353	Multiplexer	16
74HC354	8-Input Multiplexer, 3-State	16
74HC356	8-Input Multiplexer, 3-State	16
74HC365	Hex 3-State Bus Driver with Common 2-Input NDR Enable	16
74HC366	Hex 3-State Bus Driver with Common 2-Input NDR Enable, Inverting Output	16
74HC367	Hex 3-State Bus Driver with Separate 2-Bit and 4-Bit Sections	16
74HC368	Hex 3-State Bus Driver with Separate 2-Bit and 4-Bit Sections, Inverting Output	16
74HC373*	Octal D-Type Transparent Latch, 3-State	20
74HC374*	Octal D-Type Flip-Flop, 3-State	20
74HC390	Dual Decade Counter	20
74HC393	Dual 4-Bit Binary Counter	20
74HC423	Dual Monostable Multivibrator	20
74HC533*	Octal D-Type Transparent Latch, 3-State, Inverting Output	20
74HC534*	Octal D-Type Flip-Flop, 3-State, Inverting Output	20
74F538	1 of 8 Decoder	20
73F539	1 of 4 Decoder	20
74HC563	Octal D-Type Transparent Latch, 3-State, Inverting Output	20
74HC564	Octal D-Type Flip-Flop, 3-State, Inverting Output	20
74HC573	Octal D-Type Transparent Latch, 3 State	20

MC Device	Function	Pins
74HC574	Octal D-Type Flip-Flop, 3-State	20
74F620		
74HC649*	Octal Bus Transceiver, 3-State	20
74HC643*	Octal Bus Transceiver, 3-State	20
74HC645*	Octal Bus Transceiver, 3-State	20
74HC646	Octal Bus Transceiver and Register, 3-State	20
74HC648	Octal Bus Transceiver and Register, 3-State	20
74HC688	8-Bit Equality Comparator	20
74HC4002	Dual 4-Input NOR Gate	20
74HC4017	Decade Counter-Divider	20
74HC4020	14-Stage Binary Counter	20
74HC4040	12-Stage Binary Counter	20
74HC4049	Hex Inverting Buffer	20
74HC4050	Hex Buffer	20
74HC4060	14-Stage Binary Counter	20
74HC4075	Triple 3-Input OR Gate	20
74HC4078	8-Input NOR Gate	20
74HC4301	Octal Latch/Level Translator, Inverting Output	20
74HC4302	Octal Latch/Level Translator	20
74HC4303	Octal Flip-Flop/Level Translator, Inverting Output	20
74HC4304	Octal Flip-Flop/Level Translator	20
74HC305	Octal Buffer/Level Translator, Inverting Output	20
74HC4306	Octal Buffer/Level Translator	20
74HC4511	BCD-to-7-Segment Latch/Decoder/Driver	20
74HC4514	4-Bit Latch/4-to-16 Line Decoder	20
74HC4538	Dual Precision Retriggerable/Resettable Monostable Multivibrator	20
74HC4543	BCD-to-7 Segment Latch/Decoder/Drive for Liquid-Crystal Displays	20

*Technology available in F series.

COMMUNICATION INTERFACE (TELEPHONY)

Crosspoint Switch

MC3416—Low cost solid state crosspoint switch. Features 4×4 two-wire monolithic structure for PABX applications. Select inputs are both CMOS and TTL compatible.

$T_A = 0$ to $+70°C$

I_{off} @V_{AK} = 10V MΩMin	I_{on} @1AK = 20mA Ohms Max	$V_{(BR)AK}$ $V_{(BR)KA}$ Volts Min	V_{AK} @1AK = 20mA Volts Max	Pkg.
100	10	25	1.1	649,623

VOICE ENCODING/DECODING

Simplified voice encoding/decoding using continuous Variable Slope Delta Modulator (CVSD) technique.

MC3417/MC3517—3-bit algorithm; for military secure communication and general purpose low-sampling rate applications.

MC3418/MC3518—4-bit algorithm; telephone quality.

$T_A = 0$ to $+70°C$—MC3417/MC3418
$= -55$ to $+125°C$—MC3517/MC3518

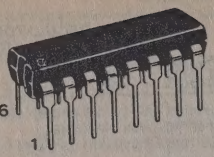
Motorola Selector Guide



CMOS INTEGRATED CIRCUITS

CMOS B Series is the standard line of CMOS monolithic integrated circuits providing the design engineer with several medium speed series fully compatible with non-buffered CMOS for mix-and-match convenience. Low power dissipation and flexible power supply requirements simplify design. High noise immunity and fanout capability reduce printed circuit board layout.

MC14406	Pulse Code Modulator
MC14407	Pulse Code Modulator
MC14408	Binary-to-Phone Pulse Converter
MC14409	Binary-to-Phone Pulse Converter
MC14410	2-of-8 Tone Encoder
MC14411	Bit-Rate Frequency Generator
MC14412	Universal Low-Speed Modem
MC14413	PCM Filter (CCITT)
MC14414	PCM Filter
MC14415	Quad Precision Timer/Driver
MC14416	Time Slot Assigner Cir.
MC14417	Time Slot Assigner Cir.
MC14418	Time Slot Assigner Cir.
MC14419	2-of-8 Keypad-to-Binary Encoder
MC14433	3½-Digit A/D Converter
MC14435	3½-Digit A/D Logic Subsystem
MC14443	8-channel A/D Converter
MC14444	Bus Comp. 8-Bit A/D Conv.
MC14447	8-Channel A/D Converter
MC14457	R/C Transmitter
MC14458	R/C Transmitter
MC14460	Auto Speed Control
MC14460	Automotive Speed/Control Processor
MC14469	Addressable Asynchronous Receiver/Transmitter
MC14490	Hex Contact Bounce Eliminator
MC14495	BCD-to-7 Segment Decoder/Driver/Latch
MC14500B	Industrial Control Unit
MC14501UB	Triple Gate
MC14502B	Strobed Hex Inverter/Buffer
MC14503B	Hex 3-State Buffer
MC14504B	Hex TTL or CMOS to CMOS Level Shifter
MCM14505	64 x 1-Bit Static RAM
MC14506B	Dual Expandable AOI Gate
MC14508B	Dual 4-Bit Latch
MC14510B	BCD Up/Down Counter
MC14511B	BCD-to-7 Segment Latch/ Decoder/Driver
MC14512UB	8-channel Data Selector
MC14513B	BCD-to-7/Segment Latch/ Decoder/Driver—Ripple Blanking
MC14514B	4-Bit latch/4-to-16 Line Decoder (High)
MC14515B	4-Bit latch/4-to-16 Line Decoder (Low)
MC14516B	Binary Up/Down Counter
MC14517B	Dual 64-Bit Static Shift Register
MC14518B	Dual BCD Up Counter
MC14519B	4-Bit AND/OR Selector

Part Number	Function
MC14520B	Dual Binary Up Counter
MC14521B	24-Stage Frequency Divider
MC14522B	Programmable BCD Divide-by-N Counter
MCM14524	256 x 4-Bit Read Only Memory
MC14526B	Programmable Binary Divide-by-N Counter
MC14527B	BCD Rate Multiplier
MC14528B	Dual Monostable Multivibrator
MC14529B	Dual 4-Channel Analog Data Selector
MC14530B	Dual 5-Input Majority Logic Gate
MC14531B	12-Bit Parity Tree
MC14532B	8-Bit Priority Encoder
MC14534B	Real Time 5-Decade Counter
MC14536B	Programmable Timer
MCM14537	256 x 1-Bit Static RAM
MC14538B	Dual Precision Monostable Multivibrator
MC14539B	Dual 4 Channel Data Selector/ Multiplexer
MC14541B	Programmable Oscillator-Timer
MC14543B	BCD-to-7 Segment Latch/ Decoder/Driver
MC14544	BCD-to-7 Seg. L/D/O
MC14547	BCD-to-7 Seg. Dec./Dur.
MC14549B	Successive Approximate Register
MC14551	Quad 2-1 Analog Mux
MCM14552	64 x 4-Bit Static RAM
MC14553B	3-Digit BCD Counter
MC14554B	2 x 2 Bit Parallel Binary Multiplier
MC14555B	Dual Binary to 1-of-4 Decoder
MC14556B	Dual Binary to 1-of-4 Decoder (Inverting)
MC14557B	1-to-64-Bit Variable Length Shift Register
MC14558B	BCD-to-7 Segment Decoder
MC14559B	Successive Approximation Register
MC14560B	NBCD Adder
MC14561B	9's Complementer
MC14562B	128-Bit Static Shift Register
MC145566B	Industrial Time Base Generator
MC14568B	Phase Comparator/Programmable Counter
MC14569B	Dual Programmable BCD/Binary Counter
MC14572UB	Hex Gate
MC14573	Quad Prog. Op. Amp
MC14574	Quad Prog. Comp.
MC14575	Dual Prog. Op. Amp/Comp.
MC14580B	4 x 4 Multiport Register
MC14581B	4-Bit Arithmetic Logic Unit
MC14582B	Look-Ahead Carry Block
MC14583B	Dual Schmitt Trigger
MC14584B	Hex Schmitt Trigger
MC14585B	4-Bit Magnitude Comparator
MC14597B	8-Bit, Bus Compat, Counter/Latch
MC14598B	8-Bit, Bus Compat. Addressable Latch
MC14599B	8-Bit Addressable Latch
MC145100	Telecom 4x4 Cross Point Switch
MC145104	PLL Frequency Synthesizer
MC145106	PLL Frequency Synthesizer
MC145107	PLL Frequency Synthesizer
MC145109	PLL Frequency Synthesizer
MC145112	PLL Frequency Synthesizer

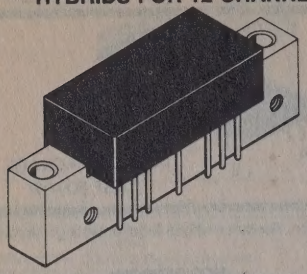
CATV Linear Hybrid Amplifiers

HYBRIDS FOR 12 CHANNEL TO 40 CHANNEL



FORWARD AMPLIFIER MODULES

Motorola hybrid modules are specified for amplifier applications in CATV distribution equipment but are applicable wherever broadband low-distortion, low-noise amplication is required. All of the listed hybrids are manufactured using the Motorola exclusive industry acclaimed "Third Generation Technology" which has set new standards for CATV system performance and reliability. These hybrids exceed most original equipment specifications and have been optimized to provide premium performance in all CATV systems from 12 channels to 60 channels.

System Upper Freq MHz	Hybrid Gain (Nominal) dB	Channel Loading Capacity	Maximum Distortion Specifications: Output Level dBmV	2nd Order Test Note 1 dB	Composite Triple Beat dB: 35CH	40CH	Cross Modulation dB: 35CH	40CH	Noise Figure @330MHz dB: Max	Typ	Device Type

Motorola Selector Guide

MICROPROCESSORS

MC68000

16 Bit microprocessor. Available in 4, 6, 8, 10, and 12½ MHz. Other processors include the MC68008, MC68010, and the MC68020 (32 Bit address and data bus). Resources available to the user consist of: 16 megabyte direct linear addressing, 56 powerful instr. type, memory mapped I/O, and others. In addition to the MC68000 Peripherals it is also functional with the existing 6800 family peripherals.

MC68008

This 8 Bit microprocessor provides the performance capabilities of the 16/32 Bit MC68000 architecture while preserving the cost-effectiveness of an 8 Bit processor system. Resources available to the user include: Eight 32 bit data registers, Nine 32 bit address registers, 1 megabyte linear address space, 56 powerful instruction types, complete Software and hardware compatibility with the MC68000, plus many more.

MC68010

16/32 Bit virtual memory processor. The MC68010 is a MC68000 with enhancements which make it an ideal processor in virtual memory systems or to operate as a true virtual machine. The MC68010 features include: 32 bit data and address registers, 16 megabyte linear addressing range, 58 powerful instructions types, operations on five main data types, automatic instr. continuation after memory fault, plus many more.

MC68230

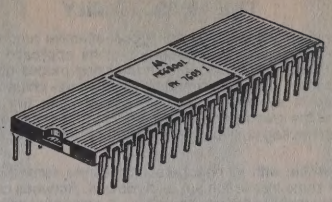
Parallel Interface/Timer (PI/T) provides versatile double buffered parallel interfaces and an operating system oriented timer to MC68000 systems. The parallel interfaces operate in unIndirectional or bidirectional modes, either 8 or 16 bits wide. The MC68230 provides the user with: port modes, 24 bit programmable timer, selectable handshaking options, and more. The MC68230 is available in a 48 pin ceramic pkg.

MC68450

Direct memory access controller (DMAC) is designed primarily to complement the performance and architectural capabilities of the MC68000 by providing the following features: 4 independent DMA channels, transfers to/from M68000 or MC6800 peripherals, programmable channel prioritization, and many more.

MC68451

Memory management unit (MMU) provides address translation and protection for the 16 megabyte addressing range of the MC68000 MPU. Features provided are: MC68000 and DMA compatible, provides efficient memory allocation, 32 segments of variable size with each MMU, plus many more.



MC68452

Bus Arbitration Module (BAM) is a cost effective, asynchronus bus controller which allows multiple bus masters (8 per BAM) to be multiplexed easily onto a bus for sharing memory, I/O devices, and communicate with each other. The unit is designed with an arbitration time of 50 nanoseconds and allows great flexibility in the user system.

MC68661/2661

Enhanced Programmable Communication Interface (EPCI) is a universal synchronous/asynchronous data communications controller chip that is an enhanced version of the Signetics 2651. A Baud rate generator in the EPCI can be programmed to either accept an external clock or the generate internal transmit or receive clocks. Each version of the EPCI (A, B, C) has a different set of BAUD rates.

MC68652/2652

Multi-Protocol Communications Controller (MPCC) formats, transmits, and receives synchronous serial data while supporting bit-oriented or byte-control protocols. The parallel BUS of the MPCC readily interfaces with M6800 and M68000 as well as many other 8 or 16 bit processors. Typical applications include: Intelligent terminals, communication test equip., computer to computer links plus more.

MC68653/2653

Polynomial Generator Checker (PGC) is a polynominal generator checker/character comparator circuit that complements a receiver/transmitter (R/T or USART/USRT/UART) in the support of character oriented data link controls. Directly compatible with Motorola's MC68652, 68661, and Signetics 2651.

MC68681/2681

Dual channel Asynchrounous Receiver Transmitter (DUART) is a cost effective peripheral providing 2 asynchronous serial channels.

M6800 Interface Circuits

Case 601

Case 603

DATA BUS EXTENDERS

MC6880A/MC8T26A Invert. } Quad Bus
MC6889/MC8T98 Noninvert. } Transcvrs.
For bidirect. bus syst. (M6800 Data bus)

ADDRESS AND CONTROL BUS EXTENDERS

MC6882A/MC3482A Invert } Octal 3-State
MC6882B/MC3482B Noninvert } Buffer/Latch
Expand drive capabilities of unidirect., byte-organized, microcomputer bus (M6800 Address and Control bus)

MC6885/MC8T95 thru } Hex 3-State
MC6888/MC8T98 } Buffer/Inverters
Bus extenders for unidirect. bus syst. (M6800 Add./Control) Devices in series differ in output and enable config.

HEX Receiver

MC3437—Hysteresis equipped for improved noise immunity.

QUAD TRANSCEIVER

MC3438—Open collector driver outputs allow wire-OR connection. MC3438 has hysteresis-equipped receiver for improved noise immunity.

DUAL LINE DRIVERS

MC8T13—Open emitter driver; specified for general TTL systems.
MC8T23—Open emitter driver; specified to meet older IBM system requirements.

TRIPLE LINE RECEIVERS

MC8T14—Hysteresis-equipped receiver; specified for general TTL systems.
MC8T24—Hysteresis-equipped receiver; specified to meet older IBM system requirements.

QUAD INTERFACE TRANSCEIVERS

MC3440AP—Three drivers with common Enable input; one driver without Enable.

MC3441AP—Four drivers with common Enable input.

MC3443AP—Four drivers with common Enable input; no termination resistors.

MC3480 Dynamic Memory Controller. Transfer data btwn processor and NMOS memories.

MC3232A—Address Multiplexer and Refresh Address Counter. W/MC3480 and ext. 32kHz oscillator provide interface btwn processor and 4K dynamic RAM (MCM4027A)

MC3242A—Address Multiplexer and Refresh Address Counter. As MC3232A but interface syst. and 16-pin 16K dyn. RAM (MCM4116A).

MC68540—16-Bit (8-Bit) Expandable Error Detection and Correction Circuit.

MC3470—a monolithic READ Amplifier System for obtaining digital information from floppy disk storage.

M6800 INTERFACE CIRCUITS

MC6875—Monolithic Clock Generator. For MC6800-based syst. 1.0, 1.5, or 2.0 MHz.
MC6846—ROM-Timer-I/O. 2K bytes ROM, 16-bit programmable timer-counter, 8-bit I/O. w/MC6802 form 2-chip microcomputer.

MC6821—Peripheral Interface Adapter (PIA). Contains two I/O circuit blocks, each capable of controlling an independent 8-bit peripheral data bus.

MC6828/8507—Priority Interrupt Controller (PIC). After interrupt, PIC directs MPU to proper memory location.

MC6840—Programmable Timer. Has three 16-bit binary counters, three corresponding control registers and a status register.

MC6850—Asynchronous Communications Interface Adapter (ACIA). Interface serial asynchronous data communications information to bus-organized systems.

MC6854—Advanced Data Link Controller. Com. link for ADCCP, HLDC, SDLC std.

MC6852—Synchronous Serial Data Adapter (SSDA). MPU/sync. data terminal interface.

MC6860—0-600 bps Digital Modem. Modulation and control functions to implement serial data com. link over voice grade channel.

MC6862—Digital Modulator. Similar MC6860 but 1200 and 2400 bps.

MC6844—Direct Memory Access Controller (DMAC). Facilitate direct memory access by peripheral.

MC6843—Floppy Disk Controller.. MPU/Floppy Disk Interface.

MC6845—CRT Controller (CRTC). CRT/processor interface. 14 add. lines, 16K memory.

MC6847—Video Display Generator (VDG). Microprocessor/color or B&W TV interface.

THE M6800 FAMILY

The MC6800 microprocessor is a highly cost-effective processor for a great many process-control and data-communications applications. Seventy-two powerful instructions and six different addressing modes give it unexcelled capability, and a full range of compatible peripheral chips offer the widest possible latitude in system implementation. To tailor the system to your specific needs at the lowest cost, the MC6800 (and its peripherals) is available in three different packages, two different temperature ranges and three speed ranges.

MC6802 Compatible with all peripherals it features same MPU architecture and works with same instruction set as basic unit. Reduces component count of a minimum microcomputer system to only 2, compared with a min. of 4 with earlier MPU. Built-in clock operates at a maximum frequency of 1 MHz but an on-chip divide-by-four circuit has been added to permit use of an external 4-MHz crystal. First 32 bytes of built-in RAM may be operated in a low-power mode from an external power source to prevent loss of information during a powerdown situation.

MC6808 Low-cost version of MC6802 has an on-chip clock oscillator and driver, but no on-chip memory. Utilize up to 64K of external RAM, ROM, or peripherals.

Temperature Range	Frequency		
	1 MHz	1.5 MHz	2 MHz
0 to 70°C −40 to 85°C	MC6800P MC6800CP	MC68A00P, S* MC68A00CP/CL*	MC6800P, S MC68B00P, S

P suffix = Plastic Package, L suffix = Ceramic Package.
S suffix = Cerdip Package
*Hi-Rel versions also available

The M6800 Family includes the following devices:

Device	Function
MC6800	MPU
MC6801, C	MCU
MC6802	MPU (with Clock, RAM)
MC6803, NR	MPU
MC6805	MCU
MC6808	MPU (with Clock)
MC6809, E	MPU
MCM6810	128 x 8 Static RAM
MC6821	Peripheral Interface Adapter
MC6822	Industrial Interface Adapter
MC6828	Priority Interrupt Controller
MC6829	Memory Management Unit
MC6835	CRT Controller with ROM
MC6839	Floating Point ROM
MC6840	Programmable Timer
MC6843	Floppy-Disk Controller
MC6844	Direct Memory Access Controller
MC6845	CRT Controller
MC6846	ROM-I/O-Timer
MC6847, Y	Video Display Generator
MC6850	Asynchronous Interface Adapter
MC6852	Synchronous Serial Data Adapter
MC6854	Advanced Data Link Controller
MC6859	Data Security Device
MC6860	Digital Modem
MC6862	Digital Modulation
MC68488	General-Purpose Interface Adapter
MC6822	Industrial Interace Adapter
MC6835	CRT Controller

THE CMOS M146805 FAMILY

The M146805 Family processors have 61 basic instructions that are similar to those of the popular MC6800 microprocessor. A complete set of bit-manipulation instructions allows any bit in RAM or any I/O pin to be individually set or cleared with a single instruction.
The low power requirement—20 mW at 1 MHz, and less than 1 mW in standby—makes the parts extremely attractive for those applications where power is a major consideration (e.g., portable instruments, telecommunications, point-of-sale terminals).

M146805 FAMILY PROCESSORS

Device	No. of Pins	Mem. (Bytes) ROM	Mem. (Bytes) RAM	I/O Lines	Special Features
MC146805E2	40	—	112	16 Programmable Bidirectional	External Bus
MC146805F2	28	1K	64	16 Programmable Bidirectional	Self-Check
MC146805G2	40	2K	112	32 Programmable Bidirectional	Self-Check

SPECIAL PERIPHERALS

Device	Function
MC146818	CMOS Real-Time Clock
MC146823	CMOS Peripheral Interface Adapter (Similar to MC6821)

THE HMOS M6805 FAMILY

The M6805 Family of single-chip microcomputers is designed from the ground up to be cost-effective and control-system oriented. The M6805 Family is a crossbreed of the positive traits of its M6800 heritage and the very low cost of earlier 4-bit controllers. The M6805 Family MCUs retain all of the key M6800 features, plus code compatibility throughout the M6805 Family.

M6805 FAMILY PROCESSORS

Device	No. of Pins	Memory (Bytes) ROM	Memory (Bytes) EPROM	Memory (Bytes) RAM	I/O Lines	Special Features
MC6805P2	28	1K	—	64	20 Programmable Bidirectional	Self-Check
MC6805P4	28	1K	—	112	20 Programmable Bidirectional	Self-Check, Standby RAM
MC6805R2	40	2K	—	64	2 to 5 Inputs, 24 Programmable Bidirectional	1 to 4 Channel 8-Bit A/D, Self-Check
MC6805T2	28	2.5K	—	64	2 Special Function, 19 Programmable Bidirectional	PLL, Self-Check
MC6805U2	40	2K	—	64	8 Inputs, 24 Programmable Bidirectional	Self-Check
MC68705P3	28	—	1.8K	112	20 Programmable Bidirectional	Self-Programming, Bootstrap
MC68705R3	28	—	3.8K	112	2 to 5 Inputs, 24 Programmable Bidirectional	1 to 4 Channel 8-Bit A/D, Self-Programming, Bootstrap
MC68705U3	40	—	3.8K	112	8 Inputs, 24 Programmable Bidirectional	Self-Programming, Bootstrap
MC6805U3	40	3.8K	—	112	8 Inputs, 24 Programmable Bidirectional	Self-Check
MC6805R3	40	3.8K	—	112	2 to 5 Inputs, 24 Programmable Bidirectional	1 to 4 Channel 8-bit A/D, Self Check

THE M6809 FAMILY

An 8-Bit Processor with 16-Bit Internal Capacity

With five internal 16-bit registers, this processor offers up to 5 times higher performance than the MC6800; yet, due to 8-bit output, it is fully compatible with all M6800 bus-oriented supplementary circuits and peripherals. The MC6809 is a logical step for applications that crowd the capacity limits of today's conventional 8-bit processors—yet, hardware and software (upward) compatibility with existing M6800 processors protects previous software investment.

M6809 FAMILY PROCESSORS

Device	Features
MC6809	On-Chip Oscillator
MC6809E	External Clocking for Synchronization of Multiprocessor Systems

PERIPHERALS DESIGNED FOR THE M6809

Device	Function
MC6829	Memory Management Unit
MC6839	Floating Point ROM (IEEE Standard Draft 6.0)
MC6859	Data Security Device

THE M6801 FAMILY

The MC6801 is the most advanced M6800-based microcomputer to date. It is useful in a wide variety of applications requiring both parallel and serial I/O capability, yet suitable for system expansion with external M6800 peripheral components. A full expansion bus permits up to 64K memory bytes. An expanded MC6800 instruction set offers 16-bit operations as well as an 8 x 8 multiplication producing a 16-bit result. The MC6801 retains full object code compatability with the standard M6800 instructions.
The MC68120/MC68121 Intelligent Peripheral Controller is a general purpose, mask-programmable peripheral Controller. The IPC provides the interface between an MC68000 or M6800 Family microprocessor and the final peripheral devices through a system bus and control lines. The MC68121 is a ROM-less version of the ROM-based MC68120.
A serial communications interface, 16-bit timer, dual port RAM, and semaphone registers are available for use by the IPC in all operating modes.

- System Bus Compatible with the Asynchronous M68000 Family.
- System Bus Compatible with the MC6809/MC6809E and other M6800 Family Processors/peripherals.
- Local Bus Allows Interface with all M6800 Peripherals.
- MC6801 Source and Object code compatible.

M6801 FAMILY PROCESSORS

M68KOPASCALH	MC68000 PASCAL Compiler on VERSAdos Cartridge

EXORciser DEVELOPMENT SYSTEMS (M6800 and M6809)

EXORciser II DEVELOPMENT SYSTEM-1, 1.5 & 2MHz WITHOUT RAM

The EXORciser II is modularized expandable development system that contains the common ingredients of a micro-computer and providethesystem designer with a low cost versatile means of developing unique systems through the selective addition of separately available optional modules.

M6800EXOR	#M6800 EXORciser II Development Sys., 110VAC including chassis, 6800 MPU II and DEbug II Modules.
M6809EXOR	#M6809 EXORciser II Development System, 110VAC including chassis, 6809 MPU II and DEbug II Modules.
MEX6809KT	#6809 Upgrade for EXORciser or EXORterm
M68PANEL220	Front panel for conversion of EXORterm 200 to 6809
M6809USE	MC6809 or MC6809E User System Evaluator (requires M6809 MPU Module)

EXORset DS35 DEVELOPMENT SYSTEM (M6800/01/09/05)

EXORset DS35 is a 6809 based development system with an access opening in the cover above the card cage permitting easy insertion and removal of M6805 emulator, PROM programmer, or other EXORbus boards. The man/machine interface consists of a full-size ASCII keyboard and 16 user-assigned function keys and a high resolution 9" CRT display capable of displaying 22 lines of 80 or 16 lines of 40 characters and simultaneously a full 320 x 256 dot graphic image. A standard parallel printer interface allows the user to connect a printer of any selected performance. The memory consists of 56K bytes of RAM, and 3 EPROM/ROM sockets accept up to 24K bytes of user firmware.

M68SETD351	EXORset 35 Development System

M68S04DS351N	DS35 with M146805G2 Emulator

MC6805 DEVELOPMENT SYSTEM

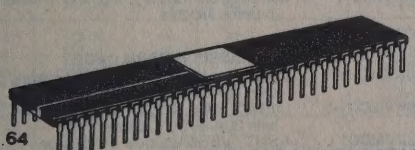
The MC6805 Development System, consisting of the 6805 Emulator Module and the 6805 Cross Assembler, enables the user to develop 6805 Systems on the EXORciser/EXORset.

MPRINT702SET 702 PRINTER

Microsystems Printer 702 is a 120 character per second (cps), 132 column bidirectional, logic seeking, 7 x 7 dot matrix serial impact, tractor feed printer.

MPRINT703SET 703 PRINTER

Microsystems Printer 703 is a 180 cps, 132 column, bidirectional, logic seeking, 7 x 7 dot matrix, serial impact, tractor, feed printer.



The MC68000 MPU

VMEmodules

Now the performance and flexibility of the MC68000 MPU is available in the internationally accepted Eurocard format. The Single and Double Eurocard circuit boards and card cages in the VMEmodule product line offer a convenient size, plus pin-and-socket bus connectors to give you an extra margin of confidence of reliability in the more severe application environments.

PERIPHERALS

The EXORterm 155 is a M6800-based display terminal and console incorporating an expanded keyboard and extended display features which allow utilization of the Resident CRT Editor.

M68SXD10155	EXORterm 155
M68SVS20155	EXORterm 150 to 155 Conversion Kit

EXORdisk II is a dual drive, single sided, single density floppy disk system to be used with the EXORciser/EXORterm Development Systems.

M68DSK2	EXORdisk II 110VAC

EXORdisk III is a dual drive, double sided, single density floppy disk system to be used with the EXORciser/EXORterm development systems.

M68DSK3	EXORdisk III, 110VAC

EXORdisk III is a dual drive, double sided, single density floppy disk system to be used with the EXORciser/EXORterm development systems.

M68KFD1102	EXORdisk III for Exormacs
M68SFDU1102E	EXORdisk IIIE Expansion Unit, 110VAC

This kit provides the guide rails to rack mount an EXORdisk II or III Floppy Disk System.

M68SFDRK3	Rack Mounting Kit, EXORdisk II & III

Microsystems Printer 702 is a 120 character per second (cps), 132 column, bidirectional, logic seeking, 7 x 7 dot matrix, serial impact, tractor feed printer.

M68SP702C10	Microsystems Printer 702, 110VAC

This module provides the interface between the 700 series printers and the 8-bit Development System.

MEX68P12	EXORbus Printer Interface Module

Printer Interconnect Cable. This flatribbon cable assembly connects the 700 series printer to the EXORbus Printer Interface Module.

MEX68PIC	Printer Interconnect Cable

MEMORIES

This memory module, consisting of sixteen 2101-1, 1024 x 1 bit RAMS or equivalent n-channel MOS memories, provides the EXORciser with 2048 x 8 bits of memory. 1MHz.

MEX6812-1	2K Static RAM Module
MEX6816-1HR	16K Dynamic RAM Mod w/Hidden Refresh
MEX6832-1HR	32K Dynamic RAM Mod w/Hidden Refresh
MEX6848-1HR	48K Dynamic RAM Mod w/Hidden Refresh
MEX6864-1HR	64K Dynamic RAM Mod w/Hidden Refresh

These modules provide 16K, 32K, 48K or 64K bytes of dynamic RAM with parity. 2MHz.

MEX6816-22D	16K Dynamic RAM Module w/Parity
MEX6832-22	32K Dynamic RAM Module w/Parity
MEX6816-22S	16K Static RAM Module with Parity

SUPPORT MODULES

This analyzer is an advanced, portable test instrument for use in locating faults in M6800-based systems. An M6800 In-Circuit Emulator with 40-pin connector, Signature Analysis Probe and Time Domain Analysis Probe is included with this analyzer. The Signature and Time Domain analysis features permit fault location at the component, module and system level.

M68UCANA1	Microcomputer Analyzer—110 VAC
M68PP3	PROM Programmer III w/software on MDOS Diskettes for 6800 and 6809 based Development Systems
M68PP3-1	Personality module and software for PP III to allow programming of MCM2532 and MCM68764
MEX68WW	Wirewrap Module

MICROMODULES*

Micromodule I can provide the solution for most processing and control applications. This micromodule contains all of the processing and control power of the MC6800 MPU plus: 1K byte of static RAM, three MC6821 PIA's providing a total of six parallel I/O ports, four sockets for EROM/ROM devices. This module also incorporates the clock and timing circuitry, power-on reset circuitry, and bus drivers to interface this module with the EXORciser/Micromodule bus.

M68MM01	Monoboard Microcomputer
M68MM01-1	Monoboard Microcomputer (MM1 with four connectors & three 4.7K termination pkgs.)

M68MM01-2 Monoboard Microcomputer (MM1 with four connectors & three 330/220 termination pkgs.)

Micromodule 1A incorporates an MC6800 MPU 1K byte of static RAM, sockets for installing up to four 1Kx8 EROM/ROM (or 2K x 8 ROM) devices, one MC6850 ACIA with RS-232C interface, and two MC6821 PIA's. In addition, this module contains the clock and timing circuitry and bus drivers to interface this module with the EXORciser/Micromodule bus. Micromodule 1A2 differs in that the four sockets support the 1K or 2K, single or multiple supply EROM/ROM devices.

M68MM01A2 Monoboard Microcomputer (MM1A with four 1K or 2K x 8 EROM/ROM sockets)

M68MM01A2-1 Monoboard Microcomputer (MM1A2 with four connectors)

M68MM01B

This module incorporates the MC6802 MPU with a crystal clock, one MC6821 PIA providing two parallel I/O ports, one MC6840 triple 16-bit Programmable Timer/Clock, sockets for mounting two 2K EROM devices, and address decode logic.

M68MM01B1A

Micromodule 1B1A is an upgrade of MM01B. This module incorporates the MC6802 with crystal clock, one MC6821 PIA providing two parallel I/O ports, an MC6850 ACIA with RS-232 interface port, one MC6840 Triple 16-bit Programmable Timer/Clock, sockets for mounting two 2K EROM devices, additional 256 bytes of RAM, and the bus buffers to interface this module with the EXORciser/Micromodule bus.

*All Micromodules are rated to operate at a clock frequency of 1MHz unless otherwise indicated.

M68MM17

Micromodule 17 utilizes the M6809 with five sockets for 2K EPROM, PROM, ROM, or RAM devices. 4K, 8K, 16K or 32K devices can be accommodated with a revised address decode PROM. The module has two RS-232C serial I/O ports, a triple 16-bit programmable counter/timer and a buffered PIA parallel port. In addition, this module has the clock and timing circuitry, power-on or switch operated reset circuitry and bus drivers to interface this module with the EXORciser/Micromodule bus.

M68MM19-1/M68MM19A1

Micromodule 19-1/19A1 Features the MC6809 advanced microprocessor with four sockets for 1K, 2K, 4K or 8K byte EPROM, PROM, ROM or RAM devices; 2K bytes of static RAM; a serial I/O port with user option of baud rate and RS-232C, RS-422, or RS-423 interface; a parallel I/O port that can be configured as a Centronics type printer interface or buffered data and control I/O; and a triple 16-bit programmable counter/timer. In addition, this module incorporates the clock and timing circuitry, +5 VDC option to parallel I/O port connector, power-on or switch operated reset circuitry, and bus drivers to interface this module with the EXORciser/Micromodule bus.

M68MM02 CPU Module

Micromodule 2 is the prime building block of a totally modular microcomputer system. Micromodule 2 combines all of the processing and control power of the MC6800 MPU with the necessary clock and timing circuitry, and bus drivers to interface this module with the EXORciser/Micromodule bus.

M68MM14/M68MM14A

Micromodules 14 and 14A provide hardware math functions in 16 or 32-bit fixed point or 32-bit floating point formats. Micromodule 14 operates with an on-board 2MHz clock and Micromodule 14A operates with an on-board 3 MHz clock. MM14A must be used with 2MHz MPU systems.

M68MM04 16K EROM/ROM Module
M68MM04A 16 Socket EPROM, ROM or RAM Module
M68MM06 2K Static RAM Module
M68MM09 4K CMOS RAM with Battery Backup

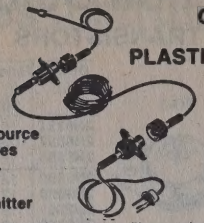
OPTO ELECTRONICS

PLASTIC FIBER-OPTIC DATA LINK



TXES478 thru TXES483 Series Source
TXES488 thru TXES493 Assemblies

- **Plastic dual-in line package for PCB mounting**
- **High-efficiency GaAlAs I-R Emitter**

All source assemblies consist of a GaAlAs emitter, a fiber optic cable and a cable termination. A six lead dual-in line package suitable for PCB mounting is used. Lead frame with I-R diode attached is assembled in a pre-molded plastic case that is epoxy filled to produce a solid assembly.

Fiber-optic cable has an outer jacket diameter of 1.9mm (0.075 inch) and optical cladding and core diameters of 0.40 mm (0.016) inch and 0.37 mm (0.016 inch), respectively. Core diameter of single plastic optical fiber is also compatible with coupling to various commercially available 7 and 19 strand glass-fiber bundles.

TXEF402 SERIES CABLE ASSEMBLY

Fiber-optic cable assembly consisting of a length of infrared transmitting plastic fiber-optic cable which has an attenuation of 350 decibel per kilometer; at 790 nm, and a numerical aperture of 0.53. Each end of the cable is terminated with a fiber-optic connector. Cable lengths of 1 meter (3.3 ft.) to 50 meters (165 ft.) are available.

DEVICE NUMBER	ATTENUATION MAX PER km	AVAILABLE LENGTHS (M = METERS)
TXEF402	350 dB @ 790 nm	M001,M003,M006,M010 M020,M030,M040,M050

TXED453 THRU TXED457 SERIES DETECTOR ASSEMBLY

All detector assemblies consist of a high-performance silicon photodiode designed to operate in a reverse-bias mode. The photodiode is in a six-lead dual-in line package. Risetimes vary from 8 ns at 5 volts to 5 ns at 12 volts.

A-to-D CONVERTERS

Device Number	Function	Pkg.

DUAL-SLOPE CONVERTERS

TL500C	Analog processor	N
TL501C	Analog processor	N
TL505C	Analog processor	N
TL502C	4½ digit seven segment output digital processor	N
TL503C	Multiplexed BCD output digital processor	N

SINGLE-SLOPE CONVERTER

TL507C	Pulse width modulator	P

SUCCESSIVE-APPROXIMATION CONVERTERS

TL520C	8-Wide analog input mux Switched capacitor ± ½ LSB	N
ADC0808	8-Wide analog input mux Resistor Ladder ± ½ LSB	N
ADC0809	8-Wide analog input mux Resistor Ladder ± 1 LSB	N

LINEAR PARTS ALSO AVAILABLE IN MILITARY AND INDUSTRIAL RANGES.

ANALOG SWITCHES: BI-MOS (30 mA CAPABILITY)

Device Number 0 to 70°C	Function	Z_{SW}(TYP) OHMSΩ	Analog Range (V)	Pkgs.
TL182C	Twin SPST	100	±10	N
TL185C	Twin DPST	150	±10	N
TL188C	Dual Comp. SPST	100	±10	N
TL191C	Twin Dual Comp. SPST	150	±10	N

ANALOG SWITCHES: PMOS (10 mA CAPABILITY)

TL601C	SPDT	200	±10	P
TL604C	Dual Comp. SPST	200	±10	P
TL607C	SPDT with enable	200	±10	P
TL610C	SPST with 3 logic inputs	100	±10	P

CURRENT MIRRORS (FIXED RATIO)

Device Number	Current Ratio Input	to Output	Package
TL011C	1	1	LP
TL012C	1	2	LP
TL014C	1	4	LP
TL021C	2	1	LP

CURRENT MIRRORS (SELECTABLE RATIO)

Device No.	33 Available ratios Input	Output	V in (Min)	V out (Min)	Max Ratio Error	Pkg.
TL010	1 to 31	to 15	2 V_{BE}	V_{BE} + SAT	10%	P

HALL EFFECT SWITCHES

Device Number	Description	ON (G)	OFF (G)	HYS (G)
TL170	Gen. Purp. Sw.	+350	-350	200
TL172	Norm. Off	+600	+100	230

TIMERS

Device Number 0-70°C	Timing		Output Current	Pkgs.
NE555	1μS	1S	±200 mA	P,JG
	1μS	1S	±200 mA	P,JG,U,FC
NE556*	1μS	1S	±200 mA	N,J,FC
μA2240C	10μS	DAYS	-4 mA	N,J

AMPLIFIERS (0°C to 70°C)

Device No.	Pkgs.	Description
TL441C	N,J	Logrithmic Amplifier
μA733C	N,J	Differential VIDEO Amplifier
NE592	N,J	Differential VIDEO Amplifier
MC1445	N,J	2-Channel-Input VIDEO Amplifier
TL068C	LP	FET INPUT VOLTAGE follows Buffer Amplifier.
MC3470	N	DISC Read Amplifier

MISCELLANEOUS FUNCTIONS (0°C—70°C)

Device Number	Pkgs	Function
TL195C	N	NFET Sample-and-Hold
TL376C	NE	Three-Channel Stepper Motor Driver
TL440C	N,J	Zero-Voltage Switch
TL442C	N,J	Balanced MIXER

POSITIVE-NAND GATES AND INVERTERS

Description	Device# SN74	AVAILABLE TECHNOLOGY
Hex 2-Input Gates	'804:	'AS
Hex Inverters	'04:	TTL, 'ALS, 'H, 'LS, 'S
Quadruple 2-Input Gates	'00: '1000:	TTL, 'ALS, 'H, 'LS,'S 'LS
Triple 3-Input Gates	'10: '1010:	TTL 'ALS,'H,'LS,'S 'ALS
Dual 4-Input Gates	'20: '1020:	TTL, 'ALS, 'H, 'LS, 'S 'ALS
8-Input Gates	'30:	TTL, 'ALS, 'AS, 'H, 'LS, 'S
13-Input Gates	'133:	'ALS, 'S

POSITIVE NAND GATES AND INVERTERS WITH OPEN-COLLECTOR OUTPUTS

Hex Inverters	'05:	TTL, 'ALS, 'H, 'LS, 'S
Quadruple 2-Input Gates	'01: '03:	TTL, 'ALS, 'H, 'LS TTL, 'ALS, 'LS, 'S
Triple 3-Input Gates	'1003: '12:	'ALS TTL, 'ALS, 'LS
Dual 4-Input Gates	'22:	TTL, 'ALS, 'H, 'LS, 'S

POSITIVE-AND GATES

Hex 2-Input Gates	'808:	'AS
Quadruple 2-Input Gates	'08: '1008:	TTL, 'ALS, 'H, 'LS 'ALS
Triple 3-Input Gates	'11: '1011:	'ALS, 'H, 'LS, 'S 'ALS
Dual 4-Input Gates	'21:	'ALS, 'H, 'LS

POSITIVE-AND GATES WITH OPEN-COLLECTOR OUTPUTS

Quadruple 2-Input Gates	'09:	TTL, 'ALS, 'LS, 'S
Triple 3-Input Gates	'15:	'ALS, 'H, 'LS, 'S

POSITIVE-NOR GATES

Hex 2-Input Gates	'805:	'AS
Quadruple 2-Input Gates	'02: '1002:	TTL, 'ALS, 'LS, 'S 'ALS
Triple 3-Input Gates	'27:	TTL, 'ALS, 'LS
Dual 4-Input Gates with Strobe	'25:	TTL
Dual 5-Input Gates	'260:	'S

POSITIVE-OR GATES

Description	Device# SN74	AVAILABLE TECHNOLOGY
Hex 2-Input Gates	'832:	'AS
Quadruple 2-Input Gates	'32: '1032:	TTL, 'ALS, 'LS, 'S 'ALS

SCHMITT-TRIGGER POSITIVE-NAND GATES AND INVERTERS

Hex Inverters	'14: '19:	TTL, 'LS 'LS
Dual 4-Input Positive-NAND	'13: '18:	TTL, 'LS 'LS
Quadruple 2-Input Positive NAND	'24: '132:	'LS TTL, 'LS, 'S

AND-OR INVERT GATES

2-Wide 4-Input	'55:	'H, 'LS
4-Wide 4-2-3-2-Input	'64:	'S
4-Wide-2-2-3-2-Input	'54:	'H
4-Wide 2-Input	'54:	TTL
4-Wide 2-3-3-2-Input	'54:	'LS
4-Wide 2-3-3-2-Input	'54:	
Dual 2-Wide 2-Input	'51:	TTL, 'H, 'LS, 'S

AND-OR INVERT GATES WITH OPEN COLLECTOR OUTPUTS

4-Wide 4-2-3-2-Input	'65:	'S

EXPANDABLE GATES

Dual 4-Input Positive-NOR With Strobe	'23:	TTL
4-Wide AND-OR	'52:	'H
4-Wide AND-OR-Invert	'53:	TTL, 'H
2-Wide AND-OR-Invert	'55:	'H, 'LS
Dual 2-Wide AND-OR-Invert	'50:	TTL, 'H

EXPANDERS

Dual 4-Input	'60:	TTL, 'H
Triple 3-Input	'61:	'H
3-2-2-3-Input AND-OR	'62:	'H

CURRENT-SENSING GATES

Hex	'63:	'LS

BUFFERS, CLOCK/MEMORY DRIVERS

Description	Device# SN74	AVAILABLE TECHNOLOGY
Quad 2-Input Positive-NAND	'37:	TTL, 'ALS, 'LS, 'LS
Dual 4-Input Positive-NAND	'40:	TTL, 'ALS, 'H, 'LS, 'S
Line Driver/ Memory Driver	'436:	'S
Line Driver/ Memory Driver	'437:	'S
Quad 2-Input Positive-NAND	'1000:	'ALS
Quad 2-Input Positive-NOR	'1002:	'ALS

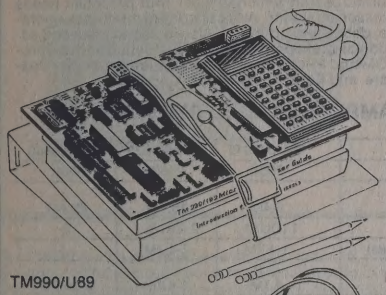
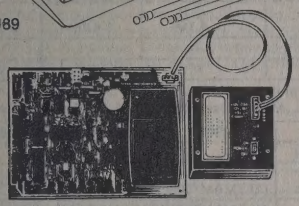
MICROPROCESSOR UNIVERSITY PROGRAM



TM990/U89



POWER SUPPLY TM990/519 Supplies necessary voltage to power the TM990/489 Module.

- **4K ROM, 1K RAM**
- **Powerful 16-bit microprocessor**
- **Audio cassette interface and optional TTY interface**
- **Assembly language programming.**

The program is an aid to institutions of higher learning as they prepare their students for careers in the microprocessor field, and an aid to hold in-house courses on microprocessor or for a self-taught course for engineers. Consists of: 1) An assembled and tested University Module (TM990/U89) offering hands-on experience with microprocessors, I/O, memory, and assembly language programming. 2) A 570-page Tutorial Text suitable for a three credit-hour university course, in-house course for industry, or as a self-taught course for engineers or serious hobbyists. 3) A 300-page User's Guide to acquaint user with full capabilities of (TM990/489). 4) Local technical support. 5) Additional microprocessor modules, development systems, software are available. Software support range from ROM resident software to software on firmware or magnetic media—i.e., POWER BASIC, TI PASCAL, FORTRAN and Run Time Executives. 6) In addition schools may obtain free software from TI. A Power Supply is available (not included).

Module itself contains: TMS9980 16-bit CPU, 45 key alphanumeric keyboard. All keys are dual function. Allows student to program in assembly language, 10 digit, 7 segment display with 64 character buffer. 1K bytes RAM expandable to 2K bytes, 4K bytes ROM containing monitor and symbolic assembler, 2K bytes expansion EPROM socket. Audio cassette interface. Sound disk for audio responses and lab experiments. TMS9901 parallel I/O controller. User addressable LEDs. Ports for memory and I/O expansion and user I/O. Optional interface allows RS232 or TTY terminal to be connected.

The microprocessor on the module offers a powerful instruction set. Multiply and divide, vectored interrupts, single bit I/O manipulation, parallel I/O, and 7 addressing modes, point out just a few of the advantages of programming with a true 16-bit microprocessor and, also, the ease of learning and applying microprocessors.

Audio cassette may be connected for off-board program storage. On-board RAM may be used for checking out a program and, after verification, the finished program may be put into EPROM, using a programmer, and plugged into the EPROM socket on the board.

Texas Instruments Selection Guide

AMPL DEVELOPMENT SYSTEM

Designed for the single user, the TMAM9000 AMPL* System can cut program development time by as much as two-thirds, compared to similar systems. This tabletop, floppy-disk development lab combines extreme ease of use with extensive, preprogrammed test and debug procedures.

AMPL high-level debug tools provide extra capability to analyze hardware or software problems via the full speed emulation and comprehensive logic trace analyzer functions. Emulation and control functions can be called from high-level control sequences written in Pascal-derived constructs, allowing design tests to be automated and repeated with a single command, a capability that facilitates production and field testing.

The TMAM9000 supports a variety of programmable-function devices: the TMS99000 16-bit microprocessors and the TM990 microcomputer modules, the TMS1000 4-bit microcomputers, and the TMS7000 8-bit microcomputers.

TMAM9000 SYSTEM SPECIFICATIONS

Main Memory (Bytes)	64K
Total Disk Storage (Formatted bytes)	2.3MB
No. of Disk Drives	2
Type	Double-side, Double-density (DSDD) 8-inch floppy disk (20.32mm)
Capacity Per Diskette	1,152K Bytes
Max. Data Transfer Rate	500K B.P.S.
Terminal Keyboard	88 Key, typewriter style plus numeric, cursor control and function key clusters. N-key rollover
CRT	12-inch (305mm) diagonal
Screen Capacity	80 Character Line-24 lines, 1720 total
Character Set	96 ASCII, upper and lower case
Printer (EIA)-RS232D	Interface included in system
AMPL Station	Interface included in system
Software Package	AMPLUS software system operating system
Features Included	Function key menus, self prompting interactive user interface
Utilities Included	• 9900 Family assembler • 9900 Family linker • Screen editor system • AMPL debug high-level language • AMPL debug procedure library including trace • Disk directory and file utilities • PROM programmer utilities

ADDITIONAL SUPPORT TOOLS

TMS9995 Evaluation Module	TMAM6095
TMS7000 Evaluation Module	TMAM6070
TI 810 Printer	TMAM7010

An entire team can now develop software and hardware simultaneously using a single system. The hard-disk Multi-AMPL* Systems from Texas Instruments allow as many as eight program designers to work at the same time.

There are three configurations from which to meet your particular needs providing multiple processor emulation. And concurrent multi-task operation: compile, assemble, debug, edit, printing. Also included: data and address trace. Data and address brakepoints. A high-level debug and test procedure language. EPROM and PROM programming. Microprocessor Pascal, Component Software, and Fortran languages supported.

Voice Synthesis

SPEECH EDUCATION MODULE (SPSB 2001-1)

The Speech Education Module was designed to be used as a low cost development aid for implementing Linear Predictive Coding (LPC) speech. LPC Speech is the method used for producing synthetic speech. The Speech Education Module is virtually a portable speech editing system. Features include: Speech editor; Audio amplifier; Graphics ouput; TMS7040 microcomputer; Memory expansion to 64 bytes; Forth like programming language. TMS 5220 VSP; VM 61002 Industrial Vocab. ROM.

Voice Synthesis Processors (VSP) TMS5110 VSP

FEATURES
- Pin compatible with TMS5100 VSP
- Increases voice fidelity over TMS5100 VSP
- Optimized coding table for general voice synthesis

Voice Synthesis Evaluation Kits

Speech evaluation kits permit designes to evaluate TI's voice synthesis capability on 4-, 8-, and 16-Bit microprocessor systems. Each kit contains all the necesary hardware and complete users manual covering interfacing and software design.

TMSK102: TMS5100 EVALUATION KIT

FEATURES
- 4-bit microprocessor compatible
- Hardware includes:
  —TMS5110 Voice Synthesis Processor
  —VM61006 ROM with 206 words (industrial vocabulary)

Voice Synthesis Memories (VSM)

TMSK102A: TMS5110 EVALUATION KIT

- 4-bit microprocessor compatible
- Hardware includes:
  —TMS5110 Voice Synthesis Processor
  —VM61006 ROM with 204 words (industrial vocabulary)
  —VM71004 ROM with 50 words (industrial vocabulary)
  —VM71005 ROM with 35 words (numeric/time vocabulary)

TMSK202: TMS5220 EVALUATION KIT

FEATURES
- 8-bit and 16-bit microprocessor compatible
- Hardware includes:
  —TMS5220. Voice Synthesis Processor
  —VM 81002 32-K bit EPROM preprogrammed with 35 words/phrases
  —VM 61002 ROM with 206 words (industrial vocabulary)
  —VM 71003 ROM with 34 words (female voice, numeric/time vocabulary)

TMS5220 VSP

FEATURES
- Allophone stringing capability
- Can process male, female and children's voices, plus tones, chimes and sound effects
- Interrupt-driven service request capability
- On-chip FIFO (16-byte) buffers two frames of speech data when coming from host processors
- Pin compatible with TMS5200 VSP

TMS6100 VOICE SYNTHESIS MEMORY

- Low-cost, 128K-bit ROM

TMS6125 VOICE SYNTHESIS MEMORY

- Low-cost, 32K-bit ROM
- Optimized interface for use with TMS5100 series and TMS5200 series voice synthesis processors
- On-chip address decode logic—no address decoding required for up to 16 VSM's with the TMS6100s or up to 4 VSM's with the TMS6125s
- On-chip memory address register—autoincrements through speech data until stopped by VSP
- Look-up and branch capability allows vocabulary-independent access to speech data on chip

TMS5100 SERIES EVALUATION BOARD (SPSB1001-01)

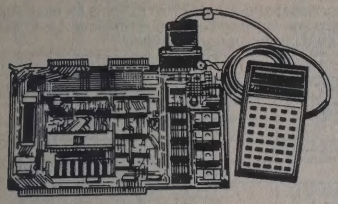
The TMS5100 speech evaluation board is a simple speech unit capable of speaking custom phrases at the touch of a button.

The board requires no external hardware or software for complete operation. 'Software instructions for the TMS5100 are stored in PROM while the LPC vocabulary data is stored in EPROM. The TMS5100 evaluation board comes with 8 custom phrases of 3 seconds duration. This capacity can be expanded with additional EPROM.

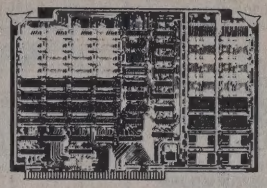
FEATURES
- 24 seconds of speech
- 8 selectable words or phrases
- easily customized to application

Texas Instruments Selection Guide

TM990 FAMILY OF MICROPROCESSOR MODULES



MICRO COMPUTER MODULES



3

The TM990 Series provides an extensive choice of preassembled, high-performance, 16 bit microcomputer modules that save design and development time, cut the number of system components, reduce costs, and improve reliability. Each module is a single, pretested, ready-to-plug-in board. The series includes: complete CPU modules with on-board memory, and I/O interface; memory and I/O expansion modules; data entry and display modules; software development modules, industrial AC and DC I/O modules; A/D and D/A interface modules; a floppy disk controller; a speech module; and industrial communication modules. In addition, OEM card cages, cables, connectors, extender, and prototyping boards are available.

I/O Modules

MODULE	DESCRIPTION
TM990/303A	Floppy disk drive controller
TM990/306	Speech output module with 179 word vocabulary
TM990/307	Communication Expansion Modules—Provides 4 RS232/RS422 channels.
TM990/308	X.25/HDLC Communication Module Permits implementation of distributed industrial processing network. Provides an X.25/HDLC communication protocol for packet switching network.
TM990/309	High Power (AC and DC) interface via 6MT industrial I/O modules
TM990/310	48 TTL compatible I/O lines with 3 programmable timers and 6 interrupts.
TM990/311	48 TTL compatible I/O lines interface with 24-mA sink current and on-board voltage regulator for operation with 5MT industrial I/O modules.
TM990/314	IEEE 488 controller
TM990/315	Low-level analog imput module supports the thermocouple, RTD, strain gauge, and pressure transducer interface.
TM990/317	Pulse timer/event counter module
TM990/1241	Analog I/O module 16 inputs, 2 outputs
TM990/56X	Digital and Analog I/O termination panel with • Barrier strip for field wire termination • Optical isolation • Transformer isolation • Sockets for installing – Current loop imputs – Voltage dividers – Noise filtering – Decoupling capacitor etc.

Memory Modules

MODULE	DESCRIPTION
TM990/201	Combination RAM/EPROM—Up to 8KB EPROM—UP to 32KB Static RAM
TM990/202-X	RAM/EPROM/CMOS RAM Module Sockets for up to 128KB EPROM—Up to 32KB Static RAM—Up to 32KB CMOS RAM—On board battery backup
TM990/203	Up to 64KB DRAM with error detection
TM990/203A-XX	Up to 256KB DRAM with error detection. A faster access (150 msec) version for use with TM 990/1481
TM990/204	Battery backed up CMOS RAM Module—16KB max—days max data retention.

System Kits

These user configurable system kits provide the necessary hardware to run either UCSD-p system or TM990 AMPLUS or any floppy based system. All the modules in the kits are jumper-configuration and tested as a UCSD-p system.

X		TM990/527	Floppy Cable
	X	TM990/522	System enclosure including: card cage, fan, power supply, and floppy cables

TMS7000 8-Bit Microcomputer Family

The TMS7000 is the newest, most cost-effective system solution for 8-bit microcomputer applications, such as computer peripherals, telecommunications, industrial control, automotive, appliances, toys, and games. The significantly smaller chip size of the TMS7000 means lower cost. The singular VLSI design concept provides the ability to add family members quickly and easily by simply inserting new areas on the chip for additional memory capacity or functions

Five memory expansion modes allow trade off of I/O pins for easy interface to a wide range of external memory and peripheral devices. Up to 64K may be addressed for increased configuration flexibility.

*Available in Industrial Temperature Range (−40°C to +85°C)

The 99000 Family contains a wide selection of system support circuits used to easily and cost effectively perform peripheral and interface functions, such as data communicatios, memory functions, special signal processing, and display. Included are controllers, latches, encoders, and others. The bus structure, architecture, I/O features, and other characteristics of these peripherals and interface circuits are compatible with other members of the 99000 Family.

MICROPROCESSORS

CDP 1800 Series IC Product

Microprocessor and Microcomputer

CDP 1802 A	COSMAC CPU
CDP 1805	COSMAC CPU
CDP 1806	COSMAC CPU

ROM's (custom)		EEPROM	
CDP1831	512 x 8	CDP1842	256 x 8
CDP1832	512 x 8		
CDP1833	1024 x 8		
CDP1834	1024 x 8		

ROM's (standard)		RAM's	
CDPR512	UT4 Util Prgm	CDP1821	1024 x 1
		CDP1822	256 x 4
CDPR522	Mcrterm Cntri	CDP1823	128 x 8
		CDP1824	32 x 8
CDPR582	Fixed-Pt Arith	MWS5114	1024 x 4

System Expanders

CDP1856	Bus Buffer (memory)
CDP1858	Address Latch
CDP1859	Address Latch

I/O Circuits

CDP1851	Programmable Interface
CDP1852	Byte I/O
CDP1853	N-Bit Decorder
CDP1854	UART
CDP1855	Multiply-Divide Unit
CDP1857	Bus Buffer I/O

I/O Circuits

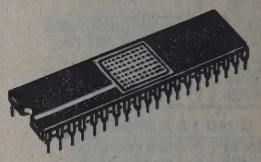
a. CDP1871A—Keyboard Encoder, ASC11/HEX
*b. CDP1872—High-Speed Input Port—8 bit
c. CDP1873—High-Speed Decoder—1 of 8
*d. CDP1875—High-Speed Output Port
e. CDP1877—Programmable Interrupt Controller
*f. CDP1874—High-Speed Input Port—8 bit
*g. CDP1878—Dual Counter Timer
h. CDP1879—Real Time Clock
i. CDP6402—Industry Standard UART

RAM Decoder Latches

CDP1866	4-Bit Latch and Decoder Memory Interface
CDP1867	4-Bit Latch and Decoder Memory Interface
CDP1868	4-Bit Latch and Decoder Memory Interface

Video Interface Circuits

CDP1861	Video Display Controller
CDP1862	Color Generator
CDP1863	Tone Generator



- Completely static circuitry
- High noise immunity
- Wide operating temperature range (55°C to +125°C)
- COS/MOS. TTL. and NMOS compatibility

Series includes all circuit elements needed for an efficient microprocessor system. This series offers user a wide variety of integrated circuits from which he can build his system.

CDP1864	PAL-Compatible TV Interface
CDP1869	Address and Sound Generator
CDP1870	Video Generator

3. Video Interface Circuits
a. CDP1876—Video Interface System (VIS)

COSMAC MICROBOARDS

Single Board Microcomputers

Type	CPU	Freq.	RAM	ROM/EPROM	Serial I/O	Parallel I/O
CDP18S601	1802	2 MHZ	4K	4K/8K	1	25
CDP18S602	1802	2.5 MHZ	2K	2K/4K/8K	1 (UART)	21
CDP18S603	1802	2 MHZ	1K	4K/8K	1	25
CDP18S604B	1802	2 MHZ	1K	2K/4K/8K	1	21
CDP18S605	1802	2.5 MHZ	2K	2K/4K/8K	1 (UART)	—
CDP18S606	1805	2 MHZ	4K	4K/8K	1	25
CDP18S607	1805	2.5 MHZ	2K	2K/4K/8K	1 (UART)	21
CDP18S608	1805	2 MHZ	1K	4K/8K	1	25
CDP18S609	1805	2 MHZ	1K	2K/4K/8K	1	21
CDP18S610	1805	2.5 MHZ	2K	2K/4K/8K	1 (UART)	—

Memory Expansion Boards

CDP18S620	4K RAM
CDP18S621	16K RAM
CDP18S622	8K RAM w/Battery
CDP18S623A	8K RAM
CDP18S625	8K/16K EPROM
CDP18S626	32K/64K EPROM
CDP18S627	4K EPROM (18U42)
CDP18S629	32K RAM

I/O Expansion Boards

CDP18S640	Control/Display	CDP18S650	Counter/Timer
CDP18S641	UART	CDP18S651	Disk Controller
CDP18S642	12 Bit D/A	CDP18S652	Audio Cassette Controller
CDP18S643	12 Bit A/D	CDP18S653V1	300 Baud Modem
CDP18S644/654	8 Bit A/D/A	CDP18S653V2	1200 Baud Modem
CDP18S646	Parallel I/O	CDP18S659	Bread Board
CDP18S647/657	8 Bit D/A	CDP18S660	Combo Memory—I/O
CDP18S648/658	8 Bit A/D	CDP18S661	Video Interface
		CDP18S662	Opto-22 Interface
		CDP18S663	Opto Isolated Parallel I/O

The CDP185600 Series offers single board computers, expansion memory and I/O Modules, plus rugged industrial chassis and low cost development systems. The microboard system allows the designer to apply low POW CMOS microprocessor technology to a variety of industrial control and data acquisition applications.

Industrial Chassis

MSI 804	Standard	4 Card
MSI 808	Standard	8 Card
MSI 812	Standard	12 Card
MSI 816	Standard	16 Card
MSI 820	Standard	20 Card
MSI 824	Standard	24 Card
MSI 825	Standard	25 Card
MSI 8804	Deluxe	4 Card
MSI 8808	Deluxe	8 Card
MSI 8812	Deluxe	12 Card
MSI 8816	Deluxe	16 Card
MSI 8820	Deluxe	20 Card
MSI 8824	Deluxe	24 Card
MSI 8825	Deluxe	25 Card

Industrial Chassis Modules

MSIM 20	Power I/O Control Module
MSIM 40	Plug-In Power Supply Module
MSIM 50	Dual 3½" Disk Drive Module

Microboard Computer Development Systems

CDP18S693—Microboard Development System
—Includes CPU Board, Audio Cassette, 5-Card Chassis, 1802 ROM Basic, Power Supply

CDP18S694—Microboard Development System
—Includes same as CDP18S693 plus 2nd Cassette, Prom Programmer, 1802 ROM Assembler/Editor

CDP18S695—Color Microboard Development System
—Same as CDP18S694 plus 10 inch Color Monitor ASCII Keyboard, Video Interface Microboard

Product Selection Guide

RCA

All SwitchMax transistors are supplied in JEDEC TO-204MA/TO-3 packages, except as noted below:
△Supplied in JEDEC TO-220MA plastic package
● Supplied in JEDEC TO-61 isolated stud package
■ MIL Approved:
MIL-S-19500/537 — 2N6674, 2N6675
MIL-S-19500/538 — 2N6676, 2N6678

	CD4049A	16
Hex high-to-low voltage (non-inverting)	CD4010B	16
	CD4050B	16
Dual 2-input NAND buffer/driver	CD40107B	8,14
8-bit bidirectional CMOS-to-TTL level converter	CD40115▽	22
8-bit bidirectional CMOS-to-TTL level converter	CD40116▽	22
Multivibrators		
Monostable/astable	CD4047B	14
Dual monostable	CD4098B	16
Dual precision monostable	CD4538B	16
Flip-Flops		
Dual "D" with set/reset capability	CD4013B	14
Dual "J-K" with set/reset capability	CD4027B	16
Gated "J-K" (non-inverting)	CD4095B	14
Gated "J-K" (inverting and non-inverting)	CD4096B	14
Hex "D"	CD40174B	16
4-bit "D" with 3-state outputs	CD4076B	14
Latches		
Quad clocked "D"	CD4042B	16
Quad NOR R/S (3-state outputs)	CD4043B	16
Quad NAND R/S (3-state outputs)	CD4044B	16
Dual 4-bit	CD4508B	24
8-bit addressable	CD4099B	16
	CD4724B	16
Registers		
Shift Registers-Static		
Dual 4-stage with serial input/parallel output	CD4015B	16
18-stage	CD4006B	14
64-stage	CD4031B	16
Dual 64-bit	CD4517B	16
8-stage with synchronous parallel or serial input/serial output	CD4014B	16
8-stage with asynchronous parallel input or synchronous serial input/serial output	CD4021B	16
4-stage parallel-in/parallel-out with J-K input and true/complement output	CD4035B	16
	CD4035A	16
4-bit universal bidirectional with 3-state outputs	CD40104B	16
4-bit universal bidirectional with asynchronous master reset	CD40194B	16
8-stage bidirectional parallel or serial input/parallel output	CD4034B	24
32-bit left/right	CD40100B	16
8-stage shift-and-store bus	CD4094B	16
Shift Registers-Dynamic		
200-stage		
Storage Registers		
8-bit addressable latch	CD4099B	16
	CD4724B	16
4-bit "D"-type with 3-state outputs	CD4076B	16
4 × 4 Multiport	CD40108B	24
4 × 4 Multiport	CD40208B	24
FIFO Buffer Registers		
4-bit × 16 word	CD40105B	16

▽Indicates types designed for special applications. Ratings and characteristics data for these types differ in some aspects from the standardized data for A- and B-series types. Refer to RCA data bulletin on these types for specific differences. Data bulletin file numbers are shown on functional diagrams.

Multifunction/AOI (cont'd)

A PRECIOUS METAL CURRENT PRICE SURCHARGE MAY APPLY ON SOME ITEMS.

Decade counter/asynchronous clear	CD40160B	16
Binary counter/asynchronous clear	CD40161B	16
Decade counter/synchronous clear	CD40162B	16
Binary counter/synchronous clear	CD40163B	16

Function	Type No.	No. of Pins
Display Drivers With Counter		
Decade counter/divider	**CD4026B**	**16**
Up/Down Counter-Latch-Decoder Driver	CD40110B	16
For Liquid-Crystal-Display Drive		
4-segment display driver	CD4054B	16
BCD-to-7-segment decoder/driver	CD4055B	16
BCD-to-7-segment decoder/driver	CD4056B	16
4-digit decoder/driver with hexidecimal display	CD22104 ▽	40
4-digit decoder/driver with decimal display	CD22104A ▽	40
4-digit decoder/driver with hexidecimal display	CD22105 ▽	40
4-digit decoder/driver with decimal display	CD22105A ▽	40
For Light-Emitting-Diode Drive		
BCD-to-7-segment latch decoder/driver	CD4543B	16
Multiplexers/Demultiplexers		
Analog		
Triple 2-channel	CD4053B	16
Differential 4-channel	CD40528	16
Single 8-channel	CD4051B	16
Differential 8-channel	CD4097B	24
Single 16-channel	CD4067B	24
Quad bilateral switch	CD4016B	14
Quad bilateral switch	**CD4066B**	**14**
Digital (Data Selectors)		
Quad AND/OR select	CD4019B	16
Dual 1-of-4 decoder/demultiplexer (outputs high)	CD4555B	16
Dual 1-of-4 decoder/demultiplexer (outputs low)	CD4556B	16
Quad 2-line-to-1-line	CD40257B	16
8-channel	CD4512B	16

Function	Type No.	No. of Pins
Phase-Locked Loop Micropower	CD4046B	16
Arithmetic Circuits 4-bit full adder	CD4008B	16
Triple serial adder, positive logic	CD4032B	16
Triple serial adder, negative logic	CD4038B	16
4-bit magnitude comparator	CD4063B	16
Quad exclusive-OR gate	CD4030B	14
	CD4030A	14
Quad exclusive-OR gate	CD4070B	14
Quad exclusive-NOR gate	CD4077B	14
ALU/Rate Multipliers		
4-bit arithmetic logic unit	CD40181B	24
	CD4057A	28
BCD rate multiplier	CD4527B	16
Binary rate multiplier	CD4089B	16
Look-ahead-carry block	CD40182B	16
Parity Generator/Checker 9-bit	CD40101B	14
Multiport Register		
4 x 4	CD40108B	24
4 x 4	CD40208B	24
8 x 1	CD4034B	24
8 x 1	CD4034A	24
Quad Bilateral Switches		
For transmission or multiplexing of analog or digital signals	CD4016B	14
	CD4016A	14
	CD4066B	14
	CD4066A	14
Telecommunication Circuits		
4 x 4 crosspoint switch with control memory	CD22100 ▽	16
4 x 4 x 2 crosspoint switch with control memory	CD22101 ▽	24
Tone Generator		
Dual-tone multifrequency tone generator	CD22859 ▽	16

CD74HC244E	CD74HCT244E	20	Octal-Buffer Line Driver, 3-State
CD74HC245E	CD74HCT245E	20	Octal-Bus Transceiver, 3-State

CMOS Input Logic Level Plastic Pkg.	TTL Input Logic Level Plastic Pkg.	Pins	Description
CD74HC251E	CD74HCT251E	16	8-Channel Multiplexer, 3-State
CD74HC253E	CD74HCT253E	16	Dual 4-Input Multiplexer, 3-State
CD74HC257E	CD74HCT257E	16	Quad 2-Input Multiplexer, 3-State
CD74HC259E	—	16	8-Bit Addressable Latch
CD74HC266E	—	14	Quad 2-Input Excl. NOR
CD74HC273E	CD74HCT273E	20	Octal D Flip-Flop w/CLEAR
CD74HC280E	CD74HCT260E	14	8-Bit Odd/Even Parity Generator/Checker
CD74HC299E	CD74HCT299E	20	8-Bit Universal Shift Register
CD74HC354E	—	20	8-Input Multiplexer, Latched-Data, 3-State
CD74HC356E	—	20	8-Input Multiplexer, Clocked-Latched-Data, 3-State
CD74HC365E	—	16	Hex 3-State Buffer
CD74HC366E	—	16	Hex 3-State Buffer, Inverting
CD74HC367E	—	16	Hex 3-State Buffer
CD74HC368E	—	16	Hex 3-State Buffer, Inverting
CD74HC373E	CD74HCT373E	20	Octal Transparent Latch 3-State
CD74HC374E	CD74HCT374E	20	Octal D Flip-Flop, 3-State
CD74HC390E	—	16	Dual Decade Counter
CD74HC393E	—	16	Dual 4-Bit Binary Counter
CD74HC533E	CD74HCT533E	20	Octal Transparent Latch, 3-State, Inverting
CD74HC534E	CD74HCT534E	20	Octal D Flip-Flop, 3-State, Inverting
CD74HC540E	CE74HCT540E	20	Octal Buffer Line Driver, 3-State, Inverting
CD74HC541E	CD74HCT541E	20	Octal Buffer Line Driver, 3-State
CD74HC563E	CD74HCT563E	20	Octal Transparent Latch, 3-State, Inverting
CD74HC564E	CD74HCT564E	20	Octal D Flip-Flop, 3-State, Inverting
CD74HC573E	CD74HCT573E	20	Octal Transparent Latch, 3-State
CD74HC574E	CE74HCT574E	20	Octal D Flip-Flop, 3-State
CD74HC640E	CD74HCT640E	20	Octal Bus Transceiver, 3-State, Inverting
CD74HC643E	CD74HCT643E	20	Octal Bus Transceiver, 3-State
CD74HC645E	CD74HCT645E	20	Octal Bus Transceiver, 3-State
CD74HC646E	CD74HCT646E	20	Octal Bus Transceiver, 3-State
CD74HC648E	CD74HCT648E	20	Octal Bus Transceiver, 3-State, Inverting
CD74HC688E	CD74HCT688E	20	8-Bit Equality Comparator
CD74HC4002E	—	14	Dual 4-Input NOR Gate
CD74HC4017E	—	16	Decade Counter/Divider
CD74HC4020E	—	16	14-Bit Binary Counter
CD74HC4040E	—	16	12-Bit Binary Counter
CD74HC4049E	—	16	Hex Buffer, Inverting
CD74HC4050E	—	16	Hex Buffer
CD74HC4060E	—	16	14-Stage Binary Counter w/Oscillator
—	CD74HCT4301E	20	Octal Latch Level Converer, Inverting
—	CD74HCT4302E	20	Octal Latch Level Converter
—	CD74HCT4303E	20	Octal Flip-Flop Level Converter, Inverting
—	CD74HCT4304E	20	Octal Flip-Flop Level Converter
—	CD74HCT4305E	20	Octal Buffer Level Converter, Inverting
—	CD74HCT4306E	20	Octal Buffer Level Converter
CD74HC4511E	—	16	BCD-to-7-Segment Latch/Decoder/Driver
CD74HC4514E	—	24	4-to-16-Line Decoder w/Latch
CD74HC4520E	—	16	Dual Binary Up Counter 3-State
CD74HC40104E	CD74HCT40104E	16	4-Bit Bidirectional Universal Shift Register,

Note: Add package suffix code to part number on all orders.
E=Dual-In-Line Plastic Package—Temp. Range=−40°C to +85°C.
F=Dual-In-Line Frit-Seal Ceramic Package (CERDIP)—Temp. Range=−55°C to +125°C. Q MOS Parts Also Available in Cerdip Packages.

RCA SK SERIES REPLACES OVER 178,000 SOLID STATE DEVICES
REPLACEMENT GUIDE LISTS CROSS REFERENCE RECOMMENDATIONS

RCA SK-SERIES REPLACEMENT GUIDE
51F944 ..... NET 1.50

SK-Series of entertainment and industrial solid-state devices are backed by original manufacturer production standards and premium specifications. Tested for use specifically as replacements for solid-state devices designed into original equipment. Each SK transistor, triac, silicon-controlled rectifier (SCR), rectifier, and integrated circuit can be used to replace a broad variety of solid-state devices used in original equipment. Electrical characteristics for each unit are comparable to, or better than, devices originally designed in.

See Semi Conductor Directory listing for specific SK part numbers.

FEATURES:

- **Replacement Cross Reference for more than 178,000 Devices**
- **Complete Index of RCA SK-Series products—MORE THAN 1000 Replacement Devices Selected for Optimum Electrical and Mechanical Interchangeability**
- **Significant Electrical Characteristics, Package Outlines, and Terminal-Arrangement Information for SK-Series Devices**
- **Procedures to Assure Most Effective Device Replacement**
- **Refer to data charts for significant characteristics, package outlines, and terminal arrangements for SK-Series devices**

A PRECIOUS METAL CURRENT PRICE SURCHARGE MAY APPLY ON SOME ITEMS.

Data Acquisition and Control Products

INTERSIL

- **± count nonlinearity accuracy ±0.000 zero accuracy.**
- **2pA current leakage for single chips. 30pA for two chip systems.**
- **1mA full scale output. Binary digital input.**

The translating of analog information into digital signals and visa versa for display, data logging, data transmission and feedback has become increasingly important as monitoring, digital control and computational technics are applied to industrial, commercial, and military analysis and control applications. These data conversion products offer the design engineer the range of characteristics for these applications.

Digital to Analog Converters

AD75 Control analog signals from your microprocessor with this 8 bit CMOS DAC. For higher resolution choose either the AD7520 or AD7541.

ICL7134 14 Bits resolution, 14 bits accurate. For extremely high accuracy and stability this 14 bit microprocessor compatible DAC is an excellent choice. It has a fast settling time of 900 nsec and is double buffered for simple processor interface.

Digital to Analog Converters

Type	Resolution	Settling Non-linearity	Settling Time	Power Voltage	Supply Current
AD7520,30	10	.2%/.1%/.05%	500 ns	5 to 15	2 mA
AD7521,30	12	.2%/.1%/.05%	500 ns	5 to 15	2 mA
AD7523	8	.2%/.1%/.05%	150 ns	5 to 15	2 mA
AD7541	12	.02%/.01%	1 μs	5 to 15	100 μA
ICL7134	14	.01%/.006%/.003%	900 ns	5	2 mA

Analog to Digital Converters

ICL7109 This low cost 12 Bit integrating + A/D converter is the choice of many data acquisition board manufacturers. It contains all of the circuitry required for microprocessor interface making it easy to get Analog data into your computer.

ADC0804 The industry standard 8 bit microprocessor compatible A/D converter. Fast 100 μsec conversion time.

Integrating A to D converters microprocessor interface

Type	Resolution	Full Scale Accuracy	Power Voltage	Supply Current	T_c
ICL7109	±12 bit + sign binary	±400 mV to ± 4 V	±5 V	1.8 mA	20 ms
ICL7104-14 with ICL8068	±14 bit binary	±400 mV to ±10 V	±15 V, + 5	15 mA, .6 mA	80 ms
ICL7104-16 with ICL8068	±16 Bit Binary	± 400 mV to ±10 VDC	±15, + 5	15 mA, .6 mA	330 ms

Hi speed microprocessor interface A to D converters

Type	Resolution	Error	Voltage	Current	
ADC0802	8	±½ Bit no adjust	+ 5	1.3 mA	100 μs
ADC0803	8	±½ adjusted full scale	+ 5	1.3 mA	100 μs
ADC0804	8	±1 bit no adjust	+ 5	1.3 mA	100 μs

DISPLAY OUTPUT A/D CONVERTERS

ICL7106CPL—Directly drives 3½ digit LCD display, ±200.0 mV to ±2.0000 V full scale input range, ±1 count accuracy, 40 pin dip package. Operates on 9 V supply at 1.8 ma max.

ICL7107CPL—Similar to ICL7106, drives 3½ digit LED display, V supply = ± 5 V.

ICL7116CPL—ICL7106 with display hold feature.

ICL7117CPL—ICL7107 with display hold feature.

ICL7136CPL—Low power ICL7106, I supply = 100 μa max, has instant recovery from over-range readings.

ICL7135CPI—4½ digit A/D with multiplexed BcD output, ±2.0000 V F.S. input, V_s = ±5 V at 3 ma max. Use with ICM7211A or ICM7212A display drivers.

DIGITAL VOLTMETER KITS

ICL7136ev/kit—contains ICL7136, LCD display, P.C. board, all required components, and complete instructions for constructing a high quality 3½ digit DVM. Fast way to evaluate the 7136 or for making lab instruments.

ICL7107ev/kit—as above with LED display and ICL7107.

ICL7135ev/kit—contains all parts to construct a high quality A/D with 2.0000 V F.S. input and multiplexed BCD output. Combine with display driver kit to make a complete 4½ digit DVM or use as a 14 bit A/D with a microprocessor.

Type	Resolution	Full Scale input range	Output	Power Supply Voltage	Power Supply Max. Current	Package
ICL7106	3½ Digit	±200 mV to ±2 V	7 seg LCD	9 V	1.8 ma	40 pin dip
ICL7107	3½ Digit	±200 mV to ±2 V	7 seg LED	±5 V	1.8 ma	40 pin dip
ICL7116	3½ Digit	±200 mV to ±2 V	7 seg LCD	9 V	1.8 ma	40 pin dip
ICL7117	3½ Digit	±200 mV to ±2 V	7 seg LED	±5 V	1.8 ma	40 pin dip
ICL7136	3½ Digit	±200 mV to ±2 V	7 seg LCD	9 V	100 μa	40 pin dip
ICL7135	4½ Digit	±400 mV to ±2 V	MUX BCD	±5 V	3 ma	28 pin dip

INTERSIL PACKAGE INFORMATION

ALL INTERSIL PART NUMBERS, *THE LAST THREE LETTERS* ARE TEMPERATURE, PACKAGE, AND PIN NUMBER, RESPECTIVELY.

TEMPERATURE:
- C - Commercial
- I - Industrial
- M - Military

PACKAGE:
- A TO-237
- B Plastic flat-pack
- D Ceramic dual-in-line
- E Small TO-8
- F Ceramic flat-pack
- H TO-66
- I 16 pin (.6 x .7 pin spacing) hermetic hybrid dip
- J Cerdip dual-in-line
- K TO-3
- L Leadless, ceramic
- P Plastic dual-in-line
- S TO-52
- T TO-5 type (also TO-78, TO-99, TO-100)
- U TO-72 type (also TO-18, TO-71)
- V TO-39
- Z TO-92
- /W Wafer
- /D Dice

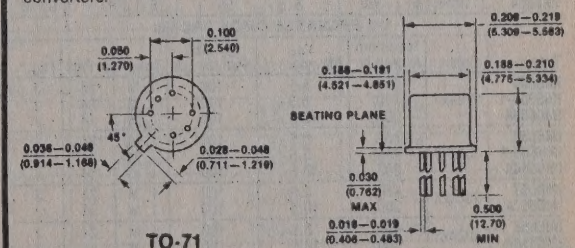
NUMBER OF PINS:

A	8	J	32	T	6
B	10	K	35	U	7
C	12	L	40	V	8 (0.200" pin circle)
D	14	M	48	W	10 (0.023" pin circle, case to pin 4)
E	16	N	18	Y	10 (0.230" pin circle, case to pin 5)
F	22	P	20	Z	8 (0.200" pin circle, case to pin 4)
G	24	Q	2		
H	42	R	3		
I	28	S	4		

Temperature Sensors

AD590 The industry's most popular temperature sensor. This is a two wire current output sensor that outputs 1 μamp/°K.

ICL8073, ICL8074 Complete temperature sensors that are the only devices available for direct reading in degrees Celsius (8073) or degrees Fahrenheit (8074). Interfaces directly to the most popular display A/D converters:



TO-71

Part Type	Grade	Temperature Range −25°C to +85°C	Temperature Range −55°C to +125°C

IM6100 MICROPROCESSOR. Design: Silicon gate CMOS, Static 0 to 5.7 MHz, Crystal controlled on-chip timing, Single power supply, TTL compatible, Noise immunity. **Architectural:** Executes PDP-8/E instruction set, Direct, indirect, and autoindexed memory addressability, 12-bit memory accumulator ADD instruction, I/O instruction, Single-clock, single-instruction capability, DMA, Interrupt. **Interface:** 64 I/O devices with PDP-8/E compatible interface, Control panel request input, Switch reg. select input, Async. interface btwn, CPU and memory or I/O, Device controlled I/O, Control signals produced by CPU, Power-on Reset.

IM6101 CMOS PROGRAMMABLE INTERFACE ELEMENT (PIE) addresses, interrupts and controls for variety of peripheral functions, e.g. UARTs, FIFOs, Keyboards. Eliminate ext. logic.

IM6102 CMOS MEMORY EXTENSION/DMA/INTERVAL TIMER/ CONTROLLER (MEDIC) Single power supply, add. up to 32K 12-bit words of memory, provide programmable real time clock.

IM6103 CMOS 20-BIT PARALLEL INPUT-OUTPUT PORT (PIO) For large no. of I/O bits in parallel. Eliminates ext. output latches or tristate input buffers in small microcomputer systems.

SERIAL DATA COMMUNICATION

IM6402/03 UNIVERSAL ASYNCHRONOUS RECEIVER/TRANSMITTER (UART) CMOS interface to asynchronous serial data channel. IM6403 operates from external crystal.

IM4702/12 BAUD RATE GENERATOR - provides 14 most commonly used baud rates from standard 2.4576 MHz crystal. IM4712 is pin and function compatible with the IM4702, but integrates two oscillator load capacitors and feedback resistor on chip.

CMOS Power Supply Circuits

Type	Desctiption	
ICL7660	Voltage Converter	The ICL7660 performs the complete supply voltage conversion from positive to negative for an input range of +1.5V to +10.0V, resulting in complementary output voltages of −1.5V to −10.0V.
ICL7663 ICL7664	Positive Regulator Negative Regulator	The ICL7663 (positive) and ICL7664 (negative) series regulators are low-power, high-efficiency devices which accept inputs from 1.6V to 16V and provide adjustable outputs over the same range at currents up to 40mA. Operating current is typically less than 40μA, regardless of load.
ICL7665	Programmable Micropower Voltage Detector	The ICL7665 contains two individually programmable voltage detectors on a single chip. Requiring only A3μA for operation, the device is intended for battery-operated systems and instruments which require high or low voltage warnings, settable trip points, or fault monitoring and correction.

Special Function Circuits

Type	Description	Accuracy	V_{SUPP} (V)	T_A (°C)	Packages*
8013AC 8013BC 8013CC	Four quadrant multiplier. Output proportional to algebraic products of two input signals. Features ±0.5% accuracy; internal% amp. for level shift, division and square root functions; full ± 10V input/output range; 1MHz bandwidth.	±0.5% ±1.0% ±2.0%	±15 ±15 ±15	0, +70 0, +70 0, +70	T T T
8038CC	Simultaneous Sine, Square, and Triangle wave outputs T^2L compatible to 28V over frequency range from 0.01Hz to 1.0MHz. Low distortion (≤1%), high linearity (0.1%); low frequency drift with temperature (50ppm/°C max); variable duty cycle (2%-98%).	5.0%	±5 to ±15	0, +70	P
8048BC 8048CC	Log amp 1V/decade (Adjustable). 120dB range. with current input. Error referred to output.	±30mV ±60mV	±15 ±15	0, +70 0, +70	J, P J, P
8049BC 8049CC	Antilog amplifier adjustable scale factor. Error referred to input.	±10mV ±30mV	±15 ±15	0, +70 0, +70	J, P J, P
8211C 8212C	Micropower voltage detector/indicator/voltage regulator/ programmable zenner. Contains1.15V micropower reference plus comparator and hysteresis output. Main output inverting (8212) or non-inverting (8211).		2 to 30 2 to 30	0, +70 0, +70	P, T P, T

*Package Key: D—Solder lid side brazed ceramic dual-in-line.
F—Ceramic flat package. J—Glass frit seal ceramic dual-in-line.
P—Plastic dual-in-line. T—Metal can.

INDUSTRIAL CIRCUITS

Intersil's Industrial product line consists of three distinct product groups, all of which are manufactured with low-power CMOS. In our "timers" group, along with our very popular ICM7555 (CMOS RC timer), we have a complete line of programmable timers. The "counters" group provides system solutions all on one chip (counting, measuring and display driving). Our third group "display drivers" behave as μP peripheral circuits. All of our drivers have on-board character sets and an input architecture that allows for simple μP interface . . . Quick Design-in.

COUNTERS, TIMERS

TYPE	CIRCUIT DESCRIPTION	PACKAGE
ICM7207	Frequency Counter, time base (.01, .1 or 1 second count window). This device when used in conjunction with any of our counters, makes an excellent frequency counter.	14 pin DIP
ICM7209 ICM7213	High Frequency Clock Generator for 5V systems Oscillator and Frequency Divider.	8 pin DIP 14 pin DIP
ICM7240 ICM7250 ICM7260	Programmable CMOS Counters/Timers using external RC time base. Programmable from μS to years.	16 pin DIP
ICM7555 ICM7556	Single or dual low power CMOS version of Industry standard 555 timer. 80 μA typical supply current 500 Khz (2—18 V supply).	8 pin DIP 14 pin DIP

Linear Integrated Circuits (Cont.)

COUNTERS-DISPLAY DRIVERS

TYPE	CIRCUIT DESCRIPTION	PACKAGE
ICM7208 ICM7216 ICM7226	Seven-digit (LED) Unit Counter Eight-digit (LED) Universal Counter measures frequency period, frequency ratio, time, interval unit counter (7226/BCD I/O's).	28 pin DIP 28 pin DIP 40 pin DIP
ICM7217 ICM7227	Four-digit (LED) up/down Counter with presettable registers. Cascadable for 8 or more digits. (7227 µP applications).	28 pin DIP
ICM7224 ICM7225 ICM7236	4½ digit high speed Unit Counter. Capable fo counting at speeds up to 25 Mhz—7224 (LCD); 7225 (LED); 7236 (Vacuum Fluorescent).	40 pin DIP

DISPLAY DRIVERS

ICM7211 ICM7212 ICM7235	Four Digit Display Driver. Non-multiplexed for low noise. On board character sets. 7211 (LCD); 7212 (LED); 7235 (Vacuum Fluorescent).	40 pin DIP

DISPLAY DRIVERS

ICM7218	Eight Digit (LED) Multiplexed Display Driver. On board character sets as well as a no-decode feature that allows individual control of 64 segments.	28 pin DIP
ICM7231 ICM7232	Eight Digit Tri-plexed (LCD) Display Driver. Parallel input. Ten Digit Tri-plexed (LCD) Display Driver. SERial input. *Both Drivers provide two annunciators per digit allowing for message panel capability. Onboard character sets.	40 pin DIP 40 pin DIP
ICM7233	Four Character (18 segment) Tri-plexed Alphanumeric (LCD) Display Driver.	40 pin DIP
ICM7234	Five Character (18 segment) Tri-plexed Alphanumeric (LCD) Display Driver. *Both Drivers accept popular 6 bit ASCII input. Onbaard character sets. Eight Character (14 or 16 segment) Multiplexed	40 pin DIP
ICM7243	Alphanumeric (LED) Display Driver. Accepts popular 6-bit ASCII. Onboard character sets.	40 pin DIP

SYSTEM CLOCKS, PRECISION TIMERS

DIGITAL CLOCKS

Part Number	Circuit Description	Package	Output
ICM1424C	3½ digit LCD clock circuit displays Hours: Minutes, can alternate with Month—Date	40 pin DIP	Drives LCD
ICM7223	3½ digit LCD clock with alarm and snooze. 24 hour format by Bond Option. 1.5 volt system	40 pin DIP	Drives LCDs; alarm
ICM7223A	3½ digit LCD clock with alarm, Radio Enable, Sleep and Snooze. 9 volts.	40 pin DIP	Drives LCDS; alarm, Radio Enable
ICM7223VF	3½ digit vacuum fluorescent clock with alarm, radio enable, sleep and snooze. 12 volts	40 pin DIP	Drives Vacuum fluorescent displays, alarm, radio enable

All the above clocks use a 32.768 lcHz crystal.

Stopwatches/Interval Timers

Part Number	Circuit Description	Crystal Frequency	Pakcage	Output
ICM7045	8 Digit 4 Function LED stopwatch circuit. Features Hours: Minutes: Seconds: 100ths. Provides Time Out, Taylor, Split and Rally modes. Direct drive for LEDs. May be used as 24-hour clock.	6.55 MHz	28 pin DIP	Eight-digit commom-cathode LED drive
ICM7045A	7 Digit 4 Function LED industrial stopwatch circuit, precision decade timer. counts seconds, minutes or hours by selection of suitable quartz crystal. Direct drive for LEDs.	Seconds: 1.31 MHz Minutes: 2.18 MHz Hours: 3.64 MHz	28 pin DIP	Seven-digit common-cathode LED drive
ICM7215	6 Digit 4 Function LED stopwatch circuit. Features Minutes: Seconds: 100ths. provides Time Out, Taylor and Split modes. Direct drive for LEDs.	3.28 MHz	24 pin DIP	Six-digit common-cathode LED drive

TONE DIALLERS

Part Number	Circuit DEscription	Package	Crystal FRequency	Output
ICM7206	Touch-tone™ encoder; requires single contact per key.	16-Pin DIP	3.57954 MHz	2-of-8 sine wave for tone dialing
ICM7206A	Touch-tone™ encoder; requires one contact per key with common line connected to + supply.	16-Pin DIP	3.57954 MHz	2-of-8 sine wave for tone dialing
ICM7206B	Touch-tone™ encoder; requires 2 contacts per key with common line connected to negative supply; oscillator enabled when key is pressed.	16-Pin DIP	3.57954 MHz	2-of-8 sine wave for tone dialing
ICM7206C	Touch-tone™ encoder requires single contact per key; oscillator enabled only when key is depressed. Disable line tied to V−	16-Pin DIP	3.57954 MHz	2-of-8 sine wave for tone dialing
ICM7206D	Touch tone™ encoder; requires single contact per key; oscillator enabled only when key is depressed. DISABLE line tied to V+.	16-Pin DIP	3.57954 MHz	2-of-8 sine wave for tone dialing
ICM7209	High-frequency clock-generator for 5-volt systems	8-Pin DIP	to 10 MHz	Cyrstal frequency, plus ÷ 8 for microprocessor
ICM7213	Oscillator and frequency divider Precision Timebase	14-Pin DIP	to 10 MHz	1pps, 1ppm, 16 Hz, from 4.19Mhz crystal

POWER MOS TRANSISTORS

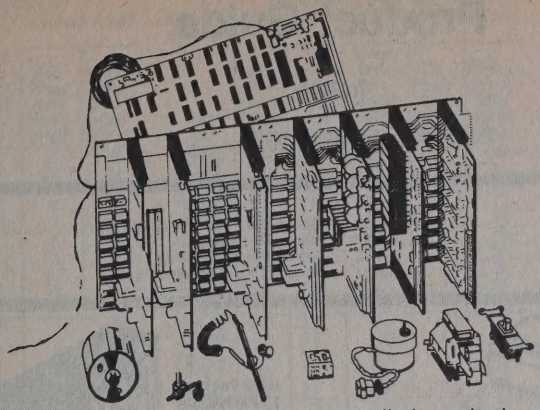
These vertical power MOS transistors are 100 times faster than a typical bipolar yet have essentially infinite beta (input leakage current only). The 100 mA to 10 amp drain current is controlled by applying +5V to +15V to the gate of these devices. No negative voltages or series input resistors are required. Devices may be paralleled for greater current handling capability.

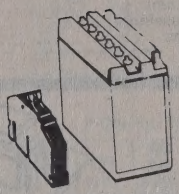
N—CHANNEL POWER MOS

Type	Description	Type	Description
IVN6300ANE	Lowest cost VMOS device. 60V, 250 mA, 7.5 ohm small signal transister. 4 nanosecond switching time. TO-237 pkg.	IVN6100TNV	High voltage VMOS power transistor. 500V, 300 mA, 15Ω device in a TO-39 pkg.
IVN6300SNP	Medium voltage, low current switch or linear amplifier, 250V, 120 mA, 25 ohm signal transistor. TO-52 pkg.	IVN6200KND	Low cost 100W VMOS power transistor. 0.35 ohm, 10A, 40V device in a TO-3 pkg.
IVN6300SNT	High voltage VMOS device. 500V, 100mA, 75 ohm transistor in a TO-52 pkg.	IVN6200KNE	Low "ON" resistance 100W power transistor. 0.25 ohm, 10A, 60V device in a TO-3 pkg.
IVN6000CNE	Low "ON" resistance power MOS device. 0.5 ohm, 80V, 5.0A power transistor in a TO-220 power pkg.	IVN6200KNP	Medium voltage 100W power transistor, 0.5 ohm 5.0 A, 250V device in a TO-3 pkg.
IVN6000KNE	Low "ON" resistance power device. 0.5 ohm, 80V, 6.0A power transistor in a TO-3 power pkg.	IVN6200KNR	Low cost, high voltage 100W power transistor. 2.5 ohm, 5A, 395V device in a TO-3 pkg.
IVN6000TNE	Low "ON" resistance transistor. 0.5 ohm, 80V, 3.0A in a TO-39 pkg.	IVN6200KNV	High voltage 100W power transistor. 1.5 ohm, 5A, 500V device in a TO-3 pkg.
IVN6002CND	Low cost, low "ON" resistance power transistor. 0.7 ohm, 40V, 4.5A in a TO-220 pkg.		
IVN6002KND	Low cost, low "ON" resistance power transistor. 0.7 ohm, 40V, 5.0A in a TO-220 pkg.		
IVN6002TND	Low cost, low "ON" resistance switching transfer. 0.7Ω ohm, 40V, 3.0A in a TO-39 pkg.		

Remdacs II

INTERSIL





Twisted-Pair Data Link Dramatically Reduces Installation Cost.

REMDACS II employs low-cost twisted-pair wiring to reliably transmit and receive data to and from sensors. Even sensors miles away from your computer.

Local signal conditioning, analog multiplexing and 12-bit A/D conversion of data from multiple transducers is performed by microcomputer-controlled cards located near the sensors. So true 12-bit data is actually delivered to your computer.

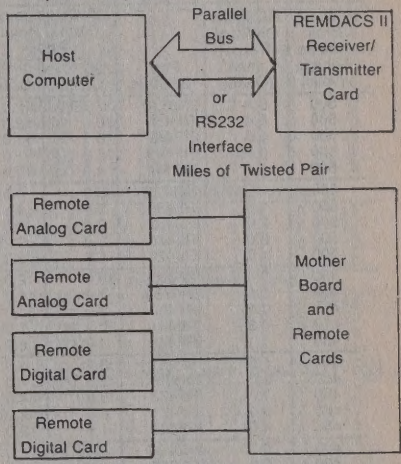
REMDACS II connects your computer with up to 256 remote digital and analog cards via a single, multi-drop or 'party line' twisted pair.

The result? A REMDACS II system not only eliminates the high cost of a dedicated cable per sensor—it frees your computer of all communications overhead.

PART NUMBER	DESCRIPTION
ANALOG REMOTE STATIONS	
REM24-L216E-AC	16-Channel, 4mA to 20mA, 50 Hz, 24VAC
REM24-L216E-DC	16-Channel, 4mA to 20mA, 50 Hz, 8VDC to 20VDC
REM24-L216U-AC	16-Channel, 4mA to 20mA, 60 Hz, 24VAC
REM24-L216U-DC	16-Channel, 4mA to 20mA, 60 Hz, 8VDC to 20VDC
REM24-T216E-AC	16-Channel, Temperature, 50 Hz, 24VAC
REM24-T216E-DC	16-Channel, Temperature, 50 Hz, 8VDC to 20VDC
REM24-T216U-AC	16-Channel, Temperature, 60 Hz, 24VAC
REM24-T216U-DC	16-Channel, Temperature, 60 Hz, 8VDC to 20VDC
REM24-V216E-AC	16-Channel, Voltage, 50 Hz, 24VAC
REM24-V216E-DC	16-Channel, Voltage, 50 Hz, 8VDC to 20VDC
REM24-V216U-AC	16-Channel, Voltage, 60 Hz, 24VAC
REM24-V216U-DC	16-Channel, Voltage, 60HZ, 8VDC to 20VDC
REM24-V208E-AC	8-Channel, Voltage, 50 Hz, 24VAC
REM24-V208E-DC	8-Channel, Voltage, 50 Hz, 8VDC to 20VDC
REM24-V208U-AC	8-Channel, Voltage, 60HZ, 24VAC
REM24-V208U-DC	8-Channel, Voltage, 60 Hz, 8VDC to 20VDC
DIGITAL REMOTE STATIONS	
REM24-D210-AC	24-Bit General Purpose, 24VAC
REM24-D210-DC	24-Bit General Purpose, 8VDC to 20VDC
MOTHER-BOARDS	
REM-MB-A201	One Slot Analog
REM-MB-A202	Two Slot Analog
REM-MB-A203	Three Slot Analog
REM-MB-A204	Four Slot Analog
REM-MB-D202	Two Slot Digital
REM-MB-D203	Three Slot Digital
REM-MB-D204	Four Slot Digital
REM-MB-D205	Five Slot Digital
DIGITAL-PERIPHERAL CARDS	
REM-DP-R204	4-Channel Electro-Mechanical Relay with Switch Over-Ride
REM-DP-R208	8-Channel Electro-Mechanical Relay with No Over-Ride
REM-DP-S204	4-Channel Solid-State Relay with Switch Over-Ride
REM-DP-S208	8-Channel Solid-State Relay with No Over-Ride
REM-DP-I208	8-Channel Active AC/DC Input
REM-DP-U200	Universal Breadboard
RECEIVER/TRANSMITTER	
R/T-1	General Purpose Receiver/Transmitter
SI-RS232	Serial RS232 Mother Card for R/T-1
R/T-STD BUS	STD-BUS Receiver/Transmitter
R/T-MULTIBUS	MULTIBUS Receiver/Transmitter
ACCESSORIES	
REM-RC-C202	Two Slot Ribbon Cable
REM-RC-C203	Three Slot Ribbon Cable
REM-RC-C204	Four Slot Ribbon Cable
REM-RC-C205	Five Slot Ribbon Cable
REM-RC-RS232	10 Foot RS232 Cable
REM-TR120	120VAC to 24VAC Transformer
REM-TR230	230VAC to 24VAC Transformer

Building-Block Flexibility

Each REMDACS II system is custom configured using standard off-the-shelf remote cards, each oriented to a specific analog sensing or digital I/O function. Remote cards and sensors can be added as the system expands, without disturbing the in-place equipment.



At present, more than ten unique remote cards are available for functions such as analog 4 to 20mA receiving, temperature sensing and general purpose low-level voltage input, and digital input/output. And new function cards are on the way, for even greater systems flexibility.

As Easy To Use As It Is To Install

REMDACS II communication is totally transparent to your computer, which sees it as a simple I/O-mapped peripheral. So *no* communication software development is required.

Just connect the REMDACS II receiver/transmitter card directly to your STD BUS, or MULTIBUS,® or any 8-bit computer I/O port—or use an RS-232 serial link. And you're ready to monitor and control any combination of thousands of analog and digital channels.

Characteristics common to all TO-3 and TO-220AB HEXFETs.

TJ = −55° C to +150° C Operating

VGS(th) Gate Threshold = 2.0 to 4.0 Volts

See Data Sheets for conditions.

Lead Temperature = 300° C for 10 Seconds Max.

Electrical Characteristics at 25° C unless noted otherwise.

Power Schottky Rectifiers

"830" PROCESS SCHOTTKYS—175°CT_J
These Scottkys (identified with Note 1) offer extremely low reverse leakage and virtually no thermal runaway at rated voltage/temperature. Devices operate to 175°CT_J with no voltage derating, offer high current capability at high temperature, and have a guaranteed maximum repetitive transient voltage rating.

STANDARD PROCESS SCHOTTKYS—150°CT_J
Low forward voltage drop (V_F) is the most significant feature offered by IR's standard process Schottkys. Rated at 150°CT_J, these devices also have low reverse leakage characteristics, and a guaranteed maximum repetitive transient voltage rating.

Forward Current @ Maximum Case Temperature (2)

Reverse Current @ 125°C TJ at rated Working Peak Reverse Voltage.

Maximum Peak Forward Voltage @ Forward Current TJ = 25°C

NOTES
(1) "830" Process Max. TJ = 175°C. (2) 180° rectangular conduction. (3) Voltages listed are rated VRWM except for 11DQ, 31DQ and JEDEC series where they are rated VRRM. (4) Dual Center Tap-Common Cathode. IF(AV) is 10. (5) Max. TJ is package limited to 150° C. (6) Max. TJ conforms to JEDEC specification and does not reflect true 150°C capability. (7) Ambient temp (TA) for pcb-mounted 60V & 50V devices. TA higher for lower voltage parts. (8) IRM & VFM for 50V & 60V devices. IRM & VFM lower for 30V & 40V devices. (9) TC is lead temperature measured 3/8 inch (0.95 min) from body. (10) IRM at rate VRRM. (11) Rated VRRM for SD41. SD51, SD241 and 51HQ045 is 45V. (12) Ambient temp (TA) for device with 0.8 inch square copper fin on each lead. (13) IRM for 30V thru 45V devices. 8mA for 60 thru 100V devices. (14) Rated 100A SD241 is 60A.

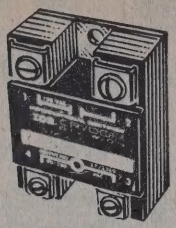
IOR CRYDOM SOLID-STATE RELAYS — Solid State Relays and I/O Switches

SERIES 1 AC OUTPUT PANEL MOUNT, HEAVY DUTY RELAYS



Heavy duty, panel mount, solid state relays to switch AC power loads up to 10 kW. Output circuit is an inverse parallel arrangement of dual SCR's to meet the most demanding requirements. Screw type terminals provide connection flexibility. Used in heater, motor control, solenoids, lamp and other load controls. Isolation Voltage: 2500VAC Std. Operating Temperature Range: −30° C to +80° C. Snubber: Internal. UL and CSA: All except where indicated. **DC Input Control Models:** Control Signal Range: 3-32VDC. Must Operate Voltage: 3VDC Max. Must Release Voltage: 1VDC Min. Input Impedance: 1.5 Kohms Min.; **AC Input Control Models:** Control Signal Range: 9-280VAC. Must Operate Voltage: 90VAC Max. Must Release Voltage: 10VAC Min. input impedance: 40 Kohms Min. TD Series relays are for applications that do not require the features of dual SCR output types. Glass passivated triac with all metallic bonded construction. Internal RC "snubber" network is built in to provide a static dv/dt capability of 100 Volts/microsecond.

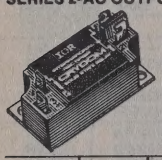
SERIES 2-AC OUTPUT PANEL-MOUNT RELAYS



Solid-state relays combine small size and high current rating. For heat sink or panel mounting. Standard 0.187" push-on terminals; positioned for max. insulation of power and signal circuits. Controlled directly by logic level DC signals and turn on/off in one-half cycle. UL recg. and CSA appr. Int. snubber.

Stk. No.	Type	Line VAC (47-63 Hz)	Max. Load Current @ 40°C Amps rms	1-Cycle Surge Amps Peak	1-Sec. Surge Amps Peak	Net Each 1-9

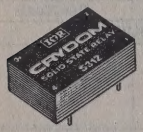
SERIES 3—AC OUTPUT PC BOARD MOUNT RELAYS



CASE STYLE 37
SIZE: 0.80"W x 1.45"L x 0.87"H

CASE STYLE 3
SIZE: 0.80"W x 1.2"L x 0.45"H

CASE STYLE 30A
SIZE: 0.80"W x 1.45"L x 0.70"H

Series 3 combines small size, high current rating and min. off-state leakage in a package designed for solder connection into PC boards. Smaller units are 0.4 cubic inches in volume and require only 1.0 square inch of PCB mounting space. An overall height of 0.45", on case style 3 models, allows PCB spacing on ½" centers. Square rigid pins are suitable for wire wrap or socket type connectors. Control Signal Range is 3.5-8VDC. Must Operate Voltage is at 3.5VDC Max. Must Release Voltage if 1.0VDC Min. Must Operate Current is 12mA Max. Isolation Voltage at 1500 VAC. Operating Temperature Ranges from −30° C to +80° C. All relays are UL and CSA Approved.

Solid State Relays and I/O Switches

IOR CRYDOM SOLID-STATE RELAYS

The Crydom Series 6 Input/Output Modules is a family of microprocessor interface switches designed to meet the demands of a rapidly expanding industrial control market. These reliable, high performance I/O modules provide an electrically clean, photo-isolated (4000 VRMS min.), noise-free interface between programmable controllers, microprocessors and computerized machine controls and external elements such as limit switches, thermostats, pressure switches, motor/motor starters, valves and heaters.

Input Modules. The input modules accept power level field control signals and convert them to photo-isolated logic level signals through noise suppression circuitry suitable for input to a microprocessor or logic system.

Output Modules. Crydom Output Modules accept logic level control signals to switch AC or DC loads up to 3.5 Amps at 45° C ambient temperature. The AC modules have integral snubbers for low power factors loads and also provide zero-voltage switching. DC models incorporate transient voltage suppression.

Buffered Output Modules. Buffered Output Modules contain additional internal amplification to reduce drive requirements to a level suitable for the MOS devices used in many microprocessor systems. To further reduce the need for additional interface components, they are available with both inverting and non-inverting inputs, for 5 volt or 15 volt logic.

AC & DC OUTPUT SOLID STATE RELAYS 3 Amps, 120 and 240 Vac.

The Crydom Series MP is a quality line of SSRs rated 3 amps at 45° C, and feature a compact vertical mount package that occupies only 0.68 square inches of pcb real estate. These SSRs are pin-compatible with the Crydom Series 6 Input/Output Modules and can be plugged into the same sockets. AC models include snubbers for high dv/dt applications and inductive loads, together with zero-voltage switching to reduce high inrush currents and electrical noise. The inherent zero-current turn-off characteristic of triacs and the total absence of arcing contacts, substantially reduces electromagnetic interference and back EMF transients. The built-in photo-coupler provides a high 4000 VRMS of isolation to comply with world-wide electrical specifications. In addition to standard TTL control-type inputs, this series will operate with control signals up to 18V dc. The dc output model includes a built-in zener diode for transient protection.

Standard Size: 0.70"W x 0.40"D x 1.00"H. Overall Ht. 1.25"

General Specifications: Must Operate Voltage: 3.5V dc. Must Release Voltage: 1.0V dc. Input Impedance: 1000 Ohms. Isolation Voltage: 4000V ac. Temperature Range: −40 to +80° C.

Stock No.	Crydom Model No.	Control Voltage Range	Output Ratings	Surge 1 Cycle	Net Each

62F833	MP-DCD3	3.5-18V dc	3A @ 60V dc	*5A dc	12.70	

The D2W202F achieves high performance at a low cost by utilizing the benefits of automatic assembly. A skin tight epoxy coating provides excellent environmental protection while maintaining very high heat transfer. The unit is pin compatible with the indutry standard (Series 6) AC input/output module in-line pattern. It can be soldered directly into printed circuit boards or socket mounted.

A single model operates with line voltages from 60 to 280 VAC. Control signal voltage is 3 to 28 VDC. Must operate voltage is 3.0 VDC max. Must release voltage is 1.0 VDC min. Input impedance is 1.4 K ohms min. Isolation voltage is 2500 VAC. Internal snubber is provided.

Off state DV/DT is 200 volts per micro-second minimum. Operating temperature range from −20 degrees to +80 degrees cen. Dimensions are 1.70" x 1.10" x .47".

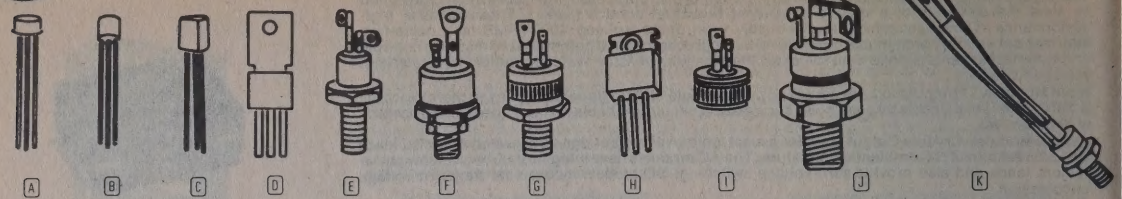
General Electric SCR's For Phase Control



3

"Phase Control" is a term used to describe silicon controlled rectifiers having slow turn-off time. Primary application for a device with relatively slow turn-off time is AC phase control—hence the name "phase control"

This type of device is also used for zero voltage switching and selected pulse application.

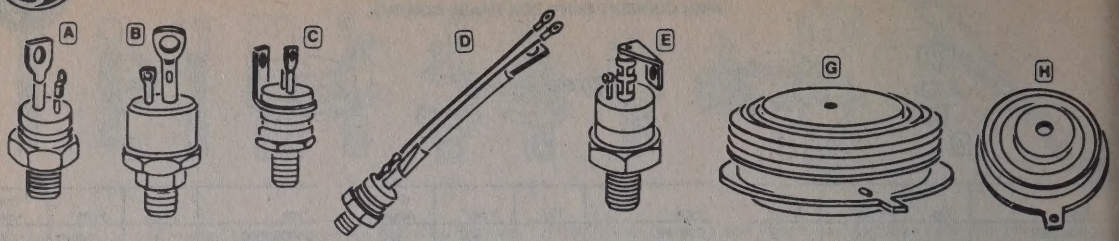
*Repetitive peak forward and reverse voltage.

General Electric SCR's For Inverter Control



3

SCR's in this use category are characterized for turn-off time (commutation speed) capability and other speed characteristics. When designing for speed, the parameter trade offs must be carefully weighed. Thus the large matrix of speed, current and voltage capability for inverter SCR's. As the name implies, major applications for these devices are DC/AC inverters. Additionally, they are used in cycloconverters and other pulse applications requiring high speed capability.

*Repetitive peak forward and reverse voltage.
**Specify suffix 10M or 20M to indicate cutoff time (μ seconds).
†Also available as 2N3649 to 2N3658.

GERMANIUM TUNNEL DIODES

Ideal for high speed switching, 1000 times faster than computer diodes; microwave oscillators and mixers; communications — tuners, converters, detectors and amplifiers: level sensing — sampling (scopes), Schmidt triggers and counters; computer circuits — sense amplifiers, flip-flops, AND-NOR gates.

GENERAL PURPOSE

Series inductance, 0.5 nH. Typical peak voltage. 65 mV.

General Electric Triacs/Triggers/Switches

PLASTIC AND METAL CAN TRIACS

Triac is an AC silicon switch which uses the gate triggered from an OFF-state to an ON-state for either polarity of applied voltage. Triac is also an AC phase controller that performs in a single device the function of two SCR's back to back in controlling heat, light, and motor speed. Plastic contacts feature low cost and reliability. POWER GLAS passivated junctions in rugged and industrial proven packaging are suitable in various types of formed leads (TO-5, TO-66, etc.). Metal can triacs feature POWER GLAS passivated junctions, glass to metal seal, high performance and reliability, transient voltage immunity and comprehensive specifications. Triacs are used in common circuitry in various electrical and mechanical equipment.

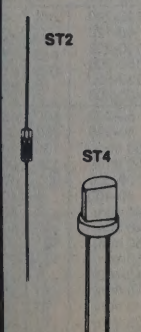
TRIAC TRIGGERS



ST2 (diac) is a silicon bi-directional diode which may be used for triggering triacs or SCR's. It has a thick layer structure with negative resistance switching characteristics in both directions. ST4 is an assymmetrical AC trigger integrated circuit for use in triac phase control applications. This device reduces the snap-on effects that are present in conventional triggers by eliminating control circuit hysteresis. This performance is possible with a single RC time constant, where as a symmetrical circuit of comparable performance would require at least three additional passive circuit components.

Type	V_{S2} Switching Volts Min.	V_{S2} Switching Volts Max.	V_{S1} Switching Volts Min.	V_{S1} Switching Volts Max.	Max. Switching Current µA	Min. Pulse Output Volts
ST2	28*	36*	28*	36*	200	3.0
ST4	7	9	14	18	80	3.5

*For STZ, $V_{S2} = V_{S1} = 10\%$.

HIGH POWER/HIGH VOLTAGE ISOLATED COLLECTOR POWER DARLINGTONS

These devices are designed for use in AC motor controls, UPS systems, and switching type power supplies. Units feature high hFE at rated current and are UL recognized for isolation (2500 V rms), strike, and creep for 460 V systems.

*Includes speed-up diode between emitter and base.

GENERAL ELECTRIC POWER TRANSISTORS

HIGH POWER/HIGH VOLTAGE SWITCHING POWER TRANSISTORS AND DARLINGTONS (TO-3 PACKAGE)

These devices are designed for use in AC motor controls. UPS systems, and switching type power supplies. Units feature high h_{FE} at rated current and are UL recognized for isolation (2500 V rms), strike, and creep for 460 V systems.

NPN FAST SWITCHING TRANSISTORS

HI-LINE™ PACKAGE FEATURES:

- 2500 volt (RMS) electrically isolated package—UL recognized (File No. E60692)
- Meets UL creep and strike distances for up to 600 volt (RMS) line applications
- Low thermal resistance
- High thermal cycling capability
- Extended blocking life capability
- Nickel plated power terminals
- 110 FASTON gate terminals
- Modular building block design flexibility

General Electric Power Modules & Hiline

APPLICATIONS:

- DC motor controls
- AC motor controls
- Power supplies
- Lighting controls
- Heating controls

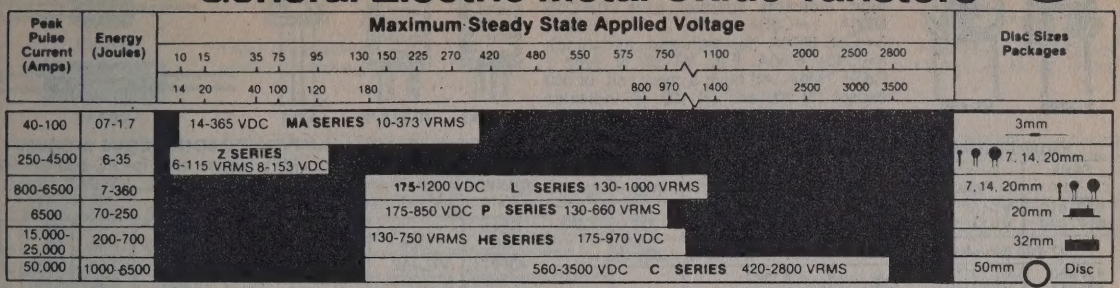
General Electric Metal Oxide Varistors



Varistors are voltage dependent, symmetrical resistors which perform in a manner similar to back-to-back zener diodes in circuit protection but offer advantages in performance and economics. When exposed to high energy voltage transient, varistor impedance changes from a high standby value to a low conducting value thus clamping the voltage to a safe level. Dangerous energy of incoming high voltage pulse is absorbed by the varistor, thus protecting voltage sensitive circuit components. Eliminates follow-on currents, extends contact life and protects circuit insulation. Applications include component and system voltage transient protection in inductive and transformer switching circuits, regenerative loads, switching magnetic amplifiers; contact arc suppression-reduction of lightning effects. If nonsinusoidal wave input is present, peak voltage input values should be used to select model.

P/HE SERIES

Power dissipation: up to 15 watts at 70°C mounting tab temperature.
Current: Can handle up to 2000 Amps.

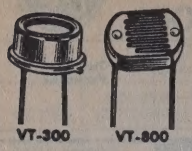
VOLTAGE SPIKE PROTECTOR

GESP752 Voltage spikes (due to lightning strikes near power lines, switching appliances ON/OFF) can destroy solid-state components. VSP absorbs this energy allowing a safe voltage level to pass. Just plug into outlet. (Not lightning arrestor.)

Photoconductive Cells



Cells ideal for circuit board mtg. 2nd digit indicates spectral peak. 0=CdS 5650A, 1=CdSe 7350A, 2=CdS 5150A, 3=CdS 5500A (for high spd., switching), 4=CdSe 6750A. E.g.: VT-312 is Type 1 CdSe 7350A. All have a max. volt. of 300 except (*) 200 and (†) 100. ($) indicates max. dark resis. (ohms) 5 sec. after 2 fc.

Field Effect LCDs: These liquid crystal displays feature state-of-the-art manufacturing and processing techniques plus materials of the highest quality; and are offered in transmissive, reflective, and transflective modes. The high quality connector pins, resistant to fatigue and corrosion, are fabricated from phosphor bronze. Pinless versions of these LCDs are also available. The standard operation temperature range is –20°C to + 55°C but a wide temperature range of –20°C to + 80°C is also available. For special applications requiring colored readouts, the LCDs are offered in red, green and blue via the use of specially processed polarizers. All LCDs are supplied with dual-in-line connector pins with neutral polarizer/reflector/transflector combinations. Colored LCSs and wide temperature versions command a 10 percent price adder respectively. Contact Newark Electronics for more information.

Typical Operating Characteristics 5 VRMS, 32 Hz, 25° C

Parameter	Liquid Crystal Materials: Std. Temp. Typ.	Std. Temp. Max.	Wide Temp. Typ.	Wide Temp. Max.	Unit

GENERAL INSTRUMENT

Chicago Miniature LED's

Low power consumption for IC compatibility and cool operation. Long life virtually eliminates replacement. Solid lens construction — shock proof. Very intense light source up to 12.0 mcd luminous intensity at 10 mA. Subminiature size tapered short lens T1¾. Solderability problems are eliminated because all leads are silver plated.

LED PANEL MOUNTING HARDWARE

For mounting in panel thickness up to .125" (CM-4-Series) or up to .187" (4999 Series). Ideal for array designs. Easily mounted from panel front.

Only Sold in Multiples of 5

- **Sizes from .300" to .800"**
- **Seven segment displays**
- **Wide range of colors including high performance red**
- **10 and 14 pin dual-in-line packaging**

Fast switching—excellent for multiplexing—low power consumption—bold segments that are highly legible—solid state reliability—long operational life—impact resistant plastic construction—directly compatible with IC logic—high brightness, high contrast. The world's finest quality LED numeric displays. Over 50 different styles from which to choose. Every display is matched and coded for brightness and color hue. We have single, 1½ and multiple digit faces with decimals. Common anode or cathode.

0.400" SEVEN-SEGMENT LED DISPLAYS

Standard 14-pin dual-in-line packaging—common anode or common cathode models—categorized for luminous intensity—wide viewing angle of 150°—high efficiency red.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9046	4905A	Red*	Uni (com anode or com cathode), overflow ±1, right-hand dec	2.65	2.15
81F9047	4910A	Red*	Com anode, right-hand dec		
81F9048	4940A	Red*	Com cathode, right-hand dec		
81F9036	4980A	Red*	Com cathode, right-hand dec		

0.400" SEVEN-SEGMENT LED DISPLAYS

Standard 14-pin dual-in-line packaging—common anode or common cathode models—categorized for luminous intensity—wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9027	4610A	ORG.	Com anode, right-hand dec	2.10	1.60
81F9024	4640A	ORG.	Com cathode, right-hand dec		
81F9072	4705A	Red	Uni. (common anode or com cathode), overflow ±, right-hand dec		
81F9025	4710A	Red	Com anode, right-hand dec		

0.400" SEVEN-SEGMENT LED DISPLAYS

Standard 10-pin dual-in-line packaging—H.P. compatible, common-cathode displays available in red, green, yellow, orange, and high efficiency red—categorized for luminous intensity, wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9032	4580A	GRN.	Com cathode, right-hand dec	3.05	2.40
81F9033	4680A	ORG.	Com cathode, right-hand dec	3.05	2.40
81F9034	4680A	Red	Com cathode, right-hand dec	2.10	1.60
81F9035	4880A	YEL.	Com cathode, right-hand dec	3.05	2.40
81F9036	4980A	Red*	Com cathode, right-hand dec	2.65	2.15

0.500" SEVEN-SEGMENT LED DISPLAYS

Two-digit and four-digit displays prematched for brightness and hue—end stackable—sculptured font for easy reading—available in red, yellow, and orange.

TWO-DIGIT

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9059	56120	ORG.	Com anode, direct drive	4.95	4.20
81F9060	56320	ORG.	Com anode, direct drive		
81F9061	58120	YEL.	Com anode, direct drive		
81F9062	58320	YEL.	Com cathode, direct drive		
81F9063	59120	Red*	Com anode, direct drive		
81F9064	59320	Red*	Com cathode, direct drive		

FOUR-DIGIT

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9065	56240	ORG.	Com anode, multiplexed	9.90	8.40
81F9066	56440	ORG.	Com cathode, multiplexed		
81F9067	58240	YEL.	Com anode, multiplexed		
81F9068	58440	YEL.	Com cathode, multiplexed		
81F9069	59240	Red*	Com anode, multiplexed		
81F9070	59440	Red*	Com cathode, multiplexed		

0.560" SEVEN-SEGMENT LED DISPLAYS

High efficiency orange, single or double display—categorized for luminous intensity—wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9029	6640	ORG.	1 digit, com cathode, right-hand dec	4.60	3.65
81F9028	6680	ORG.	2 digit, com cathode, right-hand dec	3.15	2.50

0.560" SEVEN-SEGMENT LED DISPLAYS

Standard high performance red—single- or double-digit displays—categorized for luminous intensity—wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9023	6710	Red	2 digit, com anode, right hand dec	3.55	2.80
81F9074	6730	Red	1½ digit, overflow ±1.8, right-hand dec		
81F9073	6740	Red	2 digit, com cathode, right hand dec	2.20	1.75
81F9031	6780	Red	1 digit, com cathode, right-hand dec		

0.560" SEVEN-SEGMENT LED DISPLAYS

High-efficiency red—single- or double-digit displays—categorized for luminous intensity—wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9049	6910	Red	2 digit, com anode, right-hand dec	4.20	3.35
81F9050	6930	Red	1½ digit, com anode, overflow ±1.8, right-hand dec		
81F9051	6940	Red	2 digit, com cathode, right-hand dec		
81F9052	6950	Red	1½ digit, com cathode, overflow ±1.8, right-hand dec		
81F9053	6960	Red	1 digit, com anode, right-hand dec	2.30	1.85
81F9054	6980	Red	1 digit, com cathode, right-hand dec		

0.800" SEVEN-SEGMENT LED DISPLAYS

High efficiency red—common cathode or anode models—categorized for luminous intensity—wide viewing angle of 150°.

Stk. No.	Type CMN	Color	Description	1-99	100-999
81F9055	8910	Red	Com anode, right-hand dec	2.94	2.40
81F9056	8930	Red	Com anode, ±1 overflow, right-hand dec		
81F9057	8940	Red	Com cathode, right-hand dec		
81F9058	8950	Red	Com cathode, ±1 overflow, right-hand dec		

DIALIGHT Readouts And Displays

.300" CHARACTER HEIGHT

- .300" High Characters
- High Brightness
- Low Power Requirements
- Standard 14 Pin DIP
- Single-Plane Wide Angle Visibility

Solid state LED readout, character height .300". Standard 14 pin DIP. Compatible with most TTL and DTL circuits. Typical static forward voltage: 1.7V.

Stk. No.	Type	Description	1-9	10-99	100-249

- **High Luminus Intensity**
- **Low Power Consumption**

521 Series. High luminous intensity. Low power consumption. IC compatible. Vibration/shock resistant. Solid state reliability, life measured in years. Wide viewing angle. Many applications including panel lighting, circuit status indicators, numeric or alphanumeric displays, or visual indicators.

5x7 DOT MATRIX ALPHA-NUMERIC DISPLAY

Solid-state visible dot matrix alpha-numeric display with clear transparent plastic encapsulation. 0.300" high character. 5x7 array with X-Y select and decimal. Compatible with UASCII and EBCDIC codes. Left hand decimal point. Typical static forward voltage: 1.6V.

Stk. No.	Type.	Description	1-9	10-99	100-999	1000-2499
25F904	745-0008	BCD Display	14.25	11.05	10.31	9.10

25F908	501-0702-009	Connector	2.52	2.17	1.83	1.54

NUMERIC DISPLAY

Solid-state visible displays with integral TTL MSI circuit chip with latch, decoder, and driver. 0.270-inch-high character. Left hand decimal point. Supply voltage, VCC: continuous 5.5V.

General Instrument offers a broad line of discrete light emitting diode products to provide a wide selection of off-the-shelf products to meet a customer's particular requirements.

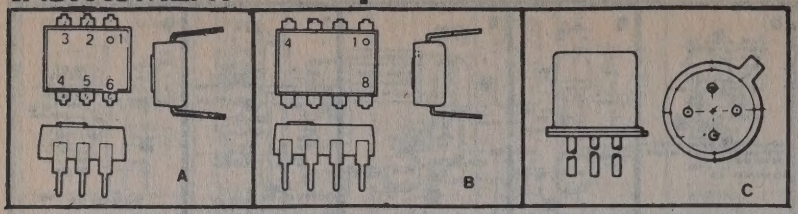
A broad selection of packages, lens effects, color power, and brightness is available. Product lines are continually being updated to provide modern, functional devices for customer use. New types added to stock as they are introduced.

(a) MV5094 contains two red diodes connected inversely parallel. Unit operates on either polarity DC current or AC current. Wavelength is 660 nm. For this unit, I^2T (0.1% duty cycle .... 2.5 x10^{-4} amps^2 sec.)

(b) MV 5491 contains one red and one green diode inversely parallel. Unit emits green light (570 nm) with one DC polarity and red light (660 nm) with the opposite DC polarity.

All specifications are typical unless otherwise specified.

GENERAL INSTRUMENT Optoelectronics and Infrared Devices



OPTOISOLATORS

- **IC compatible**
- **Physically small**
- **Rugged Construction**

Standard line of General Instrument optoisolator products combine an infrared solid state emitter with a light detecting output stage in a single IC compatible package.

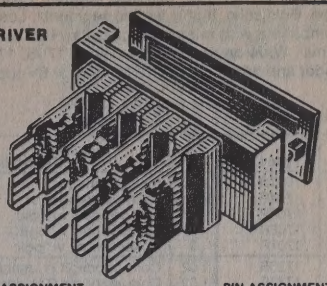
LED Decoder Drivers, Mounting Hardware

IEE

SERIES 1760 LED DISPLAY DECODER/DRIVER



- Easy mounting
- Can be used with standard PC connector
- Operates with LED readouts

Designed to be integrally mounted onto the back of Series 1750/1751/1752-OX (wire-wrap terminal models). Accepts either four line, BCD or serial, pulse count inputs; inherent memory capability. Models 1760 series are designed to operate with common Anode readouts only. When mounted, extends behind the main body of the mounting hardware (measured from the back face of the socket) as follows: —01, —03, are 1.75" (44.5 mm); —02, —04, are 2.18" (55.4 mm). Can be used with standard PC connector, or directly solder terminated.

UNIVERSAL MOUNTING HARDWARE FOR LED DISPLAYS

MODELS 1750 AND 1751

For any 14-16 pin DIP package with .3" row spacing. Consists of a one-piece black nylon bezel requiring a single rectangular panel cutout, a red circularly polarized viewing screen and a universal socket body ready for wire wrap or PCB insertion. Oper. temp. 0° to +70°C. Display brightness is inversely related to oper. temp. Last two numbers in type are decades per assembly. Amber or neutral polarized screen available on spec. order.

MODELS 1752 AND 1754

1.3" window accommodates characters up to 1.1" with wide-angle viewing. For standard 14-, 16- and 18-pin DIP packaged LED or planar displays with .300" (model 1753) and .600" (model 1752) on-centers spacing; .900" c/c digit spacing, 1 through 8 digit configurations. Last two numbers in type number are decades per assembly. One-piece bezel. Non-glare, high contrast view screen.

LED Digital Displays

Common anode or common cathode models. Fast switching, excellent for multiplexing. Low power consumption. Bold solid, highly legible segments. Long operation life. Impact resistant plastic construction. Directly compatible with integrated circuits. High brightness and contrast. Right hand (R.H.) or left hand (L.H.) decimal. Wide angle visibility. Types 1705, 1706, 1707 have internal TTL MSI chip and counter, latch, decoder and driver. Operates from 5V or 6V supply. Suffix in type number denotes color: E-Orange; R-Red.

INCANDESCENT FLATBACK DIGITAL DISPLAYS

Slim profile, seated depth of only .248" and less than .5" overall depth. Volumetrically compact packaging. Ideal for applications where panel depth, wide angle readability, high brightness and ease of installation are major design considerations. 7-segment, tungsten filament, .427" (FFD-11 and FFD-41) or .614" (FFD21 and FFD-51) high characters with decimal. AC, DC or pulse mode operation: standard TTL driver/decoder compatible. Temperature range of —55 to 70°C. Low power: 15 mA/segment ⅛ 5 VDC. Designed for 100,000 hours average life expectancy (40,000 for FFD-41 and FFD-51). Standard DIP packaging; 14 pin FFD-11 and FFD-41, 16 pin FFD-21 and FFD-51. Use 1751 mounting hardware for FD-11 and FFD-41; use type 1753 for FFD-21 and 55D-51.

Liquid Crystal Displays

- **Low, 25 μw, Typical Average Power Consumption**
- **CMOS Compatible Drive Characteristic**
- **High Stability, Hermetically-Sealed Displays Offer Long Life and Reliability**
- **Custom Models Available to Meet Every Need**
- **Rugged DIL permanently fixed .250" DIL pins. Installed That Allow Simple Field Replacement of Displays Without Desoldering From User's PCB**
- **Models using elastomeric termination as well as models with hi-temp fluid available on special orders.**

Field effect liquid crystal displays designed for use in mild environments. Equipped with reflective polarizers and permanently fixed DIL pins .250" length for ease in mounting to PC boards or standard sockets. Can be displayed continuously for up to two years w/o battery change. Compatible with low power, low voltage, CMOS drive circuitry. Crystal material is environmentally tested for stability and the package hermetically-sealed to assure a long life of greater than five years. A variety of models available to fill almost any need. Choice of voltages from 3 to 9 volts. Typical average power consumption is 25μw.

IEE FLIP VACUUM FLUORESCENT DISPLAYS

THE DISPLAY MAKERS

FEATURES

- 5×7 dot matrix for bright, clear display of upper and lower case characters
- On-board microprocessor controller
- Supports many ASCII control functions including carriage return, line feed, advance or backspace cursor
- 8-bit bi-directional bus requires minimum hardware to interface to most microprocessors
- TTL level serial operation at 1200 baud
- Requires only +5VDC power supply
- Pleasant blue-green display spectrum is filterable to blue, green, aqua or yellow
- Data may be written to or read from the module
- Up to 10,000 character per second data rate
- ECMA General European, German or Scandinavian font alternates under software control

APPLICATIONS

- Numerical control machine tools
- Telecommunications devices
- Medical equipment
- Copiers
- Automatic labeling equipment
- Mobile communications
- Automated banking terminals
- Point-of-sale terminals
- Remote data entry terminals
- Alarm, safety and security systems
- Simulators
- Automatic test equipment
- Automotive diagnostic equipment
- Energy management systems
- TTY terminals for the deaf

4

Tech. DATA:

The microprocessor-based serial data converter module (SDCM) was developed for applications where remote serial communication with improved noise immunity is desired with an IEE Flip Alphanumeric Display. Model 26685-03 will interface with all the Flip Alphanumeric Vacuum Fluorescent Display Modules.

The data converter has provisions for receiving data at three input levels: RS-232-C, 20 ma current loop or RS-422 differential TTL. Upon receipt of the serial asynchronous data, the SDCM provides parallel data and control signal formatting to the selected display module.

If you need increased versatility, the SDCM provides many standard features, of which one combination is sure to suit your particular application. The SDCM offers selectable serial data rates (baud rates) of 110, 300, 1200, 2400, 4800, 9600 and 19200. Parity is also selectable for even, odd or no parity. To further facilitate the interfacing of the host to the display system via the SDCM, error detecting of both parity and data rate is also provided. Thus, each character received with an error is replaced with the appropriate error symbol. The symbol used to indicate parity errors is "&" and the symbol used to indicate data rate errors is the "@."

To complete your system, the auxiliary 8-bit parallel input port allows communication to the host system from a remote parallel data source. In this configuration, the SDCM can receive parallel data and transmit it to the host as an RS-232 data transmission (provisions for data transmission in either RS-422 TTL and 20 ma current loop are presently not available). This port may be operated concurrently with the remote panel to allow easy implementation of a remote terminal with the addition of a user supplied keyboard, or other parallel devices.

NEWARK IS YOUR ONLY NATIONAL DISTRIBUTOR OF I.E.E. FLIP DISPLAYS IN THE U.S. AS TECHNOLOGICAL ADVANCES ARE MADE OTHER DISPLAYS CAN BE ORDERED THROUGH YOUR LOCAL NEWARK OFFICE.

Semiconductor Coolers WAKEFIELD

Literally hundreds of heat dissipation products for almost every conceivable type of electronic cooling application. Everything from relatively simple extruded and stamped heat sinks to sophisticated heat exchangers, forced convection package assemblies and liquid-cooled plates, all with one purpose in mind: to keep the temperatures of various electronic components at desired safe operating levels.

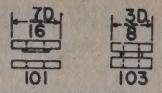
DELTA DIVISION

WAKEFIELD Semiconductor Coolers & Hardware

TEFLON INSULATORS

Insulates heat sinks from chassis, eliminating mica insulators between sink and semiconductor. ⅛ to 3½ oz.



Stock No.	Type	For Type	Read.	Each 1-499	500-999	1000-4999	5000-9900

58F412	107	Same as 103	2	.77	.69	.63	.58

TYPE 120, 121 THERMAL COMPOUND

Used between semiconductor and heat sink, or for thermoelectric modules. Zinc oxide crystals of **Series 120** in a silicon grease will increase thermal conductivity between semiconductor and heat sink. **Series 121** is synthetic oil based. Ideal for applications where silicon oil based compounds are not allowed.

Stk. No.	Type	Quantity	1-9	10-24	25-49	50-99
58F470	120-2	2 oz.	4.07	3.83	3.35	3.22

30F1294F	121-2	2 oz.	3.55	3.34	2.91	2.80

THERMALLY CONDUCTIVE ADHESIVE

Type 152. High conductivity adhesive used: As general adhesive, for bonding semi-conductors to chassis heat sinks, fabricating heat sinks or thermal links, for permanent bonding of all materials with highly thermal conductive interface. Yields high bond strength. **Type 155** is noted for its ease of application. Packaged 1½ oz. hard, 1½ oz. resin. Maximum operating temperature, 65°C.

Temp. range −70°F to +300°F.

Stk. No.	Type	Size	1-9	10-24	25-49	50-99
58F345	152-1-A	1 oz.	6.37	5.46	5.22	4.77

58F1364	155	1½ oz.	7.44	6.64	5.98	5.18

VERTICAL MOUNTING BRACKETS

Meets vibration requirements of Mil 202B. Two brackets required per sink. To insulate, use Teflon insulator #103. Heat sinks 401 and 403 use #111, 421 uses #113. Wt., 10 oz.

Stk. No.	Type	Pkgs. of 2 1-99	100-499
58F525	111	.53	.47
58F526	113	.59	.52

SERIES 170 INSULATING WAFERS

For TO-3 and TO-66 transistors. Features thermally conductive dielectric coating providing excellent thermal path between the case and heat sink. Coating on transistor side only, including edges, hole. I.D. **Sold in packages of 10. Series 177.** Beryllium oxide thermal conductor like aluminum, but also an excellent electrical insulator.

225 Series Heat Sink For TO-5 Case Styles

The 225 Series heat sink is a press-on, low cost unit for TO-5 case devices. The 225 comes in four heights from 0.25" to 1.00." Finished in Black anodized.

Stk. No.	Type	Height	1-199	200-400	500-900	1000-4900

SERIES 260 CUP CLIPS FOR TO-5 AND TO-18

260-10SH5B Stud Mtg. for TO-5 | 260-4SH18E Stud Mtg. for TO-18 | 26X-4T5 Tapped Base | 260-P18 Plain Base

Beryllium copper cup clips with brass bases for TO-5 case style transistors except (*) for TO-18. "E" suffix are epoxy insulated. "B" suffix are beryllium oxide insulated for applications requiring low stray capacity. No suffix are non-insulated and are soldered together with 63/67 tin lead alloy. Max. temperature is 300°F. Size: 0.29" I.D. cup, hex base .37" across flats for TO-5; .170" I.D. with .25" hex for TO-18. **Sold in packages of 10.**

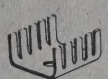
Semi Conductor Coolers & Hardware

WAKEFIELD DELTA DIVISION

270, 271, 272 and 280 Series Heat Sinks for TO-220 Style Devices. The 270, 272, and 280 Series heat sinks have a .375" height. The 272 heat sink is designed to accept two TO-220 devices. The 271 is added to these on top of the TO-220 device when additional cooling in required.

Stk. No.	Type	Dimensions L×H×W	EACH
81F042	270AB	.53×1.75×.375	.16
81F043	271AB	.70×1.75×.50	.16
81F044	272AB	1.45×1.75×.375	.21
81F045	280AB	.70×1.75×.375	.16

273 Series Heat Sink For Plastic-Cased Devices. The 273 Series heat sink is a 0.75" wide, 0.375" high heat sink for plastic-cased power SCRs and transistors.

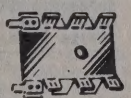


Stk. No.	Type	Dimensions L×H×W	EACH
81F046	273AB	.75×.75×.375	.13

274 Series Heat Sinks For Plastic-Cased Devices. The 274 Series heat sinks are low cost units which have height profiles as low as 0.375". Designed for plastic-cased power SCRs or transistors, 274 Series are available in two fin heights.

Stk. No.	Type	Dimensions L×H×W	EACH
81F047	274-1AB	.75×3.75×.52	.13
81F048	274-2AB	.7× .50×.52	.13

SERIES 287 AND 288 HEAT SINKS



Designed to be vertical inserted in printed circuit board. As PC board is wave soldered feet are also soldered into place. Ideal for hand soldering. Made with nickel plated stainless steel feet. Finished in black anodized aluminum.

Stock No.	Type	Height Inches	1-499	500-999	1000-4999	5000-9999
30F1286	287-1AB	.50	.36	.30	.26	.23

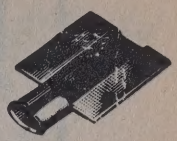
HEAT SINK FOR TO-92 TRANSISTOR

Type 292. Heat Sink accommodates most TO-92 plastic transistors for heat dissipation. Natural convection characteristics show that for power dissipation of .20 watts, collector lead temperature rise above ambient is 18°C. Made of type 6061-T6 Aluminum or copper with black "C" finish, or plain.



Stock No.	Type	Material	Finish	Each 1-499	500-999	1000-4999	5000-9999

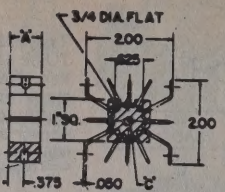
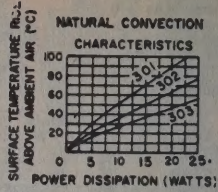
300 Series





300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 1 1/16" hex case. Semiconductor mounting surface and one mounting foot unanodized. Type no. suffix indicates mtg. accommodations.

400 SERIES NATURAL CONVECTION COOLERS

Type 401 has thermal resistance of 1.8°C W at medium power.

Type 413, 1.4°C/W natural convection, 0.3°C W moderate air flow. Type 433, 70°C rise at 100 W power dissipation.

Type 441 with 400 sq. in. cooling area, 55°C/W at high power levels.

Type 423, 0.8°C/W at higher power levels.

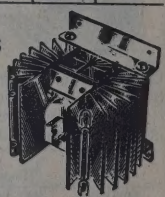
SERIES 490 KING-SIZE HEAT SINKS



- Aluminum Alloy
- Mounts & cools multicell 240/650 amp rectifiers
- Four mtg. lugs per end

Designed to mount and cool multicell 240/650 amp rectifiers and stud mounts. Takes square plate types as large as 3 1/2" x 3 1/2". Type 490-12, under natural convection conditions, will permit case temperature rise of only 110°C at 600 watts dissipation, with 3 1/2" sq. rectifier. Aluminum alloy; black anodized finish. Four mounting lugs on each end

Semiconductor Coolers & Hardware

WAKEFIELD DELTA DIVISION

SERIES 630 HEAT SINKS FOR TO-3 AND TO-66

631 632 633

Provides maximum cooling per unit cost. Suffix -3 in Type No. indicates unit is for TO-3 transistor; suffix -66, for TO-66 transistor. Made of type 1100-H14 aluminum, .062" thick. Black anodized (suffix B) or plain (suffix P) finish. Temperature rise for 5 watts: type 631, 68°C; type 632, 57°C; 633, 45°C.

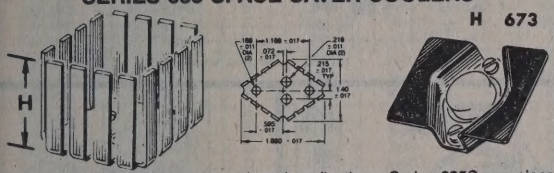
SERIES 635 SPACE SAVER COOLERS

H 673



Lightweight heat sinks for circuit-board applications. Series 635S one-piece design conforms to diamond shape of the TO-3, TO-66 and TO-220 packages for minimum space usage in high-density appl. Directly interchangeable with other TO-3 heat sinks. Last digit of Type No. indicates hole pattern: '2' for standard TO-3, '3' for a TO-66. Digits after series no. indicates height in inches. Series 673 low profile design for circuit boards. 1B for 1¾" width, and 2B for 2¾". Universal hole pattern accommodates TO-3, TO-66 or TO-220 style devices.

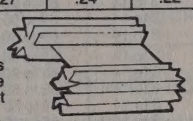
637 SERIES WAVESOLDERABLE HEAT SINKS FOR PLASTIC-CASED DEVICES



The 637 Series are high performance heat sinks designed for plastic power transistors. Solderable pins allow for vertical mounting on printed circuit boards. These heat sinks come in four heights.

Stk. No.	Type	Dimensions L x H x W	Each
81F055	637-10ABP	.50 x 1.00 x .437	.43
81F056	637-15ABP	.50 x 1.50 x .437	.47

81F058	637-25ABP	.50 x 1.50 x .437	.58

SERIES 652, 653, 654 HEAT SINKS FOR DUAL INLINE DEVICES

The 652 series and 653 series are bonded to the top surface of Dual Inline packages. The 652 series fits 24, 28, 40 and 64 pin devices, the 653 series fits 14 and 16 pin devices. They are bonded using 152 or 155 Delta Bond. The 653 series is designed for 14 or 16 pin devices and consists of a top and bottom piece.

Stk. No.	Type	Dimensions H x L x W	Each
81F049	652-5AB	.19 x 1.25 x .52	.34
81F050	652-6AB	.19 x 1.45 x .52	.39

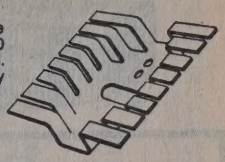
81F054	654-HB	.81 x 1.09 x .75	1.01

673 SERIES LOW COST HEAT SINK FOR TO-3, TO-66 AND TO-220 CASES

The 673 Series heat sink is designed for use with either the TO-3, TO-66, or two TO-220 style devices where low height is required. This is a low cost series used in high density packaging applications.



Stk. No.	Type	Dimensions L x H x W	Each
81F059	673-1AB	2.00 x 1.75 x 1.20	.29
81F060	673-2AB	2.00 x 2.25 x 1.20	.32

SERIES 680 CIRCUIT BOARD COOLERS

Provides optimum natural convection cooling per unit volume occupied above the circuit board. Mounting in any position is possible since the cooler permits free air flow in any direction. High thermal conductivity aluminum alloy. Temp. rise: 680-.5, 90°C at 10 watts; 680-.75, 90°C at 13 watts; 680-1.0, 90°C at 15 watts, 680-1.25, 100°C at 21 watts. All have 1.81" sq. base with 1.50" between mtg. holes. 1.3 to 1.9 oz.

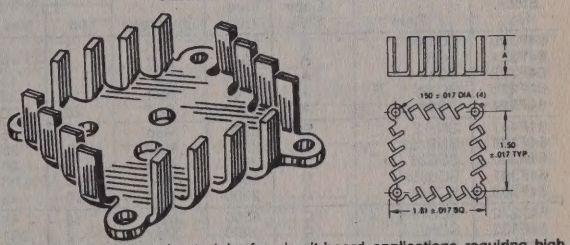
SERIES 689 SLANTED FIN COOLERS



Low-cost one-piece heat sinks for circuit-board applications requiring high thermal efficiency. Interchanges directly with other TO-3 heat sinks. Air movement from any direction is diverted to the center of the heat sink to create turbulence and improve heat transfer. Last digit of Type No. indicates hole pattern: '2' for a standard TO-3, '3' for TO-66, and '4' for TO-220. Digits after series number indicate height in inches.

TYPE 690 CIRCUIT BOARD HEAT SINKS

Deisgned to give the most power dissipation per unit cost. Dissipation of 10-20 watts is obtainable. Made of 1100 alloy aluminum in mounting patterns for TO-3 or TO-66 JEDEC packages. Available plain (suffix P) or black anodized (suffix B).

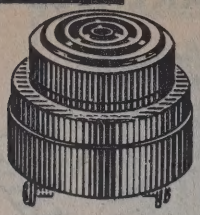
Solid State Signals



AUDIBLE ELECTRONIC SIGNAL

- Compact and Lightweight
- Completely Solid State
- No Moving Parts
- No Arcing, RF Noise or Mechanical Wear
- Salt Spray Resistant

Operating voltage ranges from 1 volt to 250 volts. All Sonalerts, excluding AC models, are polar devices and will not operate when voltage is applied in reverse direction. Electrical power is converted to sound by means of a piezo-electric transducer operating substantially at reasonance in a solid state oscillator. Sound output depends upon part number and voltage. Sonalert will operate and produce sound over a temperature range of −30°C to +65°C (ambient) surge voltage is 15% over maximum rated voltage applied for less than one minute.

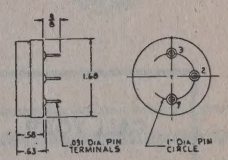
Low profile pin mounted. Hand or wave soldered. Sound level: 64–78db @ 2900 Hz. Oper. current: 2-12 mA max. VDC: 6-16 (except SBM2; 1-5 & SBM428; 4-28).



PT-3 DRIVEN TRANSDUCER

2900 HZ piezo electric transducer package is designed for direct insertion into an oscillator circuit sizes. 1.65D x .343H. Mtg. Holes .046 ± .033 D on a printed circuit board, and will produce an audible signal when connected in 1.55 circle Case style F.

81F447 Model PT-3 ..... NET 2.60

Variable FREQUENCY DRIVEN TRANSDUCER

This transducer is designed to produce an audible signal when connected to an external source of audio frequency voltage. Typical input current 20mA.

STOCK NO.	TYPE	CASE STYLE	HGT.	AUDIO INPUT	FREQ. RANGE	MAX. V	1-24	25-49	50-99	100-249	250-499	500-up

*May be driven from CMOS or TTL amplifiers orgates maximum input voltage 30 Vp-P.

Receiving, Industrial & Special Purpose Tubes

LARGEST STOCKS OF MAJOR BRANDS

Whatever your tube needs—standard receiving, industrial or special purpose types—Newark can quickly fill your order. We can ship OEM quantities at OEM prices directly from stock. Just order by tube type and we will ship one of the leading manufacturer's tubes to fill your order.

AS NEW TUBES TYPES ARE RELEASED, NEWARK WILL STOCK THEM.

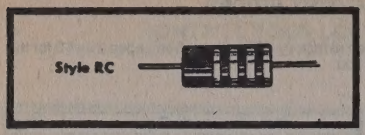
Allen-Bradley Carbon Composition Resistors

INDUSTRIAL GRADE AND MIL-R-11 STYLE RC



Hot-molded fixed composition resistors are designed for general purpose use in electronic equipment, and are unequaled for uniformity, predictable performance, appearance, and freedom from catastrophic failure when used according to published ratings and recommendations. The tightly compressed resistance material has a large cross-section resulting in low current density and high overload capacity. Uniformity of the material reduces hot spots and noise.

STYLE RC 5% TOLERANCE (SOLD IN STANDARD PKG. ONLY)

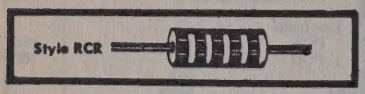
ESTABLISHED RELIABILITY MIL-R 39008 STYLE RCR



Style RCR resistors not only meet the requirements of MIL-R-39008, but also far exceed the "S" level of established reliability 0.001% failure rate per 1000 hours, Resistors are available in "S" level reliability in all five wattage sizes over the entire resistance range. The "S" reliability level is indicated by a yellow 5th color band on body.

HOW TO ORDER

A-B INDUSTRIAL GRADE

EB — 514 — 5 —
(A) (C) (D)

MIL-R-11 STYLE RC

RC20 — GF — 514 — J —
(A) (B) (C) (D)

MIL-R-3900R STYLE RCR

RCR05 — G — 541 — J — S
(A) (B) (C) (D) (E)

(A) A-B Type No. or MIL-Style No.

A-B Type	MIL-R-11 Style	MIL-R-39008 Style	Rating, Watts
BB	RC05	RCR05	⅛
CB	RC07	RCR07	¼
EB	RC20	RCR20	½
GB	RC32	RCR32	1
HB	RC42	RCR42	2

(B) For MIL types only; maximum ambient temperature and resistance-temperature characteristic per MIL-R-11 or MIL-R-39008. See Allen-Bradley **Publication EC21** for actual performance limits.

(C) Three-digit number represents resistance. First two digits are significant figures, third is number of zeros that follow. **For values less than 10 ohms:** Industrial Grade; substitute **G** for third digit, making desired resistance value the first two digits multiplied by 0.1—e.g., **27G** = 2.7 ohms; for MIL-R-11 and MIL-R-39008 substitute **R** for decimal point—e.g., **2R7** = 2.7 ohms.

(D) Tolerance: Code for ±5% is **5** for Industrial Grade, **J** for MIL types; ±10% is **1** for **Industrial** Grade, **K** for MIL types.

(E) MIL-R-39008 resistors only; expresses Failure Rate Level at 50% rated wattage in % per 1,000 hours: M = 1.0%, P = 0.1%, R = 0.01%, S = 0.001%. Available only in "S" level.

Precision Resistors

METAL FILM RESISTORS—MILITARY TYPE, 1% TOLERANCE

All popular valves are stocked in-depth. It is not feasible to inventory the thousands of possible resistance values. Contact your local Newark Branch for availability. Manufactures minimums on non-standard values may apply.

Meets a variety of industrial and military applications. Vacuum deposited metal film resistors have inherently good RF characteristics and low noise level. Flame retardant epoxy coating provides excellent moisture protection. Meets or exceeds the electrical, environmental, and dimensional requirements of MIL-R-10509F and MIL-R-22684. Dielectric strength: CMF-55: 450VAC; CMF-60: 750VAC; CMF-65: 900VAC. Solder-coated copper leads.

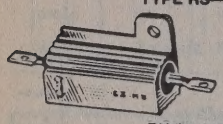
Standard resistance values are obtained from the decade table by multiplying by powers of 10. Ex.: 13.3 can be 13.3, 133, 1.33K, 13.3K: 133K, or 1.33MΩ.

TYPE RS—MIL 1% R-26 (MIL-R-23379)



Type RS. These should be specified when space is at a premium and when precision and power are needed. They are of the conventional type with pigtail mounting leads. They are completely protected and silicone sealed. Surpasses Mil-R-26.

TYPE RH MIL-R-18546

Designed to meet MIL-R-18546 specifications. Provides a flat surface and recommended for chassis mounting to assure proper heat dissipation. Molded construction and gold anodized finned-aluminum radiator housing. 100% impervious to moisture and salt spray. Heavy duty leads.

RESISTOR NETWORKS AND OSCILLATORS

DALE®

CSC (COATED) SINGLE-IN-LINE THICK FILM RESISTOR NETWORK

CIRCUIT APPLICATION.

CSCXXA-01 single-in-line resistor networks provides choice of 3, 4, 5, 6, 7, 8, 9, 10 or 11 nominally equal resistors, each connected to a common pin (Pin No. 1). Commonly used in the following applications: "Wired OR" Pull-up; Power Gate Pull-up; MOS/ROM Pull-up/Pull-down; Open Collector Pull-up; TTL Input Pull-down; TTL Unused Gate Pull-up. .175" [4.44] maximum seated height. Low profile for high density packaging. Low temperature coefficient ±200 PPM/°C (−55°C to +125°C standard). Resistor elements protected by tough epoxy conformal coating. Power Rating: .19 watt/resistor; 4 pin = .57 watt, 5 pin = .76 watt, 6 pin = .95 watt, 7 pin = 1.14 watts, 8 pin = 1.33 watts, 9 pin = 1.52 watts, 10 pin = 1.71 watts, 11 pin = 1.9 watts, 12 pin = 2.09 watts max. @ 25°C.

SINGLE-IN-LINE SERIES MSP THICK FILM RESISTOR NETWORKS

Type SIP Resistor Network

- Highly stable thick film .
- Std. resistance tol. ±2% (Code G)
- Lead spacing .10" ± .010
- Rugged, molded case construction
- Low temperature coefficient ± 100 PPM/°C (−55°C to +125°C standard)
- Compatible with automatic insertion equipment
- Marking resistance to solvents and solderability per MIL-R-83401

MSPXXA01 circuits contain 5, 7, or 9 resistors of equal value, each connected between a common pin (No. 1) and discrete P.C. pins. MSPXXA03 circuits contain 3, 4, or 5 resistors of equal value, each resistor is connected to two discrete P.C. pins. A01, A03 are low profile version.

MSPXXA05 circuits contain 4, 6 or 8 pairs of resistors. Each series pair is connected between two common lines. The junction of these resistor pairs is connected to the input terminals. The 05 circuits are designed for TTL dual-line termination and pulse squaring. A05 is low profile version.

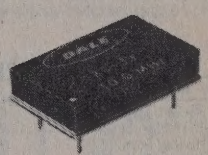
HYBRID CRYSTAL CLOCK OSCILLATOR

MODEL XO-33 B 250 KHz to 60 MHz Low Profile

Temperature Range: Operating: 0°C to 70°C; Storage: −55°C to +125°C. Input Voltage: +5 VDC ±0.5 V. One level sourcing 0.4 mA: 2.4 volts min. Environmental: Temperature Cycle: −55°C to +85°C, 3 cycles. Shock: 1000 G's 0.1 millisecond, ½ sine wave, 3 shocks each plane. Vibration: .06" D.A., 10–55 Hz, 35 G, 55–2000 Hz. Humidity: 85% relative humidity @ 85°C, 240 Hours.
Mechanical: Hermetically Sealed Package: Leak rate less than 2×10^{-8} atmosphere cc/sec. of helium. Pin Material: Phosphor bronze. Marking Ink: Epoxy, solvent resistant. Solvent Resistance: Isopropyl alcohol, Tricholoroethane, Freon TMC. Terminal Solderability: Per MIL-STD-202, Method 208C. B = ±.01% (±100 PPM). One level sourcing @ 0.4 mA is 2.4 V min. All are Type No. X0-33B plus stnd. frequency.*



XO—33B

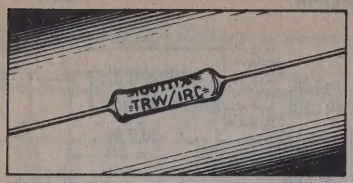
TRW IRC RESISTORS

METAL FILM 1% TOLERANCE PRECISION FIXED RESISTORS



- **Low Noise**
- **High Strength**
- **Extended Range**

TRW/IRC metal film precision resistor has brought the state of the art in thin-film to a performance level equalling that of high-stability wirewounds. Over 488 million hours of government-monitored test data have determined an actual failure rate of only 0.00043% per 1000 hours. Significantly better than the military "S" level specification of 0.001% per 1000 hours. Manufactured to the tightest controls for best performance with respect to low noise, high stability, and the ultimate in TCs and tolerances for precision applications. TRW/IRC evaporated metal film resistors will exceed all MIL-R-specification requirements, including the highest reliability level of MIL-R-55182. Voltage coefficient when measured between 1/10 and full rated voltage is typically less than 0.5 PPM/Volt for all values and essentially zero for low and medium values. Typical ΔR for long term life is less than .04%. Lead gauge #22 (.0253). The design concept of these resistors offers high strength characteristics for potting applications and automatic insertion. Furnished in values at ±1% resistance tolerance. Tighter tolerance units available upon special request. Sold in packages of 50 pieces.

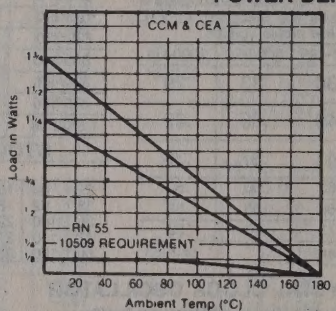
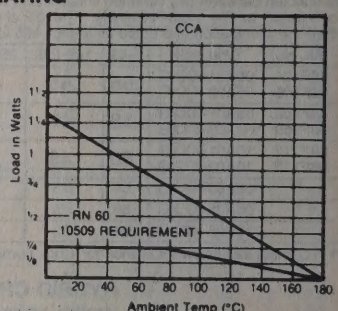
POWER DERATING

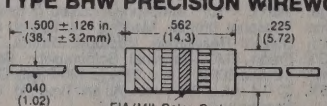




TYPE BHW PRECISION WIREWOUND RESISTORS – TOLERANCE 5%

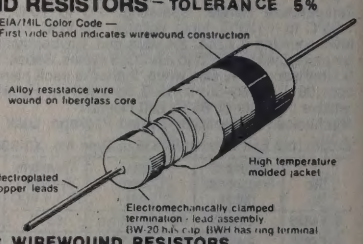
SPECIFICATIONS

TRW/IRC Type	BWH
EIA RS-344 Style	CRU2
MIL-R-11 Size Equiv.	RC32
Resistance, Stan.	0.1-2K ohms
Tolerance, Stan.	±5%
Power Rating	2 watts @ 70°C 1 watt @ 115°C ½ watt @ 137°C
Max. Continuous Working Voltage	√PR
Min. Insulation Resistance-Dry	10,000 Megohms
Min. Insulation Resistance—Wet	100 Megohms
Min. Dielectric Withstanding Volt.	
Atmospheric Press.	1000 Volts RMS
Reduced Pressure	625 Volts RMS
Hot Spot Temp. Rise at 1 watt	115°C



First band is double width to designate wirewound.

Bridges the cost-performance gap between composition resistors and premium wirewounds. Rated at 2 watts, in a 1 watt carbon composition size package.



EIA/MIL Color Code — First wide band indicates wirewound construction
Alloy resistance wire wound on fiberglass core
High temperature molded jacket
Electroplated copper leads
Electromechanically clamped termination - lead assembly
BW-20 has cup, BWH has ring terminal

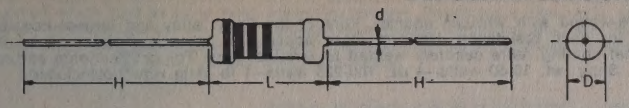
DEPOSITED CARBON FILM FIXED RESISTOR ASSORTMENTS



Specifications	AR25	AR50
Rated Wattage @ 70°C	0.25W	0.50W
Max. Working Voltage	250V	350V
Max. Overload Voltage	500V	700V
Body Length	.252±.012"	.346±.040"
Body Diameter	.095±.008"	.146±.008"
Lead Length	1.0" min.	1.0" min.
Lead Diameter	.024±.001"	.027±.001"

RESISTOR FEATURES:

- **±5% Resistance Tolerance**
- **Conformal Multi-Coating**
- **EIA Standard Color Coding**
- **Solder-Coated Leads**
- **−55°C to +155°C Temp. Range**

These ¼ and ½ watts have been designed for miniature circuits that require resistors with greater stability and reliability than carbon composition types, but the same small physical size. Carbon film resistors exceed performance characteristics of MIL-R-11F carbon composition types.

- **Conformal Multi-Coating**
- **Special Solder-Coated Leadwire**

¼ watt resistors, designed for miniature circuits that require resistors with greater stability and reliability than carbon composition types. Exceeds performance characteristics of MIL-R-11F carbon composition types. Each resistor value is pre-packaged in a plastic case. Removable cover clearly indicates location of each resistor. 20 pieces of each value, 840 pieces total.

RSU-280 POCKET SIZED RESISTANCE SUBSTITUTION UNIT

- **Over 11 Million Step Range**
- **1% Accuracy Resistors**
- **Convenient Size**
- **Rugged Construction**

Seven decades of resistance provides a wide range of values in a compact unit. Aluminum case and slide switch selection provide a durable and easy-to-use unit. Excellent for repair, development and trouble-shooting. Ranges from 1 Ohm to over 11 Megohms. Internal resistance is less than 0.2 Ohms. Three binding posts permit isolated substitution. The case may be grounded separately.

CALL YOUR NEWARK BRANCH FOR PRICES ON LARGER QUANTITIES.

OHMITE Fixed Power Resistors

Lug type, wire-wound with vitreous enamel. Wire of the finest alloy and largest possible size is used for each resistance. Uniform close spacing of turns is maintained by the vitreous enamel coating. Wire securely welded to terminal lugs. Tol. ±5% 1 ohm and up, ±10% below. Shpg. wt. 10-50 watts—4 oz. 100-225 watts—1 lb. (Mtg. Hdw. not included.)

Adjustable Dividohm® Power Resistors

OHMITE

"Dividohm" Vitreous Enameled Resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Handy for obtaining odd resistance values, for adjusting circuits and for use on equipment which must be set to meet various line voltages. Resistance is changed by moving the adjustable lug. Contact can be made to any wire along the length of the resistor making voltages lower than rated voltage available. States wattage rating applies only when the entire resistance is in the circuit. Tolerance: 10%. Avg. Shipping wt. 12-50 Watts. 4.0 oz.: 100-255 Watts. 1 lb. Mtg. Hdw. not included.

OHMITE Industrial Resistors

TYPE 200 "BROWN DEVIL" RESISTORS

High quality, compact wire-wound resistors for voltage-dropping, bias units, bleeders, etc. Extra-sturdy all-ceramic vitreous enameled. Protected against shock, vibration, heat and humidity. Have standard tolerance of ±5%, 8-watt units have 1×5/16" cores; 12 watts, 1¾"×5/16" cores; 20-watt units, 2×7/16" cores. All have 1½" leads. Average shipping weight, 3 oz.

OHMITE

All welded Vitreous enamel resistor with 1000 VAC insulation. Protects against moisture, salt spray and salt immersion. Markings resist high temperatures, solvents and abrasions. Standard resistance tolerance: ±5%. Leads tinned, 1½"L. All sizes 20 gauge. Can be used with heat sinks to increase capability by 100%.

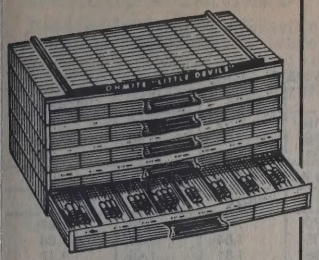
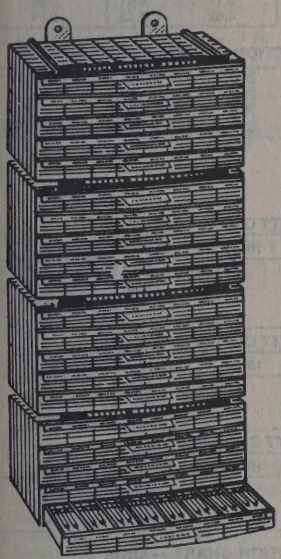
- **Cabinet Units Can Be Stacked.**
- **Available in Different Ratings.**

Select the carbon composition, carbon film or metal film resistor you need from industrial and service resistor assortments. Each assortment comes in cabinet 9" long, 4¾" high, 5¼" deep. Cabinets have five drawers and each drawer has eight compartments. Dovetail tops and bottoms facilitate stacking. Assemblies of 2, 3 and 4 cabinets are riveted to metal strips for wall hanging.



Single Cabinet Unit



Industrial Assortments

CARBON FILM AND METAL FILM RESISTOR ASSORTMENTS

Type numbers ending with **M** are metal film and 1% tolerance. Those ending in **F** are carbon film with 5% tolerance.

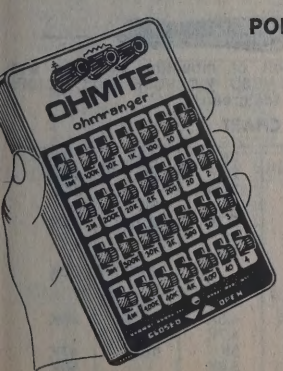
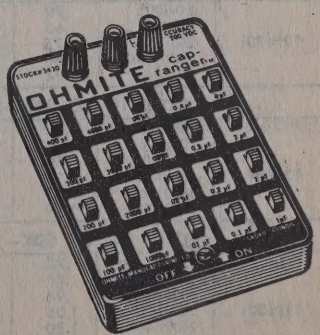
PORTABLE RESISTANCE AND CAPACITANCE SELECTORS



For use in labs, schools, and by service technicians. Feature positive slide switch operation. Light weight for easy in-hand use. Metal case, four rubber feet for non-slip bench use, and screw type binding posts. Compact size: 4"x6"x1 3/16" body approx. wt. 14 oz.

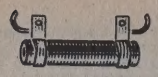
Ohm-Ranger™ 3420. Portable resistance selector. Wide range of resistance values, from 1 ohm to over 11 million ohms in one ohm increments. Assured accuracy of ±1% tolerance for 10 ohm and above settings. Rated to ½ W. max.
13F161 EACH **67.65**

Cap-Ranger™ 3430. Portable capacitance selector. Wide range of capacitances, from 100 pf to 11.111 mf in 100 pf steps with ±2% tolerance. Rated to 200 VDC max.
76F799 EACH **113.72**



Resistors

POWER RESISTORS - FIXED



Lug and Lead 8, 12 and 20 Watt — Series VPR

Lug Only. 25 to 225 Watt — Series VP and VK

Vitreous Enamel/Greenohm V™. Tolerance, ±5% except value under 1 ohm, ±10% VPR types (up to 20 watts) have wire lead and lug terminals VP and VK types (25 watts and up) have lug terminals and mounting bracket. Teal green enamel finish withstands over-heating without peeling or cracking. Designed for utmost reliability and stability under adverse conditions.

Wirewound Axial Lead Resistors and Network

SPRAGUE
THE MARK OF RELIABILITY
a GK Technologies subsidiary

SPRAGUE AXIAL-LEAD "BLUE JACKET" POWER WIRE WOUND RESISTORS

Designed for industrial applications demanding utmost stability under extreme operating conditions. Well suited for printed circuits, terminal boards, and point-to-point wiring applications. Unique all-welded end-cap construction. Power rating is based on a max. temperature rise of 300°C above a 40° ambient at full rated wattage. Will meet performance characteristics of MIL-R-26C. Available only in values shown.

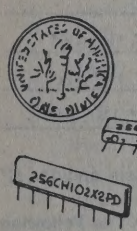
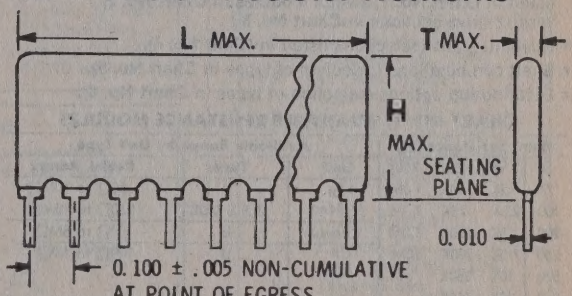
Type 256C Single In-Line Resin-Coated Precision Resistor Networks



- Made to high standards. Type 256C are low profile units.
- Ideal for use in signal and data processing applications where repetitive values and patters are required.
- For use where circuit configuration, size, power requirements, and assembly costs are important.
- Cut component count, reduce board space requirements. Reduce equipment size.
- Designed for individual terminating, dual terminating, pull-up/pull down, and interface.
- For complete technical data, refer to latest issue of Engineering Bulletin 7041.



DIMENSIONS (in inches)*

Type	H	T	Length (L) For Size Code F 6-Pins	H 8-Pins	K 10-Pins
256C	.25	.10	.60	.80	1.05

SELECTION GUIDELINE

For .200" maximum package height, use Series 420C. If power requirement is .15 watts/resistor or less, use: Series 420C for lowest package height. Series 256C for lowest cost. If power requirement is more than .15 watts/resistor, use Series 216C. PERFORMANCE CHARACTERISTICS: Operating Temperature Range: −55°C to +125°C. Package Power Rating: (At +25°C) Type 256C (216C) 6-Pin units, .90W (1.70W); 8-Pin, 1.25W (2.8W); 10-Pin, 1.5W (3.0W). Resistance Tolerance: ±2%. TCR Tracking: ±50 ppm/°C. Temperature Coefficient of Resistance: ±200 ppm/°C. Overload Test: A d-c potential of 2.5 times the rated continuous working voltage, but not to exceed 100 volts, shall be applied to each resistor in the network for 5±1 seconds at 25°C. After test, there shall be no evidence of mechanical failure and the resistance value shall not change by more than 0.5%. Load-Life Test: Networks shall be operated for 1000 hours with rated voltage applied in continuous cycles of 1.5 hours On and 0.5 hours Off, at +70°C. After test, there shall be no mechanical damage and resistance value shall not have changed by more than ±1%.

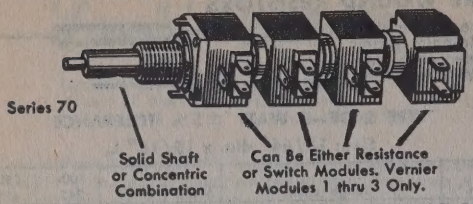
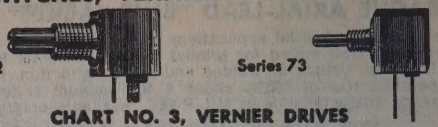
Allen-Bradley Mod Pot®

SERIES 70, 72, and 73 POTENTIOMETERS, SWITCHES, VERNIER DRIVE CONTROLS



Series 70
Solid Shaft or Concentric Combination
Can Be Either Resistance or Switch Modules. Vernier Modules 1 thru 3 Only.



Now you can obtain rapid delivery or make A-B MOD POT potentiometers, switches and vernier drive controls. Available in single, dual, triple or four section controls. The controls can be put together in almost any order. We can quickly supply you with special quantities or just an initial quote from our A-B specialist.

To Order a Custom MOD POT Control, Submit the Following Information:

- Number and type of sections required (resistance modules listed in **Chart No. 1**, switch modules in **Chart No. 2**, vernier drive sections in **Chart No. 3.**)
- Bushing types (selections listed in **Chart No. 4**).
- Shaft combinations (selection of types in **Chart No. 5**).
- Locating lug options (selection of types in **Chart No. 6**).

CHART NO. 1, AVAILABLE RESISTANCE MODULES

Nom. Resistance (Ω)				Available Range by Unit Type		
50	1K	25K	750K	**Unit**	**Taper**	**Resist. Range**
75	2K	50K	1.0M	Hot-Molded	U	50Ω to 10MΩ
100	2.5K	75K	2.5M		A,B,S & DB	250Ω to 10MΩ
200	5K	100K	5.0M	Cermet	U	100Ω to 5MΩ
250	7.5K	200K	10M	CP	U	100Ω to 1MΩ
500	10K	250K	..			
750	20K	500K	..			

To Order Resistance Modules, Specify The Following For Each:

- Nominal resistance value in ohms, **from Chart No. 1.**
- Cermet, carbon composition or conductive plastic.
- Tol.: Carbon composition, 10% or 20%; Conductive plastic, 10% or 20%; Cermet, 10%.
- Solder lug or square terminals.
- Type of taper: Linear taper. Other tapers available in values of 250 ohms thru 10.0 megohms, carbon composition only, as follows:

Clockwise and counterclockwise
modified logarithmic taper.....±10% or ±20% tolerance
Clockwise exact logarithmic taper.....±10% or ±20% tolerance
Modified linear taper.....±10% or ±20% tolerance
Attenuators, L-pad or T-pad.....±15% or ±20% tolerance

CHART NO. 2, SWITCHES

Current Rating: 2 amps rms for 125 V, 60 Hz, non-inductive load.

Switch Type	Contact Arrangement
Rotary	Two sets of contacts per switch*— One set normally open, one set normally closed. Two sets normally open.
Push-Pull† or Momentary†	Four sets of contacts per switch— Two sets normally open, two sets normally closed.

*Switches are described in the detent position.
(†) Not available on Series 72.

To Order Switches, Specify The Following For Each:

- Type of Switch
- Contact Arrangement
- Location of detent required if rotary switch is ordered—either clockwise or counterclockwise end of rotation.

CHART NO. 3, VERNIER DRIVES

Drive	Type of Shaft and Shaft Combination
4-Turn	Fine adjust shaft only.
16-Turn	Fine and coarse adjust shaft.
Vernier	Fine and coarse adjust shaft.

- To Order Vernier Drive Control, Specify Type of Shaft Or Shaft Combination Required. See Chart No. 5.

CHART NO. 4, MOUNTING BUSHINGS

BUSHING TYPE	DIAMETER	LENGTH		
		¼"	⅜"	½"
PLAIN	¼"	PA	PC	..
LOCKING†	¼"	..	LC	LH
PLAIN	⅜"	PG†	PK	PN†
LOCKING†	⅜"	..	BK	BN

† Not available on Series 72. Series 72 bushing is all plastic. Series 73 bushing is a metal insert on plastic faceplate.

To Order Mounting Bushings, Specify Type, Diameter and Length by Choosing Two Letters Listed Under Length Columns, e.g., PA = Plain Mounting Bushing, ¼" dia. x ¼" lg.

CHART NO. 5, SHAFT COMBINATIONS AND LENGTHS

Shaft Operating Combinations	Lengths*
**⅛" Dia. Solid	†5/16", ⅜", 7/16", ½", ⅝", ¾", ⅞"
**¼" Dia. Solid	†⅜", ½", ⅝", ¾", ⅞", 1", †1⅛", 1½", 2"
†¼" Dia. Outer Concentric †⅛" Dia. Inner Concentric	¾", ⅞", 1" 1", 1⅛", 1¼", 1⅜", 1½"
†⅛" Dia. Outer Concentric †.078" Dia. Inner Concentric	¾", ⅞", 1" 1", 1⅛", 1¼", 1⅜", 1½"
†¼" Dia. Outer Concentric †.078" Dia. Inner Concentric	¾", ⅞", 1" 1", 1⅛", 1¼", 1⅜", 1½"

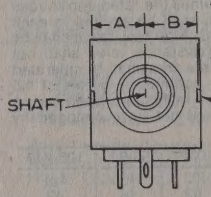
*Lengths are measured from the bushing mounting surface.
† Not available on Series 72
** On Series 72, shaft is plastic. ⅛" dia. have plain ending. ¼" dia. have slotted ending.

To Order Shaft Combination and Length, Specify The Following Information.

- Shaft combination desired
- For dual shaft combinations, specify which sections are to be operated by each shaft.
- Shaft lengths.

Shaft endings. Standard plain round, screw driver slot and flatted shaft endings available on ¼" and ⅛" dia. shafts. .078" dia. shafts available with only plain round endings.

CHART NO. 6 LOCATING LUGS



Dimension A or B, or both, specify distance from shaft center to lug center

Locating Lug Option No. or Letter	A	B
4	No lug	No lug
1	.305"	No Lug
*3	.375"	No Lug
*6	.437"	No Lug
*8	.531"	No Lug
*2	.305"	.305"
*5	.375"	.375"
*7	.437"	.437"
*9	.531"	.531"
A	No Lug	.305"
*B	No Lug	.375"
*C	No Lug	.437"
*D	No Lug	.531"

To Order Locating Lugs, Specify Lug Option No. or Letter.
* Not available on Series 72 or Series 73.

All controls include standard A-B mounting hardware and markings. Extra hardware is available on request. Special markings can be provided on each control, if desired. For additional information, request Allen-Bradley Publication EC 5670-2.1 and Mod Pot Order Form 898.

Because of the wide range of standard combinations available, pricing is quoted on an individual specification basis.

N – Single (Cermet)
U – Single (Conductive Plastic)
P – Dual (Hot Molded) [1]
R – Dual (Cermet) [1]
W – Dual (Conductive Plastic) [1]

[1] If the electrical specifications are not identical for each section, a special number will be assigned.

Shaft Length

Measured from mounting surface of the potentiometer in inches and sixty-fourths.

Use a three digit code

Examples:

7/8" shaft length: 056 (inches: 0; sixty-fourths: 56/64 7/8")

1-1/4 shaft length: 116 (one inch; 16/64 or 1/4 inch)

Some Common Shaft Lengths

Inches: Fraction	Inches: Decimal	Three Digit Part Number Code
1/4	.250	016
3/8	.375	024
7/16	.437	028
1/2	.500	032
5/8	.625	040
3/4	.750	048
7/8	.875	056
1	1.000	100
1-1/8	1.125	108
1-1/4	1.250	116
1-1/2	1.500	132
2	2.000	200

NOTE 1: The above part number format allows for the development of some part numbers which cannot be manufactured. Check parameter limits in preceding text.

NOTE 2: The above part number structure **does not** allow for the following "Mod Pot" configurations:

- Assemblies with resistance modules of different resistance values.
- Assemblies containing a vernier drive.
- Assemblies containing a switch (except for the 1001 type switch).
- Assemblies with concentric shaft arrangements.

To order any of these configurations, a special part number must be assigned through the factory. An Allen-Bradley #898 order form is recommended to insure all necessary specification information is obtained. Consult your Newark salesperson for forms and ordering details.

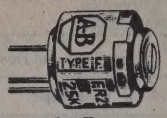
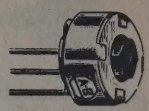
TYPE F AND Y SINGLE TURN TRIMMERS—¼ WATT



Type FR

Type YC



Type YR

½ WATT

- Type FR for demanding rheostat or potentiometer applications.
- Type YR and YC for trimmer appl. Low profile.
- Type YR has pin type term. Type YC, slotted and notched actuator.

Type FR. Hot molded carbon composition single turn trimmers. Designed for demanding rheostat or potentiometer applications in electronic equipment. Small ½" dia. size make them ideal for subminiature assemblies and PC applications. Pin type terminals fit 0.1 printed wiring board standard layout. Enclosure: immersion sealed. Pin type terminals and plastic slotted actuator. Shpg. wt. 4 oz.

Type YR and YC. Hot molded carbon composition single turn adjustable resistor for trimmer application. The low profile design fits into commonly used ⅜" PC board stacking. Enclosure: dust and splash resistant.

Type YR pin-type terminals. Type YC—slotted and notched actuator. Shpg. wt. 4 oz.

	TYPE "FR"	TYPE "YR" AND "YC"
Temp. Range	−55°C to +120°C	−55°C to +100°C
Power Rating	¼ Watt @ 70°C	¼ Watt @ 50°C
Derate to O Watt	@ 120°C	@ 100°C

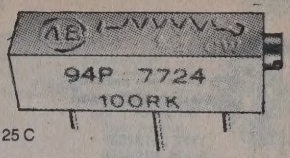
Cermet Type 94
1/2 watt-20 turn



- Cermet multi-turn
- 0.5 watt @ 70 C or .75 Watt @ 25 C
- Solid Phase Bonded Term.

Industrial 20 turn trimmer. Meets Mil-R-22097 T.C.;10,20 Ohms; ± 150 PPM/C;50 ohms up; ± 100 PP/C. Operating temperature—55 + 125 C. Contact res. 3% ohms. Size: (P.).2"Wx25"Hx.76" L.; (PS) .350" H. Pin space: .10" grod ± .010 in. Pin diameter. .024 in. nominal. Total ± .024 in. nominal, total ± 10%*, ±20%.

TYPES N AND R COMPOSITION MULTI-TURN TRIMMERS

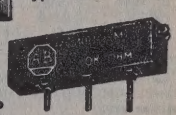
CHARACTERISTIC	TYPE "R"	TYPE "N"
TEMP. RANGE	−55°C to +125°	−55°C to +100°C
POWER RATING	¼ watt @ 70°C	⅓ watt @ 50°C
TOLERANCE	±10% only	±10% or ±20%
DERATE TO 0 WATT	@ 125°C	@ 100°C
VIBRATION	2% change in tot. res.	3% change in tot. res.
SHOCK	2% change in tot. res.	—Not tested—

TAPER	Standard "U" linear taper
ROTATION-MECH.	25 ±3 turns-5% max. res. change/500 cycles
TORQUE	0.10 to 8 in. oz. +25°C
RESISTANCE RANGE	100 ohms to 2.5 megohms
VOLTAGE	300 volts max. working voltage (RMS or DC)
MOISTURE RESISTANCE	Less than 10% temporary change
LOAD LIFE	Less than 10% change in tot. res. after 1000 hrs.
ENCLOSURE	Immersion sealed

¼ watt—25 turn

Type RP

Type RS



Type NP

- Style "RS" with lug terminals (Many available as style "RJII" of MIL-R-22097)
- Style "RP" with pin terminals
- Style "NP" industrial grade (Pin terminals only)

Hot-molded composition, continuously adjustable 25-turn variable resistors intended primarily for trimmer applications. Immersion sealed enclosure. Corrosion resistant, non-magnetic materials. Sealed; molded, insulating enclosures with "O" ring equipped adjustment screw.
Type "RS." MIL approved. Pin or lug terminals spaced on 0.1" grid system for PC boards. Type RJ11. Mil-R-22097. Marked with MIL designation and circuit diagrams if applicable. Type "N". Performance similar to Type RP except industrial grade.

TYPE "J". Hot-molded composition variable resistors for use as rheostats and potentiometers in military and industrial applications where superior performance is desired. Many available as Style RV4N of MIL-R-94. Corrosion resistant, nonmagnetic materials. Dust and splash resistant. Terminals treated for easy soldering. Linear Taper "U". Locating lug provided. Supplied with mounting nut M-2786 and internal tooth lock washer M-2898. Additional hardware and SPST switch also available. (See below).

TEMP. RANGE	−55°C to +120°C
POWER RATING	2.25 watt maximum @ +70°C
POWER DERATING	Linearly to 0 watt @ +120°C for linear taper Log taper: derate by .05.
RESISTANCE RANGE	Nominal values from 50 ohms to 5 megohms
VOLTAGE	500 V. max. working voltage (RMS or DC)
LOAD LIFE	Less than 10% change of total res. (1000 hrs)
ROTATIONAL LIFE	Less than 10% change (100,000 cycle life test)
MARKING	Type "J", A-B trade and part number, nom. res. value. Mil spec where applicable.

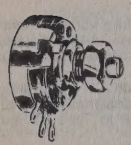
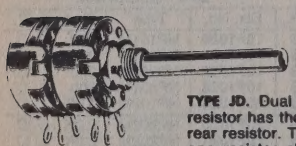
TYPE J-STYLE RV4L AND DUAL POTENTIOMETERS



TYPE JA1L0405
LOCKING BUSHING
¼" SLOTTED SHAFT
2 WATT

TYPE JA1L. Hot molded comp. pot. with locking bushing. Linear taper, low noise, infinite resolution. Includes one mtg. nut M-2786, one lock washer M-2898 and one lock nut B-13750. Shpg. Wt. 4 oz.



TYPE JD1N200P
DUAL POTENTIOMETER
2" PLAIN SHAFT
2 WATT

TYPE JD. Dual controls with linear tapers. Panel resistor has the same resistance and taper as the rear resistor. The permissible power dissipation in one resistor element is a function of the power dissipation of the other resistor element. Includes one mounting nut M-2786 and one lock washer M-2898. Max. torque for dual controls is 9 in. oz.; min. 1 in. oz. at 25°C.

Carbon Variable Potentiometer
TYPES G, GD, W

TYPE G, GD and W. High quality hot molded carbon composition type. TYPE GW approved under MIL-R-94 style RV6. TYPE W similar to TYPE G but is industrial grade. TYPE GD is dual miniature type. Plain bushing resistors are supplied with one monting nut M-4721 and one lock washer M-4748. Shaft lock bushings furnished with one locknut M-4761, M-4721 and EM-4748. Shpq. wt. 4 oz.

Type G Type W	Type GD
Torque: .5 to 3 in. @ 25°C 13 in. oz. @ –55°C	0.5 to 4.5 in oz. @ 25°C 13 in. oz. @ –55°C
Temp. Range	–55°C to 120°C
Power Rating	½ watt 70°C
Derate to 0 Watt	@ 120°C
Rotation	295° ± 5°
Voltage	350 Volts maximum
Moisture Resis.	Less than 10% of total resistance
Shock & Vibration	Less than 5%
Load Life	Less than 10% after 1000 hrs. of operation
Enclosure	Immersion sealed
Diameter	½ in. ½ in.
Shaft length	⅞ in. ⅞ in.
Panel Depth	35/64 in. 35/32 in.

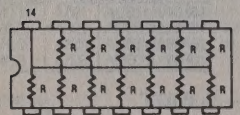
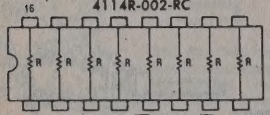
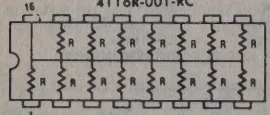
4114R-001-RC



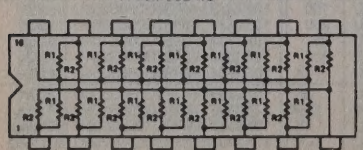
4114R-002-RC



4116R-001-RC



4116R-002-RC



4116R-103-RC/RC

These models incorporate 5, 7 or 9 thick-film resistors of equal value, each connected between a common bus (pin 1) and a discrete PC board pin.

Typical applications include open collector pull-up, wired OR pull-up, MOS memory pull-up and down, unused gate pull-up, power driver pull-up.

Designed to reduce total assembly costs and to minimize board space requirements.

Product performance is maximized with improved temperature coefficient of resistance (TCR) and resistance tracking. Less than ±100 PPM/°C TCR and 25 PPM/°C typical TCR tracking insures that each resistor is closer in value to other resistors within the same package.

Compatible with DIPs, these low-profile SIPs are available in standard values from 22 ohms to 2.7 megohms, at ±2% tolerance. Tolerances of ±1% and values of 10 ohms to 10 megohms are also available on special request.

EQUAL VALUE SIP ISOLATED RESISTORS

When ordering specify ohms

Stk. No.	Type	No. Pins	1-34	35-104	105-489	490-979

81F9205	4610X-101	10	.57	.49	.47	.37

These models incorporate 3, 4, or 5 isolated thick-film resistors of equal value, each connected between two discrete PC board pins.

Typical applications include power gate pull-up, impedance balancing, current limiting, line termination and ECL output pull-down.

EQUAL VALUE SIP ISOLATED RESISTOR

The Dual Terminator Resistor Network provides TTL dual line termination in a low-cost conformal coated SIP package. Dual terminators improve noise immunity where capacitive effects are excessive.

The 4608X-104 is an 8 pin configuration and terminates 6 lines. Pins 1 and 8 are common for ground and power, respectively. Twelve, thick-film resistors are paired in series between the common lines (pin 1 and 8). The center points of these resistor pairs are connected to input terminals (pins 2 through 7). Dual terminators are also available in standard 6 and 10 Pin SIP models.

DIP Thick Film Resistor Networks

Features reduced PC board space; compatible with automatic insertion equipment; uniform performance characteristics, compatibility with IC logic circuit environments. Constructed on high purity alumina base, an excellent thermal conductor but poor electrical conductor. Insulation resistance, pin to case, is 10,000 megohms or greater. The mold epoxy case with plated copper alloy leads insures long term integrity of the entire assembly. Lead solderability meets requirements of MIL-STD-883, Method 2003 and MIL-R-83401. Resistance tolerance: ±2%. Operating temperature range: −55°C to +125°C. The low profile SIP Networks have an installed height equal to the installed height of the DIP.

MULTIPLE EQUAL-VALUE RESISTOR NETWORK

Circuitry and application: Type 4114R, 7 isolated resistors; Type 4116R, 8 isolated resistors. Intended for power gate pull-up, impedance balancing, current limiting, line termination, and ECL output pull-down. **When ordering specify ohms.**

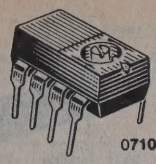
Trimming Potentiometers

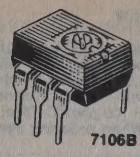
BOURNS INC

MFT™

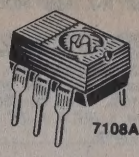
MULTI FUNCTION TRIMMERS



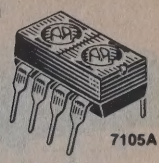
07102B



7106B



7108A



7105A

Bourns has combined technologies used in producing cermet trimmers and cermet fixed resistor networks. The results is MFT™ multiple trimmer and resistor network combinations packaged in the Dual In-Line (DIP) configuration. Manufacturing costs, PC board space, circuit design time are all reduced. Compatible with auto-insertion and auto-test equipment. Improves reliability, circuit performance. Provides temperature tracking better than discretes.

MODEL H-800 TRIM BIN KIT

- **Contains 15 of the most popular trimmer & MFT trimmer/resistor models**
- **50 varieties of resistances and pin styles for total of 127 units.**

Complete assortment of the most popular trimmers and MFT trimmer/resistors. All in a functional, convenient, attractive package. Also contains an H-90 and H-91 screwdriver, and design aids for models 20, 3005, 3008, 3099, 3386, 3339, and 3359. Designed for use in customer's engineering, or research and development labs. Sold separately these trimmers and trimmer/resistors would cost twice as much.

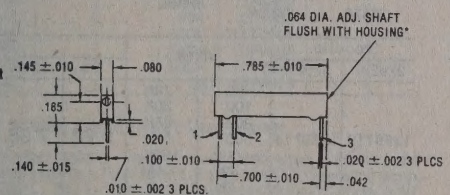
MODEL 20 TRIMPOT® POTENTIOMETER CERMET ELEMENT

- **0.5 Watt**
- **Stable Cermet Element**
- **High Power**
- **Cost Savings**
- **Lower Board Profile**
- **Continuous Resolution**



Model 20 sealed SIP potentiometer offers thin package width and machine insertability together with outstanding performance and quality. Lower PC board profile. .185" off board. High density board spacing, fits standard .100" grid. High power rating: 0.50 watt at 70°C. Low temp. coefficient: 100 ppm/°C over −55°C to +125°C temperature range. Sealed to MIL-R-22097 standard; withstands industrial cleaning processes. Weight: 0.40g max.

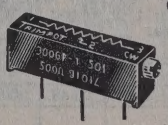
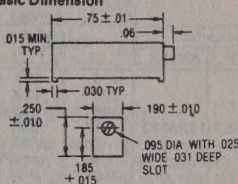
MODEL 3006 TRIMPOT® POTENTIOMETER CERMET ELEMENT



- **.75 Watt**
- **Cost Efficient**
- **High Power Rating**
- **Easy Assembly**

3006 Basic Dimension



Low cost, low profile with high power rating; 0.75 watt at 70°C. 15 turns. Sealed to MIL-R-22097, withstands industrial cleaning process. Maximum operating temperature: 125°C. Tolerance: ±10%. Temperature coefficient: ±100 ppm/°C. Size: 0.190"W. x .250"H x .75" Lgth. When ordering specify ohms.

Cermet Trimming Potentiometers

CERMET E-Z TRIM® MODEL 3009

Wiper assembly idles at both ends of trave. 20 turns nominal adjustment. Power rating; 0.75 watt at 25°C. Absolute min. res.; 2.0% or 1 ohm, whichever is greater. Max. oper. temp.: 125°C. Tolerance: 10%, Temp. co-efficient: ±100 ppm/°C. Size; .19" w. x .35" h. x .75" lgth. **When ordering specify ohms.**

CERMET DUAL IN-LINE TRIMPOT® MODEL 3099P

Sealed to meet MIL-R-22097 immersion requirements. Standard DIP size (TO-116) compatible with DIP automatic insertion equipment. Temp. Coeff.: ±100 ppm/°C. max. over entire temp. and resist. range. Power: 1.0 watts @ 70°C. Abs. Min. Res.: 2% or 1 ohm, whichever is greater. Mechanical Adjustment: 20 turns nominal. Oper. Temp.: −55°C to +150°C. Size: 0.250"w. x 0.190"h. x 0.750"lg. **When ordering specify ohms.**

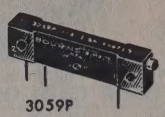
CERMET MODEL 3059 (RJ12)



3059P

Meets or exceeds MIL 22097 characteristic C & F, Style RJ12. Solderable pins for compatibility with automated and hand soldering methods. Replacement for 3012, 3052, 272, 274 & 276. Temperature Coefficient: ±100 ppm/°C max. over entire resistance and temperature range. Power Rating: 1.0 watt or 400 volts max. at 70°C. Abs. Min. Res.: 2 ohms, max. Mechanical Adjustment: 22±5 turns. Oper. Temp.: −55°C to +150°C. Size: 3/16" w x 5/16" h x 1¼" lg. **When ordering specify ohms.**

MODEL 3260 1½" SQUARE WIREWOUND

All plastic case provides positive end stops at both ends of travel; sealing against liquids and potting compounds. Clutch action wiper. Power Rating: .25 watt at 85°C. Abs. Min. Res.: 0.1% or 1.0 ohm, whichever is greater. Operating Temperature: 150°C max. Tolerance: ±5%. Size: 1/4" square x 11/64" high.

Cermet and Modular Potentiometers

CERMET ELEMENT PANEL MOUNTED POTENTIOMETERS

Single turn potentiometers for panel mount have improved adjustability and low noise for outstanding performance. Thin ¾" diameter case has extremely high power rating: 2 watts at +70°C. Resistance tolerance: ±10%. Tapers: Linear, 10% CW or 10% CCW. Contact resistance variation: ±3% maximum of total resistance. Temperature coefficient: ± 150 ppm/°C. High Performance Models meet or exceed applicable requirements of MIL-R-94 or MIL-R-23285. **High Performance Model 3852:** Housing ¾" dia. x ¼" length. Resistance range: 50 ohms to 5 megs, linear tapeer; 1K to 2.5 megs, CW and CCW taper. Power rating: 2 watts at 70°1C, linear; 1 watt CW and CCW taper. Temperature: -65° to ±150°C. **High Performance Model 3862:** Housing ½" dia. by 0.453" length. Resistance range: 100 ohms to 5 megs, linear taper; Power rating: 1 watt at 125°C, linear taper. Temperature range: -65°C to +175°C. **All models** supplied with hardware; other shaft lengths available. Types with locking bushings supplied with locking nut. **All models have lug terminals and slotted shaft end. Specify ohms rating desired when ordering.**

MODULAR 10-TURN PRECISION POTENTIOMETERS

MODEL 83/84 SINGLE ⅜" SQUARE 10-TURN WIREWOUND MODULAR POTENTIOMETER

BOURNS® Model 83/84 Potentiometer is the only precision 10-turn modular control in the industry. This product is fully compatible with the members of the model 80 family.

For your applications requiring combinations of 10-turn; single turn; or switch modules consult the factory.

MODEL 81 SINGLE ⅜" SQUARE 10-TURN CERMET MODULAR POTENTIOMETER

BOURNS® Model 81/82 MODULAR potentiometer combines the design versatility of advanced modular construction with factory assembled reliability and quality assurance. The net result is a consistently high quality ⅜" square panel potentiometer that can be delivered in single configurations to suit your specific applications...from off-the-shelf components...at low cost. The Model 81/82's unique shaft torque control feature provides a smooth, high quality feel that will enhance the "human engineering appeal" of your equipment.

MODEL 91 SINGLE ⅜" SQUARE 10-TURN CONDUCTIVE PLASTIC MODULAR POTENTIOMETER

BOURNS Model 91/92 modular potentiometer combines the superior performance of a conductive plastic element with a simplified new three-piece design.

Construction features include one piece molded plastic shaft and rotor with insert molded metal bushing. The resultant combination offers the same high quality "feel" associated with the Bourns Model 80 Series plus virtually infinite electrical circuit isolation. The molded in-line P.C. pin terminations allow the pins to be easily bent forward or aft for vertical mounting to P.C. boards or mated with low cost mini-connectors for hard wired applications.

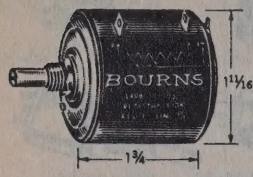
WIRE-WOUND BUSHING MOUNT PRECISION POTENTIOMETERS

10-TURN 5 WATT 1 13/16" DIAMETER MODEL 3400S-1



Exceeds humidity cycling requirements of MIL-R-12934. Shaft supported front and rear by sleeve bearings. Power rating: 5.0 watts at 40°C. Absolute min. resistance: 1.0 ohms or 0.15%, whichever is greater. Independent linearity: ±0.15% maximum. Max. oper. temp. 105°C. Tolerance: ±3%. Size: 1 13/16" dia. x 1¾" lgth. Shaft ¼" dia.

MODEL C—7½ WATT STANDARD MINIATURE RHEOSTATS

Stock No.	Type	Ohms	Amps	1-4	5-9	10-Up
11F203	4910	25	.55	28.03	23.88	18.81
11F204	4912	50	.39			
11F206	4914	100	.27			
11F234	4919	500	.12			

Compact power rheostats for limited space applications. For high temperature applications; operates at max. hot spot temp. of 340°C. Rugged ceramic and metal construction. Only .515 dia. ⅞" behind panel. Shaft dia. ⅛". Rotation 300° ±5°. Resistance tol. ±10%. Mounts with ¼-32 bushing on panels to ⅛" thick. Standard knob No. 5151. Solder terminal also fit EIA Type TS-E3R100 transistor socket.

MODEL E—12½ WATT UNENCLOSED MINIATURE RHEOSTATS

12½-Watt Miniature Rheostat. Standard shaft unenclosed. Rugged all-ceramic and metal construction. Use where 12½ watts dissipation is needed but space is limited. Operation at a maximum hot spot temperature rise of 300°C at an ambient of 40°C, but also useful for operating at high military ambients, derated linearly to zero at 340°C. Specifications. Overall diameter: ⅞".

Shaft diam. ⅛". Resistance range: Up to 5000 ohms with vitreous enamel; higher values available with (†) Ohmicone silicone-ceramic coating. Resistance tol: ±10%. Standard Mounting: for panels up to ⅛", ¼-32 threaded bushing. With non-turn lug. Rotation: 300° ±5%. Shpg. wt. 0.6 oz.

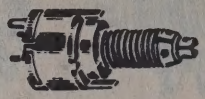
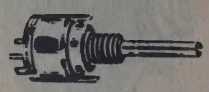
SERIES RV4—2 W THICK FILM CONDUCTIVE PLASTIC Meets Mil. Spec.—MIL-R-94B



RV6L



RV6N

A 2W pot. totally enclosed and sealed against moisture and other environmentals. High quality resistance device incorporating high-stability under extreme climatic and operational condtions. 1-1/16″ diameter and 9/16″ deep, .025″ dia. shaft. Brass nickel plated shaft, bushing and stainless steel cover. Terminals, hot tinned. **Resistance Tolerance:** Up to 1 megohm ±10%, above 1 megohm ±20%. **Electrical and Mechanical Rotation:** 312° ±3°. **Working Voltage:** 500 Vdc across end term, but power not to exceed rating. **Effective Rotation:** 270° +0° –10°. **Dielectric Strength:** 1,000 VAC, 60 Sec. ATM. **Rotational Life:** 25,000 Cycles. **Power Ratng:** 2 watt at 70°C. **Torque Range:** 1-4 oz. in. **Operating Temp.:** –55°C to +120°C. **Stop Torque:** 12 lb. in. **Weight:** .072 lb. **Functional Output:** Linear.

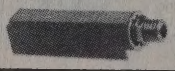
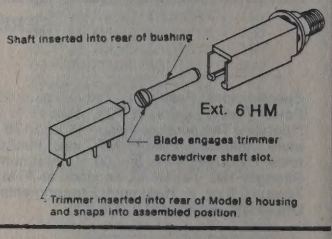
61-1-0



62-1-0



Shaft inserted into rear of bushing
Ext. 6 HM
Blade engages trimmer screwdriver shaft slot.
Trimmer inserted into rear of Model 6 housing and snaps into assembled position

Spectrol's standard ¾ inch and 1¼-inch rectangular trimming potentiometers, the Models 43 and 70, may be easily panel-mounted through the use of Spectrol Model 6 Panel Mount Adapters. The adapters are designed to convert these standard trimmer models into panel mount trimmers in a quick, convenient, and economical manner. Assembly with the trimmer is accomplished by snap-in, providing for minimal installation time. Hardware included.

- **1000 hr. operating life**
- **200 cycle min. rotational life (loaded circuit)**
- **Will withstand 30 G's 10 to 2000 Hz vibrations**

For use where higher operating wattage and temperature is desired. Resistance to humidity, shock and vibratioon. 20-turn screwdriver adjustment with idling end stops. Insulated wire lead or PC pin models. Body mounting holes: .093" on 1" centers. Operating temp. range is .55°C to 150°C. Tolerance: 10% 1 Watt 85°C. Size: 1.250 × .315 × .190. Net wt. 3.3 Gms. Single Section
Conductive Plastic

Features:
- **.5 Watt**
- **Sealed Construction**
- **Stand Off Supports**
- **Moisture Resistant**

Single turn potentiometer for panel mounting with outstanding performance. Case ½ in. sq., linearty tolerance ±5% independent; rotation 265° ±5°; torq., starting and running 0.3 to 3.0 oz-in; stop strength 48 oz-in.

148—Conductive plastic—power rating 0.5 watt @ 70°C; temp. coef. ±500ppm/°C; contact resistance variation 1.5% of total res.; operating temp. –55°C to 125°C.

149—"Cermet"—power rating 1.0 watt @ 85°C; temp. coef. ±150 ppm/°C; contact resistance variation 3% of total res.; operating temp. –55°C to 150°C.

Additional sections: ganging up to 4 Modual with other option are available on special order.

MODEL 533 (3-TURN), MODEL 534 (10-TURN)

Low cost industrial wirewound precision potentiometer available as three turn (533) and dual gang units as well as 10-turn (534) standard. Choose between bushing and servo-mounting styles. Rugged construction and superior stop strength inherent in design. Standard specs. common to both models: Resistance tol. ±5%; operating temp. -55°C to 125°C; temp. coeff. 20 PPM/°C; Shaft size 0.812″ length × 0.2497″ dia.; elec. and mech. rotation: 533: 1080° +10° -0°; 534: 3600° +10° -0°; power rating: 533: 1.0W; 534: 2.0W.

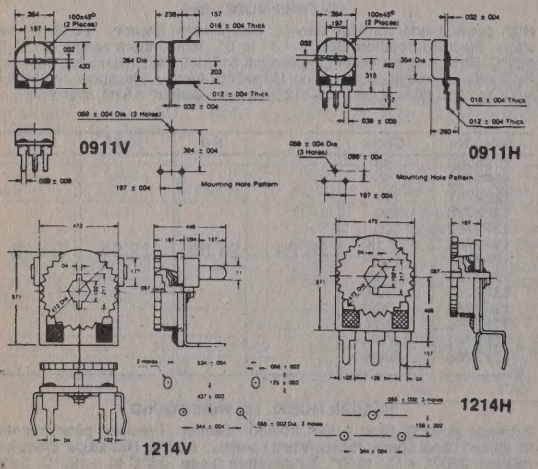
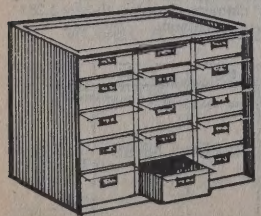
SUBMINIATURE TRIMMING POTENTIOMETERS





MALLOBIN

RVS151 A package containing cermet and carbon subminiature trimmer potentiometers. Horizontal and vertical mounting styles. Values from 500 ohms to 2 megohms.
81F000 Net **49.92**

¾ WATT CERMET SUBMINIATURE TRIMMING POTENTIOMETERS

Mallory subminiature adjustable trimming potentiometers provide excellent long-term reliability under adverse environmental conditions in an extremely small overall package.
Cermet units, additionally, provide considerably increased power dissipating capability in the same small package.

Mallory Controls

MALLORY

TYPE MLC — SUBMINIATURE

Subminiature Carbon Control. Only ½" diameter. **Rated ¼ watt linear, ⅛ watt audio.** ¼" 32 x ¼" bushing with nut. Shaft: ⅛" diameter x 1 7/16" FMS, MLC (steel); MLCN (nylon). (*) Indicates an SPST switch rated 3 amperes at 125 VAC, UL approved. Tolerance ±20%.

Taper No. 1: Logarithmic used in audio circuits where percent of change is small at start of rotation.
Taper No. 2: Reverse logarithmic used where percent of change must be large at start of rotation.
Taper No. 4: Linear taper where percentage of resistance change is directly proportional to rotational change on a straight line.

LAB SAMPLE KIT

MTC 151 Mallobin. Contains assortment of subminiature carbon trimmer controls designed for printed circuitry. MTC-1 for vertical mounting and MTC-4 for horizontal mounting. All are packed in compact, easy to stack case. "Mallobin" contains values, 10 ohms to 5 megs.
60F2293. Type MTC 151 NET 27.07

TYPE LW WIRE WOUND CONTROL

Fully enclosed. Wire wound on filled Teflon strips. Terminals: End, steel w/tin coating; Center: copper alloy w/silver plating. **5 watt at 25°C, derated to 4 watts at 55°C** in a case of 19/16" dia. ⅜-32" x ⅜" bushing and ¼" x 11/16" FMS, hollow, knurled, screwdriver slotted shaft. Specify length and type. Linear taper. Res. range: 1-25 Kohm. Tol.: 10% standard, 5% on special order. Life: 10,000 cycles. Torque: 5-6" oz., 2 oz. nom.

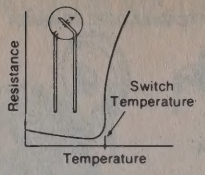
Keystone NTC and PTC Thermistors

PTC THERMISTORS—

Positive temperature coefficient themistors are characterized by an extremely large resistance change in a small termperature span. Temperature at which resistance begins to increase rapidly is referred to as the switch temperature (° C). All PTC resistances are ±30% @ 25 ° C.



All thermistors on this page are disc type with dip-soldered, radial leads

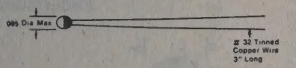
29F215	44015	1 Meg	1.0%	.2° C			

Thermistors which match a published resistance-temperature curve and thus each other to ± 1% not only at 25° C but over most of their useable range of —80° C to +150° C. Each thermistor is provided with resistance-temperature data for each degree C and with tolerance curves both in resistance variation and temperature sensing interchangeability. Base resistance from 100 ohms to 1 Megohm at 25° C available to ease circuit design impedance matching problems. Useful as transducers for measurement and control circuits where precision of YSI thermistors allow interchanging of transducers and multiple monitoring from single circuits. In control circuitry direct dialing of set points is possible as is trigger action at a specific temperature since resistance at any usable temperature is known to close tolerances. Also useful as temperature compensating devices for transistors, meters, circuits, etc. Physical size: .095″ maximum dimension #32 solid tinned copper leads, 3″ long. Thermistors are epoxy encapsulated for ruggedness and long life. Each thermistor supplied with data and with dissipation information, time constant and instructions. Rated at 25°C.

YSI ½% PRECISION THERMISTORS



- **Twice the Precision over Previous YSI Devices**

Stock No.	Type	Ohms	Res. Tol.	1-29	30-99	999

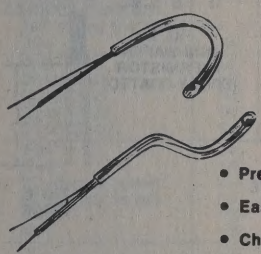
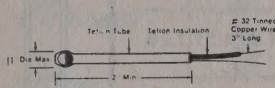
29F228	44033	2.252K	.4%			
29F257	44034	5K	.4%			

Specifically designed to match published and provided curves to within ± ½% over exceptionally wide range! Units can be interchanged in measuring circuitry with a maximum 0.1°C error. Resistance tolerance data provided with each thermistor for each degree centigrade and its corresponding resistance shown from —40°C to +100°C. Physical size: .095″ diameter. #32 solid tinned copper leads, 3″ long. Thermistors are epoxy encapsulated for ruggedness and extremely long life. Individually packaged with dissipation information, time constant data, and instructions. Rated at 25°C.

YSI 1% TEFLON PRECISION THERMISTOR PROBES





- **Precision—± 1% at 25°C.**
- **Easily bent to required shape**
- **Chemically impervious Teflon casing**

YSI interchangeable thermistors in chemically impervious form for sensing or control use. The interchangeable precision thermistors listed above, but additionally encased in a 2″ length of chemically impervious Teflon. 3″ leads extend 1″ beyond the probe for convenience in attaching leads. Leads are insulated from each other by a smaller Teflon tube around one lead. Probes can be used straight or can be bent by finger pressure to exact configuration required for placing the thermistor where you want it. 0.11″ max. in diameter.
Can be assorted for quantity prices.

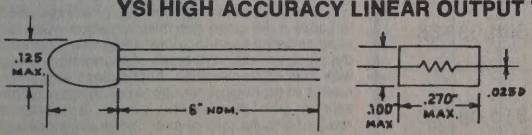
A composite precision thermistor device which in conjunction with the precision resistors supplied, provides linear voltage output or linear resistance, change with change of temperature. Sensitivities of 20 mv/°C. and more are common, 400 times the sensitivity of an IC thermocouple. Linearity deviation is as little as 2 parts in 1000 from 0 to 100°C. Combined absolute accuracy, linearity and interchangeability specifications of as little as 3 parts in 1000 from 0 to 100°C. Greater accuracies, interchangeabilities, and linearities available for shorter standard ranges. Parts guaranteed to stay within tolerances for three years. Useful for direct digital temperature indication with DVM or linear recorder. Provides linear temperature compensation with thermistor sensitivity. Time constant: 1 second, in well-stirred oil bath. Parts consist of composite thermistor and resistor assembly. For complete information and technical data, write Newark. Type 44018 and type 44019; additional thermistor composites for replacement or multiple input work. Items 44301 and 44302 are 0.1% metal film resistor sets (2 values per set) for use with thermistor composites.

YSI HIGH ACCURACY LINEAR OUTPUT THERMILINEAR THERMISTOR NETWORKS



Type 44212. Linear thermistor temperature transducer for use over a range of −50° C to +50° C. Uses a 3-thermistor composite and three resistors. Absolute accuracy and interchangeability is ±0.1° C. Linearity deviation is ±0.15° C with ±0.08° C possible with extra resistor selection.

Stk No.	Type	Range	Linearity	1-29	30-99	100-999
29F265	44212	−50° to 50° C	±0.15° C	34.05	28.94	23.83

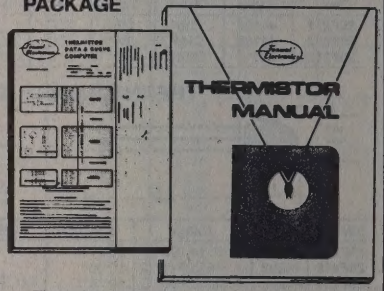
THERMISTOR ENGINEERING PACKAGE



- **Thermistor manual**
- **Handy time-saving "computer"**
- **Specs on over 500 thermistors**
- **Resistance-Temperature charts**
- **All dimensions tabulated**

Includes 8½ × 11" Data and Curve "Computer." Displays resistance values alongside temperature points of thermistor curves. Shortens computation time. Includes dimensions. Package also includes a 36 page thermistor manual. Can be used as a step-by-step primer and guide. Contains definitions of different types of thermistors along with their characteristics. Applications and schematics of thermistor circuits. Application problem solving with thermistors. Linear temperature readout circuits. List of over 500 thermistors and their specs along with Temperature-Resistance tables and a glossary of terms. Schematics of typical circuits included.

30F1783. NET 2.50

CAPACITOR INDEX

General ordering information for capacitors: When specifying capacitors, the most necessary information items are:

1. Dielectric type: (e.g., Mica, Film, Tantalum, Electrolytic)
2. Capacitance*: Picofarad (pf) Or Microfarad (µf, mf, mfd)
3. Voltage: Usually working voltage DC or AC (e.g., 50 WVDC)
4. Capacitance Tolerance: e.g., ±X% (±10% is common industrial std.)
5. Size.

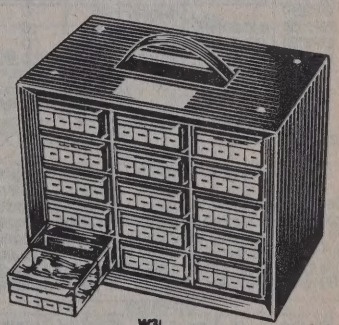
SPC TECHNOLOGY



SPC CAPACITOR KIT

Type SAC-462

This general purpose kit includes SPC capacitors in most requested values of miniature aluminum electrolytic, ceramic disk and film capacitors. The 10"x8"x6½" metal cabinet has 15 see through drawers that make finding the capacitor easy. Labels list the type, capacitance and voltage range. Cabinets can be stacked or mounted on the wall.

81F9240 type SAC-462 NET 130.95

CAPACITOR BOOTS

The Voltrex one-piece sleeve completely insulates leads and part of capacitor body allowing for increased insulation and higher component density. Available in: Round type for Ceramic and Titanium—Square type for Mylar—Tubular type for Electrolitic.

CAPACITOR INSULATING SLEEVES (ROUND)

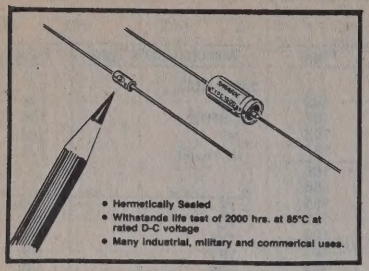
Type 109D, 150D & CS13 Tantalums

STANDARD SERIES 150D & MILITARY TYPE CS13



• Hermetically Sealed
• Withstands life test of 2000 hrs. at 85°C at rated D-C voltage
• Many industrial, military and commerical uses.

Subminiature axial-leaded tubular style, solid-electrolyte tantalex capacitor. Combines low leakage current, high capacitance and low dissipation factor with stability over time and temperature. Its operating temperature range is −80°C to +85°C with no voltage derating. Can withstand high frequency vibration from 55 to 2000HZ at 20g without internal damage. Furnished with plastic film insulating sleeve.

TYPE 109D SINTERED-ANODE TANTALEX ® CAPACITORS

Designed for auto, tele-com, aerospace, and critical equip. Suited to withstand shock and vibration found in military equip. Long shelf life (excess of 10 yrs.), have outer plastic-film insulation. Operating Temp. Range: −55° C to +125° C, Capacitance Tol: ±10%, ±20%, Leakage Current: Max d-c Leakage Current @ 25° C, 10μA, @85° C and 40μA @+1 25° C. Ripple Current: 100 to 600 max. Amp RMS @ 120 Hz, depending on Capacitance.

MIL-Type CSR-13 Solid Tantalum Capacitors

SPRAGUE
THE MARK OF RELIABILITY

- **Established reliability version of type 150D**
- **Meets Military Specification MIL-C-39003**
- **Hermetically sealed**
- **Direct Replacement for superceded Mil Type CS13**

Polarized, sub-miniature type, solid electrolyte tantalex capacitors to Mil Spec MIL-C-39003/01 established reliability. Axial-leaded, metal encased tubular.

Operating temperature −80°C to +85°C with no voltage derating. Furnished with plastic film insulating sleeves. Last letter in type number denotes established failure rate over 1000 hrs. L:2%; M:1% ±10% Cap. tolerances listed; ±20% Available on special request. Note: This design not intended to be mounted by its leads.

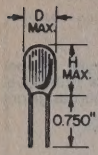
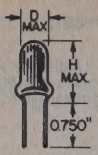
Solid-Tantalum Capacitors

196D EPOXY DIPPED SOLID ELECTROLYTE TANTALEX CAPACITORS



A1, A2 LEADS



B1 LEADS

Designed for plug-in mounting on printed circuit boards. Epoxy-dipped coating gives good electrical and mechanical protection. High stability, low dissipation factor. Cap. tol. ±10%. Operating temp. range −55° C to +85° C. End of type number denotes lead style and spacing: A1: 0.125"; E4: 0.250".

199D RESIN-COATED SOLID ELECTROLYTE TANTALUM CAPACITORS

Designed for minimum cost applications in entertainment and commercial equipment. Resin coating is flame retardent, highly resistant to moisture, damage. Cap. tol. ±20%. Operating temp. range -55°C to +85°C. End of type number denotes lead style and spacing: A1: 0.10"; A2: 0.20"; B1: 0.10". Other lead spacing available on special request.

Miniature commercial/industrial tantalum capacitors for use in applications where space is at a premium. Metal case is insulated with a heat shrunk polyester film. Leads are solder coated nickel 1.5" long x .02" dia. Tolerance: +10%. Designed to operate over a temperature range of −55c to +85c with no voltage derating. Maximum operating voltage is for continous duty at rated temperature.

TYPE 173D SOLID ELECTROLYTE TANTALEX CAPACITORS

PERFORMANCE CHARACTERISTICS

1. **Operating Temperature Range:** −55°C. to +85°C; to +125°C with 33.3% voltage derating.
2. **Capacitance Tolerance:** ±10% and ±20%.
3. **Dissipation Factor:** (At 25°C) 2 WVDC capacitors, 10%; 4 WVDC capacitors, 8%; 6 through 20 WVDC capacitors, 4 to 6%; 25 through 50 WVDC capacitors, 3 to 4%.
4. **Leakage Current:** Max. d-c leakage current at 25°C is: capacitors in size code U, 5μA; size code V, .7 to 1μA; size code W, 1.4 to 2μA; size code X, 2.4 to 5μA.
5. **Life Test:** Capacitors are capable of withstanding a 2000 hour life test at +85°C, or 1000 hour test at +125°C. After test, leakage current shall not be more than 125% of initial requirement, and capacitance at +25°C shall not have changed by more than ±10% of initial requirement.

- Designed for use in automotive, industrial, and consumer electronic equipment.
- Precision-molded in thermosetting flame-retardant epoxy resin.
- Meet stringent environmental and electrical performance requirements.
- Rugged construction, low dissipation factor, and low leakage current.
- Furnished lead-taped.
- Capacitors listed have capacitance tolerance of ±10%. Units with star * also available with tolerance of ±20%.

TYPE 2DF METALLIZED ORANGE DROP-CAPACITORS

Ideal for color TV replacement. Fits easily into tight spots because of their small size. Extremely high insulation resistance. Insures peak performance at temps. up to +85°. Radial leads are extra long for point-to-point wiring and crimped for printed board insertion. Double dipped in orange epoxy resin, for protection against heat and humidity. Tol. ±10%.

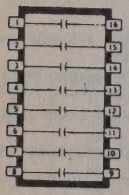
DIP MONOLYTHIC® CERAMIC CAPACITORS

- Compatible with DIP ICs
- Ideal for Breadboarding
- Superior Insertion Protection
- Reliable in Severe Environments

TYPE 923C



TYPE 926C

Separate capacitor sections are useful for by-pass and coupling applications. Standard pinspacing of .100" allows end-to-end placement in standard sockets, ideal for breadboard. Rated at 50 WVDC from −55° to 85°C with a tolerance of 10% if the eleventh letter of the type number is "K" and 20% if it is "M". **Series 923** is one section with two pin and **Series 926** is eight section, 16 pins.

NOTE: Width—.260.
Length—923c=.095. 926c=.795.

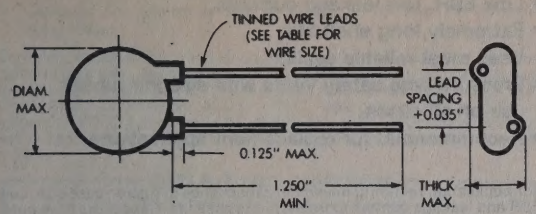
FORMULATION Z5U MONOLYTHIC CERAMIC CAPACITORS



For transistorized circuitry. Provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a touch resin coating. Well suited for by-pass, filtering application, and in the HF, VHF and UHF ranges through 1000 MHz. Radial leads. ±20% tolerance.

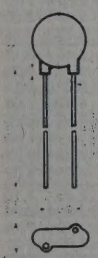
HYPERCON® HIGH-CAPACITANCE REDUCED TITANATE DISCS



- EIA Class 3—Specifically designed to meet the small size, high capacitance demands of solid-state transistorized or other low voltage circuitry.
- Especially intended for bypass, coupling and filtering applications where dielectric losses and high insulation resistance are not of major importance.
- Meet requirements of EIA Temperature Characteristic Y5P, allowing a maximum capacitance change of ±10% over the temperature range of −30°C to +85°C.
- ALL TYPES 25 VDC.
- Covered with tough insulting resin coating for excellent mechancial and moisture protection.

SERIES 5GA CERAMIC CAPACITORS

- General purpose—Designed for non-critical coupling, bypass, and filter applications as well as frequency discriminating circuits. Suited for all types of entertainment, communications, industrial, and medical equipment.
- Will meet or exceed requirements of EIA Temperature Characteristic Z5U. Max. capacitance change −56%, +22% over temperature range of +10°C to +85°C.
- Tough moisture-proof insulating coating assures good performance under severe conditions of moisture/humidity. Operating Temperature Range: −55°C to 85°C.

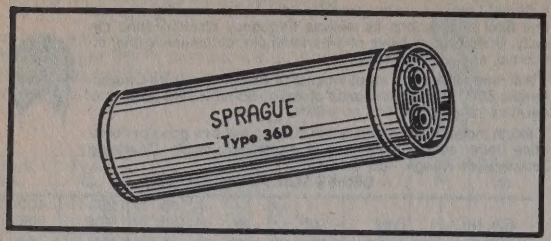
Powerlytic® Capacitors

TYPE 36D POWERLYTIC® ALUMINUM ELECTROLYTICS



- Designed for maximum capacitance.
- Low ESR, low leakage currents.
- Extremely long shelf life.
- Uses most reliable seals.
- Pressure-type safety vents with silicone rubber use on all cases.
- Recommended for replacement applications.

For application requiring maximum capacitance in a given case size. Low ESR and leakage current: extremely long shelf life. Capacitors have outer plastic film insulation. Withstands military environmental conditions including -55° C storage tests. Tolerance 3-50 WV. +75%; to -10%; 75-450 WV +50% to -10%. Capacitors have low-insert terminals.

MAKE NEWARK YOUR DEPENDABLE ONE-STEP SOURCE FOR EVERYTHING IN INDUSTRIAL ELECTRONICS

NOTE: SEE PAGE 171 FOR TERMINAL BUSHING KIT.

Powerlytic® Capacitors

TYPE 36DX POWERLYTIC® ALUMINUM ELECTROLYTICS RECOMMENDED FOR NEW EQUIPMENT DESIGNS

SPRAGUE
THE MARK OF RELIABILITY
a CK Technologies subsidiary

- Improved Version Of Sprague 36D Series, Up To 50% More Capacitance In A Given Case Size.
- Designed For Operating Life In Excess of 10 Years In Standard Applications

Especially designed and rated for use in computer power supplies, industrial control equipment, energy storage applications, and similar uses. Capacitors listed have outer plastic film insulation, and low insert terminals. Rated for continuous operation at −40 C to +85 C, ripple current: .064 to 30.7 max. amperes RMS @ 120 Hz and 65 C, depending upon capacitance. Pressure safety vent. Tol. 10 to 50 WVDC: −10% +75%; 200–450 WVDC: −10% +50%.

TERMINAL BUSHINGS FOR POWER SUPPLY ELECTROLYTIC CAPACITORS

Convert low screw-insert terminals to high screw-insert terminals on power supply 'lytic capacitors. Made from aluminum and especially tooled to close tolerance dimensions, assuring proper electrical connection between terminal and adaptor, eliminating resistance between these two elements. The additional 3/16" length on terminals is often required on bus board applications. Packaged 2 to an envelope, complete with washers and screws.

Stock No.	Type	Description	Diameter	Price
81F1111	75-327	Use with types 36D/36DX, 32DR, 602D	Restricted: 1 3/8" / 602D:2	.24

Electrolytic Capacitors

39D COMPUTER GRADE ALUMINUM ELECTROLYTICS

Welds at all critical anode and cathode terminals. End-seals are improved molded phenolic for unusually long life. Insulated case of flexible plastic. Low effective series resistance and leakage current. Oper. temp: -20°C to 85°C. Tol. -10+75% through 75WVDC and -10+50% for higher.

503D VERTI-LYTIC® MINIATURE ELECTROLYTICS

Type 503D, Low cost capacitors expressly intended for vertical installation on high-density printed wiring boards. Used for coupling, decoupling, bypass, and filtering circuits in entertainment devices. Excellent capacitance, ESR, low leakage current, oper. temp. range -49°C +85°C.

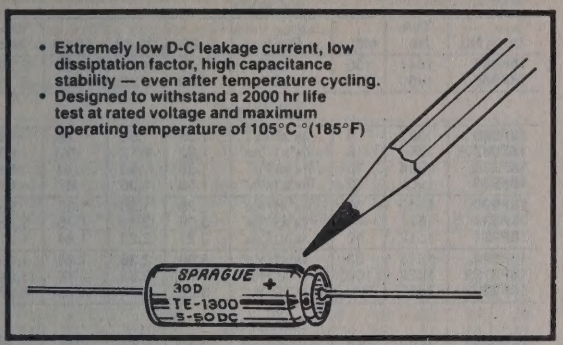
TE Miniature Electrolytics

TYPE TE LITTL-LYTICS

SPRAGUE
THE MARK OF RELIABILITY
a GK Technologies subsidiary

- Extremely low D-C leakage current, low dissipation factor, high capacitance stability — even after temperature cycling.
- Designed to withstand a 2000 hr life test at rated voltage and maximum operating temperature of 105°C °(185°F)



Exact replacement for Type 30D. For industrial and entertainment equipment applications with either transistor or modified electron-tube circuits. Temp. range –40° to + 105C. TOlerance: –10% + 75% except (*) –10% + 50%.

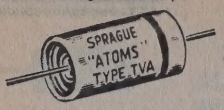
TVA Atom Electrolytics



- WITHSTANDS HIGH RIPPLE CURRENTS, TEMPERATURES, SURGE VOLTAGES
- LOW LEAKAGE CURRENTS
- LONG SHELF LIFE

Smallest dependable standard tubular. Ideal for replacement applications in many consumer type electronic devices. Capacitors to 475V operate up to 85°C. Higher voltage units designed for 65°C operation. Metal case construction with thermoplastic outer sleeve. All units listed are polarized except 400 WVDC. Avg. wt. 3 oz.

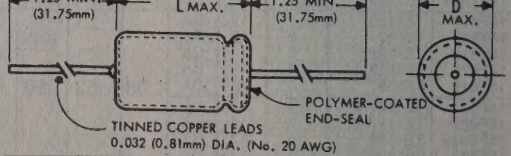
TYPE 630D EXTRALYTIC® ELECTROLYTICS FOR TIMING CIRCUITS

- Extremely Low Leakage
- Meets 2000 Hour Life Test
- Tight Tolerance Values
- All Welded Construction



These aluminum electrolytics are specifically designed for use in long-interval timing circuits. They feature extremely low leakage current levels and an unusually tight tolerance of only ±10%. These premium grade units offer capacitance values needed for commonly used R-C timing circuits. Excellent shelf and life characteristics over the temperature range of −55°C to +125°C. Reliable welded connections with an outer plastic film insulation and polymer-coated end-seals. The maximum leakage ranges from 1.0μA to 5.0 μA; the maximum ESR ranges from 13.3 ohms to 0.3 ohms. Working Voltage: 25 VDC.

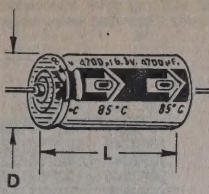
TYPE 501D MINILYTIC® ALUMINUM ELECTROLYTICS

cont.

- **Capacitance tolerance, −10, +50%**

Model 501D. For entertainment and commercial applications requiring miniature tubular electrolytics with good operating life. Intended for use in coupling, decoupling, bypass, and filtering circuits in radios, automobile receivers, portable tape recorders, commercial amplifiers and similar applications. Capacitance tolerance, −10, +50%. Designed for operation over temperature range of −40°C to +85°C. Very low equivalent series resistance and leakage current. Supplied with outer thermoplastic sleeve over aluminum case.



- **Very low ESR**

TYPE 672D, 673D
EXTRALYTIC® ALUMINUM CAPACITORS

Designed for use in high frequency applications. High capacitance combined with low inductance max. 25nH and low ESR make these very useful for bus bar decoupling in date processing applications. High ripple current capability, low impedence values. Operating range from −55°C to 105°C. Capacitance tolerance −10, +100%. Outer plastic-film insulation with polymer coated single end-seal.

TYPE 431P METFILM® E CAPACITOR

Construction gives benefits over metal encased molded or wax coated cardboard case tubulars of comparable ratings. Axial lead polyester film ca capacitor section protected from moisture by a wrap of polyester film tape. Operating temp. range: −55 C to +25 C.

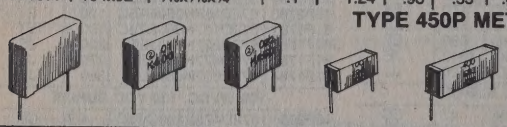
TYPE 450P METALLIZED POLYESTER



Stacked film capacitors inc. premolded box enclosure provides superior resistance to cleaning solvents and humidity. Operating temp. range: —40°C to +85°C; to +105°C with 30% volt.derating.

FILMITE® "E" ORANGE DROP CAPACITORS

Capacitors are wound from polyester film and thin gauge foil and are coated with epoxy. Capacitance tolerance is ±10%. Temp. range −55°C to 85°C. Insulation res 25000 megohm-microfarads at 25°C. Life test 250 hrs. at 85°C.

ORANGE DROP® DIPPED TUBULARS

Polyester film dielectric. Crimped-wire leads. Black stripe identifies outside foil. Double dipped in a bright orange epoxy resin—beats heat and humidity. Capacitance tolerance is ±10%. Temp. range −40°C to +85°C.

TYPE 715P FILMITE® 'L' ORANGE DROP DIPPED TUBULARS

- Linear negative temperature coefficient
- High AC current flow
- Flame-retardant epoxy coating

Polypropylene film capacitors are ideal where high AC current flow is needed. Negative temperature coefficient of 180 ppm/°C allows for high circuit stability compensation. Tolerance of ±5% from 25°C to 105°C. Leads are 1.250" long and crimped for constant spacing.

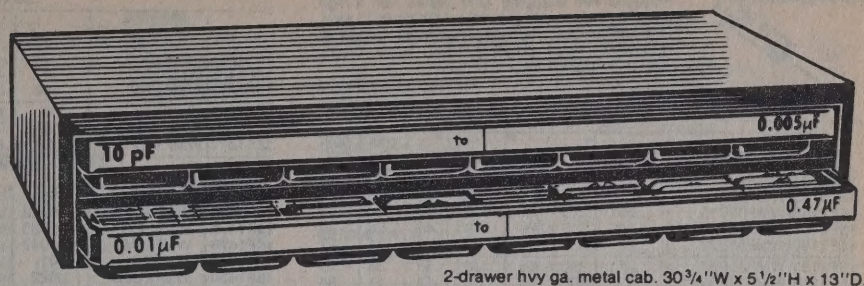
Capacitor Assortments

SPRAGUE
THE MARK OF RELIABILITY
a GK Technologies subsidiary

- **Handy assortments of capacitor types and values.**
- **Ideal for lab, school, R&D, and MTCE dept. use.**
- **All cabinet drawers/compartments prelabeled for quick reference.**
- **All cabinets stockable with like types.**



2-drawer hvy ga. metal cab. 30¾"W x 5½"H x 13"D.

J-141 Assortment: Type TE "Litti-Lytic" Aluminum Electrolytics
Contains 200 type TE miniature, axial-leaded, metal encased aluminum electrolytic capacitors. 5 each of 40 of popular values supplied. Packed in 2-drawer cabinet as shown. Contents:

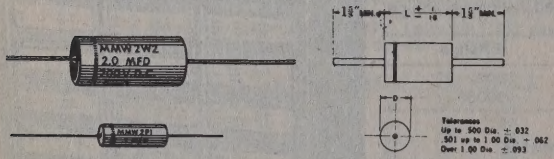
TYPE MMW METALIZED POLYESTER TUBULARS



Metalized polyester film dielectric section tightly wound and encased in tough film wrapper. Operating temperature range of −55°C to + 85°C at full rated voltage. May be operated to maximum temperature of + 125°C with voltage derated to 50% of the + 85°C value. Tolerance: ± 20%. Average shpg. wt. 3 oz.

VERTICAL MINIATURE PRINTED CIRCUIT STYLE

Type PC is a single ended, metal cased aluminum electrolytic. Designed for vertical mounting on printed circuit boards. Continuous duty operation over temperature range of −40°C to +85°C.

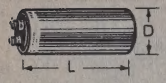
Cornell-Dubilier Capacitors

COMPUTER GRADE HIGH CAPACITANCE —TYPE FAH



Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Oper. Temp. Ranges: –40°C to + 85°C, Tol: 15-50 VDC, –10 + 100%, 75-300 VDC, –10 + 75% 400VDC, –10 + 50%.

Last two digits of CDE No. indicate case size (FAH6500-15-A). Add 1/16" to dia. and 3/8" to lgth. for size including sleeve.

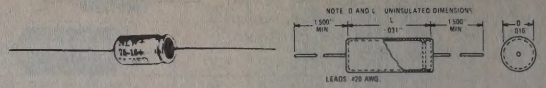
NLW ELECTROLYTIC CAPACITORS



Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leadage currents freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, -40°C to + 105° Tol. -10% to + 75%.

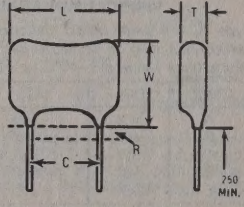
CD6 Series Dipped Mica Capacitors

MEASURED AT POINT WHERE PHENOLIC CONE BECOMES A CYLINDER



Silver MICA microminiature radial lead capacitors. CD6 type ideal for use in delay lines and IF transformers.

CD6 Dimensions as follows: L: .265 W:.135 T: .095 R: .125 C: 172

Capacitor Tolerance: Third letter from end indicates tol. Example (C)03 = ± 1 pF. C = ± 1 pF, D = ± .5 pF, G = ± 2%, J = ± 5%

Cornell-Dubilier Dipped Mica Capacitors

CDE

CD SERIES DIPPED MICA CAPACITORS

Feature multi-coat dipped process to meet rigid humidity requirements. Conform to EIA specs. Meets requirements of MIL-C-5. Tinned copperweld leads. All units meet 10-2000 cycle vibration tests. Operating temp: −55°C to +125°C. Tolerance denoted at end of Type No: J: ±5%; G: ±2%; D: ±0.5 pf. Operating potential 500 WVDC. (*) 300V. (**) 100V.

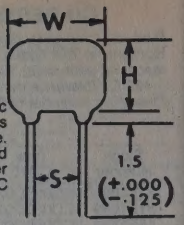
Solid Tantalum Capacitors

TDC-TDM DIPPED SOLID TANTALUM CAPACITORS

TDC DIPPED SOLID ELECTROLYTIC TANTALUM CAPACITORS



"Type TDC-TDM Capacitors used for bypass, coupling, timing, and filter circuits in consumer and industrial electronic equipment offer long life electrical stability characteristics of solid tantalum at low cost. Tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture, premium performance, minimum size. Operating temperature −55°C to +85°C. TDC offers high CV product with radial stand-off lead spacing of .125 inch and .250 inch. TDM is a low profile rectangular thin body shape. Radial lead spacing is .125 inch and .200 inch in the smaller case size with .250 inch lead spacing in the larger case sizes. Operating temperature −55°C to +85°C. Tolerance TDC ±10%. TDM ±20%.

TDM Epoxy Dipped Solid Tantalum Capacitors

EPOXY-COATED SOLID TANTALUM CAPACITOR KITS

MALLOBINS—Attractive 15 drawer plastic cabinets are stackable and keep all of your parts instantly available and fully identified. Clear plastic drawers are custom partitioned to keep parts where they belong. Contain a variety of carefully selected assortments of popular Mallory components keyed to current market trends. Size 7½"H x 9⅛"W x 6½" D.

Wet Slug Tantalum Capacitors

MALLORY

MTP TANTALUM CAPACITORS

Offers greatest capacity of any tantalum type. Meets or exceeds MIL-STD-202 for high freq. vibration, shock, temp. and immersion cycling, moisture resistance, sleeving dielectric strength, and insulation resistance. Increased capacitance and lower ripple current. Same specs as CMT except sealed in silver case with elastomer end seals. Completely insulated. Operating temp. from −55°C to +85°C. Tolerance ±20%.

CMT TANTALUM CAPACITORS

Polar wet slug tantalum capacitor ideal for miniature circuits. This line offers much higher CV product per unit volume than other wet slug and solid types. Sealed in silver plated copper alloy case that is closed on an elastomer end seal. Anode lead-weld joint and end seal are epoxy resin encapsulated. Operating Temperature from −55°C to +85°C. Tolerance ±20%.

CTL TANTALUM ELECTROLYTIC CAPACITORS

Miniature, polarized, sintered tantalum anode, liquid electrolyte capacitor. Exhibit high MFD-Volt rating to vol. ratios. Low cost replacement for wet slug tantalum caps. Equivalent to style TLS except come in silver plated copper alloy case. Capacitance tolerance ±20%. Operating temp. from −55°C to +85°C (at full rated voltage); −55°C to +125°C (with proper voltage derating).

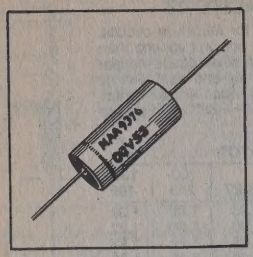
CSR13 Tantalum Capacitors

TYPE CSR SOLID ELECTROLYTE CAPACITORS



Type CSR13 Solid Electrolyte Tantalum Capacitors to MIL-C-39003/01. Established reliability, low leakage and low impedance. Hermetically sealed with plastic insulating sleeve.

Meet MIL-C-39003 specifications. Life test, 10,000 hours. Temperature range, −55°C. to +125°C. Leads may be welded or soldered: are tinned nickel, type N1 of MIL-STD-1276.

TAC MOLDED SOLID ELECTROLYTIC TANTALUM CAPACITOR

TAC. The TAC Capacitor uses the same dry electrolyte, sintered tantalum anode that is used for high reliability, military type tantalum. The capacitor is housed in a precision molded, high impact resistant case designed to close tolerances for adaptation to high speed automatic insertion applications. Cases are tapered at the positive lead for quick polarity identification. Leads are of high purity nickle with solder coating. Temperature ranges: −50° C to.+85° C (to +125° C with proper voltage derating).

- Small Uniform Size
- Tough Epoxy Case
- Long Shelf Life

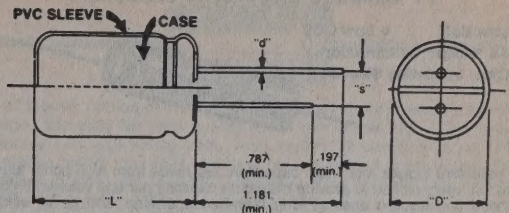
VTL MINIATURE SINGLE ENDED ELECTROLYTICS



- **High Density** • **Low Leakage** • **Low ESR** • **PVC Sleeve**
- **Polarity Encoded Leads** • **−40°C to +85°C** • **−10, +30% Tol.**

Miniaturized aluminum electrolytic single ended capacitor which uses a newly developed high quality aluminum foil. Low profile case sizes. Excellent stability over a temperature range of −40°C to +85°C. Capacity tolerance: −10%, +30%. Size is diameter x length.

THF SOLID ELECTROLYTIC TANTALUM CAPACITORS

THF solid tantalum capacitors offer low impedance to ripple current at frequencies above 1kHz to 100kHz. Configuration sintered anodes provide lower ESR than conventional tantalum capacitors which means lower power losses and results in savings by substituting one THF for up to four CSR 13 capacitors. Operating Temperature Range: −80°C to 125°C.

APPLICATIONS: Switching Regulators, High Frequency Power Supplies, By-pass filtering.

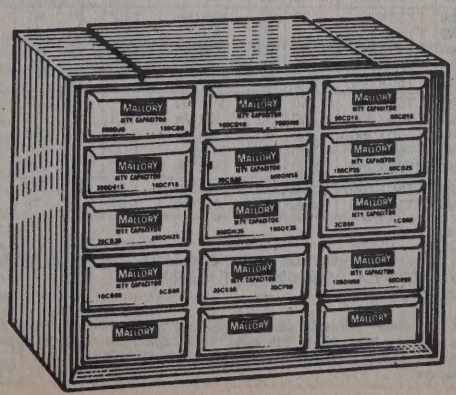
LAB SAMPLE KITS

- **Convenient 15-Drawer Stackable Cabinet**
- **Durable Capacitor Construction**
- **Mallobin Quality and Reliability**



VTL-151 Mallobin—Contains 135 VTL capacitors. 45 different values with voltages ranging from 10 to 50 volts. Three capacitors of each value are provided in a handy 15 drawer cabinet which is stackable.
60F2296. NET **49.75**

VPR 151 Mallobin—Contains 45 capacitors. 15 different values 160μf to 4900μf with voltages ranging from 10 to 50 volts. Two capacitors of each value are provided in a handy 15 drawer cabinet which is stackable.
81F9279. NET **69.36**

Type SX301. Mallobin Merchandisers—Two 15 drawer cabinets with popular voltages and values. 73 different values. 210 capacitors total.
20F311. NET **67.23**

TCG 151 Mallobin—Contains 30 capacitors. 15 different values 10μf to 10,000μf with voltages from 10 to 150 volts. Two capacitors of each value are provided in a handy, stackable 15 drawer cabinet.
81F9280. NET **65.35**

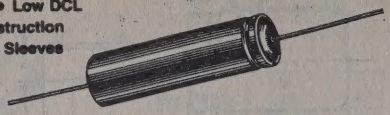
TCX 151 Mallobin—Contains 30 capacitors. 15 different values, from 65μf to 12,000μf. Voltages range from 15 to 75 volts. Two capacitors of each value are provided in a handy, stackable 15 drawer cabinet.
81F9281. NET **75.88**

Miniature Electrolytic Capacitors

MALLORY

TT Miniature Electrolytic Capacitors

- Low ESR
- Low DCL
- All Welded Construction
- Clear Insulating Sleeves



TT miniature tubular aluminum capacitors are made from high purity aluminum foil, deep-etched to provide maximum capacity per unit volume. Etched cathode construction assures long hum-free operation. Utilizes all-welded construction; exhibits exceptionally low DCL and ESR. Supplied in aluminum case with insulating sleeve. Temperature range: −55°C to +85°C (3 through 100 WVDC), −40°C to +85°C on everything else. Tolerance: −10 +75%, 1-100 WVDC; −10 +50%, 100-150 WVDC.

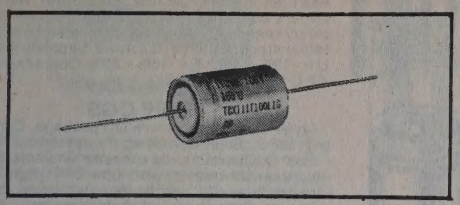
Electrolytic Capacitors

MALLORY

TCX HIGH PERFORMANCE COMPUTER GRADE +105°C



The TCX capacitor is a tubular, axial lead, aluminum electrolytic capacitor. Designed to assure optimum CV product along with outstanding DC leakage current, low ESR, low impedance and temperature stability, very high ripple current capability. A pressure safety vent is formed into the capacitor walla. Reverse voltage should not exceed 1.5 volts. Tolerance: 3–75 WVDC, −10% +75%. Range −55°C to +105°C. Storage: −75°C to +125°C, up to 200,000 feet altitude. Leads are 2½" tinned copper wire, #20 AWG for case diameters of ½" and ⅝", #18 AWG for ¾" and up. Dimensions are inches, diameter by length. Supplied with Mylar® insulated sleeve.

TCG TUBULAR COMPUTER GRADE

Small tubular version of the Mallory type CG electrolytic capacitor. Meets present demands for high quality performance and high C/V product. Features can wall safety vent, wide variety of container sizes, PVC insulating sleeve, low ESR and long life, all welded construction. Temperature range: −40° to+85°C. Tolerance: 10 to 50 WVDC types, −10% +75%; 150 to 450 WVDC types, −10% +50%.

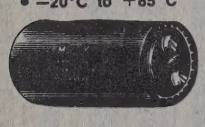
TYPE NP NON-POLARIZED
±25% Tol.

• –20°C to +85°C



Plastic case electrolytics for high capacity, low-voltage applications such as dry disc rectifier filters, movie equipment, etc. Two screw terminals. 10 oz. HC types are polarized; NP types are non-polarized.

TYPE NP NON-POLARIZED
±25% Tol.

TYPE CG

Conservatively rated capacitor designed for long operating life (over 10 years in many applications). Features include low leakage current, high ripple current capability, low ESR and pressure sensitive safety vent. PVC insulating sleeve standard 7/32" high terminal posts, use 10-32 screws. Capacity tolerance: U = -10% + 15%; T = -10% + 50%. Operating temp. -40° C to +85° C.

TYPE CGS

Mylar sleeved maximum DC Leakage. Current: @ 25° C, 6ma. Operating Temperature; -40 to +85° C. Operating life exceeds ten years. Pressure sensitive safety vent. Low ESR. High ripple capabilities 7/32" high terminal posts, 10-32 screws. Tolerance: 1-150 working volts DC, -10%. +75%; 200 working volts and up, -10%, +50%. Temperature tolerance and vibration capability same as Type CG Shipping Weight, 3 oz.

Computer-Grade Capacitors

MALLORY

CGR COMPUTER GRADE CAPACITORS

Low ESR, high ripple current power supply filtering capacitor in aluminum can. Low DC leakage current plus high ripple current capability over broad temperature and frequency ranges. Has been successfully utilized as an output capacitor in some high frequency switching regulator power supplies. Ripple capability up to 35.9 amperes at 20kHz at +85°C. Oper. Temp.: −55°C to +85°C. Tolerance: −10% +75%. For Price Quotes on Larger Quantities Contact Newark.

VPR ALUMINUM ELECTROLYTIC CAPACITORS

Designed for use in high frequency switching regulators where low impedance and inductance is required. Low ESR and excellent μF stability allows VPR to handle high ripple current at high frequency and make VPR an ideal by pass and coupling capacitor in EDP equipment. Oper. Temp.: −55°C to +105°C. Tol.: −10% +75%. For Price Quotes on Larger Quantities Contact Newark

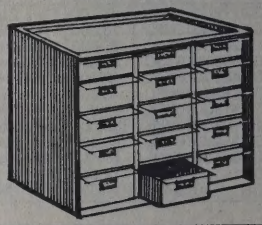
SPECIFICATIONS
All Tests Per MIL-C-11015

- **Capacitance Range:** 10pF to 1,000,000pF. Tested at 1.0 volt RMS ± 0.2 volt RMS, 1MHz (100pF and below), 1kHz (over 100pF), and +25°C.
- **Capacitance Tolerance:** K = ±10%, M = ±20% as listed.
- **Working Voltage:** 50, 100, 200 VDC as listed.
- **Dielectric Strength:** 250% of rated working voltage with 50 mA maximum charging current.

CK05 and CK06 Series capacitors are for general purpose bypass and coupling applications in telecommunications and instrumentation equipment. They are military qualified to MIL-C-11015 specifications. The capacitance values from 10pF to 1,000,000pF in 50, 100 and 200 WVDC ratings are offered. Radial lead design provides easy p.c. boards installation. Two package sizes with .200" lead spacing are available: CK06, .290 sq.; CK05, .19 sq. Operating temperature range: −55°C to +125°C. Insulation Resistances: 100,000 megohms or 1000 megohms whichever is less. Tested at rate working voltage and +25 °C.

MONO 151A LAB KIT



Lab Kit Assortment Mallory Part No.	Cap (pF or µF)	Tolerance	WVDC	Quantity

81F9283 MONO 151A Lab Kit 120.02

"Mallobins" . . . These attractive 15 drawer plastic cabinets are stackable and keep all of your parts instantly available & fully identified. . . . Clear plastic drawers are custom partitioned to keep parts where they belong. Mallobins contain a variety of carefully selected assortments of popular Mallory components keyed to current market trends.

Size 7½" high, 9⅛" wide, 6½" deep.

Polystyrene Capacitors

Provides the ultimate in temperature and humidity protection. Can replace mica, film, paper and ceramic types in most applications. Insulation resistance. SXK & SXL types greater than 100 megohms; SXM and SX types greater than 100,000 megohms. Temperature range: −40°C to +85°C. Tolerance. SX types ±5%; SXK, SXL and SXM types ±2.5%.

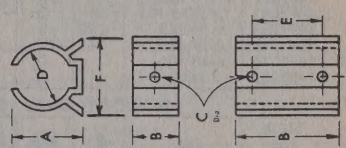
M

Type V-VINYL Component Clips



Plastic Component Clips are a convenient, economical means for fastening and, where required, insulating a wide variety of electrical and electronic components, accessories and parts. They permit fast and easy insertion, hold firmly, yet allow easy removal. Typical applications are capacitors, resistors, lamps, batteries and fuses.

They are made of strong, black vinyl and have high dielectric strength.

The floor of the clip is pierced for screws or other fastening devices

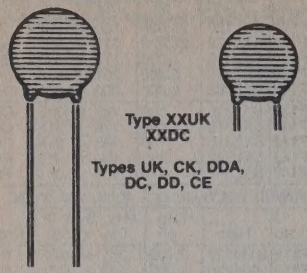
Capacitors

LOW VOLTAGE DISC CERAMICS CAPACITORS



GENERAL PURPOSE
500VDCW—Z5V

Designed for high capacity low voltage demands of transistor circuitry. Leads #22 tinned copper. 1.5" minimum length. Power factor: 3% max. at 1 KC. Insulation: Phenolic vacuum wax impregnated. Tolerance: +80 −20%. Operating range: −55 to +85°C.

ULTRA-KAP® CERAMIC DISCS

- **Semi-Conductor Design**
- **Miniature Size**

These reduced titanite devices provide from 50 to 100 times greater capacitance than standard ceramic discs. Excellent for bypass and coupling applications in power supply, audio, IF and other low voltage circuits. Durez coated, wax impregnated. Oper. temp. −55°C to +85°C. Standard lead length 1.5" min. XXUK have .187 clipped leads for low profile uses.

TEMPERATURE STABLE CAPACITORS

Excellent capacitance stability over wide temp. range. Used where extended temp. stability is required for RC networks and conventional applications. Working voltage: 600 VDC. Dielectric strength: 250% of rated working voltage. Operating temp. range: −55°C to +85°C. Encapsulation: Phenolic coated, wax impregnated. Leads-configuration: Tinned wire. Type SLL.

Disc Ceramic Capacitors

CENTRALAB, INC.
A NORTH AMERICAN PHILIPS COMPANY

TYPE DD, XXDD, DD30, DD60 CERAMIC DISCS

DD, XXDD, DD30, DD60

Intended for by-pass, coupling or filter uses. Disc ceramics have a higher dielectric constant, greater voltages, and higher capacities than paper or mica types. DD30/DD60 types for high voltage. XXDD is a cut leaded low profile version of DD. Phenolic coated, wax impregnated. Oper. temp.—55°C to +85°C. For DD and XXDD: Tol. ±10%, except (*) ±20%, (†) ±.5 pF, (#) GMV; +100, —0%.

CERAMIC CAPACITOR KITS

- **Ideal For Schools, Labs, Maint. Depts., and R & D Depts.**
- **Kits Contain the Most Popular Values ARRANGED by CAP VALUE**
- **Shipped Set-Up and Ready to Use in Steel Frame Cabinet**

Kit 60D contains an assortment of the most widely used general purpose ceramic disc capacitors. 600 and 1000WVDC ratings in 40 different values from 5pf to .05 mf.

KIT-60D CONTENTS

Type	Qty.	No. of Values	WVDC Cap. Range	EIA Temp. Char.
DD	230	33	1000 5pf—.01μf	S2L, S3N, Z5F, Z5R, Z5U
DD	15	3	600 .01μf—.05μf	Z5U

67F5031. NET **75.95**

Kit 63L contains an assortment of the most used low voltage Ultra-Kap and general purpose capacitors in 3 to 100VDC in 14 valuues from .005mf to 1.0mf.

KIT 63L CONTENTS

Type	Qty.	No. of Values	WVDC	Cap. Range	EIA Temp. Char.
UK	230	10	3-75	.01-1.0 μf	Y5P, Y5T, Y5U
DC	25	6	100	.0005-.1μμ	Z5U

F9W511 NET **143.14**

KIT-100MK contains a wide assortment of the most popular radial leaded Mono-Kap© monolithic capacitors in three industry standard temperature characteristics. Eighty values, ranging from 10pf to 2.2mfd, in four tolerances, 50 and 100 VDC ratings, totaling 495 pieces. Each drawer is clearly labeled with T.C., capacitance value, voltage and part number.

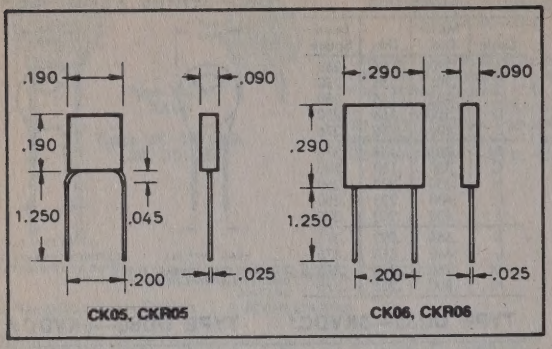
Military Grade Capacitors

CK-CKR Series Monolithic Ceramic Capacitors



6

CK05 - CK06 molded monolithic ceramic capacitors are military qualified to MIL-C-11015 specifications. Ideal for general purpose bypass and coupling applications in telecommunications and instrumentation equipment and a wide variety of other applications. Operating temperature: -55°C to +125°C. Insulation resistance: 100,000 megohms or 1000 megohm-microfarads, whichever is less. Tested at rated working voltage and +25°C.

CK05 - 200V (TOL ± 10%)

CKR05-CKR06 Monolithic Military Type Capacitors
Meet the requirements of MIL-C-39014. Industry standards for high reliability applications within the communications, computer and aerospace fields and also in a variety of other applications. Operating Temperature: -55°C to +125°C. Supplied in "R" (0.01%) and "S" (0.001%) failure rate levels (per 1000 HRS).

Reliable hermetically sealed type glass to metal construction with tinned wire leads. Ideally suited for applications in communication equipment, navigation and guidance systems, computer business machines or where high volume and low price is required. Working potential: 50 WVDC. Operating temperature: −55°C to 85°C for Z5U; −55°C to 125°C for OOG and X7R. Available in tape and reel on special order. C42 (Y5V) not listed. Available on spec. order.

MONO-GLASS™ CAPACITOR KIT

Kit-110MG contains a wide assortment of the most popular C40, C41, C43 axial lead mono-glass monolithic capacitors in three industry standard temperature characteristic, COG (NOP), X7R, Z5U. 56 valves, ranging from 10pf to .47mf in four tolerances, 50WVDC rating. Each drawer is clearly labeled with T.C., capacitance value, voltage and part number.

MONO-PAK® RADIAL LEAD MOLDED CAPACITORS

These two pin dual-in-line capacitors feature .165" seated height for compatability with IC's and other DIP components. Available in standard EIA Temperature Characteristics. Capacitors are magazine loaded (200 pcs. per) for automatic insertion.

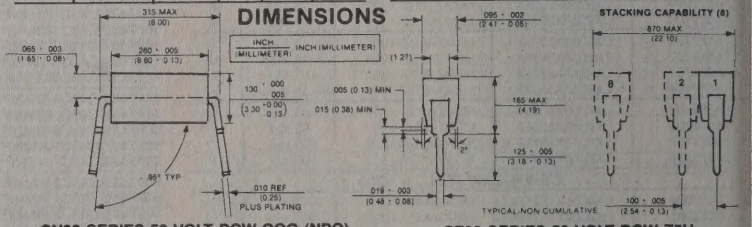
DIMENSIONS



Capacitors

DIPPED-MICA CAPACITORS

Silvered mica with plastic coating. Combines stability, dielectric strength, "Q", dielectric constant, chemical inertness, moisture and puncture resistance. Oper. Temp. —55 to 150°C. Tolerance: ±5% except (*) ±0.5 pF. DMS series is stamped with cap. values in pF followed by a letter indicating tol: (J) ±5%; (A) ±1 pF; (D) ±0.5 pF. All meet or exceed MIL-C-S specifications. 500 volts except (†) 100 V and (**) 300 V.

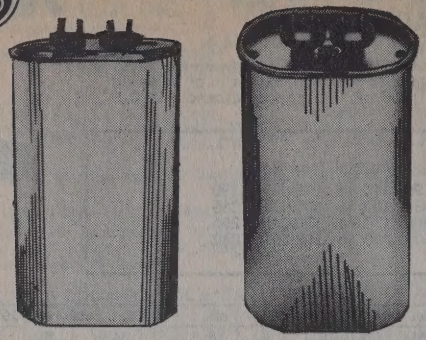
AC/DC POWER CAPACITORS



GEM-I METALLIZED CAPACITORS (97F Series)

General Electric's line of GEM-I capacitors represents a major advance in capacitor technology. GEM-I brings improved performance with substantial reductions in size and weight over conventional paper/foil designs. The extremely low dielectric losses, the inherent "self-healing" property of metalized capacitors, and the greatly increased microfarads per unit volume of GEM-I make it the choice for all AC applications up through 440 VAC. The smaller microfarad values come in an oval case (Style A). The larger units are round case styles (P,S,T).

DIELEKTROL I PAPER/FOIL CAPACITORS (21L Series)

The oval-cased designs are included primarily for replacement purposes. The majority of A-C capacitors now in service are ovals and the round GEM-I designs may not be acceptable.

SPECIFICATIONS

Both the 97F and 21L capacitors shown here are rated for 60,000 hour life with 94% survival when operated within rated voltage and temperature limits. The operating temperature range is −40° to +70°C. The capacitance value shown has a tolerance of ±10%. The Dissipation Factor for the 97F's is 0.1% max. and for the 21L's 0.6% max. All the units contain GE's patented pressure sensitive interrupter and carry UL recognition for fault currents up to 5000 amps.

26F6600 SERIES PAPER/FILM CAPACITORS

These higher voltage A-C capacitors are designed for use in ferroresonant power supplies and A-C filters. The polypropylene/paper dielectric system provides excellent reliability and low losses.

SPECIFICATIONS

Rated life is 60,000 hours with 94% survival. The capacitance tolerance is ±6% and the units are color coded in 4 bands each of 3%. The operating temperature range is −55°C to +70°C. All units contain the pressure sensitive interrupter.

SCR COMMUTATION CAPACITORS

26F6700/6900 SERIES SCR COMMUTATION CAPACITORS

These capacitors are designed for medium to high current applications such as in SCR commutation or either high frequency. A-C circuits. The internal construction features a polypropylene/paper dielectric with exposed foil electrodes and braided cable connections. The specified life is 40,000 hours with 95% survival when operated within rated conditions. The "peak" voltage is the maximum repetitive voltage (in either polarity) that the capacitor can handle.

GENERAL PURPOSE CERAMICONS

Ceramicon discs. For variety of applications. COGO is a high stability type; X5F, X5R and Z5A are general purpose types; U2,J0 is a temperature compensating type. All types are rated at 500 WVDC. Standard lead length is 1½" minimum. *mf.

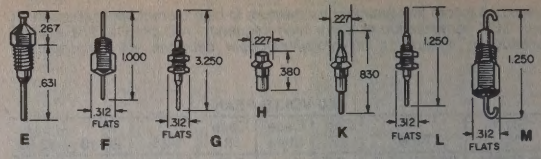
FEED-THRU CERAMIC CAPACITORS



For by-passing RF to ground in feed-thru appl. Wire terminal (362) and hook terminals (327) serve as tie pt. for several connections, for supporting other ckt elements and for pt. to pt. wiring. 2499 (for aerospace appl.) is mini version of 327. 2499 and 327 are sealed in heavy metal housing at both ends with a low loss thermosetting plastic. *Curved leads. †MIL-C-11015C 20%.

TRANSCAP CERAMIC CAPACITORS

TRANSCAPS are low cost disc type ceramic capacitors for transistorized applications. Useful where high capacitance and low cost are important, such as in by-pass and filtering. Dissipation factor: 7% max. @ 1kHz, 3VRMS, 25°C. Body thickness: .156". Lead spacing: 5635, 5655, 5835, 5855—.25"; 5615, 5815—.375".

Type LK capacitors offer unusually good electrical characteristics with very small size. They are specifically designed for filter, bypass, and coupling applications in the low audio frequency range. Have twice the life of MIL-C-25D capacitors. Temp. range: −55°C to +85°C. Std. tol. ±10%. Mineral oil filled. No PCB's. Footed Brkts. supplied.

TYPE "OF" HIGH VOLTAGE GLASS CAPACITORS

Mylar film dielectric. Used for high voltage power filter. Mount in any position. Temperature range—55°C to +85°C. Tolerance ±10%. ⅜x8-32 screw terminals except (*) marked have tinned copper pigtails. Heavy wall, hard glass case.

Contains no PCBS

HIGH VOLTAGE D.C. POWER PACKS

- **Long-life Silicon Rectifiers Provide Instant Operation**
- **Output from Zero to Rated Voltage by Adjusting Input**
- **Mount in Any Position**

Hermetically sealed, oil filled hot-tinned or lead coated plate steel container with MIL-L-7178-lacquer coating. 118 volt 50-500 Hz input. Output operation from zero to rated voltage by adjusting input. Max. ambient 85°C. Supplied with footed brackets. Positive or negative out. except items marked (*); pos. only. Terminals: 20kVA and less—solder lugs. Units 25kVA and over—aluminum Corona Spheres.

Monolithic Ceramic Capacitors

MURATA ERIE NORTH AMERICA, INC.

CERAMIC CAPACITORS

Encapsulated with a polymeric coating for mechanical and electrical protection under severe conditions. Monolithics incorporate stacked parallel plates with metal electrodes fired at high temp. Temp. range characteristics adapt capacitors from stable requirements of tuned circuits to general needs of coupling and bypassing. Oper. Temp.: COG(NPO), X7R, −55 to +125 C; Z5U, +10 to +85 C.

"SUPER CAP" CERAMIC CAPACITORS

"Super Caps" are low cost disc type ceramic capacitors for transistorized applications. Useful where high capacitance and low cost are important such as in by-pass and filtering. Dissipation factor: 7% max for Y5R and 5% for Y5P at 1KHz, .3VRMS, 25°C.

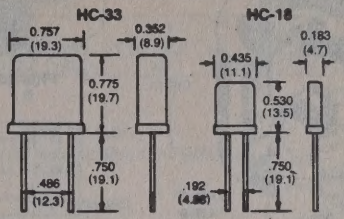
MICROPROCESSOR QUARTZ CRYSTALS



Piezoelectric devices with inherently high "Q". Generally used to time microprocessor circuitry. Frequency tolerance of ±.005% at room temp. (25° C) and stability tolerance of ±.01% over temp. range (−20° C to +70° C). Other frequencies including low frequency (KHz) available upon request. Holder type HC-18 except (*) HC-33.

APPLICATIONS

- Fire alarms
- Gas detectors
- Calculators
- Medical electronics
- Appliances
- Burglar alarms
- Automobiles
- Aircraft
- Clocks
- Watches
- Communication systems
- Data processing
- Instrumentation and control systems
- Restaurant equip.
- Recreational equip.

6

(A) Miniature PKB Piezo-Alarms are designed requiring a small highly-reliable acoustic alarm or signal. Solid state with no electromechanical components. Cased piezo-electric units produce a clear, audible tone and require very low electronic power input for high acoustic power output. Self-contained and require no external driving components. Standard pc board mounting.

(D,E) The piezo-alarms are completely self-contained alarms requiring only a DC voltabe source for operation. They provide surprisingly high audio outputs with exceptionally low input power requirement and offer a high degree of flexibility because of their ability to operate over a broad range of input voltages.

Units are compatible with most standard pc board assembly and flow soldering procedures.

(B) The piezo-alarms have *no* internal "feedback" tab, suited for the generation of both standard tones and unusual sound effects that are possible with specifically designed driving circuits including musical melodies, insert sounds, etc.

Compatible with all standard pc board and flow soldering techniques used in high volume electronic equipment manufacture.

(F) Piezo-alarm elements that can meet any application requirements. Both self driven units with a feedback electrode for oscillation generation and externally driven units designed to be driven by an external signal source are included.

Devices available from AMP and Molex.

(C) Increased use of microprocessors in a variety of consumer applications in microwave areas, automobiles, clocks, washers and dryers to name a few, piezo-alarms provide an inexpensive and highly reliable means of audio alarm generation. Units are provided with a "feedback" tab for use in self-oscilating circuits.

Components are compatible with most standard pc board assembly and flow soldering techniques.

SUBMINIATURE TRIMMING POTENTIOMETERS

TRIMMING POTENTIOMETERS

Variable resistors which are widely applicable to a variety of consumer and industrial applications. Excellent long-term reliability under adverse environmental conditions in an extemely small overall package.
Cermet units, additionally, provide considerably increased power dissipation capability in the same small package.

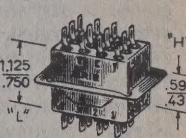
MULTI-SECTION TYPES

MINIATURE 6 & 12 CHANNEL R.F.I. FILTERS



Minimum attenuation: 45 dB from 100-200 Mc, 50dB from 200Mc to 2000 Mc, over the temp. range of −55°C to +125°C measured in accordance with Mil-Std.-220A. Capacitance: 2500 pf min. at 1 Kc, 0.5 to 5 VRMS, 25°C. Working voltage: 350 VDC. Insulation resistance: 20K megohms min. at 100 VDC 25°C (50 ma max. charging current). D.C. resistance: .01 ohms per section. D.C. and low frequency current: 5 amps max. per section.

Type 1212 is 12 channel — **Type 1206** is 6 channel. Size: 1.125"L x .594"H.

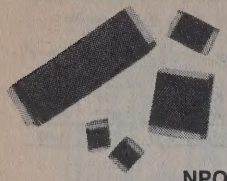
JOHANSON DIELECTRICS

CERAMIC CHIP CAPACITORS



Ceramic chip capacitors are suited for a wide variety of hybrid circuit applications. These units feature high volumetric efficiency in an extremely small size. Available in NPO dielectric which meets the applicable portions of EIA 198B Class I specifications and BX dielectrics which meet the applicable portions of EIA 198B Class II.

SPECIFICATIONS

Voltage:	50VDCW
Tolerance:	NPO Dielectric Below 10 pf ±.5 pf, above 10 pf ±5% BX Dielectric ±10%
Termination Material:	Palladium silver
Temperature Coefficient:	NPO Dielectric 0±30 ppm/°C –55°C to 125°C BX Dielectric ±15% △ C Max –55°C to 125°C
Dissipation Factor:	NPO Dielectric < .001 (0.1%) @ 1 KHz,25°C BX Dielectric < .025 (2.5%) @ 1 KHz,25°C
Insulation Resistance:	> 100ΩF or 100 GΩ whichever is less, @ 25°C, VDCW. @ 125°C, IR is 1% of 25°C Requirement.
Dielectric Strength:	NPO Dielectric > 2.5 × VDCW BX Dielectric > 2.5 × VDCW, 50 ma Max.

CHIP CAPACITOR PROTOTYPING KITS

Designer kits contain standard size chips in popular capacitance values and dielectric characteristics, with palladium silver terminations. Kits are supplied in a special vinyl cover for convenient shelf storage with each chip value individually packaged for easy access.

S-900 NPO/COG Kit

300 ceramic NPO/COG capacitor chips. Includes 10 chips each of 30 different values from 1.0 pf to .01 mfd with tolerances from ±.5 pf to ±5% at 50 VDCW. Sizes included are from .050" x .040" x .040"T to .125" x .095" x .065"T.
17F149. S-900 NET.....75.00

S-905 BX/X7R, Z5U and Y5V Kit

400 ceramic BX/X7R and High K (Z5U and Y5V) capacitor chips. Kit includes 10 chips each of 20 BX/X7R types with values from 390 pf to .22 mfd with tolerances of ±10%, at 25 and 50 VDCW and 20 High K (Z5U/Y5V) types with values from .012 mfd to 1.0 mfd with tolerances to +100%, —0% at 6 and 12 VDCW. Sizes included are from .050" x .040" x .040"T to .125" x .095" x.065"T. in all dielectrics. **17F150. S-905 NET.....75.00**

S-910 CERAMIC CAPACITOR WAFERS KIT

500 single layer ceramic capacitor wafers are ideal for microwave circuit applications. Kit includes 125 pieces each of 4 sizes from .020" x .020" (U02) to .050" x .050" (U05). Each size group includes 5 different capacitance values ranging from 0.3 pf to 50.0 pf in the U02 size to 1.0 pf to 1000 pf in the U05 size. Electrodes are high adhesion precious metal alloy which provides easy attachment to circuitry with solder, epoxy or wire bonding techniques.

RFI Filters

GENERAL PURPOSE INTERFERENCE FILTERS

SPRAGUE
THE MARK OF RELIABILITY
a GK Technologies subsidiary

Series JX5100

General Purpose Interference Filters. Useful for eliminating high-frequency interference into the VHF range and even from microwave ovens. Can be used at any frequency or voltage up to 250V and 60 Hz. Maximum leakage of .5 mA at 125V 60 Hz, 1 mA at 250V 60 Hz. Dielectric will withstand 2100 VDC. Style AA and AB have combination terminals which accept quick disconnect terminals. U.L. recognized at 125 and 250 VAC. *Maximum rated current in amperes.

SERIES JX5600 EMI/RFI LINE FILTERS FOR POWER SUPPLIES

- UL RECOGNIZED for operation at 125 and 250 volts a-c.
- For appl. in moderate to severe suppression situations, for conducted emission or conducted susceptibility.
- High performance for applications as switching regulated power supplies and equipment which contains especially susceptible low-level logic.
- TYPE S FILTERS. offer two suppression elements ('L' Filter) for common-mode signals and three elements ('Pi' Filter) for differential-mode interference. Effective where low-frequency common-mode problem is least severe and high-frequency load impedance is relatively high.
- TYPE V FILTER. offer three suppression elements ('T' Filter) for common-mode signals and three elements ('Pi' Filter) for differential-mode interference. Effective where a low load impedance is presented to common-mode signals.
- TYPE W FILTER. offers four suppression elements (Double 'L' Filter) for common-mode signals and three elements ('Pi' Filter) for differential-mode interference.
- For complete data, refer to latest issue of Engineering Bulletin 8213.

PERFORMANCE CHARACTERISTICS

1. Leakage Current: From input or output lines to filter case, the max. shall not exceed 0.5 mA @ 125 v, 60 Hz or 1.25 mA @ 250 v, 50 Hz.
2. Voltage Rating: 125 v a-c @ 0-400 Hz; 250 v a-c @ 50-60 Hz.

SERIES JX5900 GENERAL-PURPOSE EMI/RFI LINE FILTERS

- UL RECOGNIZED and
- C.S.A. CERTIFIED.

U.L reg and C.S.A. certified. Complies with FCC rules Part 15, VDE 0871, and other appl. that must meet similar spec. for 10kHz to 30MHz atten reg. Supplied with insul stranded wire leads(ends stripped and tinned) or with .250 × .035" Q-C tab term. (slotted for soldering). Operates @ 125 or 250V, 50/60 Hz. leakage current. From input or output line to filter case, max not to exeed 0.3mA @ 125V, 60 Hz or 0.4mA @ 250V, 50 Hz. Insul res., 6000 meg. min. @ 200VDC from line to case

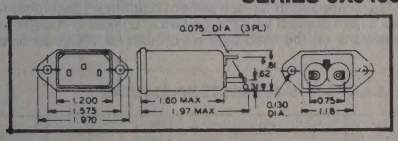
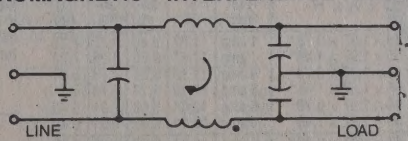
SERIES JX5400 ELECTROMAGNETIC INTERFERENCE FILTERS





CIRCUIT STYLE #1

Electromagnetic Interference Filters. Incorporates I.E.C. integral male line cord receptacle. U.L. recognized for operation at 125 or 250 VAC over range of 50-400 Hz. Protects low level logical circuitry against external transients (energy range: 150 kHz-30MHz). Withstands I.E.C. 10 kV surge test. Type numbers shown are for filters with rear terminals. Size: 1.97"x1.97"x.81.

EF & EFF INTERNATIONAL SERIES FILTERS

This rugged international series of RFI filters incorporates the special IEC (International Electrotechnical Commission) power line connector. This series includes ¼ inch fastons on the EFF or solder terminals on the EF on the load side which can be soldered or crimp terminated. Electrically the EF international series is a general purpose filter effectively providing RFI control of line-to-ground noise. The design is compact and meets low leakage requirements.

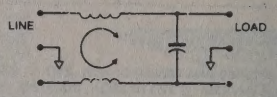
EH SERIES RFI POWER LINE FILTERS FOR MEDICAL EQUIPMENT APPLICATION

°RECOGNIZED UNDER UL544
°CSA CERTIFIED AND VDE APPROVED



SERIES EH

The EH Series is designed to meet UL 544 specifications for medical and dental equipment. The model 6EH1 is suited for patient care equipment. Model 6EH4 and 6EH9 are suited for non-patient equipment (equipment that is intended for use where contact with the patient is unlikely). The EH Series included ¼ inch fastons on the load side which can be soldered or crimp terminated.

FIG. B

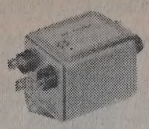

FIG. C

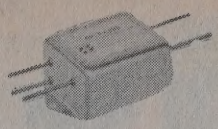

FIG. D

FIG. E

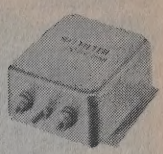

FIG. F

SERIES VR FILTERS

The VR series dual T section RFI power line filters provide premium performance at moderate cost. They are well suited for low impedance loads where noisy RFI environments are present. At frequencies as low as 150 KHz the VR series has an insertion loss as high as 45 DB. They control pulsed, continuous and/or intermittent interference insuring protection of your equipment from power line noise in addition to protecting the line from equipment noise. The V.R. series is an ideal replacement for Pi type filters while incorporating the "value added" concept. Pi filters have used large capacitors to eliminate low frequency RFI, resulting in high line to ground leakage current. The R series dual T type provides extremely low leakage current without deterioration of insertion loss characteristics.

EP SERIES
RFI POWERLINE FILTER FOR SWITCHING POWER SUPPLY NOISE SUPPRESSION

EP series RFI filters developed to reduce conducted noise to acceptable limits for equipment that must comply with requirements of VDE 0875, in West Germany, and FCC specifications in USA. Filters provide high insertion losses for both line-to-ground and line-to-line emissions throughout frequency range. Filters are U.L. recognized, CSA certified VDE and SEV approved and comply with requirements for IEC 161.

- UL Recognized
- CSA Certified
- VDE Approved
- SEV Approved

ED SERIES—High Performance RFI Power Line Filters

The ED series filters are high performance filters that are extremely effective in applications where line-to-line and low frequency line to ground noise must be controlled in such cases as bringing equipment into compliance with FCC conducted emission standards. The series incorporates an IEC connector and features a very low leakage current.

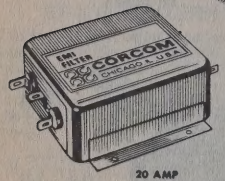
3-CONDUCTOR LINE CORDS

Type 80-1245. Mates with J, EF, EFF, ED and all style 7 filters.
15F2481 1-49 $5.72 each
50-up 4.57 each

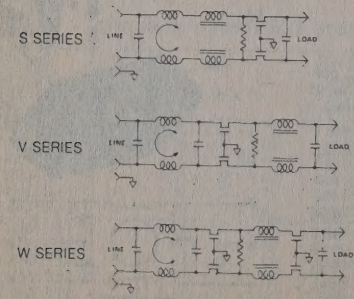
Type 80-1430. Low leakage line cord for use with 6EH1 filter.
1-49 $39.95 each
50-up 31.96 each.

THESE FILTERS ARE RECOGNIZED UNDER THE COMPONENTS PROGRAM OF UNDERWRITERS LABORATORIES, INC.

3, 6, 10, AMP



20 AMP



SERIES S, V and W FILTERS

The S, V and W series combine line-to-ground interference rejection filters with additional circuitry designed to reduce low freq. line-to-line noise and add a balanced N = 3 ("PI") line-to-line filter with high rejection at low freq. to the N = 2 ("L") and N = 3 ("T") sections to eliminate line-to-ground noise. Particularly effective when applied in equipment using switching type power supplies, SCR and TTL circuits.

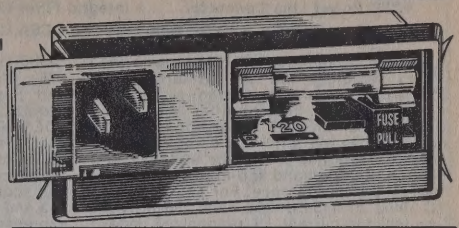
RFI Power Line Filters

corcom

VOLTAGE SELECTING & FUSED CONNECTORS

Developed for the manufacturer who markets his products worldwide. Eliminates internal wiring changes, special power supplies or stocking various line cords.

VS & F, in less than 3½ square inches of panel space, provides an internationally approved connector, fuse holder and a means to change transformer primary connections with a unique voltage selector card. Can be operated any place in the world without modification at time of installation. Available with a built-in filter for RFI protection of the equipment. U.L. recognized. 6VJ1 is VDE approved.



SPECIFICATIONS

Current: 6A AC max. Operating voltages: 100, 120, 220, and 240 VAC. Operating frequency: 50-400 Hz. Fuse: integral fuse holder line side, accepts .25" x 1.25" fuse. Power connector: meets U.L./IEC requirements. Specs per CEE Publication 22 Type VI. Terminals: connector back terminals suitable for soldering, wire wrapping or crimp-on lugs. 2250 VDC test voltage. Construction meets IEC 161, category 10/70/21. Max. leakage current line-to-ground @ 250 VAC 50 Hz, 5 μA (6VJ1); 500 μA (6J4).

STANDARD VARIABLE AIR CAPACITORS

These capacitors are designed for UHF and VHF applications. They feature excellent tuning stability and very low dynamic noise. Working voltage: 250 VDC. Test voltage: 500 VDC. Temperature coefficients PPM/°C: 5200, 0±15; 5400, 0±25; 5450, 0±50; 5500 and 5600, 0±30.

MINIATURE VARIABLE AIR CAPACITORS

The miniature air series of variable capacitors are a size reduction of the standard series and are for use in microwave, VHF and UHF applications. They offer fine tuning resolution; .35 pf per turn, 10/1 capacitance ratio, low temperature coefficients and sizes compatible for hybrid circuits as well as standard applications. Working voltage: 250 VDC. Test voltage: 500 VDC. Temperature coefficients PPM/°C: 5700 and 5800, 0±15, 5750 and 5850, 0±50.

Miniaturized variable ceramic capacitors for microwave, RF, video and digital applications. Perfect for applications where small size and contamination free operation is required. Incorporates a sealed body which prevents intrusion of solder flux, cleaning agents and atmospheric contamination. Printed circuit mounting. Conforms to specification MIL-C-81. Tamper proof, non-slip adjustment with unique square drive tuning. Size: .250"D x .078"H.

81F4903.....$2.50

- **Low temperature coefficient and drift rates**
- **Impervious to all standard P.C. board cleaning solvents**
- **Tamper proof, non-slip adjustment with unique square drive tuning**
- **High Q factor and frequency response**
- **Conforms to Specification MIL-C-81**
- **Printed circuit mounting**

International Connectors

INTERNATIONAL CONNECTOR SERIES

- IEC Power Line Connector
- Integral Filter Case Housing
- UL Recognized
- VDE Approved
- CSA Certified

Low cost, all purpose RFI/EMI power line filters featuring the IEC (International Electro-Technical Commission) power line connector. Case housing filter is an integral part of molded connector. Molded cover containing terminals completes enclosure. Designed to provide effective reduction of broadband line-to-ground (common mode) interference. For operation on AC lines of 115 to 250 volts, 50/60 Hz. Low leakage current. UL recognized under Component Recognition Program for UL 478, Electronic Data Processing Units and Systems. Entire series is VDE approved for full current rating under the VDE 550-6 and 560-7 and VDE class HPF and listed by the Canadian Standards Association as certified Insertion loss in dB chart below for 50 ohm system covers both common and differential modes at 1, 3 and 6 amperes for various frequencies expressed in MHz.

APF-21 SERIES

The -21 Series of RFI/EMI power line filters are all purpose filters similar to the APF-11 Series with the added feature of effectively reducing broadband line-to-line interference. This is accomplished by the addition of line-to-line capacitors.

APF-31SERIES

The -31 Series of RFI/EMI power line filters are all purpose filters. They are a step up in performance over the -11 and -21 Series in the reduction of both line-to-ground and line-to-line broadband interference, while providing the same low leakage current as the -11 and -21. The -31 Series is schematically a "T" filter and performs exceptionally well when used with low impedance systems.

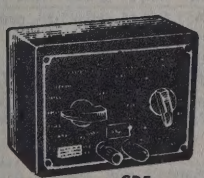
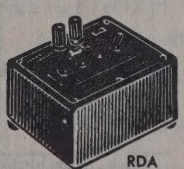
CAPACITOR AND RESISTOR DECADES



CDE



RDA

CD Capacitor and RD Resistor Decade boxes provide precision values needed for breadboarding and substitution. Direct-reading value ranges, six-way molded nylon terminal posts, and calibration chart for capacitance boxes to improve accuracy. Capacitor decade box CDE uses toggle switches, all other boxes have rotary-type switches. Resistor decade box RDC rated at 2 watts maximum, types RDA and RDB rated at 10 watts maximum dissipation. Individual capacitor boxes available in tantalum electrolytic type. Size: 3¹³⁄₁₆x5x3⅝", weight 2 lbs.

FREQUENCY SELECTIVE R.F. CHOKES

Maximum efficiency and highest impedance at specific operating frequencies. Designed to cover the major amateur, industrial and citizens bands and will also operate efficiently at frequencies approximating the recommended frequencies.

SUB-MINIATURE RF CHOKES

- **Moisture Resistance**
- **Fungus Proof Varnish Coating**

Iron core R.F. chokes designed to meet demand for high reliability, ultra-miniature components. Ideally suited to network and filter design, delay lines, and computer applications. Coils are impregnated with a moisture resistant lacquer; can be fungus-proofed per JAN-T-152 using varnish per MIL-V-173A. Can be encapsulated in epoxy resin to conform to Grade 1, Class B of MIL-C-15305. Wt.: 2 oz.

9100 SERIES SHIELDED ADJUSTABLE R F COILS

These ultra compact adjustable coils offer a good inductance range with relatively small changes in Q. Tuning is accessible from either top or bottom of the assembly. Magnetic shielding is achieved by the use of cup cores while the copper shield offers effective electrostatic shielding. Printed circuit terminals on base and shield. Applications between 10 kHz and 200 MHz. Dimensions: .440" Sq. × .550" High. *Minimum self resonant frequency measured at maximum inductance.

ADJUSTABLE R.F. COILS

Vertical Mounted Printed Circuit Velvetork Adjustable R.F. Coils
COILS WOUND ON FORM NO. 23A013

The coil form is Polyester impregnated Alpha-Cellulose tubing with internally bonded resilient ribs which provide both thread and torque control. Coils may be adjusted from either end of form.

Dimensions (form only) Over Collar ⅜" Dia. × ¾" long.
*Minimum self resonant frequency measured at maximum inductance.

Molded Shielded Miniature R F Chokes

An extremely useful series of chokes where extraneous coupling presents problems in dense packaging. Electromagnetic shielding limits coupling to less than 3% when two units are placed side by side. Conforms to MIL-C-15305 and MS 75087/88/89 (LT10K)

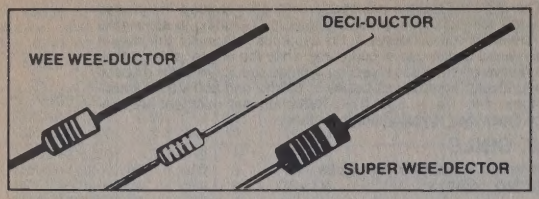
Size: .162 ± .010 diameter; .410 ± .020 length
Leads AWG #22TCW; 1.438 ± .188 length
Meets MIL-C-15305, Grade 1, Class A

Nytronics Components Group, Inc.
Fixed Inductors



WEE WEE-DUCTOR

This shielded inductor has great inductance-to-size ratio and meets the stringent requirements of MIL-C-15305C, Grade 1, Class B. The smallest shielded inductor for high density circuits. Dimensions: 0.133 " diameter × 0.335" length. Operating Temperature: –55°C to +125°C. Dielectric strength: 700 volts RMS. Tolerance: ± 10%. Weight 0.50 grams max.

DECI-DUCTOR

Subminiature inductor. Designed to meet all the environmental specifications of MIL-C-15305C, Grade 1, Class B. Tolerance: ± 10%. Dielectric strength: 700 volts RMS. Operating temp: –55°C to +125°C. Shock: 50G, 11MS. Weight 0.35 grams. Dimensions: 0.100" diameter by 0.250" length. One hundred fit in one-square inch space. Epoxy-molded reliability and uniformity.

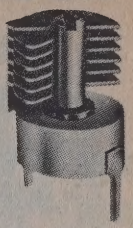
Fixed and Variable Capacitors

JOHNSON

SUB-MINIATURE TYPE "T" AIR VARIABLE CAPACITORS



FEATURES
- Air dielectric, extremely stable
- Plates machined from solid extrusion
- Low loss ceramic base for stability
- Silver plating standard
- Mounting same as Micro-J® series
- Stator attachment with high temperature solder (232°C)

SPECIFICATIONS
- Torque: 108–576 gm. cm. (1.5–8.0 oz. in.)
- Working voltage: 125 VDC
- Insulation resistance: $>10^5$ megohm
- Q factor: >2000 at 1 MHz
- Temperature coefficient: +45 ±45 PPM/°C
- Operating temperature range: −55°C to +125°C
- Nominal air gap: 0.20 (.008)

APPLICATIONS
- Communications equipment
- Test instruments
- Crystal oscillators and filters
- Remote control circuits
- Satellite communications equipment
- Thickness monitoring of thin film applications

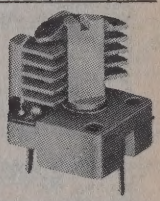
MINIATURE TYPE "U" AIR VARIABLE CAPACITORS



FEATURES
- Air dielectric, extremely stable
- Plates machined from solid extrusion
- Low loss ceramic base for stability
- Silver plating standard
- Designed for use in low to microwave frequencies

SPECIFICATIONS
- Torque: 180–720 gm. cm. (2.5–10.0 oz. in.)
- Insulation resistance: $>10^5$ megohm
- Q factor: >2000 at 1 MHz
- Operating temperature range: −55°C to +125°C
- Temperature coefficient: +45 ±15 PPM/°C
- Nominal air gap: 0.25 (.010)

APPLICATIONS
- Communications equipment
- Test instruments
- Crystal oscillators and filters
- Remote control circuits
- Satellite communications equipment
- Thickness monitoring of thin film applications

MICRO J® 100 SERIES CERAMIC CAPACITOR

FEATURES
- High capacity (35 pF) in small size
- Excellent shock and vibration resistance
- Precision lapped bearing surfaces for smooth linear tuning
- Terminal attachment with high temperature solder (232°C)
- Silver plating standard

SPECIFICATIONS
- Torque: 36–216 gm. cm. (0.5–3.0 oz. in.)
- Working voltage: 100 VDC
- Q factor: >500 at 1 MHz
- Operating temperature range: −55°C to +125°C

APPLICATIONS
- Crystal oscillators and filters
- Communictions equipment, (radios and antennas)
- Test instruments
- Hybrid circuits

Compact size makes these units ideal for circuits where minimum mounting space is required. Units offer high capacity in a rugged package. Capacitors are designed for use in low to microwave frequency ranges. Available in vertical and horizontal mounting styles. High reliability results from monolithic rotor construction. Unit has a wide capacity range with NPO temperature characteristics.

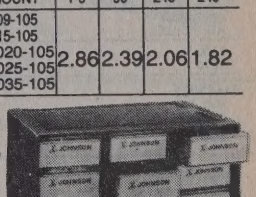
CENTRALAB, INC. — A NORTH AMERICAN PHILIPS Company

Capacitors

Air, Ceramic, and Tubular Variable Capacitors

DESIGN AND PROTOTYPING KIT



Kit contains an assortment of 232 capacitors in horizontal, vertical, PC, stripline and panel mounting styles. In capacity ranges from .25 pF to 34pF. 40 Tubular variables, 30 Micro T™ ceramic variables, 30 Type "T" air variables, 102 Type "U" and "V" air variables.

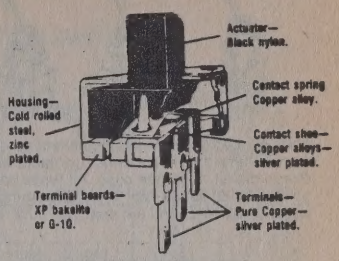
Reliable Design:

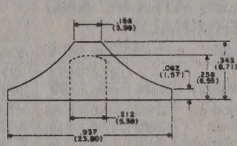
Applications include electrical and electronic instruments, communications and business equipment, appliances, vending machines, automobiles . . . where reliability, cost and quality are major considerations in switch selection.

Designed to provide long, reliable operating life and trouble-free performance. Designed for use in a wide range of applications requiring panel and printed circuit mountings . . . single and multipole . . . low and high voltage . . . low and high current.

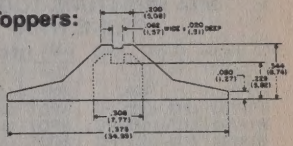
SPRING AND SHOE MOVING CONTACT



Toppers:



Topper for P/N G-02-56 Miniature Switches



Topper for P/N G-02-72 Standard Switches

Control panel styling and appearance can be changed by adding an auxiliary black plastic "topper" button, press fit over the switch button.

MICRO-MINIATURE SWITCHES
All rated .05A AC-DC @ 125V.

BREADBOARDING KIT

Switch sampler containing 23 different switch types, ideal for bread boarding, prototyping, circuit design, value engineering, packaging or product design in applications such as automotive, television, electronic games, appliances, test equipment and computers. Contains over 200 items, including top, side, rocker, and toggle actuated slide switches. Switch configurations range from single-pole, double throw to double-pole, four position and cover current ratings from 0.5 amps to 13 amps. Also included in the kit are decorative toppers.

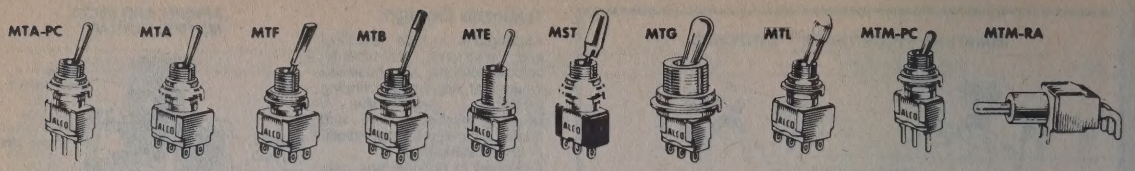
ALCOSWITCH Subminiature Toggle Switches



Have molded-in terminals to prevent solder, flux and other contaminants from entering contact area. Contacts and terminals have gold finish. Green diallyl phthalate case. All types have ¼"-40 high torque bushings except **MTG Series** has 15/32"-32 bushings. Rated 6 amps @ 125VAC, 3 amps @ 250VAC. PC pin spacing: .170" on centers.

MTA MINIATURE TOGGLES WITH PC AND WIRE WRAP TERMINALS

PC terms: 0.250" long. WW type: 0.031" x 0.050" x 0.740" long.

SERIES TT AND TTE 3A SUBMINIATURE WITH LUG TERMINALS

Silver contacts: rated 3 A @ 125 VAC or 28 VDC; gold flashed solder lug terminals. Instrument grade. Can be mounted only ⅜" apart on panel. Uniform 0.1" spacing between all terminals and mounting studs permits mounting on standard "perf" boards. TTE models have watertight bushings and panel seals.

*Color-Black, Red or White available on special order

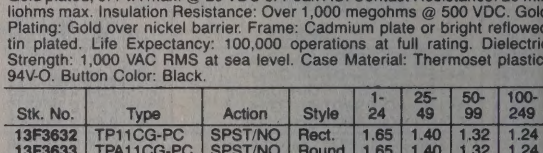
TP/TPA SERIES



TPA11CG-PC TP11CG-PC TPA11CG-RA TP11CG-RA

- **For Instrumentation, Telecoms, Computers**
- **Good Solderability**
- **Compact For PC Use**
- **10,000 Operation Life**

Suffix RA in type number signifies Right Angle terminals for edge PC board mounting. PC models have 4 stabilizing standoffs. Dual actuator types conserve space. Choice of small, round or rectangular buttons. Contact Rating: Gold plated, 0.4 VA max. @ 20 VDC or Peak AC. Contact Resistance: 20 milliohms max. Insulation Resistance: Over 1,000 megohms @ 500 VDC. Gold Plating: Gold over nickel barrier. Frame: Cadmium plate or bright reflowed tin plated. Life Expectancy: 100,000 operations at full rating. Dielectric Strength: 1,000 VAC RMS at sea level. Case Material: Thermoset plastic. 94V-O. Button Color: Black.

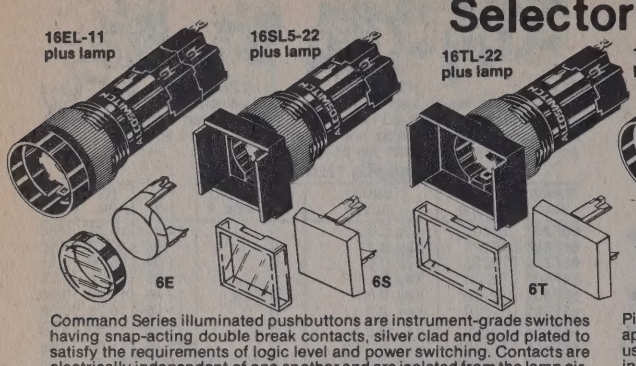
ALCOSWITCH® Command Series

Illuminated Pushbuttons, Pilot Lights, Keylocks and Selectors



Command Series illuminated pushbuttons are instrument-grade switches having snap-acting double break contacts, silver clad and gold plated to satisfy the requirements of logic level and power switching. Contacts are electrically independent of one another and are isolated from the lamp circuit. Maintained models have latching feature for visible indication of status. Uses T-1-3/4 midget flange base lamp, relampable from front of panel. Legends may be provided using printed transparent tape affixed to inner button. Order button sets and lamps separately. Contact rating: 1A @ 125 VAC or 24 VDC.

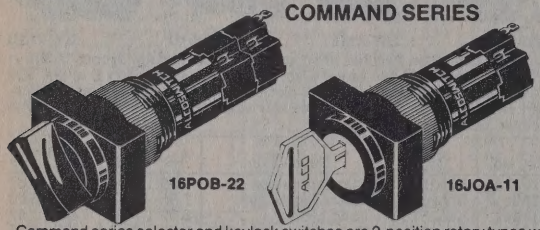
COMMAND SERIES



Command series selector and keylock switches are 2-position rotary types with snap-acting double break contacts. All models have 90° throw. Contacts are silver-clad and gold-plated to provide reliable operation at logic levels as well as for power switching applications. Contacts are electrically isolated from one another. Keylock types are supplied with two keys, and maintained keylock models are available with key removable in the counter-clockwise (left) position only, or in both left and right positions.

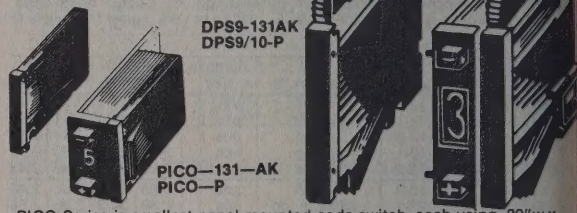
PUSHBUTTON CODE SWITCHES



PICO Series is smallest panel mounted code switch, each using .30"w x .59"h panel space with less than 1" extension behind panel. DPS9 Series models retrofit popular thumbwheel switches and use .315"w x 1.3"h panel space, 1.54" rear extension. All switches have heavy gold contact surfaces and large wheel numbers, and feature fast, easy snap-together, snap-mount design.

SLIDE SWITCHES

MSSA-1350R

MSS-2250R

MSS-4200

MINIATURE PC SLIDE SWITCHES

Designed for printed circuit applications. Require less space than conventional switches. Mounting styles are vertical or right angle. All have mounting tabs on the parameter of the frames for added stability on PC boards. Features positive wiping action. Contacts rated: Silver, 300 mA @ 125 VAC. Gold plated, .4 VA max. @ 20 VAC or DC. Life expectancy 15,000 oper. Contacts and Terminals: Epoxy sealed w/silver plate or .00004" gold plate over nickel. "R" in type number indicates right angle mounting.

CES & CET (MINIATURE TOGGLE OR SLIDE)

Slide and toggle actuators coupled with a basic miniature toggle mechanism offers 6 amp rating in an economy package. Rated: 6 amp @ 125VAC; 3 amp @ 250VAC, 4 amp @ 28VDC.

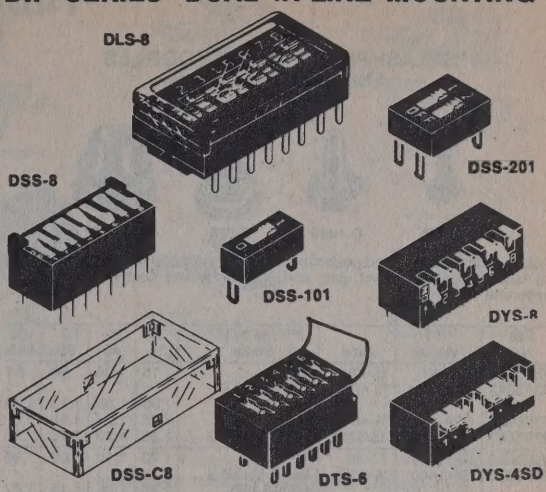
DIP SERIES—DUAL IN-LINE MOUNTING



DIP switches provide high reliability at low cost. All models are designed for soldering onto PC boards. Terminals and contacts are beryllium copper with gold plating over nickel to assure dependable service for low-energy level use. The low-profile DLS and DLS-SD models are supplied with a protective cover having an "actuator lock" feature that prevents accidental operation and protects the inner mechanism during cleaning cycles.

SPECIFICATIONS

Contact Rating: Non-switching: 50 VDC @ 100 ma. Switching: 5 VDC @ 100 ma. (max.) Initial Contact Resistance: 100 milliohms max. Insulation Resistance: 100 megohms min. Dielectric Strength: 500 VDC at sea level. Switch Capacitance: 5.0 picofarads between poles. Op. Temp:−10°C to +60°C. Contacts and Terminals: .00004" gold plate over nickel.

Tiny Micro Miniature Switches

C&K

TINY TOGGLE SWITCHES

Tiny toggle and pushbutton switches. Stainless steel housing. Include nut, locking ring and lockwasher. Oper. Temp: -20°C to 65°C. Type T. .Q have coin silver contacts; brass or brass silver plated terminals. Type T. .B have brass with gold plate over nickel plate contacts and terminal. All have brass, chrome plated toggle handle. Brass, nickel plated bushing.

Toggle Switches. Contact rating: Type T. .Q—3 amps @ 120 VAC for models T101 and T108, 2 amps @ 120 VAC for model T103; Type T. .B—0.4 VA max, @ 20 V max. (AC or DC). Pushbutton Switches. Contact rating: Type T. .Q—1 amp @ 120 VAC; Type T. .B—0.4 VA max. (AC or DC). ( ) indicates momentary.

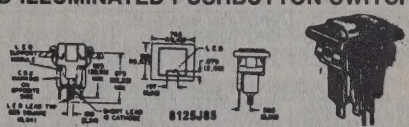
LED ILLUMINATED PUSHBUTTON SWITCHES



SPDT LED illuminated pushbutton switches with snap-in bezel and standard terminals. Continuous Forward Current: 50 mA. Power Dissipation: 100 mW. Current Rating: 0.4 VA max. @ 20 V max. (AC or DC) for 8125 model; 1 amp resistive @ 120 VAC or 28 VDC for U811 model. Model 8168 and 8161 have pushbuttons which protrude further from the bezel than do pushbuttons on models 8125 and U811. Steel, nickel plated mounting spring. Stainless steel bracket. Nylon cap, bezel and LED support module.

Contact rating 5 amps with resistive load @ 120 VAC or 28 VDC; 2 amps with resistive load @ 250 VAC. Oper. Temp: −20°C to 65°C. Includes nut, screw, lockwasher and stand-off. Nylon rocker and lever handles. Stainless steel housing. Brass, nickel plated bushing. Coin silver, silver plated end contact. ( ) indicates momentary. 3 and 4 pole switches available on special order.

ROTA-SLIDE ROTARY SWITCHES

Oper. Temp: −40°C to 105°C ambient max. Contact resistance: less than 0.01 ohms @ 20 MA/DC. High voltage breakdown: 1000 RMS, 60 Hz for 1 min. between live metal parts of opposite polarity. Life cycling (no load): ECI switches will remain operative after a minimum of 100,000 cycles at rate of 10 cycles per min. Life cycling (load): ECI switches will remain operative after a minimum of 10,000 cycles at rate of 10 cycles per min. at full load. Indexing 36°—single pole max. 9 positions 36°—double pole max. 5 position. 36°—continuous. Silver plated oxygen free hi-conductivity copper contacts. Rolled music wire contact spring. Contact rating (pos. 5-7 of type no.): type Q06-6 amps @ 125VAC with copper silver plated movable contact material; type B00-0.4 VA MAX. @ 20V max with movable contact material of copper with gold plate over nickel plate. Mounting style: panel mounting with threaded bushing. Actuators: .750 long with flat for PC mounted rotary. Housing, top plate bushing and actuator/rotor U.L. approved (94V2). Available in 2, 3, 4 and 5 position non-shorting styles as detailed below. See diagrams for position configurations. Gold plated contacts and terminals available. Contact Newark for more information.

ROTARY SWITCHES

SPECIFICATIONS

CONTACT RATING—350 MA @ 110V (AC or DC)
150 MA @ 250V (AC or DC)
CURRENT CARRYING CAPACITY—5 AMPS continuous
ELECTRICAL LIFE—15,000 cycles at full load up to 300,000 detent operations.
CONTACT RESISTANCE—20 milliohms max.
DIELECTRIC STRENGTH—1000 volts RMS @ sea level
OPERATING TEMPERATURE—20°C to 65°C
STOPS—Adjustable 2 through 12 position—30° indexing

The C&K Rotary Switch is offered in four models: 1 pole-12 position, 2 pole-6 position, 3 pole-4 position and 4 pole-3 position. The number of switch positions is adjustable by means of a stop-ring provided with each switch. To set stops, turn shaft fully counter clockwise and insert stop-ring tab in desired hole. Each model is available with printed circuit or solder terminals and silver plated contacts.

SHORT PANEL DEPTH KEYSWITCH

Keyswitch with extremely short, behind the panel depth for tight fit applications. Used in computers, security systems, medical equipment and consumer products. Requires .760 diameter panel opening. Includes 2 keys, has solder terminals rated at 4 amps @ 125VAC or 28VDC, 2 amps @ 250VAC which are copper, silver plated. Finish is bright stainless steel; includes mounting nut.

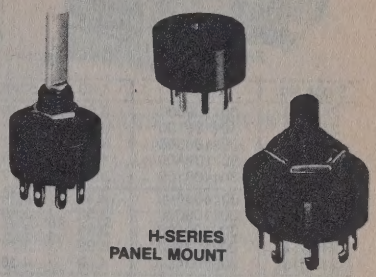
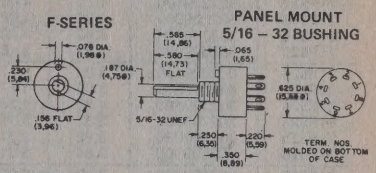
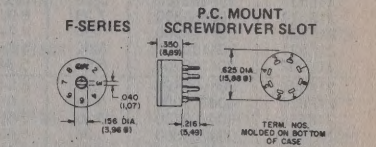
F-SERIES PANEL MOUNT 5/16—32 BUSHING UL LISTED

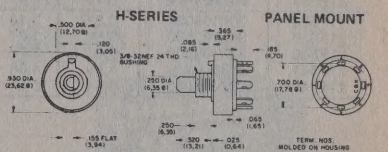
F-SERIES P.C. MOUNT SCREWDRIVER SLOT UL LISTED

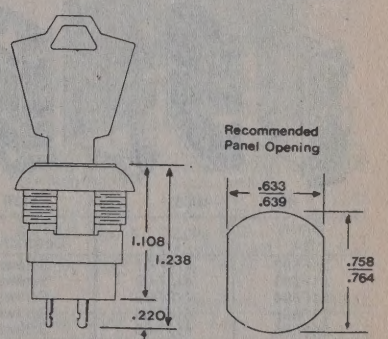


H-SERIES PANEL MOUNT

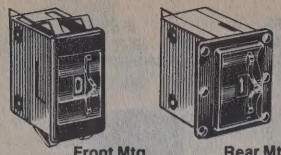








Thumbwheel Switches



Front Mtg. Rear Mtg.

Matte black thumbwheel with unsealed switch contacts. Oper. Volt: 50 mV to 28 VDC or 120 VAC. Oper. Temp.: –10°C to 65°C. ABS plastic body and wheel. Precious metal on copper alloy rotor. Hard gold over Ni flash over 1 oz. Cu on epoxy fiberglass stator. 100 milliohms typical initial contact resistance. 100 milliamps max. switched current. 1 amp max. continuous current. 1000 megohms min. insulation resistance. Dielectric breakdown: 500 VAC.

PC TERMINALS

Termination styles 3, A and B incorporate PC terminals. See chart below for terminal lengths.

MINIATURE THUMBWHEEL SWITCHES

The new miniature 1 pole thumbwheel switch is mounted directly to the printed circuit board with either vertical or horizontal orientation and clockwise or counterwise rotation. Switches may be mounted as individual units or side by side in a multisectional row without hardware. Indexing is accomplished either by the knurled wheel at the side of the switch body or by inserting a screwdriver in the slot provided at the top of the switch. Several function codes are available including: Decimal, BCD and complement of BCD.

Stock No.	Part Number	Description	Positions	Read-Out	Rotation	1-49	50-99	100-499	500-999

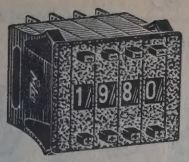
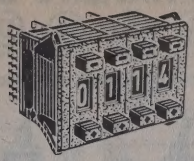
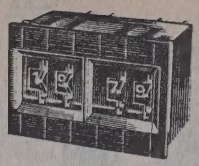
81F960	3M2400000	Complement of BCD	10	0–9	CW	3.49	3.32	3.15	2.97

Thumbwheel Switches







Switch finishes matte black, with white legend on black wheels. Contact rating: 2A @ 115 VAC or 28 VDC, non-switching; 50¢A @ 28 VAC, or 28 VDC. Min. recommended switching current 1.0 ¢A.

SUBMINIATURE-PUSHBUTTON

Front mount bi-directional push indexing switch. Pushbutton below dust-window advances digit, button above retracts digit. Snap-in panel mounting and snap together banking requires no hardware. Face height is 1.3", requires panel cut-out 1.22" high. Switch is .312 wide and extends 1.72 from front of panel.

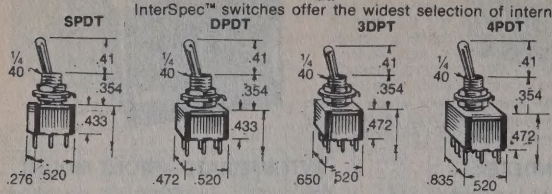
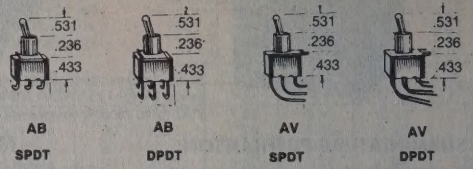
International Approvals

InterSpec™ switches offer the widest selection of international agency approvals for power applications.





Contact rating: 6A @ 125 VAC, 3A @ 250 VAC, 5A @ 30VDC resistive load. Contact material: fine silver. Anti-rotation pin & high torque bushing standard.

Contact metal: gold over nickel/copper. Rating: 100ma @ 30 VDC anti-rotation pin standard.

Ideal for business machines and the computer industries. Lighted pushbutton switches designed to offer 25, 344 combinations with 31 components listed below. Highly reliable—100,000 cycles mechanical and electrical at full rating. Rated: 5A @ 125VAC, 2A @ 250VAC, and 5A @ 28VDC. Minimum rating for dry circuit application 10 microamp, 50 mV. Uses standard T-1¾ (CM 334, 336, 337), incandescent lamp with groove base. (Lamps not supplied.) Installed through front of panel.

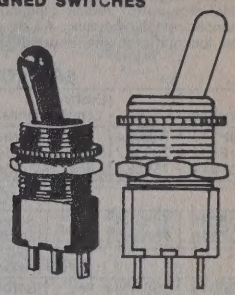
SERIES A—CUSTOM DESIGNED SWITCHES



- **UL Listed**
- **Satin Chrome Finish**
- **Solder Lugs**
- **Miniature**

Series A. SPDT, DPDT, throws either ON-OFF-ON or ON-NONE-ON circuits. .460 large T bushing. Satin chrome finish. Solder lug terminals. Coin silver contact material. 15/32 diameter T1 levers. All switches are UL Listed. All switches 6 amp rated @125VAC and 28VDC resistive.

Stk. No.	Type	Switching	Action	1-24	25-99	100-499	500-999

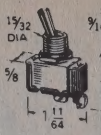
MAKE NEWARK YOUR DEPENDABLE SOURCE

FOR ALL ELECTRONIC PARTS AND EQUIPMENT

EATON Cutler Hammer AC Switches

6 AMP 120 VOLT — 3 AMP 250 VOLT

General purpose AC switches for power appliances. Employs slow make slow break rocker type contact mechanism. Combination phenolic-metallic housing. All are one hole mount type. One hexagon locknut and one knurled facenut furnished unassembled.



Single Pole

Double Pole

Visible metal parts are bright nickel plated. UL and CSA approved. 1/4" spade terminals. Movable contact actuated by compression of spring which provides positive contact pressure in closed position and firmly positions contactor in open position.

THREE AND FOUR POLE AC SWITCHES

These slow make — slow break AC rated switches feature a rocker type contact mechanism that is actuated by a compression spring to provide positive contact pressure. Exposed metal parts are plated with bright nickel. All switches are provided with a hexagon locknut; the 3 pole with a hexagon facenut, the 4 pole with a knurled facenut. All 3 + pole switches are rated 15 AMPS @ 125VAC and 10 AMPS @ 250VAC. 3/4 HP @ 250VAC.

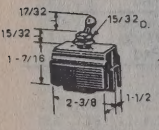
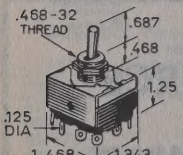
HIGH CAPACITY AC SWITCHES



Three Pole

These heavy duty AC rated switches feature a rocker type contact mechanism for a slow make — slow break operation. The terminals are firmly riveted to the rear of the base with adequate spacing provided to facilitate wiring and to reduce the possibility of electrical creepage. Screw terminals are .250" wide, screw terminals are provided with screws. Type 8320K1 is zinc with an aluminum ball. The 8320K1 is provided with two hexagon facenuts.

Stock No.	Type	Circuit	250VAC Amp	250VAC HP	Bushing Length	Terminal	1-4	25-49	50-99	100-499
41F559	8320K1	3PST	20	2	15/32"	Screw	12.54	11.58	9.65	8.69



HESITATION SWITCH

Three position center off, hesitation, positive stop, or positive off switches; restrict operation from one "on" position to the other "on" position without a stop in the center position. Use with reversing motors; prevent damage by high currents from reversing. A mechanical interlock in switch prohibits toggle action through center position until pressure is momentarily relieved from lever. Bushing Diameter: 15/32".

Stock No.	Type	Action	1-24	25-49	50-99	100-499

HARDWARE FOR MOUNTING SWITCHES

For use with 15/32" diameter bushings:

30-5632-4. ON-OFF vertical plate, keyway by OFF. Burnished nickel finish.

30-5632-13. ON-OFF horizontal plate, keyway by OFF (left side). Burnished nickel finish.

30-5632-16. HI-LOW. Same as 30-5632-4.

29-761. Locking ring.

16-886. Internal tooth lockwasher.

AC-DC QUICK-MAKE, QUICK BREAK

AC-DC DESIGNER LINE

Designer line switches employ standard utility mechanism with addition of nylon toggles. All are double insulated and feature quick-make, quick-break contact mechanism. Nylon bushing in 15/32"-32, 11/32" long. Furnished with all necessary mounting hardware. Designer line facenuts optional. UL and other CSA approved. Note: switches with other than standard bushing length (11/32), for dry circuit applications, with other than listed ampere ratings, terminations, descriptions and colors-available on request.

AC DESIGNER LINE

Switches employ standard slow make, slow break rocker type mechanism with nylon toggle epoxied to the metal actuator. One mounting hole, one hexagon locknut and one knurled facenut furnished unassembled. Take care in ordering correct part numbers to suffice your needs. Do-it-yourself switch assembly. (*) indicates momentary operation in that position (spring return).

MIL-S-3950 ENVIRONMENTALLY SEALED

One Pole

- Patented Sealing Process
- Positive Detent Feel
- Rated 20A at 28VDC
- Rated 15A at 115VAC

Brown base has patented sealing process. Molding material provides greater safety, higher ignition time and increased arc resistance under contaminated conditions. Positive detent feel and reliable momentary return action. Improved dielectric capability. Simplified wiring and bussing together with excellent sealing in medium-range pricing. Current rating is 20 amperes at 28VDC and 15 amperes at 115VAC resistive.

MIL-S-83731 STANDARD LEVER SEALED

One Pole

Employs a rocker-type contact mechanism, has silicone rubber lever seal assembled between the lever and the bushing to stop contaminants. Hot tin-dipped screw terminals (to facilitate soldering when used as lug). Positive snap-acting rocker type movable contactor assembly. Phenolic and metal housing. Rated 20 amps at 28VDC, 10 amps at 115VAC.

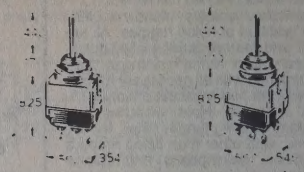
MIL-S-8834 MINIATURE LEVER SWITCHES



One Pole Two Pole

Miniature size switches are completely "tease-proof". Enclosed in nylon-filled molding and stainless steel housing. Bushing size: ¼-40 thread, .170" long. Toggle size: 440 mounting; one facenut, internal tooth lock washer and silicone "O" ring panel seal. Lever seal withstands 15 feet of water pressure. Rating and description same as 8834B switches .75 × .56 × .35".

SUB-MINIATURE ROCKER & PADDLE

These compact sub-miniature rocker switches are offered with flat frames for sub panel mounting or as a snap-in mounting type. Both the paddle and the low profile rocker operated switches employ a slow make-slow break contact mechanism. Two sizes of low profile rockers, and two sizes of paddle rockers are available in the flat frame series. The snap-in series has a low profile and a paddle rocker. The rockers come in standard color black, other colors available on special order. All switches utilize solder lug terminals. The contacts are rated for six amps at 125 VAC and 28 VDC. (*) Denotes Momentary Action. "All items U.L. approved. All items C.S.A. except 2, 3, 4 pole solder lug."

ROCKETTE® SWITCHES

Contact mechanism is of Slow-Make Slow-Break design engineered specifically for use on AC circuits and low voltage DC circuits. Contacts rated for 15 Amps at 125 VAC and 28 VDC; 10 Amps at 250 VAC; maximum ¾ horsepower at 250 VAC. While nylon rocker on a mounting frame of heavy gauge steel, plated for resistance to corrosion. Terminals are .250" wide spade lugs.

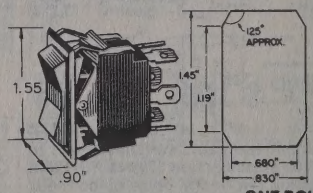
ROCKETTE® SNAP-IN MOUNTING BEZEL



Rockette® switches with snap-in metal bezels. Switch description at left. Bezels are made of hardened spring-steel for durability and structural strength. Corrosion-resistant bright nickel-plated finish. Recommended panel thickness .040" to .140 inches.

Butt action contact mechanism designed specifically for use on AC and low voltage DC operations. Available in one or two pole, multicircuit combinations with solder or screw terminals. Features serrated or smooth white or black. 1 or 2 window thermoplastic rocker actuators which mechanically indicate the function and position the switch is in. SERIES 8080 switches are SPDT and rated 15A at 125VAC, 10A at 250VAC, with ¾ horsepower at 250VAC. SERIES 8083 switches are the same as series 8080 but are DPDT. All switches are UL and CSA listed. NOTES: the action column in the tables below refers to the rocker positions up center and down respectively. (*) indicates momentary action. TYPE NUMBER SUFFIX E DENOTES E STYLE MOUNTING X X STYLE MOUNTING.

Wide Cap w/Two LEDs SWITCH AND TERMINAL DIMENSIONS
Clean Lines Positive Tactile Action, Bright LED Indicators
Stand-Off Lugs Minimize Solder-Creepage
Keys are Detachable and Interchangeable with Improved Push-On Design

SPECIFICATIONS:

Ratings—Switch—10mA at 24 VDC.
Mechanical Life and Electric Life—5 million operations
Initial Contact Resistance—50 milliohms max.
Insulation Resistance—10^9 Ohms minimum
Contact Bounce—1.5 ms maximum
Operating Force—150 grams approx.
Total Key Travel—.079 (2mm)
Pre-Travel—.039 (1mm)
Ambient Temperature— -25°C to +85°C (-13°F to +185°F)
Mounting Method—Direct soldering onto standard Matrix printed circuit board.
Interchangeable Keys—In a choice of key colors—white, red, or black.

MATERIALS:
Housing—Glass filled Nylon
Key Cap—ABS
Switching Contacts—Gold plate over silver plated brass.

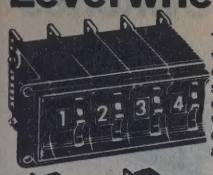
Leverwheel & Thumbwheel Switches CHERRY



T-Series indicates thumbwheel switch, **L-Series** indicates Leverwheel switch. **T-50 Series** rated at 50 volts @ .125 amp., 3 amps. carrying current. All other switches rated at 28 volts @ .125 amp., 3 amps, carrying current. Contact resistance .1 ohm max. Insulation resistance: 1000M ohms. Dielectric strength: (50, 65 and 71 Series) 500 volt AC; (10, 11 and 20 Series) 1000 volts A.C. Switch life: 1 x 10^6 operations at nominal load. Switch operating force: 7-10 oz. Weight: ¾ oz. per module (except T-50 which is ⅛ oz. per module. **Type 71** has an integral bezel and requires no hardware. (#) Available in either gloss black finish—suffix A or mattle black finish—suffix M. Suffix L denotes lighted switch, available only in black matte finish.

10° SLOPED, ALUMINUM,
HINGED KEYBOARD HOUSING

Model B70-60AA comes with sloped keys (10°), remainder are sloped at the angle of the panel. Encoded boards have 7 data bits; ASR-33 type keyboards have 4 modes, ASCII have 3 modes. 2-key roller and logic data resting high are standard features. Type TTL components used in all keyboards. Power Requirements: 5V, 350 ma. Drive Capability: 10 standard TTL loads. Utilizes same switch module as listed below. Gold crosspoint contacts standard. Keyboards not temperature or humidity sensitive. **Model B70-05AB** comes with sloped keyboard. Features full 67 key array; five user definable keys with changeable plastic covers and hard wiring provisions; TTL and DTL compatible output circuitry; positive logic with outputs resting low; four mode keyboard, upper, lower and control cases, and alpha lock configuration. Special features included Negative logic where output code is compliment of code shown; Tri-State-Positive Logic for use of two or more keyboards in parallel; high voltage CMOS compatibility; non encoded outputs; encoded outputs; flexible factory wired key assignments; provisions for auxiliary keyboards; automatic repeat; variable strobe pulse width; optional parity bit; output latch provided by auxiliary circuit; and external optional shift control mode. **Keyboard Housing** allows keyboard to become stand alone instrument suitable for office or lab. Consists of ⅛ inch aluminum blue-gray base and 10° sloped, off-white cover hinged together in the rear. Features cable strain relief and rubber base pads for protection.

7

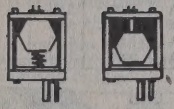
KEYBOARD SWITCHES



Pretravel: .085" ±.03", total travel is .160" ±.020". Key module case material is Thermoplastic nylon. External terminals are tin plated brass alloy. Contacts are W/E #1 Alloy (69% gold, 25% silver, 5% platinum). Contacts rated at 28 volts max. .125 amp. max. switching current, .5 amp. max. carrying current. DC resistive: 3 watts max.; AC resistive 3 VA max. Initial contact resistance: 200 milliohms max., 25 milliohms typical.

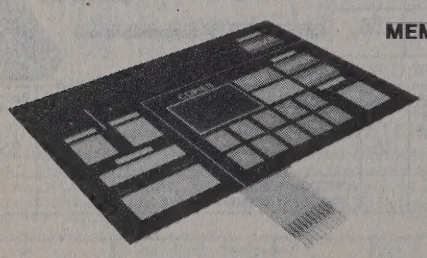
MEMBRANE KEYBOARDS



- **Thin, Lightweight and Cost Effective**
- **Completely Sealed, Resist Spills and Corrosive Attack**

Touch panel keyboards are thin lightweight and cost effective. Ideal for demanding applications such as electronic and office equipment, home appliances and communications equipment. Completely sealed construction resists spills and corrosive attack resulting in a long service life in home and office areas as well as hostile industrial environments. 20 mA @ 30VDC; 1mm operations nominal. **V1G1-0071**—Nontactile field telephone format. **V1G1-0075** nontactile field 0-9, A-D.

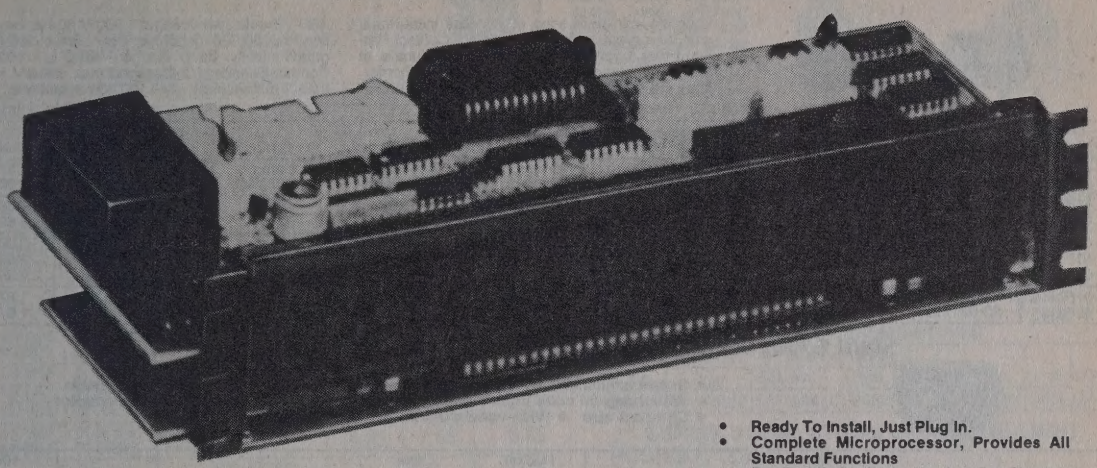
GAS DISCHARGE ALPHANUMERIC DISPLAY SYSTEMS—16, 20 AND 24 CHARACTER



- **Ready To Install, Just Plug In.**
- **Complete Microprocessor, Provides All Standard Functions**
- **For Detailed Information Ask For Cherry's Display Product Catalog.**

Alphanumeric display systems are available in 16, 20 and 24 characters. These systems are ready to install . . . just plug in . . . no engineering time required. Complete microprocessor controlled circuitry includes drivers, character generator, refresh memory and provides all standard functions. This intelligent display system is self initializing and completely addressable with 19 ASCII control codes. Standard features include three end-of-line modes: left entry with auto line feed carriage return, writeover carriage return, or horizontal scroll. Five levels of brightness are programmable to provide over 6 to 1 range of light output in 4 db steps. A fully addressable flashing visual cursor is provided to indicate the next character position to be written. In addition to backspace, tab, and selective addressing, cursor functions include erase to end-of-line and erase to start of line. Flashing panel and self test are also standard. Requires 12VDC only and accepts parallel or serial input—serial in either RS232 or 20 ma current loop. Selectable baud rates. For more detailed information ask for Cherry's Display Product Catalog.

P-4 SERIES—MODULAR PANEL SWITCHES

- **Snap-in Mounting**
- **Attractive Modern Trim-Line Look**
- **UL and CSA Listed**
- **Momentary and Alternate Action**

Offers a variety of standard features including: snap-in mounting from front or operator side of panel, momentary or alternate action, no extra mounting hardware required, attractive modern trim-line look, panel thickness from .060 to .187", easy access to lamp from front of panel without tools, UL and CSA, .110" Q.C. terminals, accepts T1¾ wedge base lamps (not included), gold cross point contacts 1"x1" cap size, contact rating 3A @ 125 VAC, 2A @ 250 VAC.

MINI MIKE™ LINE ULTRA LOW BOUNCE SLIDE ACTION SWITCHES

Long life, miniature snap action slide instrument/computer grade switches. UL listed. Contact Rating: From 1 volt 10 ma to 1.0 amps inductive at 125VAC. Contact Material: Hard gold over barrier. Life Expectancy: 100,000 actuations. Stroke: .085". Breakdown Voltage: 1,000 V 60 Hz. Insulation Res: 60,000 megohms. Oper. Force: 200-500 grams initially. Temp. Range: −40°C to +100°C. Contact Bounce: 1 millisecond max. Initially; less than 2 milliseconds after 100,000 actuations.

Pushbutton Switches

SERIES 05-6 LIGHTED PUSHBUTTON SWITCHES

Mount in .75" square cutout. Accept T-1¾ flange base bulbs (not included). Bulbs are replaceable from front panel. Switches all 125 VAC contacts with independently lit indicator bulbs. .110 quick connect terminals on back. Terminal clearance .18" to facilitate hand wiring. Panel thickness range .062-.125". Barriers prevent accidental switching.

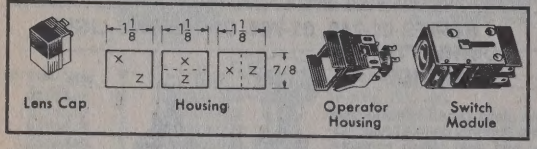
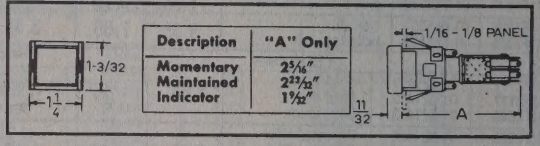
SERIES 02 RECTANGULAR SNAP-IN TWO LIGHTS PUSHBUTTON SWITCHES





UL and CSA listed at 10 amps 125/250 VAC. Silver or gold plated contacts and solder lug terminals standard. Accepts standard T-1¾ flange base lamps.

Note: to order a complete switch you must order lens cap, housing and switch module. Lens Caps. 1⅛" x ⅞" rectangular.

Ample room for legend indication. Snap in or out easily for front of panel relamping. For desired color replace XZ with 1) White 2) Red 3) Green 4) Blue 5) Yellow 6) Amber 7) Orange.

Series 50 Lighted Pushbutton Switches

LICON

Complete Assortment of Pushbutton Switches and Display Options

The Series 50 Line includes mechanical and solid state control pushbuttons and indicators in square and rectangular shapes. A power duty pushbutton is also available to complement the Series 50 control switches. Most are available with LED or incandescent lighting, or non-lighted. Display options include a selection of legend sizes, 3 button heights, full or split section display. There is a choice of 8 colors and 3 different color display methods for flexibility in using color as an indicator of operating functions and as an aid to visibility.

Bezels are matte black for excellent separation and visibility.

Designed for Harmony

LICON engineers have designed the Series 50 line for aesthetic and technical compatibility with other widely used switches and components. Series 50 Switches are completely interchangeable with comparable switches such as the Micro Switch AML. This compatibility gives designers more options and freedom in selecting switch components. All buttons and bezels are designed to blend aesthetically for clean, attractive panels, efficient operating patterns and simplicity of design. **Part Numbers Are Interchangeable With Microswitch.** NOTE: Buttons and Incandescent Lamps must be ordered separately.

FEATURES (50-11)

- Interfaces With DC Logic Level Loads.
- Reliable Hall Effect Circuitry.
- UL Recognized.
- 5 VDC or 6-16 VDC Supply Voltage.
- Selection of Bright Colors and Display Options.
- Buttons and Lamps are Ordered Separately.

FEATURES (50-12)

- High Efficiency LED Display.
- Identical to Series 50-11 but with LED Display.
- Bright, Wide Angle Indication With Low Power Consumption.
- Extremely Long Lamplife.
- LED Buttons are Ordered Separately.

FEATURES (50-21)

- Up to 3 AMPS 125 VAC; 1 or 2 Poles.
- Silver or Gold Contacts.
- Momentary or Two Level Alternate Action.
- Selection of Bright Colors and Display Options.
- Buttons and Lamps Ordered Separately.
- Deisgned to Meet UL, CSA, VDE and CEE-24 STandards.

FEATURES (50-22)

- High Efficiency LED Display.
- Identical to Series 50-21 but with LED Display.
- Bright, Wide Angle Indication With Low Power Consumption.
- Long Lamp Life.
- LED Buttons are Ordered Separately.
- 5 and 15 VDC Devices have an Internal Resistor to Maintain LED Current at Nominal 20 mA.

FEATURES (50-41/42)

- Matches Appearance of Lighted Switches.
- Buttons and Incandescent Lamps Ordered Separately
- Designed for UL and CSA Recognition.

FEATURES (50-71)

- Help Avoid Accidental Activation.
- Mount to Switch Prior to Installation in Panel.

BASIC SWITCHES

Type 10. Sensitive "serpentine blade" snap action switch. UL rated 15A (75-80%PF) 126, 250 480 VAC. 0.5A, 128 VDC. #6 Screw Term and cup washer.

MINIATURE SWITCH

Type 11. High capacity two circuit Double break mechanism. Wiping action. UL/CSA listed. SPDT-DB. Form Z. ¾ Hp. 250 VAC. 10 A 125/250 VAC 75%-80% P.F.

HEAVY DUTY SWITCH

Type 14. Industrial limit switch. Double break mechanism for high electrical rating. UL listed. 20A @ 125/250 480 VAC. 75-80%PF. SPDT-DB. Form Z.

SUBMINIATURE SWITCH

Type 16. Double break. 2 circuit. UL/CSA listed. 10 A @ 125/250 VAC.

SUB SUBMINIATURE

Type 18. Double break. Rated: 7 A @ 125/250 VAC; 3 amps ind. @ 28 VDC. UL listed. Diallylphthalate case.

DOUBLE POLE SWITCH

Type 22. DPDT high current interruption. Rated: 10 A @ 125/250 VAC. 75-80%PF. UL listed. 10 A @ RES 30 VDC. Double bearing guide. Wiping action. Beryllium copper switch blades.

DOUBLE POLE SUBMINIATURE SWITCH

Type 26. Two Butterfly Double break mechanisms. Poles operate simultaneously due to special linkage. Uses type 76 actuators. UL rated 8 A @ 125/250 VAC, 75-80%PF. UL listed. DPDT-DB (Form ZZ). 10 A res., 5 ind. @ 28 VDC.

TYPE 76

Type 76. Subminiature door interlock switch for electronic equipment. Manual set for servicing. Uses Type 26 or 36 double break switches.

Series 30

Available in a variety of infinitely adjustable actuators. Aluminum housing. Permits adequate wiring room. Has ½-14 internal tap conduit hub. Rated 15 amps, 125, 250 and 480 VAC; ½ amp 115 VDC. Size: 3 x1 x 2½".

Series 65

SERIES 65 SUBMINIATURE SEALED SWITCHES

Dependable, environment-free snap action switching with ratings up to 10 amps, 30 VDC. SPDT 2-circuit configuration. Solder terminals. Quick disconnect, screw and potted leads available on special order. Size: .850" x .320", ½" mounting centers. UL listed.

Magnetic Reed Switches

HAMLIN

Dry and mercury wetted magnetic switches are precision created for reliable operation under most critical conditions. They offer excellent flexibility in a broad range of applications. These switches are hermetically sealed for safe, dependable use in any atmosphere—even under explosive conditions and are unaffected by high or low temperatures or pressure. They offer long life with high sensitivity and their rapid cycling rate makes these ideal for a wide variety of uses. Applications include position indicators, counting devices, limiting switches, flow meters, communication instruments and reed relays. Actuating time: 1 millisecond or less. Life Expectancy; Dry reed switches—50 million operations. Mercury Wetted switches—1 billion operations. Contacts: Form A (SPST-NO), and Form C (SPDT). These switches may be actuated by permanent magnets, shown below, or electro magnets. Average shipping weight 1 oz. each.

- High reliability and long life
- Come packaged for mounting in any position
- Hermetic seals—for safe use in hazardous environments

MAGNETICALLY ACTUATED REED PROXIMITY SWITCHES

Offer the long life and high reliability of reed switches. Include all the advantages of magnetic reed switches but come packaged ready for mounting. Epoxy package resists most solvents, acids and salts. Safe for use in hazardous environments. Shock and vibration characteristics comparable with the basic reed switch.

SWITCHES FOR MULTIPOLE, HI-DENSITY SWITCHING

T-Bar

Designed especially for general purpose and 10 level man, switching. Capability of switching up to 72 circuits at one time. Toggle and pushbutton switches mate with snap-on, crimp type T-Bar connectors. (See index under T-Bar relays.)

SWITCH SPECIFICATIONS

Contacts: Series 800 — general purpose gold plated; Series 900 — low-level bifurcated gold plated. Contact Rating: Series 800 — 5 amps max. resistive to 150 watts; Series 900 — 1 amp max. resistive to 50 watts. Life Expectancy: Series 800 — 50,000 cycles; Series 900 — 50,000 cycles at 20 CPM. Contact Resistance: 20 milliohms typical. Ambient Temp.: — 55°C to + 85°C. Terminals: Mate with T-Bar Connectors. Dielectric Strength: 1000 VRMS @ 60 cycles/sec. Insulation: 5000 megohms min.

SERIES 803 PUSHBUTTON SWITCHES

SERIES 802/902 TOGGLE SWITCHES

All types are double throw (Form C). Switch from 8 to 72 circuits simultaneously. For lo-level applications (less than 1 amp), specify the new 902 bifurcated series. For general purpose, hi-current applications, use 802 series. The 8, 12, 24 and 36 pole units are single stacks. The 48 and 72 pole units are double stacks.

Unimax Switch Unimax Inductive Proximity Switches

Introduction

The selection guide summarizes Unimax's comprehensive line of solid-state, inductive proximity switches for sensing metals (both ferrous and non-ferrous). All units are self-contained. As such they do not require auxilliary amplifiers or associated circuitry. Each is fully encapsulated, making them completely reliable in hostile environments.

General Design Features

- Senses all metals, ferrous & non-ferrous.
- Sensing ranges to 50mm.
- Shielded and Unshielded models.
- Most AC units operate from 90-250V.
- AC units feature 2-wire installation.
- DC units operate from 10-30V.
- DC units available with PNP or NPN outputs.
- Most DC units offer either N.O. or N.C. outputs.
- Output currents to 200ma.
- All units meet NEMA 1, 2, 4, 12, & 13 enclosure requirements. (Most also satisfy NEMA 6).
- All AC units internally protected for transient voltage peaks to 5kV (10ms).
- All DC units internally protected against inductive voltage peaks, spurious line pulses, and reverse polarity of supply lines.
- Short circuit protection standard on most DC models.
- LED function indicator standard on most models.

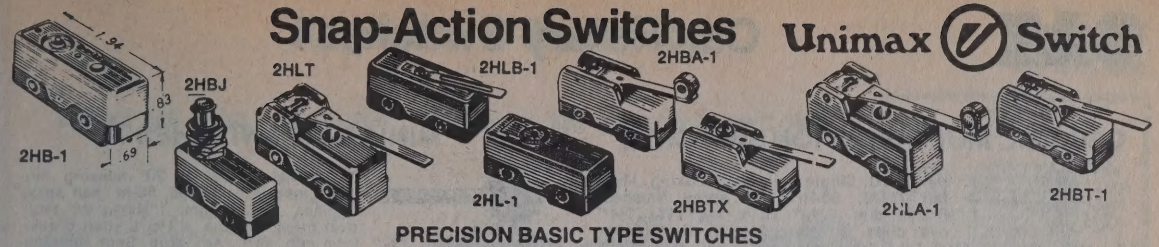
Snap-Action Switches

Unimax Switch



PRECISION BASIC TYPE SWITCHES

Pin actuator. Used in applications requiring minimum pre-travel and over-travel, with moderate operating force. 20 amps 125/250/480VAC. ½ amp, 125VDC. ¼ amp, 250VDC. UL and CSA listed. Double-throw. Mounting holes will accept .139" dia. max. on 1.0" centers ± .002". **Suffix —1:** Recessed solder lug terminals of tinned copper. **Suffix —5:** screw terminals widely spaced on a stepped base. Contact separation is .020 in. except (*), which is .025 in.

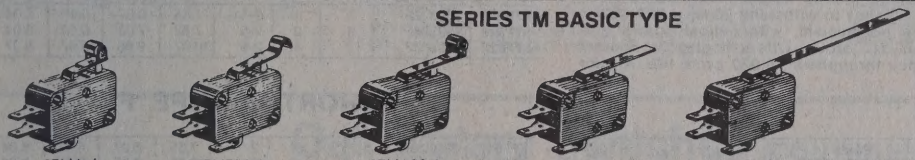
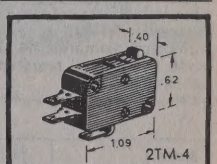
SERIES TM BASIC TYPE





Silver contacts standard. Low operating force with negative force gradient (overtravel forces less than operating forces). Long life. Quick connect terminals. **2TM.** Basic switch. **2TMA.** Short roller lever. **2TMA15.** Standard roller lever. Low motion lever position. **2TMT15.** Standard lever. Low motion lever position. **2TMT14.** Simulated roller. **2TMT18.** Extra long lever. Electrical Ratings: 10 amps—250VAC, ½ amp—125VAC, ¼ amp—250 VDC, ⅓ HP—125/250VDC.

METAL-CASED KS SERIES SNAP-ACTION SWITCHES

20 amp basic switches with die-cast aluminum housings mounted flat with style T housing or upright with style F housing. Conduit-hub has ½-14 NPSM internal thread. Hex shape facilitates installation. Two part housing separates so screw terminals of basic switch are fully accessible. 20 amps, 125/250/480VAC. ½ amp, 125VDC, ¼ amp 250 VDC. Contact separation is .020 in.

SUBMINIATURE ROTARY SWITCHES

Ultra-compact switches provide superior insulating quality, with dimensional stability even under severe environmental conditions. For all applications where extremely small size is essential. Long-life silver alloy contacts. Double wiping design, with frame components of materials and finishes to withstand 50-hour salt spray. Exclusive Tri-Ball detente mechanism, with helical spring provides approximately 16 in.-oz. torque. Offers negligible contact noise and circuit resistance throughout 10,000 cycle life. All are non-shorting.

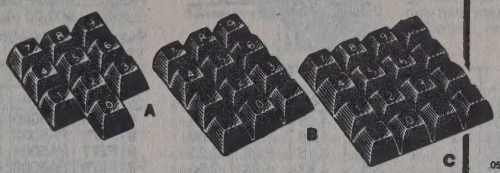
SERIES 400 KEYBOARD SWITCHES



• Less than 100 milliohms contact resis. **• Gold-alloy contacts, nickel base**

Breakdown voltage: over 500 VAC. Contact resistance less than 100 milliohms throughout switch life. Contact rating 5 VDC, resistive load, 100mA. Housing—0.52″ x 0.52″ x 1.00″ high. Contact bounce less than 3 millisec., N.O. only. Tested for 20 million operations, per key at rated load. Temp. range 0 to 85°C. Operating force 3 oz. ±½ oz. (85 gm. ±15 gm.) Key travel 0.125″ ±0.010″ total, pre-travel 0.070″ nominal. Contacts: gold-alloy crown on nickel base, crossbar wiping. Copper alloy contact leaves. Terminals: 0.050″ (±0.002) x 0.008″ x 0.240″ long below standoffs on housing. Terminal ends tinned to facilitate soldering.

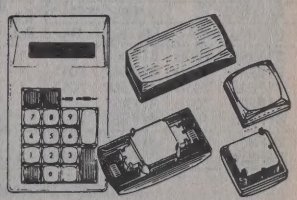
LOW PROFILE 415 SERIES



• PC board mtg. **• Range —20 to +75°C**

Tested to 10 million operations. Switch action SPST/N.O. Contact resistance 100 milliohms maximum. Height .415″ (incl. terminals, which are 0.125″ long on .400″ grid). Temp. range —20 to +75°C. PC board mtg. Travel 0.100″ approx., pretravel 0.070″ nom. Operating force 70 gm. (+20 gm., —15 gm.). Contact bounce 3 millisec. max.

Oak Rotary Switches (CONTINUED)

TYPE 200 SERIES SLIDE SWITCHES

30% narrower than ordinary slide switches; Double-Wiping contacts which are self-cleaning. Rated 3 amps at 125 VAC operation. Non-shorting.

CENTRALAB, INC.
A NORTH AMERICAN PHILIPS COMPANY

PSA SUB-MINIATURE ROTARY SWITCHES

Bushing ⅜" or Printed Circuit Board (P.C.B.) mounting. Index angle: positive 30°. Index stop strength: 10 inch pounds. Section spacing: 9/32" between front plate and clip surface of first section, 5/32" spacing between sections. Insulation: Diallyl Phthalate with high quality molded thermosetting plastic type SDG per MIL-M-14F. Current carrying capacity: 7 amp. Dielectric strength 750VAC. Resistive load: 0.550 amps at 28 volts VDC; 250mA @ 115VAC. Weight of each switch is less than one ounce. Uses P-120 knob.

SUB-MINATURE CERAMIC SWITCHES

Ultra-small ceramic rotary switches ideal for use in transistor circuits, aircraft instruments, etc. Bolt construction with single hole bushing mount: locating lug on 3/8" radius; 1/8" D. shaft, cadmium plated steel, 1¼" long from mounting surface. Index angle positive 30° with index stop strength of 10 in-pounds. 9/32" spacing between front plate and first section, Make, break, resistive load: .550 amps @ 28 VDC; 170 ma at 115 VAC (based on 10,000 cycles). Avg. initial resistance 5 milliohms. Uses P-106 knob opposite. Wt. 2 oz. per section.

2ASA MICROMINIATURE ROTARY SWITCHES

2ASA microminiature switches have fixed stops, 3 to 10 pos., 36° indexing. Contact system: 1 pole center common, non-shorting, rated .5A @ 12VDC, .3A @ 24VDC. Contact resistance less than 20 millionhm. Breakdown 1000VAC. Switches are in screwdriver, thumbwheel and knob-adjust styles. All are printed circuit board mountable, knob type can be bushing mounted. Bushing ¼" diameter.

Centralab Switches

PA-3000 SERIES 18 POSITION SWITCH

Phenolic insulation per MIL-1-3115B. Voltage breadown between parts 1000 VAC. Sections 2 9/16" high × 2 11/64" wide. 1/16" thick. Rated 2.25 amps @ 28 VDC: 1.0 amps @ 115 VAC. Adjustable stop or continuous rotation. Uses P-120 Knob. Wt. 4 oz. per section.

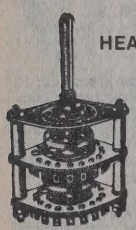
HEAVY DUTY ROTARY POWER SWITCHES



Ceramic insulation; 3/8" bushing mounted; 1/4" D. shaft, double flat steel. 2 1/4" L. from mounting surface. Index angle is 20° with 2 adjustable stops. 1" spacing between front plate and first section. Make and break res. load; 9 amps @ 110 VAC-RMS; 15mA @ 2500 VAC-RMS; 30 amps @ 5 VDC. 20 amps @ 12 VDC; 11 amps @ 28 VDC. Contact resistance 7 milliohms with rotational life 25,000 hz. min. Comes with adjustable stop pin and nut and instruction sheet. Uses P-168 Knob. Shpg. wt., 6 oz.

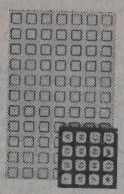
Centralab

CENTRALAB, INC.
A NORTH AMERICAN PHILIPS COMPANY

MONOPANEL™ TOUCH SWITCHES



MonopanelTM touch switches feature highly reliable touch-sensitive membrane technology. Both prototype panel and keypad versions have momentary, N.O. contacts. Oper. Temp. –40°C to +85°C. Contact Rating: 50mA @ 30VDC. Max. Voltage 50VDC. Max. Current 100mA. Max. Power 1.5W. Contact Resistance: 2 ohms max. @ 4 oz. pressure.

PROTOTYPE PANELS

Prototype panels are ideal for mock-up testing. Available in 3 sizes and 3 switch interconnections. Panels are blank and can be customized with commercially available graphics. Switches can be cut using commercially available shear.

Stock No.	Type MRP	No. Swts.	Inter connection	1-24	25-up

Rotary Switches

Grayhill INC.

SELECTING GRAYHILL ROTARY SWITCH

Fixed stop rotary switches are not in inventory, but adjustable rotary switches that follow are in Newark's stock. They provide the exact electrical properties and basic mechanical characteristics you need. You can readily obtain the right number of positions per pole for your application by a simple adjustment of stop washers or stop pins.

Adjustable stop feature available in following rotary switches: **1) 1" dia., multi-deck:** Use series 44D for 30° angle throw, 42D for 36° angle throw, prototyping and where series 5000 or 24 will be used for production. **2) ½" dia., single deck:** Use series 50D for 36, 45, 60° angles; series 51D for 30° angles. **3) ½" dia., multi-deck:** Use series 71D for 30° and 36° angles and for prototypes where series 8 or 9 will be used in production.

SERIES 42D AND 44D ADJUSTABLE STOP

1-AMP ROTARY SWITCHES

- **Make/Break 1 Amp at 115 VAC**
- **Carry 10 Amps at 115 VAC**
- **10 or 12 Positions**
- **1 to 4 Decks, 1 to 4 Poles**

Fully enclosed switches, interchangeable with fixed stop 42A and 44A series. Electrical ratings: make or break 1 amp, carry 10 amps at 115 VAC, resistive. Insulation resistance: 50,000 megohms initially, 10,000 megohms minimum. Non-shorting contacts. Bushing, ⅜-32 NEF. Depth behind panel: 1-deck, 1.025"; 2-deck, 1.371"; 3-deck, 1.717"; 4-deck, 2.063".

SERIES 42D. 10-position switch with 36° indexing. Diameter, 1.000". Shpg. wt. 1½ oz.

SERIES 44D. 12-position switch with 30° indexing. Diameter, 1.162". Shpg. wt., 1½ oz.

SERIES 71 ADJUSTABLE STOP

Behind panel distance approx. ¾" for one deck switch and 1" for two deck. Gold plated contact systems. Adj. stops provided. Adjust by relocating stop pins at front of switch. Stops held in place by mylar sticker. Provide form, fit and function equivalents to their fixed stop counterparts. 8th digit in type number represents the number of decks, 9th digit the number of poles.

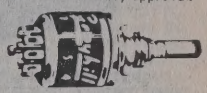
(*)51MD, 51MDP. Qualified to MIL-S-3786. Other than these, adjustable stop type not qualified and should not be used in equipment submitted for Military approval.

SERIES 50 AND 51 ADJUSTABLE STOP ROTARY TAP SWITCHES



SERIES 50. Single deck, 10-position switch with 36° indexing. "CD" commercial types have no seals, phenolic base. "MD" military types have integral shaft and panel seal, diallyl phthalate base, meet MIL-S-3786 SR20 requirements. Contact resistance, 10 milliohms initially, 50 milliohms max. Non-shorting. ½" dia.; .617" behind panel.

SERIES 51. Similar to above except 12-position (30° indexing). 9/16" diameter. "MD" types meet MIL-S-3786 SR35.

SERIES 19 POWER ROTARY SWITCHES

U.L. LISTED—15 AMPS

- **2 to 11 Positions—30° Indexing**
- **Life in Excess of 50,000 Cycles**
- **Solder or "Faston" Terminals**

Single pole, single deck rotary tap switches. Non-shorting contacts with 15 amp, 125 VAC resistive rating. Contact resistance, .010 ohm approx. for new switch, measured at 2 VDC and 100 mA. Insulation resistance, approx. 100,000 megohms. Breakdown between mutually insulated parts, 2500 VAC. Contact force, approx. 12 oz. Solder terminals with .125" wire hole, or "Faston" terminals with .080" wire hole. 2 to 11 positions. Wt., 1¾ oz.

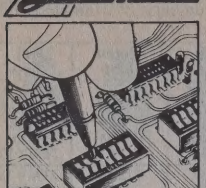
Switches

SERIES 76 ROCKER DIP SWITCHES



Spring loaded sliding ball contact system for positive positioning and high resistance to shock and vibration. Molded-in terminals protect against contact contamination. Easily mounted to PC board by direct-flow soldering or insertion into standard socket. Even switch independent. Current Rating: 35,000 oper. @ 50 MA 30VDC; 25,000 oper. @ 125 MA 30 VDC. Molded thermoplastic polyester cover, base and base-plate. Brass shorting bar with gold .00001" min. over .00006" min. nickel plate.

Suffixes on all dip switches indicate bottom seal and tape seal.

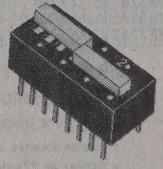
DOUBLE THROW SWITCHES

- **Circuitry and Pinouts Common to the Industry**
- **Tied Adjacent Opposing Circuits for Double Throw Action**

All double throw switches have alternately opposed circuits which are actually 2 completely separate circuit paths. A cap ties the slide actuators of both circuits together thus providing double throw. True double throw circuitry is achieved by tying selected terminals on the PC board for a common. The "ON" position of each circuit is indicated by a dot on the cover.



DOUBLE THROW

SERIES 78 SLIDE DIP SWITCHES

SINGLE THROW SWITCHES

- **Sliding Ball Contact System**
- **Top Access and Easy Actuation**
- **Many Circuitry Possibilities**

All single throw switches have an in-line configuration in which the closed on "on" positions are on the same side of the package, as marked on the switch cover.

SWITCHES AND RELAYS

PUSH BUTTON SWITCH MODULES

For prototype and small quantity usage. Clear protective cap slotted on one side to allow insertion of clear plastic tab imprinted with legend. Legend sheet has all normally required legends for both vertical and horizontal mounting. Rating @ 5 VDC: 100 milliamps. Contact Resistance: 25 milliohms or less. Voltage Breakdown: 250 VAC between mutually isolated parts. Insulation Resistance: 1,000 megohms min. Life expectancy: 1,500,000 operations.

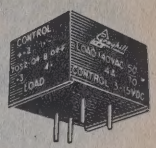
MINI CUBE SOLID STATE RELAYS



- Optically Isolated
- Zero Voltage Turn-On

Switches from 0.1 to 4 amps. Rated at 25°C, no derating to actual operating temperature. Measure 1.0" x 1.2" x 0.85"—occupying only 1 cubic inch and ⅓ the board space of old-style relays. Can be used directly with TTL, DTL, CMOS and other logic circuits—no intermediate driver necessary. Control circuit takes less than 5 mA drain with typical 5 volt logic circuit. Optical isolation for coupling the control and power circuits. Theoretically infinite life span. Zero voltage turn on and zero current turn off prevent the 'feedback' of spurious pulses into logic circuit when relay is turned on or off. 3000 volt per microsecond transient protection. Designed for PC board mounting.

50 to 140 VAC, except (†)100 to 240 VAC

Optically Isolated Miniature Solid State Relays

- DC Control of AC Loads to 4 Amps
- Package Requires Minimum of Space
- PC Mount or Plug-In With Integral Heat Sink
- All Units Include Zero Voltage Turn-On and Transient Protection
- Logic Compatible, Responds to Low Level Voltage and Current
- UL Recognized, File No. E58632
- CSA Recognized, File No. LR 38763

DC to DC Solid State Relay

- Logic Compatible—Sensitive to 3 to 24 VDC Inputs
- 400 MA or 2 Amp Maximum Load Current
- Wide Operating Range, 3 to 50 VDC
- Occupies a Minimum of Space
- DIP Compatible PC Mount or Plug-In Termination
- Optical Isolation Protects Your Logic Circuitry
- Zener Clamped Output Provides Excellent Transient Immunity
- Minimal Turn-On Time

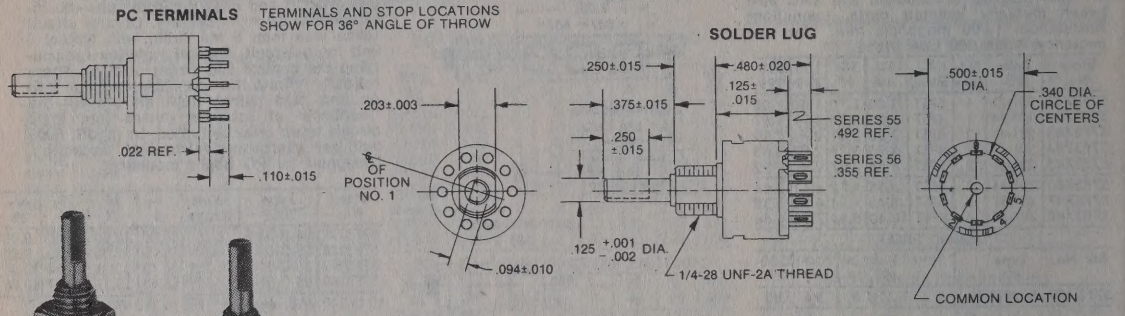
LOW COST ROTARY SWITCHES AND KEYBOARD MODULES

NEW

Quality ½ Inch Diameter Rotary Switches at Economical Prices!

Rated at 200 MA. For 10,000 cycles of operation. End of life criteria—100 milliohms maximum contact resistance, 10,000 megohms minimum insulation resistance and 600 VAC minimum voltage breakdown.

Available with Adjustable Stops, 1 pole, 30° (2 thru 12 positions) or 36° (2 thru 10 positions), Non-shorting Contacts, Solder Lug or PC Terminals



Series 55
0.492" behind panel (excluding terminals)

LEV-R SWITCHES SERIES 3000 and 13000

Fine silver contacts rated 3 amps., 300 watts max. AC non-inductive load. Non-locking have spring return. Series 3000 mounts in panels up to 3/32" thick; series 13000 up to ¼" thick. Both ⅝" wide; requires 2¼" behind panel; mount in ½" dia. hole N.O. circuit center position off. ‡"Talk-Listen" switches. 3 position switches have same contact for both sections on each side except 3033 and 13033 and have one form C only. Supplied with lock nut and screw-on black knob. Wt.: 3 oz.

LITTEL SWITCHES

These are momentary contact switches, no bigger than a small phone jack. Available in three circuits with red or black, one-piece push-button (non-locking only). All contacts are thoroughly insulated from panel bushing with interlocking phenolic washers. Springs are special nickel-silver alloy. Integral contacts; recommended for low current circuits only. Plastic button and shaft need not be removed for mounting. Mounts in ⅜" dia. hole in panels up to ¼". Complete with locknut and washer. Shpg. wt., 1 oz.

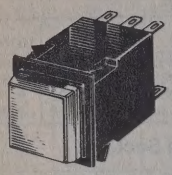
PUSHBUTTON SWITCHES

"Box Switch" SWITCHES, SERIES BXL



NEW miniature momentary or locking pushbutton switches offer lighted and unlighted options in minimum panel space. 11/16" square switch mounts in panels from 1/32" to 3/32" thick and occupies only 17/32" max behind panel space (17/32" less panel thickness). Molded black plastic housing protects against dust and dirt, prevents bending disfiguring contacts caused by excessive handling. Attractive bezel frames push button and acts as built-in escutcheon. Can be mounted in rows of matrices completely compatible in front-of-panel appearance with Switchcraft Series BXR "Box Switch" switches.

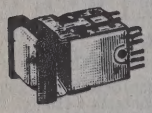
SERIES PL-PUSHLIGHT SWITCH



Enclosed and lighted, leafspring switching. Available in momentary or PLPR functions; single or twin lamps; with or without barriers; full or split-faced display: 1-C to 4-C switching; black switch housing; white pushbutton. Contacts: rated at 2 amps, 200 watts, max; AC non-inductive load. Mounts with clamp-type brackets. Flange mounting requires 1" x .875" panel cutout. Barrier mounting requires 1 3/16" x .875" panel output. Accepts. std. T-1 3/4" flange base lamps, 6 or 28 volt (not included).

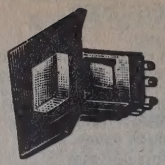
BOX SWITCH



A flush mounted, momentary action pushbutton switch. Offers broad switching capabilities in minimum panel space. For control panel application in computers, data processors, ground support equipment, machine and process controls, test equipment, and telephones. 11/16" square. 4 switching poles; 2 limited to single throw. Solder lug terms. Silver plated, brass integral contacts.

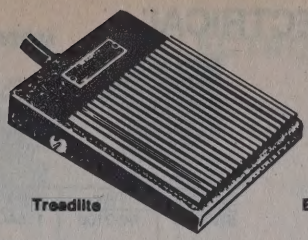
Control Switches

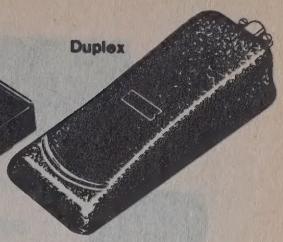
LINEMASTER

Junior



Treadlite

Executive



Duplex

JUNIOR. Momentary SPDT light pressure contact switch. Foot or knee operation. Provided with strain relief clamp for wide variety of cord sizes. Aluminum casting. Black finish. Skid-proof base pad. 20A @ 125-250 VAC. 5 1/2" x 3 1/4" x 1 1/4". Wt. 1 lb.

Stk. No.	Type	1-9	10-19	20-49
24F161	121S	16.00	14.40	12.80

TREADLITE. Designed to give instantaneous and accurate control at low amperage loads. Treadle angle and light pressure contact insure operator comfort and reduce the possibility of fatigue. Formed steel castings with black finish. Actuating treadle has heavy tread and skid proof base pad. Less cord and plug set unless otherwise stated. Rated 7 amps at 125 to 250 VAC. Size: 3 1/2" x 2 5/8" x 1". Shipping weight: 7 ounces.

Model T-51-S. Momentary SPDT contact. Can be used normally open or closed.

Model T-51-SC3. Momentary SPST contact wired normally open. Supplied with 6' 18/3 cord and 3 prong series plug. Green lead grounded.

Model T-51-SC36. Momentary SPST contact wired normally open. Supplied with 6' 18/3 cord without plug. Green lead grounded.

Model 515-M. Replacement interior for T-51-S.

Model T-52-S. Two stage momentary contact. Each stage SPDT.Light pressure activates first switch, added pressure activates second switch.

Stk. No.	Type	1-9	10-19	20-49
24F163	T-51-S	5.85	5.27	4.68

24F175	515-M	2.35	2.12	1.88
24F167	T-52-S	8.80	7.92	7.04

EXECUTIVE. Two switches in one using the teeter-totter principle to operate one circuit at a time. Modern styled die cast cover. Medium gray finish. Full non skid base pad. Internal wire connections. Single cord output. SPDT. 15 A @ 125-250 VAC. 4 5/8" x 4" x 1 1/16". Wt. 1 1/4 lbs.

Stk. No.	Type	1-9	10-19	20-49
24F169	72	14.85	13.37	11.88

DUPLEX. Two SPDT momentary switches in one housing. Center pivot for easy heel-toe operation. Adjustable strain relief for most cord sizes. Black finish. Skid proof base pad. Mechanical interlock prevents both circuits from being operated at same time. Size 8 1/2" x 3 1/2" x 2". Wt. 1 3/4 lbs.

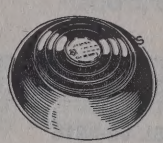
Stk. No.	Type	1-9	10-19	20-49
24F166'	476S	24.40	21.96	19.52

Compact

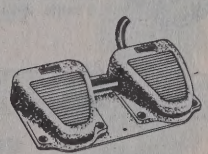
Clipper

Lektro-Lok

Nautilus



Gem



Twin Clipper

COMPACT. Small, compact, lightweight and long lasting switch. Strong steel housing. Black finish. Skid proof base. Precision made for accurate operation. SPDT and SPST models. Rated 10 amps at 125-250 VAC. Size: 2 7/8" x 2 1/2" by 1 1/8" Weight: 7 ounces.

Model 491-S. Momentary SPDT. 1/2 H P., 125-250 VAC. Minis cord and plug.

Model LSC-229. Replacement interior for model 491-S.

Model 491-SC3. Momentary SPST wired N.O. With 3 prong plug and 8' cord.

Model 491-SC36. As above with 6', 18/3 SJ cord. No plug. Green lead grounded.

Stk. No.	Type	1-9	10-19	20-49

24F181	491-SC36	10.90	9.81	8.72

NAUTILUS. Aluminum casting. Piston type actuator sealed with "O" rings. Waterproof. Oil-proof. Rustproof. Dustproof. Gray enamel finish. 8" x 4" x 2 1/4" Wt. 2 lbs. 9 oz.

Model WP-541-S. Momentary SPDT. 20 amps at 125-250 VAC.

Model WP-541-D. Maintained SPDT. 12 amps at 125 VAC. 6 amps at 250 VAC.

Stk. No.	Type	1-9	10-19	20-49
10F7451	WP-541-S	85.10	76.59	68.08
10F7452	WP-541-D	85.10	76.59	68.08

LEKTRO-LOK. Both circuits cannot be operated at same time. Each side SPDT. Can be wired normally open or normally closed. Internal wire connections. Stamped metal housing. Rated 10 amps at 125-250 VAC. 5" x 2 1/2" x 1 1/8". 10 oz.

Stk. No.	Type	1-9	10-19	20-49
24F168	L-2-S	10.75	9.68	8.60

CLIPPER. Designed for operation under heavy loads. Cast iron housing. Skid proof base pad. Strain relief connector. Size 4 1/2" x 3 1/2" x 1 1/2". Wt. 2 1/4 lbs.

Model 632-S. Momentary SPDT. Rated 20 amps at 125-250 VAC.

Model 632D. Maintained SPDT. Rated 20 amps at 125-250 VAC. Molded nylon actuating cam mechanism.

Model 632S. The Clipper Twin consists of two SPDT momentary switches mounted on a heavy steel base plate with a skid-proof pad. A tube between the two switches conceals all internal wiring between them. A conduit opening with strain relief connector is provided in the right switch.

Stk. No.	Type	1-9	10-19	20-49

ELECTRICAL

P2-1106

2-1106

P2-1126

MODEL 110 SERIES

Simplified, inexpensive, 6-figure, reset, general-purpose electromechanical counter which requires no maintenance during its normal life expectancy. Rated at 1,000 counts/minutes AC and 1,200 counts/minute DC with pulse timing of 30 ms "on," 30 ms "off" AC and 25 ms "on," 25 ms "off" DC voltage. Power consumption: 5 watts, available in base-mount, panel-mount, and for the security conscious, a key-reset panel-mount version.

Stk. No.	Type	Volt	Reset	Mount	1-4	5-9	10-24	25-49

REDINGTON COUNTERS INC.

ELECTRONIC

SERIES 9415 TOTALIZERS

6-figure, battery powered, push button or key-reset, silent operation totalizers. Easy to read LCD display and durable cast zinc housing are standard. Rated at 2,400 counts/minute with sensor input, 1,200 counts/minute with switch input. Pulse timing of 25 ms "on," 25 ms "off" sensor input, 12.5 ms "on," 12.5 ms "off" switch input. Power consumption: 1.1VA. Available in base-mount and panel-mount; interchangeable with electronic or electrical counters.

Predetermining

SERIES 9300

4-figure, high-speed, high-performance counter with push button preset controls. Choice of operating modes permits setting for automatic recycling or remote reset. Rated at 1,200 counts/minute with switch input and 60,000 counts/minute with pulse input. CMOS logic-flexible printed circuit boards, high-brightness red LED's, 40-day memory circuit all standard. Power: 4.0VA. Fits in 2 1/16" square panel opening.

LX Totalizer
Series 7997

A direct replacement for electromechanical counters. The 7997 has long-life internal power source, LCD, and die cast housing. Standard models are suited for base mounting. Four models are available which differ only in respect to their input circuits and method of reset. The 799716-020 (799716-021 Remote Reset) accepts isolated switch input and is reset by a button on the side of the case. The 799716-010 (799716-011 Remote Reset) is impulsed by any voltage within the range of 6 to 250 volts . . . AC or DC. Accessory panel mounting kits feature reset by lock and key or remote pushbutton.

Sensors and Proximity Switches

Rotary Pulse Generators

Series 7132, 7133

Convert rotary motion to signal pulses. Sealed aluminum 2-¼" case, 0.25" dia. shaft. Face or base mounted. Shaft speeds to 10,000 rpm. Minimum 100,000 hour lamp life. Precision ball bearings. Double-ended shaft is optional. Series 7132 has square wave output or open collector. Series 7133 has dual channel square wave pulse output in 90° (nominal) quadrature for directional sensing in bidirectional counting. Resolution is 600 ppr.

Inductive Proximity Switches Series 7785
Nominal Sensing Spans from 1 mm (0.04") to 10 mm (0.39")

Series 7785 are totally self-contained proximity switches having encapsulated electronics in high density threaded tubular packages. Standard outside diameters are 12 mm, 18 mm and 30 mm. Shielded tubular design allows units to be flush-mounted in metal without affecting target range sensitivity. Meets NEMA 3, 4, 12, 13 and IP67 environmental requirements. Logic output interfaces directly with microprocessors, counters, controllers, relays, etc. No external amplification necessary. Integral 2 meter long cable supplied with standard models.

Motion Detector Series 77853
(30 mm Diameter) Nominal Sensing Span 10 mm (.39")

The Series 77853 is a totally self-contained motion detector with encapsulated electronics in a 30 mm high density threaded tubular package. It is designed to be a cut-off switch for underspeed conditions, can detect linear as well as rotary motion, and requires no additional control modules, timers, counters or tachometers. Two models are available with speed ranges from 6 to 150 rpm and 120 to 3000 rpm. RPM trip point is adjustable with a rear-mounted set point screw. Meets NEMA 3, 4, 12, 13 and IP67 environmental requirements. Integral 2 m (6.6') long cable supplied with standard models.

Inductive Proximity Switches Series 7781
Nominal Sensing Span 15 mm (0.59")

Totally self-contained proximity switch. Direct replacement for mechanical limit switches (JIC & DIN configuration). Meets NEMA 3, 4, 12, 13 and 1P67 environmental requirements. Logic output interfaces directly with microprocessors, counters, controllers, relays, etc. No external amplification necessary.

Standard Models

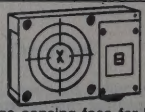
Stock Number	Form Number	Sensing Span	Sensing Face	Output Function	Operating Voltage	Price
81F2924	778111-111	15 mm (0.59")	Top	N.O.	85-265 VAC	80.00
81F2925	778112-111	15 mm (0.59")	Front	N.O.	85-265 VAC	80.00

Inductive Proximity Switches Series 7783
Nominal Sensing Span 25 mm (1.0")

Totally self-contained proximity switch with modular plug-in design and extended sensing range. Simple two-wire connections. Extended sensing range detects larger targets with larger tracking path variances. Meets NEMA 3, 4, 12, 13 and 1P67 environmental requirements.

Standard Models

Stock Number	Form Number	Output Function	Operating Voltage	Indicator LED	Price
81F2926	778311-111	N.O.	93-265 VAC	Yes	105.00
81F2927	778311-121	N.C.	93-265 VAC	Yes	105.00



Inductive Proximity Switches Series 7784
Nominal Sensing Span 40 mm (1.5")
Adjustable Sensing Span 30-60 mm (1.2"-2.3")

Totally self-contained proximity switch. Includes large sensing face for long range detection. Adjustment permits "fine tuning" to targets. Series 7784 meets NEMA 3, 4, 12, 13 and IP67 environmental requirements. Built-in line fuse to protect output switch. Interfaces directly with microprocessors, counters, controllers, relays, etc. No external amplification necessary.

Standard Models

Stock No.	Form Number	Output Function	Operating Voltage	Price
81F2928	778412-151	N.O. or N.C.	85-265 VAC	190.00

Timers and Time Delays

635 AND 636 ELAPSED TIME INDICATORS

Type 635. Compact, non-resettable indicators with 1" diameter number wheels for excellent readability. Quick stop and start induction motor. Six-digit register. Type 636. Similar to 635, but has unique pushbutton reset with no danger of overshoot; 5-digit register. For 115 VAC, 60 Hz. Case Styles: E has 3⅛" round bezel; S has 3½" square bezel; G is utility type with 2½" round bezel; X is 2½" round bezel; Y, 2½" square bezel; K, utility type with 2½" square bezel. 3½" units mount in 2.82" dia. panel cutout; 2½" units mount in 2.22" cutout.

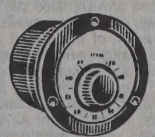
RESET AND CYCLE TIMERS

402

472



561

SERIES 402 PLUG-IN RESET TIMER WITH PILOT LIGHT

Accurate, adjustable interval or timing delay between operation of a control circuit and closing of load circuits. Repeat accuracy: ±0.4%. Motor voltage: 115 VAC, 60 Hz. Power input: motor 3.0 watts, clutch 5 watts. Snap-action SPDT switches rated 10 amps res. Size, 3⅞" sq. x 4$^{5}/_{32}$" deep.

Stock No.	Type	Time Range	1-24	25-49	50-99	100-249

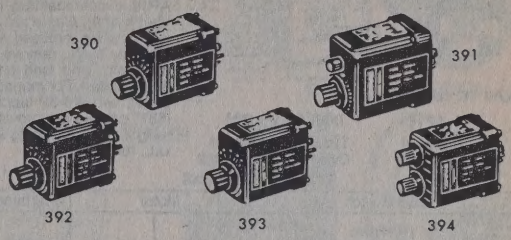
SOLID STATE PLUG-IN TIMERS



Solid state timers with adjustment of delay, interval or cycle times. Compact cases are 2⅜" by 1¾" by 2$^{13}/_{16}$" high (exclusive of knobs). Isolated DPDT relay contact output, rated 10A resistive @ 120 VAC. For 120 volts, 50-60 Hz.

390 Series, "On" Delay models. Repeatability ±2%.

TYPE 241 AUTOMATIC RESET INTERVAL TIMER

- **High Visibility 300° Dial**
- **Silver-Cadmium Load Contacts**
- **Repeat Accuracy: ±0.25%**

Start button integral with setting knob turns on load and starts timer. SPDT contacts rated 15 amps at 115 VAC, 60 Hz; 10 amps at 250V, non-inductive. Repeat accuracy: ±0.25% except 15 second time range ±0.5%. Three-hole mounting on 1.687" radius. Silver-cadmium oxide snap-action load contacts. High visibility dial with 300° scale. 115 VAC.

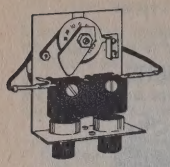
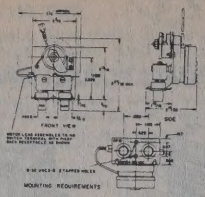
TIMERS





INTERVAL TIMERS

SERIES AP 16
PUSH BUTTON TIMER

Series AP16 timers are similar to the AP18, except that they have a black start button, plus a red stop button, which when pressed will interrupt the time cycle, remove power from the motor and load and reset the timer to start. For mounting behind a panel, two #8-32 tapped holes on .687" centers are provided. Unit net weight 14 oz. Shipping weight 1¼ lb. U.L. recognized.

HOW TO ORDER:

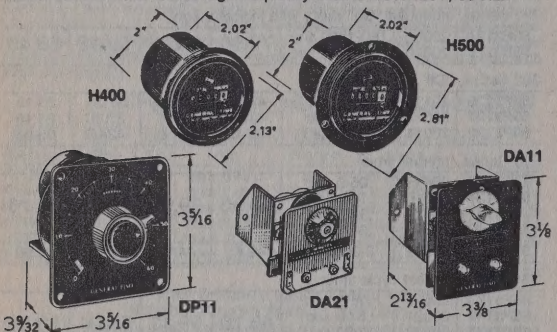
SPECIFICATIONS

Load Switch			Motor		Terminals
125 or 250 or 480 VAC	Resistive 15 Amps	SPST N.O.	24 120 or 240 VAC 60 or 50 Hz	5 watts max.	Motor* S.W.—¼" Spade
125 VDC	0.40 Amps				
250 VDC	0.20 Amps				

Motor leads 6" ±¼" with one amp #41772 type "A" and one amp #4271-1 type "E" quick connect receptacles. Receptacles mate with switch tabs.

Stock No.	Type	Timing Code	Time Range	Max. Reset Time	Each
81F742	AP16	002	3 to 52 sec.	1.5 sec.	36.85
81F743	AP16	003	.5 to 4.3 min.	5 sec.	
81F744	AP16	004	.5 to 8.6 min.	120 sec.	
81F745	AP16	005	6 to 104 sec.	2.5 sec.	

All of the above have a voltage frequency code of 003. 120V, 60 Hz.



SERIES DA11 AND DA21 RESET TIMERS

Type DA11. For use where delay, interval, or repeat cycle time functions are required for adjustable time periods. Repeat cycle requires two units. Resets to start when power removed. Manual knob adjustment. Rear mounted. SPDT switch. 20 Amps. Solder lug terminals. 5 watt motor. Repeat Acc: ±¾%. Min. Time Setting: 0 sec. UL recognized. CSA listed. 3⅛x3½x2 13/16". Shpg. wt.: 1 lb. DA21. Same as DA11 exc. locknut adjustment. UL recognized, CSA listed. Use with external relay.

SERIES DP11 PANEL MOUNT RESET TIMERS

Apply wherever delay, interval, or repeat cycle timing (requires two timers) are needed. Simple pointer knob for timing adjustment. Reset to start position when power is removed. Time elapse readout in center of adjustment knob. SPDT switch, 10 amps, 5 watt timing motor, 120 VAC 60 Hz. Repeat accuracy ±1% of total time. Screw term. Size: 3⅜ sq. x 3 9/32" depth. Requires 3⅛" dia. mounting hole. Use with external relay.

Series AP18 Push Button Timer. Designed primarily for automatic merchandising machines, amusement devices, coffee making equipment and copying machines. Can be used wherever manual push button control of a set time interval is desired. Repeat accuracy is ±¾% of total time range.
Designed for mounting directly behind a panel. The timer will operate mounted in any position. Push buttons are bushing supported to withstand rugged use. U.L. recognized.

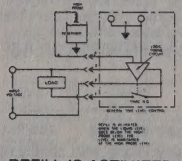
LEVEL CONTROLLER FOR LIQUIDS AND OTHER CONDUCTIVE MATERIALS

Specifications Model 9989-003. Input Voltage: 105-129 VAC, 50/60 Hz. Other input voltages available. Probe @ MA Circuit Voltage: 24 VAC (nominal) Operating Temperature Range (Ambient): 25°C to 78°C. (77°F to 172°F). Sensitivity: This controller, used for water and aqueous solutions, is set to show a "full" condition when the impedance between the probe and the material being controlled is 75 kilohms or less and to react to a "low" condition when impedance reaches 375 kilohms. The electrical gap between these values prevent false starts from high moisture conditions and frothing liquids. Other sensitivities available. Delay period: A built-in delay device prevents actuation of the output circuit until the control circuit has been open for a continuous period exceeding 5.2 seconds (nominal). Delays to 15 minutes optionally available. Sensing Probe: Contact probe suppliers directly. Mounting: The controller may be mounted by the .220 inch 5.6 mm diameter holes provided on the PC board. It can also be mounted to a non-chassis reference point. Construction: All components mounted on G-10 fiberglass board and sealed with a moisture resistant coating. Output: Output circuit current is controlled by a Triac switch conservatively derated @ 78°C ambient temperature to 40 VA (1/3 ampere) for 117 VAC; 50/60 Hz resistive or inductive loads of 50% to 100% power factor. Contact form is SPST normally open. U.L. file number: E48126.

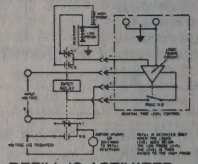
81F750 NET 38.25

TYPICAL APPLICATION #1. AUTOMATIC HIGH LEVEL RESERVOIR REFILL



REFILL IS ACTIVATED WHEN THE LIQUID LEVEL GOES BELOW THE HIGH PROBE LEVEL. THE LEVEL IS MAINTAINED AT THE HIGH PROBE LEVEL.

TYPICAL APPLICATION #2. AUTOMATIC LOW LEVEL RESERVOIR REFILL



REFILL IS ACTIVATED **ONLY** WHEN THE LIQUID LEVEL GOES BELOW THE LOW PROBE LEVEL. THE LEVEL IS THEN RAISED TO THE HIGH PROBE.

Dimensions: width = 3", length = 3½", height = 1½".

4-40 VDC SERIES H-DC HOUR METERS

5 Digits. Non-resettable, 4 to 40 VDC meters with permanently sealed, high impact, heavy-duty cases. Standard SAE mounting required; 2" (nom.) dia. panel cutout. Jeweled bearings, accurate within 1% @ −20°C−+185°C. Auto-Recycle after 9999.9 hrs. With oper. indicator. MIL-3971-C.

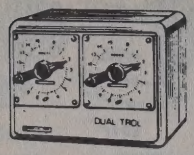
SERIES "DUAL TROL" RECYCLING TIMERS



Dual-Trol is a compact recycling timer that continuously closes and opens a SPDT load switch. A complete unit consists of two TM timer modules—one to set the ON interval. Second to set the OFF interval—and a control cabinet. Any two modules from listing below may be used to achieve the desired combination of time cycles. TM modules are complete timing mechanisms with 4-prong plugs that match receptacles within cabinet, for easy installation. Isolated SPDT load switch connects to terminal strip within cabinet; switch is rated 10A non-inductive at 120 VAC. 120 VAC/60 hz. 5⅛x5⅜x7½" Wt. 2 lbs.

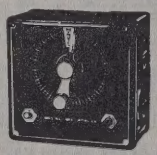
Series P



The Series P timer is a multi-purpose interval timer, equipped with line cord, manual start push button and two receptacles. The BLUE receptacle is provided on the side of the case for REMOTE STARTING. The BLACK receptacle receives plug-in LOAD circuits. Keyholes are provided in the back of the case for wall mounting. Load contact rating is 15 amps. noninductive. Repeat accuracy is ±.25% of full scale. Reset is ½ second at maximum setting. Voltage of 120, 240/50 or 60 cycles are available.

AUTOMATIC RESET INTERVAL TIMER PANEL MOUNT SERIES MPB

The Series MPB is an automatic reset, push-button operated interval timer. The MPB features an attractive bezel framed dial with time selector ring and start button combined into a single assembly.
Time interval indication is viewed by a moving white pointer located within the selector ring. Repeat accuracy is ±½ of 1% of full scale with a reset time of ½ second at maximum dial setting. Mounting: Mounted through a 3½" diameter hole and is secured to the panel with four screws. Electrical Specifications: Load switch rating: SPDT snap action, 15 amp. noninductive at 125/250 VAC. Motor Voltage: 120 v, 60 Hz. Terminations: ¼" push-on terminals. Dimensions: 4"L x 2¹⁵⁄₃₂"D x 4⅜"H. Shipping Weight 3 lbs.

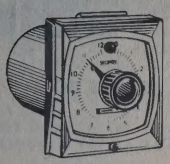
Automatic Reset Delay/Internal Timer with Spider Clutch



- Incorporates mechanical and infinite engagement for high accuracy.
- Completely interchangeable.

GP2 is an automatic reset, synchronous motor driven plug-in timer control completely interchangeable with all popular plug-in timers. Provides two delayed sets of contacts and two sets of instantaneous contacts. Rating of 5 amps at 250VAC. Patented Spider Clutch incorporates the high accuracy of infinite engagement clutches with mechanical integrity of toothed clutches. Accuracy ¼ of 1%. Reset time—less than ½ sec. for full scale. For 120 VAC 60 Hz. Wt. 2 lb. 7 oz.

Stock No.	Type	Max. Time Cycle	Dial Cal.	EACH

GPC SERIES

The GPC Series, identical in operation to the PC Series, is calibrated in percentages and designed to close an electrical circuit for an adjustable part of a given time cycle. "ON" time can be set from 3% to 97% of the total time cycle. The GPC Series can also be set at 100% which provides constant circuit closure. The GPC is a companion to the GP-2 and is completely enclosed in a dustproof case. SPNO load contacts are rated at 20 amps, non-inductive. Operating voltages of 120 or 240VAC, 50 or 60 Hz are available.

Stock No.	Type	Time	Each

81F028	GPC-60M	60 min.	

To order, specify model number, cycle time and voltage.

7

HOW TO ORDER CAM TIMERS

Locate desired time cycle duration in "Gear Assemblies" chart below, order gear-and-rack assembly listed in left-hand column. Appropriate foundation (motor-switch) units appear at top of "Time Cycle" columns. Example: 4 circuits are to be controlled, with a 30-second time cycle, recycling. Order gear-and-rack assembly. A12, stk. no. 24F315, and note that foundation unit MC2 is required. At bottom of page, locate MC2 under heading "4 SWITCH CHASSIS". Order stk. no. 62F2010. U/L & CSA approved.

Series K. Totalizer add/subtract electronic counter. Registers simultaneous and overlapping pulses. Optically isolated. 5-40 VDC, 50 Hz, Max. 250 csp count speed. 24VDC regulated power supply. 50 Hz, 10 cps to 1 MHz input. Panel or remote reset. Built in battery for power failures. Batt. not included. C/MOS L.S.I. circuitry. 4 digit counters have open collector logic level zero output option. .17″ LED. 1″ x2″ case.

Series 8100

- Counts overlapping pulses.
- Freeze display, output w/o affecting logic.
- Built in standby circuitry.
- C/MOS L.S.I. low power circuitry.

Series 8100. 8 digit add/subtract panel mount counter. Designed for simultaneous and overlapping pulses, quadrature pulses, AC and DC pulses, line driven and switch closure pulses. Low C/MOS insures accurate count in noisy industrial environments. Powered by 110VAC 60 Hz supply which also generates 100 milliamps of regulated 5 or 12V to peripherals. Built-in self charging battery to hold count up to 3 weeks. Batt. not incl. Aluminum case. .4″ orange LED's. Parallel BDC and logic level zero output options. Edge connector termination supplied.

- 2 preset points, 8 amps each.
- Counts between two numbers.
- Crystal controlled timer modes.

Series SCPS. 6 digit AC powered single or dual preset panel mount counter timer. Can count up to the preset number or between the preset numbers. Built in 110 VAC 60 Hz power supply generates 100 milliamp of 12V to power input devices. Output features 8 amp relays, 3 amp triacs and open collector logic level outputs. Both panel and remote resets. 12 volt high impedance pulse input to count/time. 1 standard variable preset. Controlled by two form C relays in 10 millisecond auto recycling. 100 cps count speed. Battery standby circuitry with 25 milliamps/8 volts current consumption built in to secure data in power outage. Battery not included. Changing preset number does not affect count. —32 to 140°F operating temperature range. 1.9″ x 5.6″ aluminum case with aluminum bezel.

Series 8000

- AC/DC pulses or switch closure to count.
- One megahertz count speed.
- Freeze display, output w/o affecting total.
- Reset both remote and panel.
- For noisy electrical environments.

Series 8000. Panel mount 8 digit electronic totalizing counter replaces electromechanical counters without changes to circuitry. Feature built in 110VDC 60 Hz power supply which both powers the counter and provides 100 milliamps of regulated 5 or 12VDC to power photoelectrics and proximity sensors. Accepts 12V high impedance pulse and switch closure inputs at speed up to one megahertz in noisey industrial environments. Built in self charging nicad battery protects the count for 3 weeks in power failures. Battery not included. Option—BCD output is ideal for interfacing with printers and other data processing equipment. No moving parts. Offers remote or panel pushbutton resets. Printed circuit board edge connector supplied. Operating temperature of —32 to 130°F. 100 cps count speed. Mount on aluminum bracket provided. 4.0″ x 3.5″ x 1.89″.
Type 80503-12PE3EX. Totalizing counter.

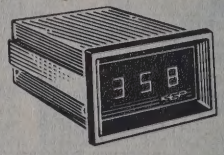
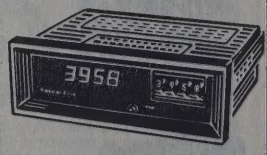
TYPE 80503



TYPE 85503



TYPE 86503

Series 8500 and 8600

- .375″ brilliant orange LED displays.
- Crystal oscillator controlled.
- 110/220/-50/60 Hz power supply.
- Rocker switch field programmable.
- Frequency display updates-programmable.
- BCD output.
- Rugged cast aluminum case.
- Presettable.

Series 8500 and 8600 crystal controlled rate meter/frequency counters designed for controlling event per minute. The 8500 indicates rpm's and update at precise one second intervals. The 8600 als updates each second and features four digits of preset and 8 amp control relays. Both rate meters are designed for use with sensors that generate 60 pulses per revolution. As frequency counters, both meters will tract 3-30VDC signals at speeds up to one megahertz refreshing the display at precise one second intervals. This family is powered by a built in 110/120-50/60 Hz power supply. These supplies generate 100 milliamps of 5 or 12 volts for powering photoelectrics and shaft encoders. Counters accept up to 12 volt high impedance pulses. Operating temperature of 32 to 130°F.

Type 85503-110PE. Rate/frequency meter.
13F3394. NET **385.50**

Type 86503-110PE. 2 Form C relays 8 amp relays available for control. When preset rate is reached, relays either transfer or remain tansferred, transfer for an adjustable time period or latch until the rate falls below the preset point at which time relays will open once again. Open collector output also available, 400 milliamp switching capacity.

INTERMATIC®

SCHEDULER AND SUPERVISOR TIMERS

V47000 Series—Ideal for control of background music, industrial process operations, heating systems. Periods of operation can be varied in multiples of 5 minutes. V48000 Series—Provides 1 to 288 short interval operations per day. Operates for periods of from 2 to 60 seconds duration at 5 minute intervals. Both units repeat program every 24 hours and skip days desired. Includes toggle switches for testing and cutting off automatic operations. Gray steel case 10⅞"x7⅜"x3⅝". 125 V. 60 Hz AC. Weight 8½ lbs.

The "LITTLE GRAY BOX"® Electric Water Heater Timer

Program your hot water heater operation . . . automatically. The "Little Gray Box" electric water heater timer lets you save up to 33% on your electric water heating bill at the same time by controlling the times your hot water heater operates. Program your water heater's operation so that the quantity and temperature of your hot water are reduced—automatically. Schedule your water heater's operation to coincide with lowest time-of-day rates—conveniently. Regulate your water heater's operation so that you are not draining unneeded energy while your utility has least power to spare—easily. WH-40 U.L. Listed DPST-250V., 10,000 watts, 40 amps., 60 Hz.

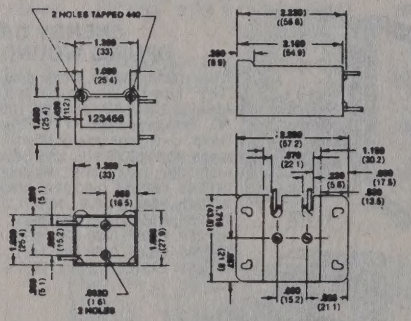
6NR



MODEL 6NR SERIES

UL recognized CSA certified

The 6NR incorporates the latest manufacturing technology together with a patented basic design to achieve high performance and unbelievably low pricing. This counter is specifically designed for vending, dispensing, gaming and office equipment applications, but due to it's high performance and low price, the 6NR can be used in many varied applications 6 big digits in a rugged plastic case. Count speed: 10 CPS, standard. 50/50 ratio on/off. Base mount dimensions: L. 1.715″ W. 2.25″ Height from base mount to face: 2.35″

Dual Mount: can be front or base plate mounted.

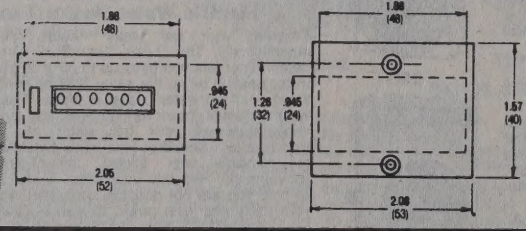
6DT



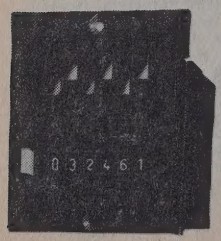
MODEL 6DT SERIES

ELECTRO-MECHANICAL

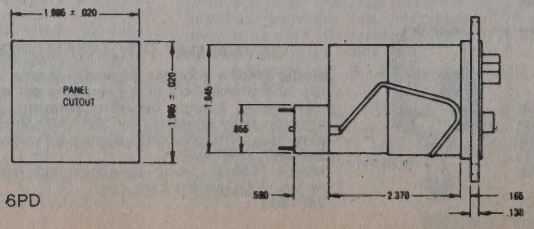
UL recognized

6 digit with manual reset. A very high reliability impulse counter designed for long life, (250 million) ruggedness, and low (2 watt) power consumption. Capable of count speeds to 50 per sec. Mounts in 1.89″ × .95″ panel cutout. 2.8″ behind panel.

81N4963	6DT115AP	115AC	Panel	52.15	46.93
81N4964	6DT024DP	24DC	Panel	45.85	41.26



6PD



MODEL 6PD SERIES PREDETERMINATING ELAPSED TIME INDICATOR

The 6PD predeterminating counter features large staggered push buttons for easy fast presetting. To operate use the push buttons to index each number wheel to it's preset number while holding down the white reset button. The counter will then count down to zero and actuate a SPDT built in 5-AMP switch. Reset back to the original preset number is done manually. Counter mounts in 1.97″ square panel cut out; extends 2.8″ behind panel.

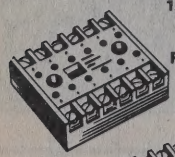
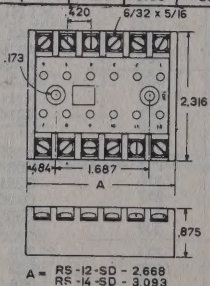
12 AND 14-PIN



RS-12-SD

RS-14-SD



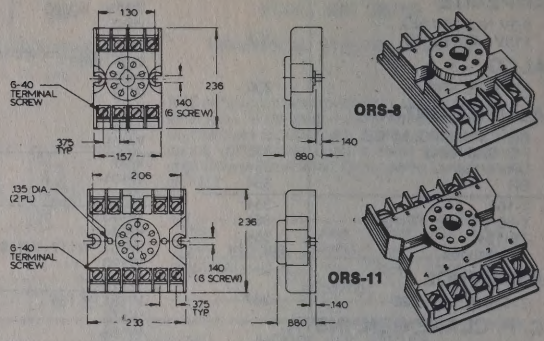
A = RS-12-SD - 2.668
RS-14-SD - 3.093

Screw terminals and clamp plates for #14 wire. Rated 10 amperes at 300 volts. RS-12-SD is designed for use with Struthers and Dunn 12-pin relay types: CX3671, CX672, S.S.96 solid state, RSX1440, A255, 236, 237, 219. RS-14-SD is designed for use with Struther and Dunn 14-pin, 4PDT and 6 pole type 219 relays.

Stk. No.	Type	Description	1-9	10-24	25-49	50-99
23N3602	RS-12-SD	12-pin	7.10	6.04	5.68	5.32
23N3603	RS-14-SD	14-pin	8.04	6.84	6.43	6.03

- **Unitized, thermoplastic sockets with closed-back design which eliminates panel insulation and resists breakage.**
- **Permanent numbered terminals for easy identification.**

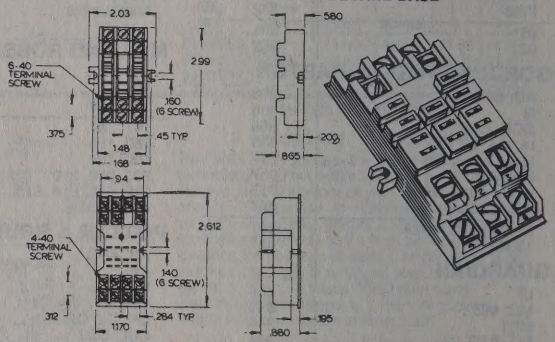
8 & 11-PIN UNITIZED OCTAL



Rated 10 amperes at 300 volts. Screw terminals #6-32. Screws with captivated traveling nut. For use with Potter & Brumfield type KRP, KRP3-H, KAP, KBP, KCP, EBT, EBA relays; CD-21, CD-38, CH, CK and CR time delays; and CS sensor.

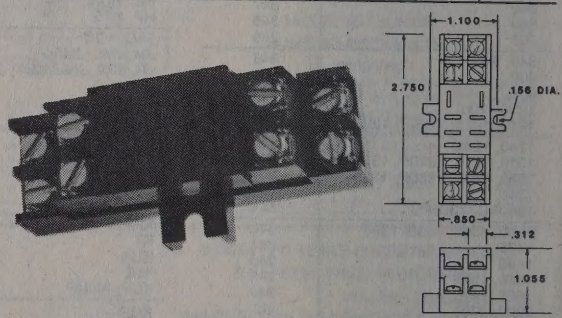
Stk. No.	Type	Description	1-24	25-50	51-99	100-249
22N3609	ORS-8	8-pin/2PDT	4.20	3.99	3.78	3.15
23N3610	ORS-11	11-pin/3PDT	6.29	5.98	5.66	4.72

11 AND 14-PIN UNITIZED SQUARE-BASE



Screw terminals #6-32 screws with captivated travelling nut. RS-11-SQ is an 11-pin socket for 3PDT square-base barrier type plug-in relays. Rated 15 amps at 250 volts. For use with P & B type: KUP-KUMP, KUA, KUL, KUR, CU and CL series relays. RM-14-SQ is a 4PDT square-base socket rated 5 amps for P & B type: KHU, KHS and CD-31 series relays.

Stk. No.	Type	Description	1-24	25-50	51-99	100-249
23N3611	RS-11-SQ	11-pin/3PDT	6.66	6.33	5.99	4.66
23N3766	RM-14-SQ	14-pin/4PDT	10.19	9.68	9.17	7.64



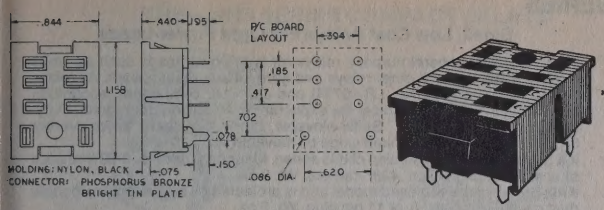
2PDT-8 PIN MINIATURE FOR MIDGET POWER RELAYS

Resilient thermoplastic body molded in closed back design. One piece hardware construction having no solder connections. Space saving size is 30-40% less space than conventional square base sockets. Make it ideal for control equipment. High power capacity rated 300 volt, 10 amp. Special designed pressure clamp assembly for screw terminals. Low profile and barriers between all contacts.

Stock No.	Type	Description	1-24	25-50	51-99	100-249
81N1450	RM-8-SQ	2PDT, 8 pin screw terminal	5.16	4.90	4.64	3.87

Relay Sockets

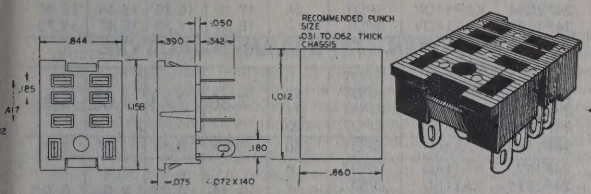
VOLTREX® brand



2PDT MINIATURE STYLE

Rated 300 volts, 10 amps. Molded of UL grade black nylon. Terminals are phosphor bronze with bright tin plating PCB standoffs included.

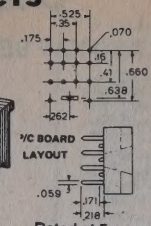
Stock No.	Type	Description	1-24	25-50	51-99	100-249
81N1452	MRS-8PCB	2PDT, 8 pin PCB	1.41	1.34	1.27	1.06

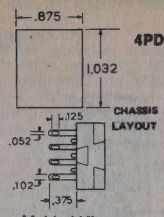


2PDT-8 PIN MINIATURE CHASSIS MOUNT (SOLDER STYLE)

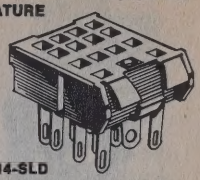
Rated 300 volts, 10 amps. Molded of UL grade nylon black. Terminals phosphor bronze with bright tin plate. Snaps into chassis from front, eliminating mounting screws or retainer springs.

Stock No.	Type	Description	1-24	25-50	51-99	100-249
81N1451	MRS-8-SLD	2PDT, 8 pin solder	1.34	1.27	1.21	1.01





4PDT MINIATURE



MRS-14-SLD

Rated at 5 amperes. Molded UL grade nylon. MRS-14-SLD: Solder terminals. Can be chassis from front or reverse side, this allows pre-wiring of socket prior to installing in chassis or panel. MRS-14-PCB; PC Board terminals. For use with Struthers and Dunn type C281 and 282 relays.

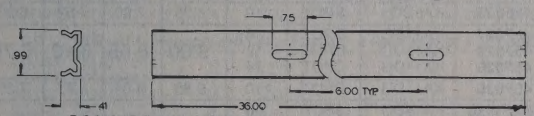
Relay Sockets, TRACK MOUNTING ACCESSORIES FOR UNITIZED RELAY SOCKETS



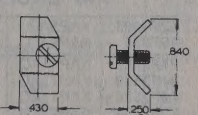
SOCKET TRACK RST-601

Track is available in 3' lengths and has slotted mounting holes for #8 screws on 6 inch centers.
16N1676 NET 3.89

TWIST-IN CLIP

Type RST-609. For track mounting types ORS-8, ORS-11, RM-14-SQ sockets. Two required for each socket or one at each end of row if quick-mounts are used.
16N1677 NET 25

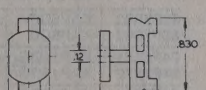
Type RST-709. For tract mounting type RM-11-SQ socket. One required for every two sockets with one at each end of row.
16N1678 NET 25



RST-609. RST-709.

QUICK-MOUNT CLIP

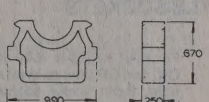
Type RST-506. for track mounting types ORS-8, ORS-11, and RM-14-SQ sockets. Quick-mounts fasten adjoining sockets without the use of screws. Use RST-609, twist-in clips, for each end of row.
16N1679 NET 25



RST-506.

QUICK-MOUNT CLIP

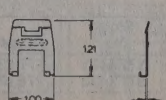
Type RST-704. For track mounting type RM-11-SQ socket. Quick-mounts fasten adjoining sockets without the use of screws. Use RST-709, twist-in clips, for each end of row.
16N1680 NET 25



RST-704.

SPRING LOCK

Type RST-705. For use with RM-11-SQ sockets. Spring-locks hold relays with side slots securely to socket.
16N1681 NET 18



RST-705.

Small, Low Cost Relays For Light Power Loads

Highly efficient general purpose relays for light power loads such as small motors, solenoids and other relays and general automation work. All relays bear CSA listing (File No. LR-15734) and carry UL component recognition (File No. E22575). Mechanical life expectancy: 10 million operations. Duty-continuous. Contacts: "Y" Suffix-Movable, Silver; stationary, Silver overlay, 5A. "G" Suffix silver-cadmium oxide on movable rated 10 amps.

KA Series is the open version of this series. Mounting: one No. 6-32 threaded stud and locating tab on .438" centers. Wt. 2 oz.

KAP Series is the enclosed model and is protected by a clear polycarbonate dust cover. Terminals: 8 or 11 pin plug. Wt. 3 oz.

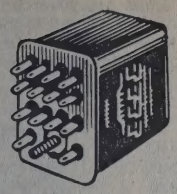
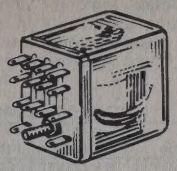
General Purpose Relays

Potter & Brumfield

KHU—KHS SERIES COMPACT RELAYS



KHS



KHU

- **KHU Series UL recognized**
- **Used for data processing, computer and process control applications.**

Small 4PDT relays. Designed to meet exacting requirements of data processing, computer and process control applications. **Suffix-1** denotes silver contacts rated 3 amps @ 30 VDC or 120 VAC, resistive. **Suffix-2** denotes silver-cadmium oxide contacts rated 3 amps. **Suffix-3** indicates gold alloy contacts for low level to 1 amp application. **Suffix-6** indicates gold overlay on silver bifurcated contacts rated 1 amp @ 30 VDC resistive or 120 VAC. Mounting: solder terminals with 3-48 stud 0.312" long. **KHU Series** is recognized under component program of UL and has clear polycarbonate cover. **KHS Series** is UL recognized and is hermetically sealed in metal enclosure. **Suffix N** denotes neon indicator available with 120V AC or DC coil only. Weight without socket: KHU—1.12 oz. KHS—1.63 oz.

DC VOLTS—Hermetically Sealed Metal—3 AMP except (††) 1 AMP

GA SERIES—MULTIPLE LEAF

- **Multiple Contact**
- **For Industrial Control**

Low Cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, pierced solder type terminals. Contacts: Silver rated 5 amps, @ 28 VDC or 120 VAC resistive. Designed for maximum self-cleaning action. Mounting: 8-32 tapped core with locating boss. Weight: 3½ oz.

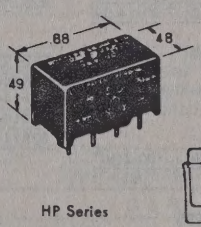
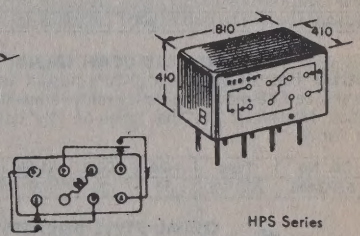
HP AND HPS SERIES HALF SIZE CYSTAL CASE



HP Series



HPS Series

HP SERIES. Circuit board or socket mounting. Encased in a nylon heat-sealed (non-hermetic) cover. Contacts rated 0.3-2 Amps @ 28 VDC or 0.1-0.5A @ 120VAC @ 25° C resistive. Terminals on .2 grid. Wt. 3 oz. **HPS SERIES.** Hermetically sealed version of **HP SERIES.** Designed for prolonged submersion of pc. boards. HP socket may be used for mounting. Sealed metal enclosed. Wt. ¼ oz.

KRP AND KRP-N SERIES GENERAL PURPOSE RELAYS

KRP Series. Versatile, multi-contact arrangement. Enclosed in clear polycarbonate dust cover. Standard 8 pin octal type plug for KRP5 and KRP11, 11 pin for KRP-14. Contacts: 5 amps are silver, 10 amps are silvercadmium oxide. **KRP-N Series.** Indicator Lamp Relay incorporating a lamp to indicate current or voltage availability in power circuit. Mounting: standard octal plug. Contacts: Silver cadmium oxide rated 10 amps. Enclosed in clear polycarbonate dust cover. Approximate weight: 3 oz.

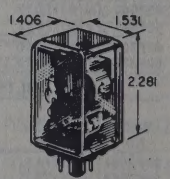
KR3-H AND KRP3-H COMPACT RELAYS

- **Used where limited space is a factor**
- **Weighs only 2 oz.**



Heavy duty relay ideal for limited space. Copper alloy movable contact carrier has twin silver-cadmium oxide contacts rated 20 amps @ 120V AC 60 Hz resistive or 28V DC; 1 HP 120/240V 60 Hz. Contact arrangement is 1 Form X (SPST-NO-DM) only. Terminals suitable for .250" quick connect, also solder; for contacts: solder only for coil. Mtg.: one 6-32 stud and locating tab on .437" center. Size: 1.6"x1.671"x1.52". Seated height: 1.21". **KRP3-H Series.** As above except enclosed in clear polycarbonate dust cover with an octal plug-in case. 1.406x1.531x2.281". CONTACTS: SPST-NO-DM

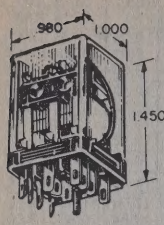
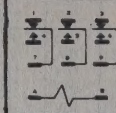
KNP SERIES—COMPACT 3 AMP RELAYS



Small AC or DC General Purpose Relay



Recognized under the Component Program of UL and CSA for ratings of 1/10 HP @ 120VAC; 3 amps @ 32VDC resistive, or 3 amps @ 240VAC 80% PF. U/L File No. E22575. Contacts are fine silver cross bars for low resistance point contact. Terminals are .110" quick-connect/solder. Fit sockets below. **KNP-11 Series** has 6-32" tapped hole with locating tab for chassis mounting. **KNP-21 Series** has 3-48" stud for chassis mounting. Enclosed in clear polycarbonate dust cover. Size when seated 1.45" high max. Wt. 1.4 oz.

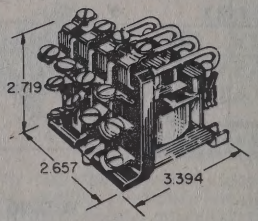
PM SERIES POWER RELAYS



- **For polyphase and Heavy Duty Switching**
- **UL and CSA listed Except 480V**

Compact 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has silver-cadmium oxide contacts rated at 25 amps at 240VAC 50/60 Hz resistive. 1 HP per movable arm at 120V or 240V, AC single phase. UL (File E22575) and CSA listed except 480V. Mounts by one front key hole and two rear channel slots for 8-32 screws on 2" × 2.5" triangular centers. Weight 14 oz. For enclosures see Dust Covers listed on this page.

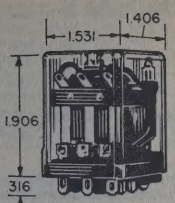
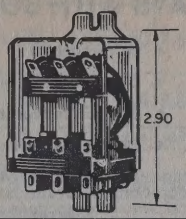
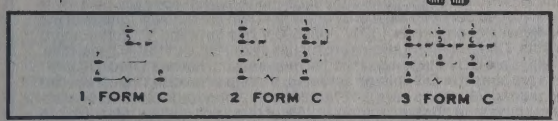
General Purpose Relays Potter & Brumfield

KUP SERIES—RELIABLE 10 AMP RELAYS AND KUMP 15 AMP RELAYS



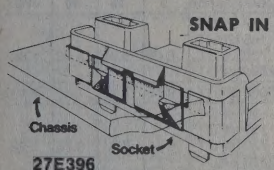
For Industrial Control

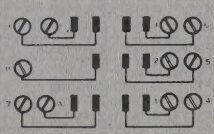




Type KUP-KUMP relays have polycarbonate dust cover, are UL Recognized under File E22575, and CSA Listed under file 15734. Contact ratings of all **KUP** models are for duty at either 28V DC or 240V AC, 80% PF. Power rating of 10 amp contacts is ¼ HP, 120V AC; and ½ HP, 240V AC, 80% PF. The 5 amp contacts are rated 1/10 HP, 120V AC; and ¼ HP, 240V AC, 80% PF. **KUMP** contacts are rated at 15 amps, 277V AC, 80% PF; ¼ HP, 120V AC; and ½ HP, 240V AC. Contact life expectancy for both relay series is 10 million operations, mechanical, and 100,000 operations at full load. At loads of less than maximum rating, life expectancy rises accordingly. All models have .187" QC/solder terminals. **KUP** with suffix "55" has flange mount case unsuited for socket mounting. All other models use sockets and hold-down springs listed. Weight is approximately 3 oz. each model. (**) test button (†) with neon light (††) test button and neon light.

SNAP IN SOCKETS





27E396
27E400

SPDT/DPDT/3PDT snap-in sockets require no mounting screws or retainer spring. 27E396 has .187" quick connection termination; 27E400, solder eyelet termination.

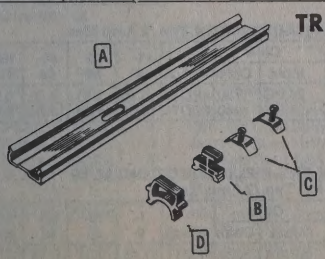
TRACK MOUNT SYSTEM FOR SOCKETS



(A)—Extruded aluminum, three foot section with slotted holes on 6" centers for #8 screws. **(B)**—Plastic clip for mounting sockets 27E122, 27E123. Two clips required per socket. **(C)**—steel mounting clip with #6-40 tapped hole for mounting sockets 27E121, 27E122, 27E123, and 27E166. Includes one #6-40x1 3/32" screw. Two retainers and screws required per socket. **(D)**—Plastic clip will mount 27E487 only. Two required per socket.

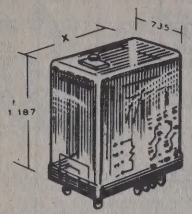
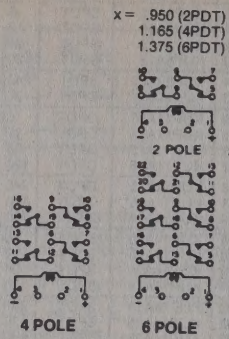
R10-E1 SERIES INDUSTRIAL RELAYS WITH SOLDER TERMINALS





- **UL recognized**
- **CSA recognized up to 6PDT Models**
- **Contact life expectancy of 10 million mech. operations**
- **1000V Initial Breakdown**

UL recognized under File E42810 and E2 9244 Models to 6PDT have CSA recognition. Contact life expectancy for all series is 10 million operations, mechanical. Wiring connections should be made so that opposite polarity is not developed between adjacent contacts. Initial breakdown voltage of the gaps between contacts is 1000V rms; 500 V rms between "Z" (bifurcated) contacts. Contact rating shown are for use at 28V DC or 115V AC, resistive. "V" relays are DC voltage actuated. "J" relays are current actuated (DC). "S" relays are sensitive DC voltage actuated. Voltages listed in "Input" col. are maximums. "E1" relays have .012" x .080" x .21" long solder terminals w/ #3-48 mounting stud. Pickup is approx. 75% of rated coil voltage. Max. pickup power of SPDT R10-SS1.0 and -SS220 is 20 mW DC @ 25°C. Wt. 0.8-1.4 oz.

R105 GENERAL PURPOSE RELAYS

R10S series relays are very sensitive, current actuated DC relays for direct drive by DTL, TTL, ECL, and HTL. Available in solder (E1), and pc board (E2) termination. Maximum pickup is listed in "Input" column. Weight: 0.8 to 1.4 oz.

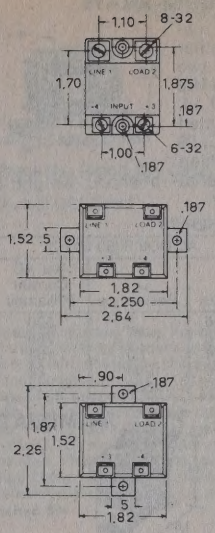
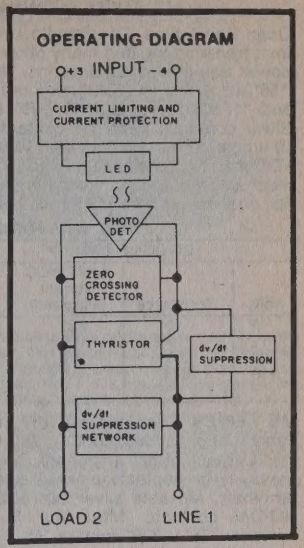
*Mounted to appropriate heatsink w/silicon grease.





Solid-state controlled, isolated by optoelectronic coupler. Both feature zero voltage turn on and zero current turn off. Life expectancy greater than 100 million operations at rated values. Current rating is 25°C, 120 VAC, 50/60 Hz. Maximum load current derating is linear between 25°C and 55°C ambient. Can be driven directly by TTL, DTL, ECL, HTL, or MOS logic. EOM has screw terminals. EOT has .250" quick-connect terminals; non-hermetically sealed.

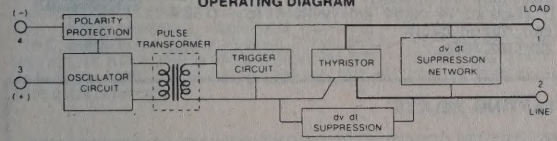
EAX SERIES

- TTL, MOS, I^2L compatible
- 1.2 amp load current
- 100 million operations

OPERATING DIAGRAM



Consists of solid-state switch; controlled and isolated by toroidal transformer driven by pulse circuit. Compatible with TTL, MOS, and I^2L logic. Input current: 12 mA, max. at all input voltages. Load current 1.2 amp, 120 Vac, 50/60 Hz., +25°C, derated linearly between +25°C and +55°C to a value .75 amp. Operate time: .5 ms, max. Release time: Typical turnoff at first zero crossover. Operating ambient: −10°C to +55°C. Operating life expectancy: 100 million operations, min. Approximate weight: 1 oz.

ECM

ECM SERIES hybrid relay consists of a solid state switch controlled and isolated by an internal reed relay. Packaged in a non-potted, screw terminal enclosure only .875" high, the ECM switches AC loads up to 40 amps. Current ratings for each rating code are listed in the ECM Switch Rating Table. Maximum load current derating is linear between +25°C and +55°C ambient. The referenced heatsink in the rating table is 15" x 15" x .125" aluminum for rating code ⑦ and 20" x 20" x .125" aluminum for rating code ⑨. Relays should be mounted securely to the heatsink using thermal joint compound between the relay and heatsink.

MR SERIES MEDIUM POWER RELAYS

Open frame type. Can handle small motors, transmitters, and many other similar power equipment applications. Mtg: two .156" dia. holes on 2.250" centers for MR3 and 11; 2.625" centers for MR5 and 14. Silver contacts. MR3 has contacts rated 10 amps; all others, 8 amps, 120 VAC, 28 VDC resistive. Life expectancy is 5 million mechanical operation. Insulating material—phenolic. Weight: 4 oz. For dust covers, see MS series below.

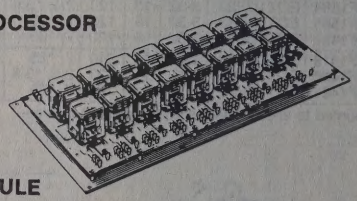
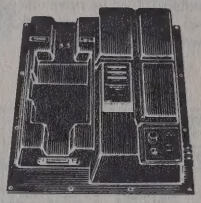
VERSATILE, AFFORDABLE MICROPROCESSOR BASED CONTROL



LOGIC MODULE WITH 29 INDEPENDENT CHANNELS

ABLE TO CONTROL 16 RELAYS AT DIFFERENT TIMING INTERVALS



LOGIC MODULE QL08-1000. 29 independent channels, is programmable in either minutes or seconds and can control as many as 16 output relays. A programmable wait feature allows a "wait" to be inserted at the beginning of any start time or the end of any stop time, with a 96-132V, 60 Hz. pulse required to reinitiate sequencing. QL08 utilizes a non-volatile, electrically alterable read only memory which needs no battery backup for memory retention during power failures. Should a power interruption occur, the QL08 remembers its location in the sequence. Sequencing may be resumed at that point when power is restored. Maximum cycle duration for the QL08 is 99.9 minutes, in the minutes mode, or 99.9 seconds, in the seconds mode. Resolution is 0.1 minute, in the minutes mode, or 0.1 second, in the seconds mode. Output 1 has maximum of 8 start/stop times, outputs 2 and 3 have a maximum of 4 start/stop times each and outputs 4 through 16 have 1 start/stop time each. Approximate dimensions: 15.75"H x 12.65"W x 3.5"D (40.0 x 32.1 x 8.89 cm).

22F1181. NET 594.40

INTERCONNECTION CABLE

INTERCONNECTION CABLE QC08-1000. Required to connect the QL08 logic module to the QR08 output module. This ribbon cable with card edge connectors is five feet (152.4 cm) long.

22F1183. NET 33.45

OUTPUT MODULE

OUTPUT MODULE QR08-1000. Interfaces directly with loads by means of 16 UL Recognized KUP relays. Each of the 2 form C DPDT) relays in the module has an LED wired in parallel with its coil to indicate operation. The output relay contacts are UL rated ¼ HP @ 120V AC; ⅓ HP @ 240V AC; 10 Amperes @ 28V DC or 240V AC, 80% PF; 10 FLA, 30 LRA @ 125V AC; and 5 FLA, 15 LRA @ 250V AC. Minimum expected contact life is 10 million operations, mechanical, and 100,000 operations, electrical, at rated load. Relays operate in approximately 15 milliseconds and release in approximately 10 milliseconds. The output module has .250" quick connect terminals for fast, secure wiring. Approximate dimensions: 8.3"H x 17.8"W x 2.5"D (21.1 x 45.2 x 6.35 cm).

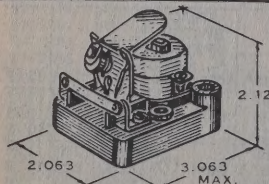
22F1180. NET 337.80

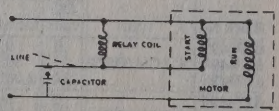
PROGRAM MODULE

PROGRAM MODULE QS08-1000. Programs may be entered and changed quickly and easily using the QS08. Once the programming has been completed and the unit has begun sequencing, the program module may be disconnected and removed. This allows one QS08 to be used with several logic modules and also prevents program tampering. Approximate dimensions: 5.75"H x 3.6"W x 1.12" D (14.6 x 9.14 x 2.84 cm) with 5 foot (152.4 cm) ribbon cable.

22F1182. NET 81.05

MS SERIES MOTOR STARTING RELAYS





Disconnects capacitor on capacitor start, induction run motors Operates on back EMF of start winding. Armature gap can be altered to change pick-up. UL recognized. Mounting: two .156" dia. holes on 1.563" centers. Contacts: ¾ HP, fine silver; 3 HP, silver cadmium.

Heavy Duty Power Relays

AB AND ABC SERIES MEDIUM POWER 10 AMP RELAYS

Equipped with terminals to fit snap-on connectors and may be applied to PC using dip soldering. Recognized under component program of UL and are CSA listed. Silver contacts.

AB Series. For appliance and general purpose applications. Mtg.—Two 8-32 tapped holes on 1¼" centers. Wt. 5 oz.

ABC Series. Med. duty power relay for small motors. Enclosed in non-hermetic, heavy metal cover. Mtg.-one ⅜" × 8-32" metal stud and locating tab on .562" center. "Y" style contacts, 10 amp @ 120 VAC, or 5 amp @ 240 VAC resistive. Wt. approx. 7 oz.

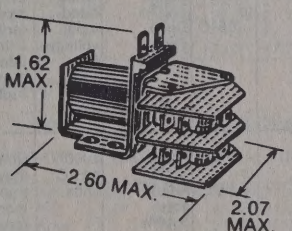
S87R SERIES 20 AMP POWER RELAYS

- UL RECOGNIZED
- 1 MILLION OPERATIONS



For use in vending machines, washing machines, machine-tool control systems, heating and air conditioning systems, and automated conveyor systems. U.L. Recognized. Has a life expectancy of 50,000 operations at full load; 1 million operations, mechanical. Operating temp. range is –45 C to + 65 C. Contacts are rated at 20 amps, 277VA; 60 LRA, 12 FLA, 1 HP @ 125 VAC; 48 LRA, 8 FLA, 2HP @ 250 VAC pilot duty; 360 VA, 125/250 VAC. Mounting is by one .166" dia. mounting hole and .160" dia. boss. Termination is .250" quick connect.

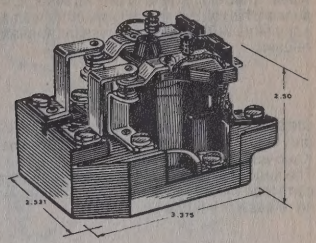
PRD SERIES POWER RELAYS

- For high inrush current applications
- Protective Plastic Coil Cover
- UL and CSA listed



Heavy duty power relay. For high inrush current applications such as motor starting and incandescent lamp loads. Coil housed in protective plastic enclosure to min. possibility of damage. 100,000 operations @ full load. Directly interchangeable with the PR model. All PRD 1, 3, 5 models have contact ratings of 25 amps @ 277VAC, res. 1 HP @ 120/240VAC Models PRD 7, or 11 with AY and DY suffixes are rated 25 amps @240VAC, 20 amps @ 277VAC, res. 1 HP @ 120/240VAC Models 7, 11 with the suffix AG are rated 30 amps @ 240VAC, 20 amps @ 277VAC, res. 1 HP @ 120/240VAC, 10 amps @ 600VAC resistive. Floating movable contact carrier provides excellent pressure and wipe between contact surfaces, thus keeping voltage drop to a minimum between mating contacts. UL and CSA listed.

Potter & Brumfield

CD SERIES—Remarkably dependable, accurate and flexible, offers an unusually wide selection of operational configurations, all with accurate time delay values, fast reset time and excellent repeatability. It is available in two types: Knob-adjustable in two versions, one with the relay in the same enclosure as the solid state unit, the other with an auxiliary relay. A second type is adjustable with an external resistor. Available for time delay on operate or on release.

CH SERIES—Intended for a wide range of industrial applications where economy is of greater interest than non-false operation. It is available in two types: Knob-adjustable with the relay in the same enclosure as the solid state unit. The second type has a fixed time delay period that is set at the factory and cannot be modified; its case has no knob. Available for time delay on operate, on release or interval on.

CJ SERIES—Time delay dry reed relays have high sensitivity and low power requirements. CJH external resistor provides adjustable time delay on operate.

CK SERIES—Similar to the CH with the exception that they do not have timing cycle interrupt transfer and will time as low as 0.1 second. These time delays include an internally mounted DPDT relay rated 10 amperes to form a compact and convenient assembly. Enclosed in white nylon dust covers, CK relays are available in three types: fixed, resistor adjustable and knob adjustable for AC or DC operation. Mounting convenience is provided by plug-in octal type terminals.

CL SERIES—Designed for delay on operate the CL Series is similar to the CU with the exception that they don't have timing cycle interrupt transfer and will time to 0.1 second. These solid state time delays are ideal for AC or DC applications. A DPDT KU relay rated 10 amperes is mounted in the same enclosure, forming a compact assembly. CL relays are enclosed in yellow polycarbonate dust covers and are available in three types: fixed, resistor adjustable and knob adjustable. Plug-in/quick-connect terminals facilitate handling and hook-up.

CR SERIES—Recycle timer has two independent control knobs for adjusting ON and OFF delays in 5 models from 0.1 to 180 seconds. The recycling sequence is initiated by applying power to the terminals. When the first preset delay is complete, the contacts transfer from normally OFF to energized ON, at which time the ON delay begins. If power is removed during any part of the operate cycle, the CR will revert to its OFF state (contacts open).

CU SERIES—An outstanding value in solid state time delay relays. The low cost CU Series is designed for delay on operate application in machines, process controls, copiers, office equipment, coin-operated machines and many others. Relays are available in three types: Fixed time delay that is set at the factory and cannot be modified, adjustable with an external resistor, and knob-adjustable with a reference scale. For minimum time (on external resistor types), two terminals, 2 and 5 must be shorted; for maximum time, the listed external resistor must be added between terminals 2 and 5. For intermediate times, select a lesser value resistor or use a potentiometer. Either fixed or resistor adjustable models can be furnished in two types of enclosures with the relay mounted in the same case as the solid state circuit. The CUB series knob-adjustable time delay is offered in a slightly taller enclosure. All CU series time delays have an internal DPDT 10 amp relay of the KUP series. The cases for the CU and KUP are dimensionally the same.

CG SERIES—Available in time delay on operate, delay on release or interval on. Feature CMOS integrated circuit controlling DPDT relay having contacts rated 10 amps @ 120VAC, or 5 amps @ 240VAC resistive. Repeatability, including first cycle of operation, typically .05% for DC units, .1% for AC units. Delay time provided by IC network not normally affected by voltage transients encountered in industrial applications. Relay contacts will not transfer if timing cycle is momentarily interrupted.

CW SERIES—Programmable time delay relay features a CMOS integrated circuit with delay on operate, delay on release and interval on timing functions. Timing is controlled by four toggle switches on the unit's case. One switch selects timing function, one selects seconds or minutes timing mode and the other two select timing range. Actual delay time is set using an adjustment knob on the case. This permits easy programmability within the 0.5-5, 1-10, 5-10 and 10-100 timing ranges. An internal DPDT relay rated 10 amps controls load switching. An LED on the case will illuminate when the relay is on. Mounting convenience is provided by plug-in octal type terminals.

Time Delay Relays

COMPARISON OF GENERAL SPECIFICATIONS OF TIME DELAY RELAYS

TYPE	TEMP. RANGE	TOLERANCE AND DELTA TIME	TRANSIENT PROTECTION	FALSE OPR.	RECYCLE AND RELEASE TIME	REPEATABILITY
CD	-40° to +55°	±5% Delta Time: ±5%	1 joule MOV	None	CD-38 45 Milliseconds typical	CD-38 ±1% Others ±2% (AC UNITS ADD ±1 cycle 60 HZ)
CH	-10°C to +55°C	±5% Delta Time: ±10%	1000V (on all 120VAC models)	Contacts may transfer momentarily if timing interval is interrupted	125 milliseconds typical	±2% (AC UNITS ADD ±1 cycle 60 Hz)
CJ	-10° to +55°C	±10% Delta Time: ±10%		None	50 milliseconds typical	±2%
CK	-10°C to +55°C	±5% Delta Time: ±10%	1 joule MOV	None	60 milliseconds typical	±2% (AC UNITS ADD ±1 cycle 60 Hz)
CL	-10°C to +40°C	Fixed ±5% Adjust ±10%	1,000V on AC units	None	100 milliseconds typical	3% (AC UNITS ADD ±1 cycle 60 Hz)
CR	-40°C to +55°C	Adjust ±20% Delta Time: ±10%	Twice rated input voltage for 1 ms.	Contacts may transfer momentarily if timing interval is interrupted	60 milliseconds typical	2% (AC UNITS ADD ±1 cycle 60Hz)
CU	-10°C to +40°C	Fixed ±5% Adjustable ±10%	1000 V on AC units	Contacts may transfer momentarily if timing interval is interrupted	150 milliseconds typical	±3% (AC UNITS ADD ±1 cycle 60 Hz)
CG	-10°C to +55°C	Both ±5%	1 joule MOV	None	30-40 milliseconds typical	0.05% AC 0.1% DC incl. first cycle
CW	Oper: -10°C to +55°C Storage: -40°C to +85°C	+10%, -0% of max +0%, -20% of min. **TIME:** ±5% max.	1 joule MOV	None	75 milliseconds maximum 50 milliseconds max.	AC ±0.5% max. but not less than ±16 ms DC ±0.1% max. but not less than ±3 ms.

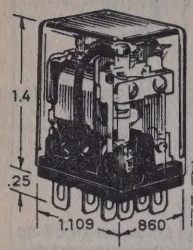
Potter & Brumfield Special Purpose & Time Delay

K10 SERIES 10 AMP GENERAL PURPOSE RELAYS

- **Polycarbonate Dust Covers**
- **Mechanical Life: 10 Million Operations**
- **Quick Connect Terminals**



Offer reliable, DPDT, 10 amp switching capability. Recognized under Components Program of UL. Enclosed in smoke colored polycarbonate dust covers and have .187" quick connect solder terminals. All relays fit sockets with printed circuit, solder lug or screw terminals. Silver cadmium oxide contacts rated 10 amps @ 30 VDC, resistive, or 277 VAC. Mechanical life expectancy is 10 million operations while electrical life exceeds 100,000 operations at rated loads. Weight: 1.15 oz. (without socket.)

8

R12 SERIES VARIABLE TIME DELAY

Small DC variable relays combine field proved R10 basic relay with high quality delay circuit. Do not have timing cycle interrupt "transfer." DPDT contacts rated 5 amps. Solder terminals. Mtg: 3-48 stud or sockets with solder or PC terminals.

R14-R15 SERIES TIMING RESISTOR

The resistor values shown are for maximum delay time. For minimum time, short the external resistor terminals together.

Max. Time Delay	Resistance
2 sec.	1.32M
10 sec.	4.34K
30 sec.	1.32M
120 sec.	1.32M

R14 SERIES FIXED OR ADJUSTABLE

Externally resistor adjustable DC operated time delay relay. Accuracy: Externally adjustable to within ±25%. Repeatability: ±3%. Temp.: −10°C to +55°C. No timing cycle interrupt "transfer." Reverse polarity protection.

R12, R14, R15, R16, R52 SERIES SOLID-STATE TIME DELAY ON OPERATE RELAYS

R15 SERIES

AC operated externally resistor adjustable time delay relay. Accuracy: to within ±25%. Temp: −10°C to +55°C. Repeatability: ±3%. Momentary timing cycle interrupt "transfer."

R16 SERIES

Time delay on operate. Potentiometer sets timing value in range of 2.0-30 seconds. Contact life expectancy of 10 million operations, mechanical and at least 100,000 op. @ full load @ 28V DC.

R52 SOLID STATE TIMING MODULE

Makes time-delays of all but a few of the P&B 5, 6, 12, and 24V DC relays. Connects in series w/one of two coil terms. and pos. side of input line. Conducts 350 mA at voltages from 4.5 to 30V DC. Resistor adjustable.
